# How to install ──────────────────────────────────────

**1.** Put screws into the left and right hoods.

NOTE

- Attach the hood by using the specified screws with referring to the labels on the packing bags of the screws.
- By over-driving the screws, the hood cannot attach into the monitor.

Screw holes
(Ex. Right Hood)

  (1) Put screws into the screw holes (2 places for each) and drive it until the half-length of screws coming up from the screw holes.

  (2) Put the screw caps on each tips of screws.

**2.** Attach the top hood to either the left or right hood before attaching to the monitor.

Top Hood   Right Hood

3. Attach the hood to the monitor.

NOTE

- Attaching one hood and tightening the screws should be completed before going on to the other hood.

  (1) Attach the left hood to the monitor from above and slide it from the side of the monitor until the hood is firmly positioned against the monitor.
Left Hood

 (2) Hold the left hood and tighten two screws on each side.

  (3) Attach the right hood in the same way.

4. Slide the top hood to close.

Calibration

When calibrating the monitor, the sensor of the measurement device can be attached by sliding the top cover without removing the hood.
