1.Introduction

Network cameras Hi3507 network camera-based solutions, and embedded Linux operating system, support for high-definition video in 720P @ 25fps, with the industry's leading international standard H264 video compression algorithm, using H264, MJPEG encoding, can easily achieve the high-resolution images low-bandwidth transmission. In addition, it uses a CMOS high sensitivity image sensor, display sharp, clear HD.

Network camera uses a simple and easy to use video systems IP-based applications, only need an RJ45 cable to connect to the network, the built-in power-over-Ethernet module allows to provide power directly from the network, reducing installation wiring, built-in WEB server support through browser to manage and configure the camera internet explore solutions for monitoring and surveillance project on various occasions.

Network camera you buy the product box should contain the following items, if it is found that some of the items not found in the product packaging, you can contact a local dealer or you buy camera products manufacturers.

The product packaging contains:

- ✓ Network camera * 1
- ✓ Network Camera CD-ROM * 1
- ✓ 5V power adapter * 1
- ✓ Screw Kit * 1
- \checkmark Cable * 1
- ✓ Bracket * 1

If you buy a camera with WIFI function, should be included with the product packaging WIFI antenna.

2. Product Description

2.1. Feature

- Megapixels CMOS sensor, integrated low lux function (5 series) / integrated WDR function (7 series) / highest resolution reached UXGA 1600 * 1200 (9 series)
- ▶ Real time (MJPEG/H.264) dual-stream encoding
- The use of advanced H264 video compression algorithms, support for the H264 Main Profile@Level3.0 coding, H.264 Baseline Profile@Level3.0 coding and the MJPEG /JPEG the Baseline encoding, you can easily achieve high-resolution images of low-bandwidth transmission
- Embedded Linux-based operating system, built-in WEB server, can be accessed directly via a Web browser, system stability, powerful, secure and reliable
- Standard RTSP stream output, supports VLC streaming
- > Integrated ONVIF standard and various brands of camera can easily compatible platform software
- > Bi-directional and echo cancellation function, monitoring and real time voice synchronization
- Supports alarm input and output
- > Built-in automatic filter switch, can meet the needs of monitoring day and night
- Support for WIFI, and SD card

2.2. Specifications

Item		GS-W3200 Wireless IP Cameras
	Device	2.0 Megapixel CMOS Sensor
	Size	1/4 inch
	Effective Pixels	2MP:1600*1200,1MP:1280*720
Min.Scene Illumination Color 0		0.5 LUX(IR ON)
	B/W	Yes
	IR Sensitivity	Yes
	IR Cut Yes	
Lens	Lens	3.6mm
	Viewing Angle	Horizontal355° vertical 90°

Linux System		Internal Linux system		
Day/Nigh	IR distance	8-10 M		
Functions	Motion Detection	Yes		
	BLC	Yes		
	AGC	Auto		
	White Balance	Fixed Aperture F1.2		
S/N Ratio	S/N Ratio	>50 dB		
Video Compression	Compression	H.264		
	Picture Resolution	Main Flow: 1600*1200@15fps 1280*720@25fps Minor Flow: 640*360@25fps 160*112@25fps		
	Bit Rate	32 K~ 4.0 M bps		
	Image Frame Rate	15 FPS		
Audio	Compression	G711		
	Two way audio	support		
Alarm I/O	Alarm I/O	1 channel in/out put		
Network	Ethernet	Ethernet (10/100 Base-T),RJ-45 connector		
	Protocol	HTTP/DHCP/IP/TCP/UDP/DDNS/RTSP/SMTP; WIFI/ 802.11/b/g		
Software	Web Browser	support Internet Explorer, Firefox, Google		
	Mobile phone	Support IPhone, Android		
	Remote	Support DDNS、P2P		
Operating	Temperature	-10°~60°C		
	Humidity	20—80%		
Power	Power Consumption	DC 5V,2A		
Physical	Dimension	100*99*118MM L*W*H		
	Weight	0.5KG		
Approvals	Certification	CE ,FCC

PT Models Interface Description

& Audio output & RJ45 network cable interface & SD card slot & WIFI antenna interface & Alarm interface & power input The & Microphone MIC

3. Product Use

3.1. Camera installation and connection

Pre-installation considerations:

- 1. Unpack the box carefully check to confirm the items list consistent.
- 2. Please read this chapter carefully before installing.
- 3. Installation, be sure to turn off the power of all related equipment.
- 4, Check the power supply voltage to prevent voltage unworthy cause device damage.
- 5. Installation environment: Do not use excessive moisture or high temperature environment,

maintain good ventilation, pay attention to the anti-rain; avoid installing rattling environment.

6. If the equipment is not working properly, please contact the dealer to buy equipment, do not disassemble or modify the equipment in any way. Problems caused by unauthorized modification or repair your own risk.

Connect the camera:

Connect to power adapter, the power indicator light (green) at this time, the device start and self-test, the PTZ begin to twirl.

Must use the supplied power adapter or 5V/2A power adapter.

Access your network with a network cable to the camera, directly connected to the PC through a switch or network normal network indicator (yellow) will begin to flash, the physical connection of the camera.

Green LED: power status indicator, when lit in power, the normal state should be lit. Yellow status indicator: Communication status indicator, flashing when the description of the ongoing data transfer, under normal circumstances, should be kept blinking.

3.2. Connect the camera

3.2.1. Find the Camera

The camera default IP address is automatically assigned by the DHCP server, please make sure that the router open DHCP server before using the camera.

Running device search tool to search for camera (search tool is in the CD-ROM that came in the product), the search tool will display the camera connected to the LAN, and displays some of the basic information of the camera. when the camera automatically assigned an IP address by the DHCP server (see below) you can start using the camera.

Please install the ActiveX widget				

After the controls (RSAV.exe) the is installed, refresh the page, click on the top of the page prompts a message selector allows the use of add-ins,

network cameras IE Manual.

3.2.3. Connect to Easy View

Easy View is a small, simple monitoring software, has basic real-time monitoring, storage and playback functions. Easy view connect to the camera via a P2P way, In this way, you can very easily add camera which already connected to the internet. When the camera is connected to the Internet, you can connect the camera to Easy View only if you add the UID of the camera to Easy view. Here are the steps to add cameras to the Easy view:

Open the CD-ROM to find Easy View software and install it.

Right click on my video camera, add a user group

Easyview		? - 5 X
+ 0 = 0 0		
Wy IP Cameras Orfault Group Midsor wordsor		
	Add Group	
	Group Home	
	Carral Garat	
TTE CONICE INC		

Right click on the group name, add a camera, enter the information of camera, click "OK" to complete add.

Serial number: input the UID of camera, UID is a set of 20 characters consist of numbers and letters, recorded in the camera label.

Name: enter the name of the camera, can define any name.

User account: Enter the camera's user name, the factory default is: admin

Password: Enter the password, the factory default is: admin

Easyview		? - 5 X

<0-		
*		

After added equipment, there will be a list of cameras has been added in the upper left corner of the page, double-click the camera name to preview the real-time image.

Please read the document "EasyView user manual" in the product CD for Easy view detailed function.

3.3. Camera other applications

3.3.1. Mjpeg Stream

Input in the browser the camera the address + mobile.htm access MJPEG streams, such as:

http://192.168.1.128:8000/mobile.htm

JPEG picture Also can crawl through the following command:

http://192.168.1.128:8000/cgi-bin/net_jpeg.cgi?ch=0

/ideo Stream:	MJpeg 👻	Zoom: 1 💌

oom Control:		1		
Focus Control:		1		

3.3.2. RTSP Stream

Our camera output is standard RTSP stream, you can use VLC player or other support RTSP streaming software to connect the camera RTSP stream watch online.

First to know the network URL address of the camera, such as the IP address of the camera is 192.168.1.128 RTSP port is 554, our camera network corresponding to the following URL address:

Main stream: rtsp ://192.168.1.128:554/ch0_0.h264

Secondary stream: rtsp :/ / 192.168.1.128:554 / ch0_1.h264

Audio stream: rtsp ://192.168.1.128:554/ch0_3.h264

Concrete steps to connect the camera with VLC:

Running VLC, then select Open Network streaming.

🚊 V	LC media player	le le	
Med	dia Playback Audio Video	Tools View He	lp
	Open File	Ctrl+O	
	Advanced Open File	Ctrl+Shift+O	
	Open Folder	Ctrl+F

		\$X 4	1005
		1.00x	:/:

Camera network and then enter the URL address, then play.

VLC player to play the camera image.

3.3.3. ONVIF

ONVIF is committed to advance the application of <u>network video</u> in the security market through a global open interface standard, this interface standard for network video products from different manufacturers will ensure interoperability.

Our network cameras integrated ONVIF core specification 1.0.2.2, so that the camera can easily access to support the ONVIF the platform software, such as Milestone, Geovision, Axxon Let Milestone for example, describes how ONVIF is connected to the other platform software .

Running the Milestone XProtect Go Management Application, in the main interface, select "add hardware"

Add hardware, device detection method to select the high-speed, click Next.

Add Hardware Devices	
	Add Hardware Devices
19	This dialog helps you detect and set up IP hardware devices.
	Hardware device detection method
	🔘 Express (recommended)
	O Advanced
