Disclaimer

All the information, design and specifications contained in this manual were correct at the time of publication. However, as the product is under development and upgrading, the final device may have a slightly difference in appearance or modified functionality than presented in this manual.

Introduction

ODYS BooX is an ebook reader with full color display screen. ODYS BooX supports ebooks encrypted with Adobe DRM.

Package Content

1. Ebook Reader
2. Earphones
3. USB cable
4. Quick Start Guide
5. Warranty Card

Safety Instructions

Although this product is safe, please observe the following information and warnings.

- Do not expose the device to direct sunlight, extreme heat or cold, damp or dusty conditions. Malfunctions and damage can occur as a result.
- Do not use the device in an extremely dry environment to avoid static electricity.
- Do not shake the device or subject it to hard knocks. The device may be damaged if it falls. Do not place any heavy objects on top of the device.
- Promptly load the device's internal battery.
- Do not use the e-book reader while driving a vehicle.
- Never press two buttons simultaneously and handle the display carefully.
- Do not carry the e-book reader with other metal objects (coins or keys) in your pocket.
- Clean the device only using a soft, dry cloth and do not use any volatile substances, such as solvents, to avoid damaging the surface.
- Do not open the casing of the device under any circumstances, and do not attempt to repair or modify the device.

- Never disconnect the USB cable from your e-book reader to the PC during a data transfer or formatting. Correctly disconnect the device from the operating system. Information loss and malfunctions can occur.

Hearing Safety

Listen at a moderate volume: Using headphones at a high volume can impair your hearing. This product can produce sounds in decibel ranges that may cause hearing loss for a normal person, even for exposure less than a minute. The higher decibel ranges are offered for those that may have already experienced some hearing loss. Sound can be deceiving. over time your hearing 'comfort level' adapts to higher volumes of sound. So after prolonged listening, what sounds 'normal' can actually be loud and harmful to your hearing. To guard against this, set your volume to a safe level before your hearing adapts and leave it there. To establish a safe volume level: Set your volume control at a low setting. Slowly increase the sound until you can hear it comfortably and clearly, without distortion. Listen for reasonable periods of time: prolonged exposure to sound, even at normally 'safe' levels, can also cause hearing loss. Be sure to use your equipment reasonably and take appropriate breaks. Be sure to observe the following guidelines when using your headphones. Listen at reasonable volumes for reasonable periods of time. Be careful not to adjust the volume as your hearing adapts. Do not turn up the volume so high that you can't hear what's around you. You should use caution or temporarily discontinue use in potentially hazardous situations. Do not use headphones while operating a motorized vehicle, cycling, skateboarding, etc.; it may create a traffic hazard and is illegal in many areas.

Disposal

Do not dispose of a defective e-book reader in normal household waste disposal containers (internal battery). Take the defective device to your retailer or to an appropriate waste collection site. This will ensure that the device is disposed of in an environmentally-friendly way.

- 9 OK / Enter Button**
- 10 Next pg button** – press to turn to next page
- 11 Previous pg button** – press to turn to previous page
- 12 Power button** – press and hold for 3 second to turn on/off
- 13 LED indicator**

Power On and Off the Reader

Press and hold the [Power] button for 3 seconds to turn on Reader. It may take a few moments for reader to turn on and loading the content.

- If Reader does not turn on, charging is required.
- To turn off Reader, press and hold [Power] button for 3 seconds.

Power On and Off the Display

- Shortly press the [Power] button to turn off the display.
- Press the [Power] button again shortly turn the display on again.

Language Setting

- To access extra functions available, press [Menu] button to open the Options Menu.
- Select [Settings] and press <OK>.
- Select [Language] and press <OK> again.
- Select your desired language and press <OK> to confirm.

Charging the Reader

- You need to charge the Reader prior to using it for the first time or when battery power is low.
- You can charge the Reader via:
 - Connect to PC via supplied USB cable.
 - When charging through PC, you cannot operate the Reader. To operate the reader during charging, click the Safely Remove Hardware from your desktop with the Reader remains connection to PC. Upon Reader is safely removed, you can operate it while charging.
- Please turn the Reader to standby mode to shorten the charging process.
- It will take about 6 hours to fully charger the reader in standby mode (LCD off)
- The battery status is displayed at the bottom left corner. The remaining battery playback time is displayed right next to the battery icon.

Inserting Memory Card

The Reader supports Micro SD/SDHC card. To insert a Memory card:

- Check that the Micro SD card is in the correct position with the contact pin facing upwards as illustrated below. You may damage the card and the reader if Micro SD card is not inserted in correct position.
- Push the Micro SD card into the card slot until it clicks.
- To remove Micro SD card, push the Micro SD card once again until it clicks.

- We recommend using only Micro SD or SDHC cards up to 8GB capacity.
- When a Micro SD card is inserted in or ejected from the reader, it may take few seconds for the reader to update the content.
- Please avoid inserting or ejecting Micro SD card when other operation is running as this may cause the system hang.
- Do Not remove the card if the content inside the card is being played. This will halt the operation of the reader and cause the reader to restart.
- If the system is not responding, press and hold the <Power> button for 6 seconds to reset and turn it off.

Starting from Home Menu

Warranty Conditions

The following conditions comprise the requirements and scope of our warranty conditions and do not affect our legal and contractual warranty obligations.

We offer a warranty on our products in accordance with the following conditions:

1. AXDIA products are covered by a 24 month warranty. We will resolve damages or defects on AXDIA products free of charge within 12 months of the purchase date under the following warranty conditions. For any damage or defect determined later than 12 months after the purchase date, proof of a manufacturing fault must be submitted for repair under warranty.
The warranty does not cover batteries and other parts, which are considered consumables, parts that break easily such as glass or plastic or defects based on normal wear and tear. There is no warranty obligation in the event of marginal differences compared to the target appearance and workmanship provided these have a negligible effect on the product's fitness for use, in the event of damage caused by chemical or electrochemical effects, by water or generally from abnormal conditions.
2. The warranty will be performed in such a way that we shall decide whether to repair the defective parts or to replace them with working parts free of charge. AXDIA reserves the right to exchange the product for a replacement product of equal value if the product that is sent in cannot be repaired within a reasonable time or at reasonable cost. The product can also be exchanged for a different model of the same value. Requests cannot be made for repairs to be carried out on site. Parts that have been replaced or exchanged become our property.
3. The warranty claim does not apply if repairs or other work is carried out by unauthorized persons or if our products are equipped with additional parts or accessories that are not approved for our products.
4. Warranties that have been activated do not cause the warranty period to be extended, nor do they trigger a new warranty period. The warranty period for any replacement parts installed ends with the warranty period for the entire product.
5. Any other or further claims are excluded, especially those for replacement due to damage caused outside of the product, provided there is no obligatory legal liability. We therefore accept no liability for accidental, indirect or other consequential damage of any kind, which leads to usage restrictions, data loss, loss of earnings or interruption to business.

Asserting a warranty claim

1. To make use of the warranty service, you must contact the AXDIA Service Center by e-mail, fax or phone (see below for contact details). You can also use the service form on our website or on the back of the warranty conditions.
2. AXDIA Service Center will try to diagnose and solve your problem. If it is determined that a warranty claim exists, you will be given an RMA number (Return Material Authorization) and you will be asked to send the product to AXDIA.

IMPORTANT: AXDIA will only accept parcels that have an RMA number.

Please observe the following when sending the product:

1. Send the product suitably packaged with carriage and insurance paid. Do not enclose any accessories with the products (no cables, CD's, memory cards, manuals, etc.), unless the AXDIA Service Centre specifies otherwise.
2. Mark the RMA number on the outside of the package in such a way that it is visible and clearly legible.
3. You must enclose a copy of the sales slip as proof of purchase.
4. Once AXDIA has received the product, it will meet its warranty obligations in accordance with the warranty conditions and will return the product to the sender with carriage and insurance paid.

Service outside of warranty

AXDIA can refuse any service claim made that is not covered by the warranty. If AXDIA agrees to provide a service outside the warranty, the customer will be invoiced for all repair and transport costs.

AXDIA will not accept any packages that have not first been approved by AXDIA by means of an RMA (Return Material Authorization).
