SAFETY PRECAUTIONS

Before using your phone, please read the following important information to eliminate or reduce any possibility of causing damage and personal injury

| | |
|---|--|
|  | Do not use wireless phones while driving. |
|  | Switch off wireless devices in aircraft. The signal may cause interference. Using them on aircraft is illegal. |
|  | Do not use mobile phones where blasting is in progress. Follow regulations and rules strictly. |
|  | Do not use mobile phones at a refueling point. Don't use near fuel or chemicals |
|  | Follow regulations or rules in hospital and health care facilities. Switch phone off near medical equipment. |
|  | All wireless devices may get interference that could affect performance. |
|  | Only qualified service personnel can install or repair this device. |
|  | Use only approved accessories and batteries. |
|  | Use only in normal conditions. Do not expose your phone to extreme high temperatures above $+60^{\circ}$ ($+140^{\circ}\text{F}$) . Do not use anything static to clean your |

| | |
|---|--|
| | phone. |
|  | Ensure the phone is turned on and in service. Enter the emergency number, then press Pick Up key. Give your location. Do not end the call until told to do so. |

Improper use will invalidate the warranty! These safety instructions also apply to original accessories.

a) Use a wireless hands-free system (headphone, headset) with a low power Blue tooth emitter.

b) Make sure the cell phone has a low SAR.

c) Keep your calls short or send a text message (SMS) instead.

This advice applies especially to children, adolescents and pregnant women.

d) Use cell-phone when the signal quality is good.

e) People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

- Please don't use or place batteries near fire or heater, or else it will lead to liquid leak, superheat, explosion or fire.
- Please replace new battery if temperature rising, color changing or distortion occur during the process of operation, charging or conservation.
- Burn will be caused when the liquid from battery enters one's skin or clothes. If so, please rinse them with clean water, then promptly sees the doctor.

- Please promptly move the battery away from fire if liquid leakage or oddball odor occurs to prevent from explosion or fire.
- Please don't keep the battery away from damp. or else it will lead to superheat, fume and erosion.
- Please don't use or place battery when exposure to direct sunlight or high temperature, or else it will induce liquid leakage, superheat, thus decreasing performance and shortening longevity.
- Please don't charge more than 24 hours continually.

Chapter2 Before Use

2.1 SIM card

- In order to use the mobile phone, you should insert the valid SIM card, which is the key to enter the GSM network.
- All the information related to the creation of the connection to the network and initial call records will be recorded in the metal plane area of the SIM card as well as the names, telephone numbers and SMS stored in the phone book on the SIM card. The SIM card can be taken out from your mobile phone and can be placed in any one of the GSM mobile phones for use (the new mobile phone will read the SIM card automatically).

****Note: Please do power off your mobile phone before pulling out the SIM card. It is forbidden to insert or pull out the SIM card with the mobile phone connected to the external power supply; otherwise, the SIM card is most likely to be damaged.***

2.1.1 Insert and pull out the SIM card

- Power off your mobile phone and then remove the battery and other external power supply.
- Insert the SIM card into the SIM card slot, make sure the SIM is fixed accurately.

- When you need to pull out your SIM card, please power off your mobile phone firstly, then remove the battery, open the SIM card slot and then pull out your SIM card

****NOTICE: The card slot on the Left is SIM2 card, the one on the right is SIM 1 card.***

2.2 Battery

- The battery can run immediately after taken apart for it has charged for about 50% volume; In order to reach the optimum operation, please make use under the situation of fully charging after complete consumption. The new battery should be charged at least for 14 hours. Only when the initial battery is exhausted thoroughly (the electricity quantity runs out and the mobile phone can not power on) can the battery be fully recharged for use, so does the second time charging. Only when recycled for three times in this way, the battery works in the best condition easily.

2.3 Install and pull out T-flash card

This mobile phone supports T-flash card, which is a kind of multimedia memory card used to increase memory of the mobile phone. It is so small that you should take cautions to

install or pull it out in order to avoid damage. The method to install/ pull out T-flash card as the follows:

1. Install the T-flash card: Power off the mobile phone, ,and set T-flash card with the metal face downward to the T-flash card slot.
2. Pull out the T-flash card, power off the mobile phone, take out the T-flash.

Note: The mobile phone does not support hot-plug function of T-FLASH in “power on” mode. Only when the mobile phone is powered off can T-FLASH be pulled out.

Chapter3 Basic Description

3.1 Call functions

You can dial or receive call if the symbol of network supplier is displayed on the screen (intensity of network signal shown at left up corner). Move in small region may improve calling effect, which is has too much with the barrier.

3.1.1 Make a call

➤ Dial call:

Input telephone numbers, and then press the dial key to make call. Use right soft key to delete number if modification is needed. The picture of dialing will appears on the screen during dialing, then call status information will appears after the pick up of phone ,additionally together with a alert sound(network support needed) if it is opened. If you want to end the call, please press the end key. If the number does not belong to the Phone Book List, the screen of your device only displays the number. Otherwise, the name would be displayed.

➤ Dial fixed branch phone:

You should firstly dial telephone exchange, then branch

for some branch phones which can't be got through directly. The phone will press * key (now "p" displaying on screen) for you if pulse character "p" is entered between host and branch number when dialing.

Region no. Host no. p Branch no. Dial key

Dial international call:

Please press * key twice until prefix "+" of international call appears on the screen, which will allow you to dial to any country without knowing of the local international call prefix (for instance, 0091 for India).

Firstly enter prefix, then enter the country area number and complete phone numbers. The country area number is in accordance with general routine, such as 49 for Germany, 44 for UK, 46 for Sweden and so on.

Please delete "0" before city number, which is the same as dialing international call.

For example, please dial service phone of other countries as: +91 21 114

+ Country code integrated no. dialing key

Emergency call:

You are able to make emergency call in the range covered by network (please refer to signal intensity displayed in left up corner). Emergency call will be shown on the screen if your

network supplier doesn't provide ramble function. Emergency call can be made without SIM card if you are in the network range

3.1.2 Answer a call

You can Press the call key to receive the call when call coming. Display "SIM1 incoming call" with the phone number or name if SIM 1 has been called. Display "SIM2 incoming call" with the phone number or name if SIM 2 has been called.

If you set any key to receive the call, you may use the any key to receive call besides the end key and the right soft key.

You also can press the key in the earphone to receive calls if it has been connected.

3.1.3 Reject a call

- When you do not want to answer a call, you can press the end key to end the call.
