Installation and User Manual

Issue 1.0

INTRODUCTION

This product will work with virtually ANY type of telephone and will record to the majority of recording devices available on the market, such as MP3 player, Dictaphone, tape machine and PC/MAC. For PC/MAC you must have recording software installed.

This Recording Adaptor can connect to the handset of your telephone or the telephone line if your telephone is cordless.

It has the following features:

- Good quality sound recordings.
- Records both sides of the telephone conversation.
- You can choose the recording device you want to use.
- Can be used on digital, analogue or DECT telephones.
- Very easy to set up and use.

CONNECTING

There are 2 options for connecting:

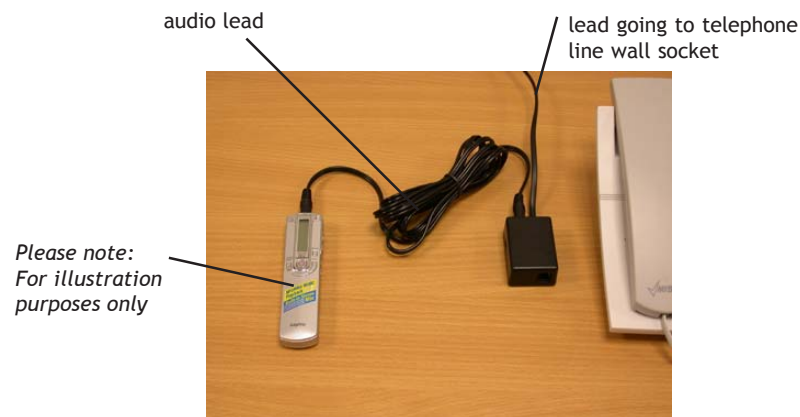

OPTION 1 - Handset recording (using curly lead)

- 1 Detach the handset from the telephone and plug it into the front of the recording adaptor.
- 2 Plug the curly lead into the recording adaptor and into the handset socket of the telephone.
- 3 Plug the audio lead into the MIC input of your chosen recording device.

OPTION 2 - Line recording (using telephone lead)

- 1 Plug the telephone lead into the recording adaptor and into a telephone line wall socket using a socket doubler.
- 2 Plug the telephone into the other socket of the doubler.
- 3 Plug the audio lead into the MIC input of your chosen recording device.

NOTE - For both installations

If you can hear your own voice but not the other party's, move the switch on the side of recording adaptor to the alternative position and try again.

GUARANTEE
