- e. LED power indicators

Charging to Power Bank

- Insert the Micro USB end of included charging cable into the socket of input Micro USB (b) on Power Bank.
- Plug the other end of charging cable, USB into the wall A/C adaptor that has a USB socket (you may need to use your original A/C adaptor that has a USB socket), or directly plug it to your PC.
- After this connection is completed, plug the A/C adaptor into the A/C power outlet to start charging.
- During the charging process the LED indicators "POWER" will start shifting.
- Once the LED indicators stop shifting and are all lit up, the power bank is fully charged.
- It takes about 3-4 hours to fully charge the unit.
- This battery life is estimated for 400-500 times of recharge.

Charging small electronic devices

- Insert the USB end of included charging cable into the socket of output USB (d) on power bank.
- Plug the Micro USB of charging cable into the smart phone (device) which has Micro USB socket. To charge an iphone, it you need to use the original cable to complete this connection for charging.
- When the power bank is fully charged, it will be able to charge one and half iphone, and it takes an hour and half to charge an iphone full.

Flash light & power check

- One click to turn power on or off.
- Double click to turn flash light on or off.
- There are five LED indicators on "POWER" which indicates the level of power stored. When all five LED lit up it means the unit is fully charged.
- It needs to have at least two LED lit up to be able to charge.

Specifications
