## **Remote Control Functions**

When you start your computers every time, you can use the Remote Control function to type password for the computer that is without the keyboard and mouse connected. And, you can use this valuable function to activate KMDS of the computer if you click

Exit **Exit** to leave or unplug KM Switch.

1. Please connect the KM Switch with your two computers and then turn on both

computers. Click taskbar icon 💷 and	KM Switch icon	:0
	Remote control	
switch. (During the process the screen	Press Shift + Esc to leave remote control	

appears. This is to let you switch back to original computer to avoid any unforeseen circumstances).

2. Now, you can type your password to start the computer.

3. Please follow the AP installation procedures to select ICON PLAY or AP PLAY if needed.

## The Application of Smart Data Link with KM Switch

A. This device lets you access two computers and associated monitors by sharing a single keyboard and mouse. It is easy to move the cursor by a mouse sliding to control between two computers.

B. The Picture in Picture (PIP) mode is the value added to this device and is suitable for a single display monitor.

C. This product also combines the Data-Link function allowing you to copy files on desktop between two computers under KVM PIP mode or KM Switch mode.

D. It is easy for you to cut and paste texts within KVM PIP mode or KM Switch mode.

# Remark:

- 1. The file transfer and cut & paste text function only support same operating language of PC.
- 2. The file transfer function only supports desktop file transfer.
- 3. The Picture in Picture (PIP) mode is not suitable for media watching in inset window. Please do not function it with KM mode together.
- 4. Please do not unplug KM Switch device while the current data transfer is in progress or KMDS is functional. This can cause the unforeseen loss of data or temporary inactive.
- 5. The PC authority should be "ADMINISTRATORS" not "USERS" or "GUEST".
- 6. If any unforeseen circumstances occur during the use, please unplug & plug KM device and click KMDS icon to activate.
- Please note, we do not recommend to use this device with OS Windows XP (64bit) due to slow data transfer speed.
- 8. The maximum resolution of monitor is up to 2,560 x 1,920 with KVM PIP mode.
