

# INSTALLATION & USER MANUAL

## PTZ-9000T

## Thank You for Choosing Our Tracking Box for PTZ Camera!

### When you open the box:

- ☑ Check that the packing and the contents are not visibly damaged. Contact the retailer immediately if any parts are either missing or damaged.
- ☑ Do not attempt to use the device with missing or damaged parts. Send the product back in its original packing if it is damaged.

*The information contained in the document is subject to change without notice.*

## 1. SAFETY NOTES --- IMPORTANT!!!

---

The following important notes must be followed carefully to run the device and respective accessories in total safety.

### **Use the instructions correctly and fully**

Read all safety rules and instructions carefully before operation.

Follow the instructions in the instruction manual. Pay attention to all warnings on the camera and in the instruction manual. Keep the safety notes and instructions for use for future reference.

### **Attachments & Accessories**

Do not use attachments other than those recommended in the instruction manual because this could cause risks to the device. Only use the recommended accessories for the camera for installation and operation.

### **Protect the video system**

Keep it away from rain and humidity to prevent the risk of fire and electrocution.

Do not introduce solids or liquids inside the device to prevent the risk of fire and electrocution. If this should accidentally occur, disconnect the device from the mains and have it inspected by qualified personnel.

### **Maintenance & Repairs**

Always contact a qualified service technician to repair the device. Unauthorized opening or removing the lids may cause fire and electrocution risk and other dangers.

Disconnect all electrical parts from the mains before cleaning.

After any servicing intervention or repair to the device, ask the technician to run a safety check to ensure that everything is working safely.

## 2. ABOUT THE PRODUCT

---

The tracking box is a new and cost-effective tracking solution for high speed PTZ cameras. It enables object tracking functions on normal speed domes.

### 2.1. FEATURES

---

- ☑ Highly compatible with normal high speed PTZ cameras, with no affect on the existing functions of the cameras. Cost effective solution with no other update cost on the cameras;
- ☑ Independent OSD menu;
- ☑ Up to 4 alarm inputs;
- ☑ Compact design and easy operation;
- ☑ Auto search and track on moving object, with adjustable precision and tracking state;
- ☑ Auto return to home position/preset and keep tracking after some programmable interval when object is out of adjustable area;
- ☑ P/T speed adjustable as per zoom times;
- ☑ Manual-controlled scan area adjustable.

### 2.2. FUNCTIONS

---

#### **Object Tracking**

In auto tracking mode, a PTZ camera can track a moving object in the target area with auto pan, tilt and zoom which realizes smart unattended surveillance.

The device can enable a normal PTZ camera to track a moving object.

#### **Alarm and Track**

The device receives alarm signals and as a result, it enables the connected PTZ camera to track a moving object.

### Tracking During Cruise

The device can enable tracking function for a PTZ camera when the camera is during cruise. When there is a moving object in the camera view, the camera will follow the object with auto pan, tilt and zoom.

The PTZ will return to cruise mode when there is no moving object.

## 2.3. TECHNICAL PARAMETERS

Interface	RS485 (one to controller, the other to PTZ camera)
Baud Rate	2400bps, 4800bps, 9600bps
Menu	OSD
Spectra Address	0~255
Protocols	Pelco D/P
Power	9~12VDC

Table 1: Technical Parameters

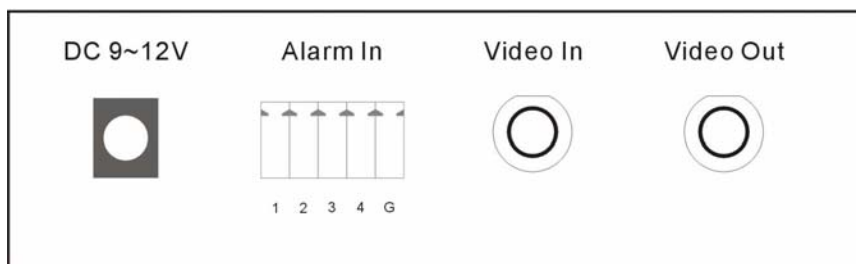

*The specifications are subject to change without notice.*

## 3. OPERATION GUIDE

This section contains detailed instructions for installation and operation of the device. These instructions assume that the user has a good knowledge of installation techniques and is capable of adopting safe installation methods.

### 3.1. DIAGRAM AND DIP SWITCH SETTING

Please ensure the power supply is within the named range of the device. Connect the power, alarm and video.

Pic. 1 Power, Alarm, Video

Make sure the DIP switches of protocol, baud rate, address on the device are the same as those of the PTZ camera connected.

Pic. 2 Protocol, Baud Rate, Address and RS485

Please refer to the following tables to set baud rate, and communication protocol type and camera address.

POS	1	2	3	4	DESCRIPTION			
Protocol	OFF	OFF	OFF	OFF	PELCO-P			
	ON	OFF	OFF	OFF	PELCO-D			
POS	DESCRIPTION				5	6	7	8
Baud Rate	2400				ON	OFF	OFF	OFF
	4800				OFF	ON	OFF	OFF
	9600				OFF	OFF	OFF	OFF

**Table 3: Address Setting**

### 3.2. OPERATION AT POWER UP

The device employs the default settings the first time it is switched on. Changes to the settings will be permanently stored and will be made available the next time it is switched on. You can return to the default settings by means of the appropriate menu option at any time.

The device will work as follows when it is switched on. The device will run a calibration procedure and a message showing the following information will appear on the video output OSD (On Screen Display): protocol, communication parameters, and camera address and software version.

Check that the data are suitable for operation. Otherwise, refer to the section in this document that shows how to install the device correctly.

PROTOCOL: PELCO-D  
 COM: 9600, N, 8, 1  
 ADDR: 01  
 SOFTWARE VERSION V4.2

### 3.3. FUNCTION PROGRAM MENU

Use the following control panel command to access the function programming menu.

PRESET + 50 + ENTER

At this point, if no password is required for access, the following first level menu will appear on the screen:

MAIN MENU	
TRACKING SETTING	
CRUISE SETTING	
ALARMS	
PARK TIME	15S
PARK ACTION	NONE
RESTORE FACTORY DEFAULT	
EXIT	

**Screen 1: Main Menu**

Simply move the joystick vertically to scroll the menu and point the cursor to the menu item to be selected: at the point, press OPEN to access the selected second level.

Simply press **BACK** and use OPEN to go back to the previous level menu.

To completely exit a menu on any level, simply select **EXIT** and use the OPEN command.

Option	Value	Explanation
TRACKING SETTING		Sub-menu of tracking settings (refer to <b>Section 3.3.1</b> ).
CRUISE SETTING		Sub-menu of cruise settings (refer to <b>Section 3.3.2</b> ).
ALARMS		Sub-menu of alarm settings (refer to <b>Section 3.3.3</b> ).
PARK TIME	15SEC~12HOURS	With this function, the device will resume the function defined in <b>PARK ACTION</b> by specifying a value (in 1s, 1m, 1h steps) following a stop or interruption of the performed function and after the programmed time.
PARK ACTION	NONE	No action is performed at the end of the park time
	TO HOME + TRA	The camera goes to preset 1 and keeps tracking
	PRESET1	The camera goes preset 1 at the end of park time
	PRESET2	The camera goes preset 2 at the end of park time
	PRESET3	The camera goes preset 3 at the end of park time
	PRESET4	The camera goes preset 4 at the end of park time
	CRUISE	The camera performs a cruise (preset sequence) at the end of the park time. A preset list shall be programmed in advance (refer to <b>Section 3.3.32</b> ).
	REPEAT LAST	The camera simply resumes the operation it was performing before being interrupted at the end of the park time
	TRACKING	The camera performs a tracking operation at the end of the park time
RESTORE TO FACTORY DEFAULT	CRUIS1	The camera performs a cruise with tracking function enabled at the end of the park time. A preset list shall be programmed in advance (refer to <b>Section 3.3.32</b> ).
		Restore all settings to factory default

**Table 4**

### 3.3.1. TRACKING SETTING MENU

In the first level menu, select **TRACKING SETTING** to set the tracking function.

TRACKING SETTING	
AUTO ZOOM	ON
SIZE SENS	MEDIUM
GRAY SENS	MEDIUM
TRACKING TIME (M)	AUTO
TRACKING SPEED	AUTO
DEFAULT SETTING	
BACK	
EXIT	

Screen 2: Tracking Setting

Option	Value	Explanation
AUTO ZOOM	ON/OFF	This option determines if the tracking function is with auto zoom on or off.
SIZE SENS	LARGE/MEDIUM/SMALL	This option defines the total dimensions of the object to be tracked. The parameters are <b>LARGE/MEDIUM/SMALL</b> . An object larger than one fourth of the screen is <b>LARGE</b> . An object smaller than one eighth of the screen is <b>SMALL</b> .
GRAY SENS	HIGH/MEDIUM/LOW	This option determines the auto tracking sensitivity. The sensitivity measures the grey scale variations of a certain point in the frame in the unit of time.
TRACKING TIME (M)	AUTO, 1 ~ 15 (MINUTES)	The duration of tracking function. The tracking will be disabled after the period.
TRACKING SPEED	AUTO, 1 ~ 5	This option establishes the camera movement speed. If <b>AUTO</b> is selected, the camera is automatically "adapted" to the motion of the target. The <b>MANUAL</b> options allow selecting the expected speed of the object to be tracked (1 slow, 5 fast).
DEFAULT SETTING		Change all the tracking settings to default.

Table 5

## Advice for Correct Auto Tracking Use

### General warnings

- ☑ The tracking function should mainly be used in indoor environments. Outdoor use is highly problematic: the variety of objects (leaves, flags, litter, etc.) moved by the wind makes use unreliable.
- ☑ Provide the best lighting possible in the detection zone: in poor lighting conditions, the inevitable presence of noise on the image makes grayscale variations extremely critical. In poor lighting conditions, the camera may easily lose the tracked object.
- ☑ If IR illuminators are used, remember that:
  - The camera must be programmed to operate in B/W only because the Slow Shutter will make tracking unreliable in color mode
  - The lighting entirely covers the frame where motion is tracked, possibly by restricting the range of action of the camera in tracking mode.
- ☑ Avoid background objects in the frame which could trick the motion detector, such as for example Venetian blinds, gates, doors with grid and objects with very marked, contrasting contours. A checkerboard background is certainly the worst condition for satisfactory operation.
- ☑ Do not use the auto tracking function if the object to be tracked and/or monitored moves too fast.

### Recommended control parameters

**SIZE SENS:** select **SMALL** particularly in poor lighting conditions to improve performance.

**GRAY SENS:** most false alarms are caused by the tracking of unexpected objects. For this reason, it is preferable to select low sensitivity.

**TRACKING SPEED:** the **AUTO** setting should always be preferred, unless the object to be tracked does not always move at low, constant speed.

## 3.3.2. CRUISE

The **CRUISE** menu is used to display and change the cruise settings.

```
CRUISE

DWEELL TIME (SECS)      8
PRESET LIST              1
    1 ON      0 OFF
1234567890      PRESET
0000000000      (1-10)

WAIT BEFORE TRA (SEC)   4
BACK
EXIT
```

Screen 3: Cruise

Option	Value	Explanation
DWEELL TIME <SECS>	5 ~ 250	Duration (in seconds) of the dwelling time on each presetting.
PRESET LIST	1~3	The team number of presets. 1 means the first 10 presets (preset 1 ~ 10); 2 means the second 10 presets (preset 11~20); 3 means the third 10 presets (preset 21~30).
WAIT BEFORE TRA (SEC)	3~6	The wait time (Seconds) after a preset localization ends and before tracking function starts. The suggested value is

		4 or 5.
		This will prevent the camera from fault tracking during a preset localization.

**Table 6**

### 3.3.3. ALARMS

The **ALARMS** menu is to display and change the alarm settings.

ALARMS	
SEQUENC (SECS)	1
ALARM 1 ACT	NONE
ALARM 2 ACT	NONE
ALARM 3 ACT	NONE
ALARM 4 ACT	NONE
BACK	
EXIT	

**Screen 4: Alarms**

Option	Value	Explanation
SEQUENCE (SECS)	1 ~ 250	Duration time (in seconds) of the action related to each alarm when several alarms occur at the same time.
ALARM ACT (FOR ALARM 1 ~ 4)	TO HOME + TRA	The camera goes to preset 1 and keeps tracking
	NONE	No action occurs during the alarm.
	PRESET 1 (~4)	The camera goes to the selected preset.
	CRUISE	The camera performs a cruise after the alarm. A preset list shall be programmed in advance (refer to <b>Section 3.3.32</b> ).
	TRACKING	The camera performs a tracking operation after the alarm.
	CRUISE 1	The camera performs a cruise with tracking function enabled after the alarm. A preset list shall be programmed in advance (refer to <b>Section 3.3.32</b> ).

**Table 7**

*If an alarm is triggered during any automatic operation of the camera (such as Auto Tracking, etc.), the operation in progress is stopped and the camera executes the action that has been set in the **ALARM ACTION** menu:*

- ☒ *In the event of "TRACKING" action, the camera executes the tracking function. Once the tracking action has finished, the camera executes the action set in the option **PARK ACTION MENU**.*
- ☒ *In the event of "CRUISE" actions, the action is executed by the camera permanently and can only be stopped by one of the following actions: any command sent by the operator, the use of the joystick, any alarm event.*

### 3.4. SPECIAL CONTROL PANEL COMMANDS

The device can be programmed and operated using various quick control panel commands.

Control panel command	Function
<b>PRESET + 50 + ENTER</b>	Accesses main menu
<b>PRESET + 51 + ENTER</b>	Starts tracking function for a PTZ camera

<u>PRESET</u> + <u>52</u> + <u>ENTER</u>	Starts cruise A preset list shall be programmed in advance (refer to <b>Section 3.3.32</b> ).
<u>PRESET</u> + <u>53</u> + <u>ENTER</u>	Starts tracking function during cruise A preset list shall be programmed in advance (refer to <b>Section 3.4.2</b> ).
<u>PRESET</u> + <u>54</u> + <u>ENTER</u>	Goes to preset 1 and starts tracking. Preset 1 should be saved in advance.

**Table 8**
