# Add Moisture & Comfort to Your Home.

# Bryant Has The Solution For Dry Indoor Air.

Since 1904, Bryant has been manufacturing top-quality home comfort equipment. Offering solutions that are reliable, efficient and affordable, Bryant has earned the trust of homeowners nationwide. That reputation continues today with our complete line of whole-home humidifiers.

Bryant offers three different humidifiers, each designed to enhance your comfort by adding moisture to dry, indoor air. Your local Bryant dealer is the key to finding solutions to your comfort problems. He can help you select the humidifier that best fits your system and your home comfort needs.

**WARRANTY**  
Bryant protects your comfort with written warranties. The entire unit is backed with a five-year limited warranty. Extended warranties are also available. Ask your local Bryant dealer for details.

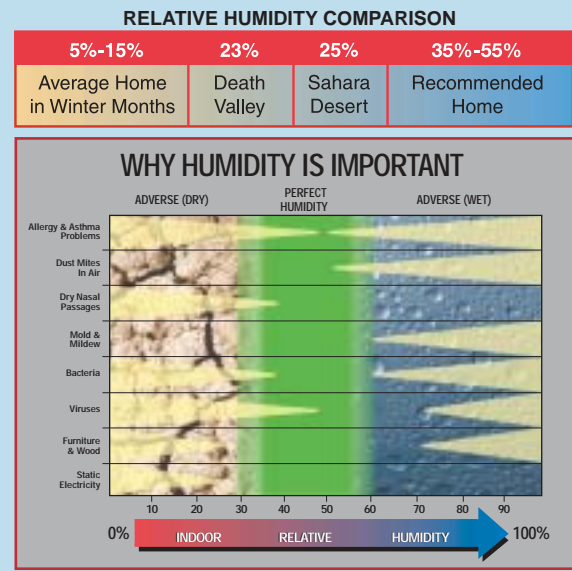

## Enjoy The Benefits Of Humidity Control

Controlling your indoor humidity is very important. In many cases, the air inside a home is drier than a desert. Dry, indoor air is often the culprit for such common problems as itchy or cracked skin, eye irritation, dry nasal passages and damaged home furnishings. Dry indoor air can also increase the possibility of catching cold and flu viruses and can reduce the efficiency and effectiveness of your heating system.

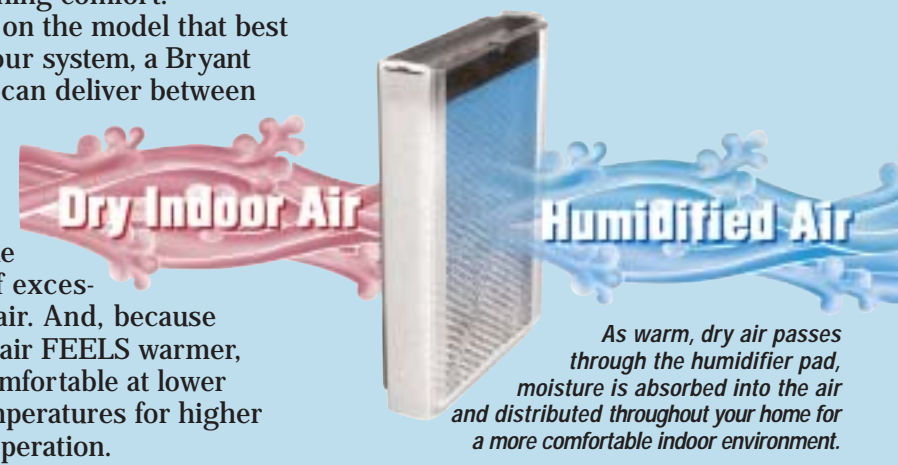

All of these problems can be alleviated with the help of a Bryant humidifier. Bryant offers three humidifier models designed to put moisture back into your indoor air so you can relax in warm, soothing comfort. Depending on the model that best matches your system, a Bryant humidifier can deliver between 12 and 18 gallons of moisture per day to minimize the problems of excessively dry air. And, because humidified air FEELS warmer, you'll be comfortable at lower heating temperatures for higher efficiency operation.

A Bryant humidifier helps prevent damage to your furniture such as dry, cracked wood, protecting your furnishings for years.

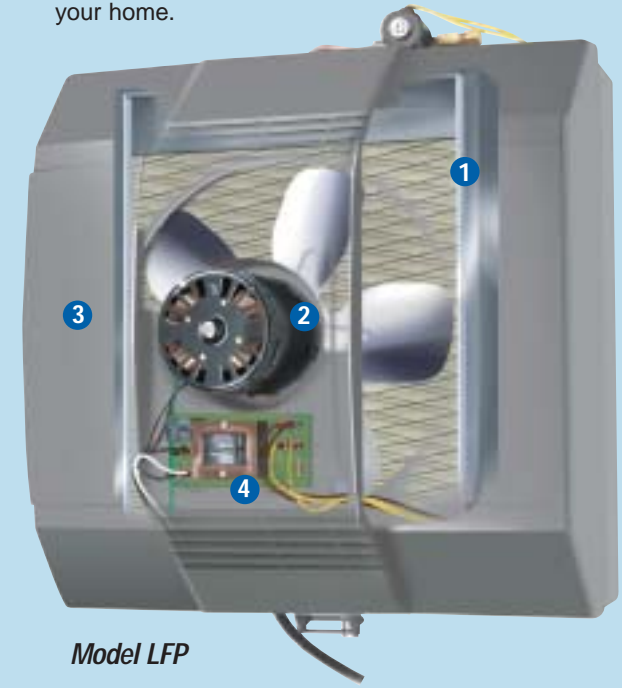

Maintaining proper humidity levels in your home can be the key to relief from dry nasal passages, static electricity and dry, itchy skin. Proper humidity control is also important for minimizing the growth of bacteria, molds, viruses and dust mites.

Prevent static electricity cling and shocks in the wintertime by installing a Bryant humidifier in your home.

## Built-In Reliability & Performance

- 1 EASY ACCESS FOR CLEANING AND MAINTENANCE**  
of the treated expanded aluminum pad ensures top performance. Front access door allows for quick and convenient removal and replacement of pad.
- 2 SMOOTH, LOW NOISE OPERATION**  
is the result of the precision-engineered fan and motor combination. Air is drawn through the evaporator pad quietly and efficiently, turning water into the water vapor that humidifies your home.
- 3 LONG-LASTING, ATTRACTIVE COVER**  
made from durable UV Resistant Plastic. Resists deterioration, even when exposed to ultra-violet light sources common in many systems.
- 4 OPTIMUM DISTRIBUTION OF MOISTURE**  
is ensured through our combined solenoid valve and water distribution system. Precision water measurement and control allow for accurate humidity control.

## Bryant Offers Three Moisture Control Options.

Bryant has always met the needs of homeowners nationwide. We also understand that those needs vary from home to home. That's why we offer three choices for maintaining proper humidity. Your Bryant dealer can help you select the right humidifier model for your home, and help walk you through the control choices available.

**HUMIDISTAT**  
For accurate, economical humidity control, our humidistat comes standard with all three humidifier models. Simply select the humidity level you'll be comfortable with and let your Bryant humidifier go to work. As conditions change, manually select a new setting on this easy-to-use control.

**HUMIDITRAC™**  
If you prefer the convenience of automatic humidity control, select the HumidiTrac Control option. This enhanced control offers a truly automatic humidity control that

monitors exterior conditions and adjusts indoor humidity to compensate. Taking about 86,000 temperature measurements per day, HumidiTrac automatically maintains the indoor moisture levels you selected. HumidiTrac also helps your humidifier provide 50% more moisture than standard humidifier/control combinations.

**THERMIDISTAT™ CONTROL**  
For programmable temperature settings and automatic humidity control, Bryant offers its patented Thermidistat Control. This Bryant exclusive monitors temperature and humidity readings and automatically adjusts system operation to achieve the perfect balance of comfort and energy efficiency. For year-round humidity control, ask your dealer about a Bryant Perfect Humidity system featuring a variable speed furnace or fan coil to complement your Bryant humidifier and Thermidistat Control.

The LFP, LBP and SBP Humidifiers proudly carry the Good Housekeeping Seal of Approval
