|                                       |                                                                                                                                                 |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Play/Pause/<br/>Answer/Hang Up</b> | Press the multifunction button                               |
| <b>Raise Volume</b>                   | Press up <<                                                                                                                                     |
| <b>Lower Volume</b>                   | Press down >>                                                                                                                                   |
| <b>Skip Forward</b>                   | Hold up <<                                                                                                                                      |
| <b>Skip Back</b>                      | Hold down >>                                                                                                                                    |
| <b>Voice Command/Siri</b>             | Short Press the multifunction  & up >> button simultaneously |

## ■ POWER UP

For best results, fully charge your Orcas before use.

For a full charge, plug the Orcas into your wall charger or computer via micro USB cable.

The LED indicator located below the right ear piece will flash red to indicate a low battery.

**NOTE:** It takes 2 hours to give your Orcas a full charge.

## ■ PAIRING

### Entering Pairing Mode

1. Hold the "multifunction button (  )" down until the LED flashes red and blue alternately.
2. Release "button," you are now in pairing mode.

### Pair

Go to your device's Bluetooth settings  
ADD or SEARCH devices.

When "ODT ORCAS" appears, select it.

\*If asked for a pass code: Enter "0000"

After successfully connecting, the blue LED will flash twice every 4 seconds.

You should now be able to play music & make/receive calls using the headset. Hooray.

## TALK

The following are tips on how to use your Orcas to talk on the phone:

|                                                                       |                                                                                                                                                 |
|-----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Answer/ Cancel a call</b>                                          | Press the multifunction button                                 |
| <b>End a call</b>                                                     | Press the multifunction button                                 |
| <b>Decline a call</b>                                                 | Press & Hold the multifunction button                          |
| <b>Make a call</b>                                                    | Use your phone to dial as usual. Listen & talk through the Orcas.                                                                               |
| <b>Mute/cancel mute</b>                                               | Press & hold up <<                                                                                                                              |
| <b>Transfer conversation to mobile phone or headset during a call</b> | Press the multifunction button                               |
| <b>Volume up during a call</b>                                        | Short press up <<                                                                                                                               |
| <b>Volume down during a call</b>                                      | Short press down >>                                                                                                                             |
| <b>Voice dial</b>                                                     | Short Press the multifunction  & up << button simultaneously |
| <b>Redial last number</b>                                             | Double click the multifunction  button                       |

## ■ TALK (THE FANCY STUFF)

You're popular. What happens when you're on a call with your girlfriend and your mom calls?

|                                                     |                                                                                                                           |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>Answer new call &amp; end current call:</b>      | Short press the multifunction button   |
| <b>Answer new call &amp; retain current call:</b>   | Double Click the multifunction Button  |
| <b>Switch calls:</b>                                | Double click the multifunction Button  |
| <b>End current call &amp; switch retained call:</b> | Short press the multifunction Button   |

**Bluetooth Version:** V4.0

**Bluetooth Profiles:** A2DP, aptX, AVRCP

**Operating distance:** 32 feet

**Dimensions:** 37 x 16 x 28 mm

**Weight:** 13g

## FAQ

### **1. Why is the LED flashing red instead of blue?**

The battery is low. Recharge it.

### **2. Why is the red LED off when charging?**

- A. Make sure the connection between the charging cable and the Orcas is tight.
- B. If the Orcas haven't been used in awhile, the light may not come on immediately. Charge the battery for at least 30 minutes.

### **3. Why cant I pair my Orcas?**

Your Bluetooth device and the chips must both be in pairing mode.

### **4. Why can't I hear the sound on the headset?**

- A. Make sure the Orcas are on.
- B. Make sure the volume is not too low or muted.
- C. Make sure the Orcas are properly connected with your device.
- D. Make sure the Orcas are within range of your device.

### **5. Why can't I hear the sound clearly on the headset?**

- A. Move your orcas closer to your device.
- B. Make sure your Orcas are charged up.
- C. Turn off your Orcas and device, then power up and reconnect.

### **6. Why the pause/play, last/next song not function when playing music?**

Make sure your Bluetooth device supports AVRCP (Audio/Video Remote Control profile)

## **CARE & MAINTENANCE**

- **Keep the Orcas Dry**
- **Keep the Orcas away from direct sunlight or hot places. High temperatures will shorten the life of electronic devices, destroy the battery or distort certain plastic parts.**
- **Do not try to disassemble the Orcas.**
- **Do not let the Orcas fall onto the floor or other hard surfaces. The internal circuit board may get damaged.**
- **Do not use intensive chemical products or detergent to clean the product.**
- **Do not scratch the surface with sharp things.**
