CAUTIONS

1. Do not allow this radio to be exposed to water, steam or sand.
2. Do not leave your radio where excessive heat could cause damage such as in parked car where the heat from the sun can build up even though the outside temperature may not seem too high.
3. The rating is located on the underside of the unit.
4. No naked flame sources such as lighted candles should be placed on the product.
5. It is strongly recommended that the original packaging supplied with your product be retained for future safe transportation.

TROUBLESHOOTING

Why can I not receive any DAB+ stations?

1. Please check if you are in digital radio coverage area.
2. If you are in a good reception area and still do not receive any signals, try moving the radio to another position of the house as physical and electromagnetic factors can play a large part in signal strength and quality.

No Sound

1. Adjust volume
2. For mains powered radio, please check that the mains power lead is connected at the side of the radio and the main power wall socket is switched
3. Check if the batteries are low when you are using batteries. We recommended using alkaline batteries to maintain working in good condition.
