DAIKIN AC[®]
absolute comfort

INTELLIGENT AIR-CONDITIONING SOLUTIONS

The Daikin Difference

With passion and precision, Daikin is redefining how the world thinks about air conditioning.

- **Performance worldwide.** Daikin has sold millions of systems in more than 45 countries, with the average system consistently up and running 20 years after installation.
- **Revolutionary technology** for precise temperature control that constantly readjusts itself to the environment and changing occupancy.

- All Daikin AC systems employ inverter "variable speed" compressors and R-410A refrigerant, also optimizing energy conservation (up to SEER 17).
- **Absolute Comfort™** — now available at every stage. Along with their technological and aesthetic sophistication, Daikin systems are backed by one of the best warranties in the industry.

The Luxury of Choice

Single Zone and Multi-Zone Systems

Whether you plan an add-on or a new construction, Daikin Single Zone and Multi-Zone Systems will keep you comfortable. Wireless remote controllers are standard on all of our models giving temperature control, timer and other functions. Available with a Slim Duct Built-In indoor unit, Daikin units are energy efficient and discreet.

Single Zone and Multi-Zone Systems

FTXS/CTXS Wall-Mounted Units

- Movement sensor automatically saves power consumption in unoccupied rooms
- High energy efficiency, up to SEER 17 up to HSPF 10.1
- Set back operation
- Flat panel design is easy to clean
- Air purification filter with photocatalytic deodorizing function
- Powerful mode can be selected for rapid cooling and/or heating

FTXS/CTXS

FDXS

RXS

FDXS Slim Duct Built-In Units

- Low profile (less than 8" height)
- Low sound level
- SEER 13 HSPF 7.7
- Home-leave temperature set-back operation
- Powerful mode – rapid cooling or heating

RXS/2MXS Outdoor Units

- Outdoor unit with silent mode
- R-410A precharged for piping length up to 33 ft., but allowable up to 98 ft.
- Reliable and unique Daikin Swing Compressor
- Compact and lightweight design

Intelligent to the Core

Maintains your idea of comfort. Automatically.

Set your system to Auto Mode, for example and it computes all the factors that influence the air, including both indoor and outdoor temperatures. It then “remembers” your preferences, making subtle — and constant — changes to the environment within your home.

Unlike conventional air conditioners that reach a set temperature and then shut themselves off, a Daikin system runs at a constant, energy-conserving level. That way it maintains temperature and helps control humidity.

This constant monitoring not only keeps you comfortable, but avoids excessive cooling or heating — cutting down on both energy consumption and costs.

Also, the indoor units are very quiet with sound levels as low as 25dB (A), comparable to the sound of rustling leaves in the wind.

No duct work needed.

At Daikin, we’re not just concerned with how comfortable the air conditioner makes you feel — but how comfortable you feel about the air conditioner itself.

Instead of large condensing units with noisy compressors and large duct work, Daikin systems are comprised of small, easily located outdoor units and a connected pair of cooling lines. These lines slide into a small 3-inch opening through a wall or ceiling connecting to a wall-mounted or a slim built-in indoor unit.

There are few electrical connections to make, so your contractor can install your system in a minimal amount of time — in many cases, on average, in a single day’s work. The compact and lightweight design, combined with the long, flexible piping and wiring, make installation a snap.

Comfort within your reach.

Daikin systems are so advanced, they’re simple to use. Here are just a few of the innovative features you can access at the touch of a button.

Home-Leave Operation:
Keeps the room from becoming too hot or too cold, even when you’re not there.

Night-Set Mode:
Knows when you are sleeping, and gently raises or lowers the temperature just before the air conditioner stops.

Intelligent Eye:
Pioneered by Daikin, it actually senses human movement — and saves energy when there’s nobody around.

Wide-Angle Louvers:
Gives you the widest airflow possible, no matter where the unit’s located.

No grills to clean— ever.

Ever hear of an air conditioner *improving* a room? Daikin’s sleek and stylish wall-mounted flat-panel design adds grace and elegance to any setting. And by removing the grooves from the front panel, we’ve made cleaning easier than ever. Most of our flat-panel models can be wiped clean with a single pass of a cloth.

Sounds friendly too.

Just as the right temperature is important to being comfortable, so is a quiet-running unit. Our systems are designed to run softly, not only indoors but outdoors — so even the neighborhood remains comfortable. Some of our units are equipped with functions that allow them to run at levels as low as 25dB(A), the industry low.

Single Zone and Multi-Zone Systems Heat Pump

INDOOR UNITS - FDXS SLIM DUCT BUILT-IN UNITS - For use with RXS (High Efficiency) Models

Model	FDXS09DVJU	FDXS12DVJU
