Use:

Using the Callus Remover

Step 1: Place the Metal Callus Blade on the main unit and switch on. Touch the device to the area you want to treat on low speed at first, when you feel comfortable then turn to the high speed. Shave your feet slowly, stop to check the results from time to time. Once the tough callus has been removed, switch off the device.

Attention: As soon as you feel the device touches new, healthy skin or callus has been removed, stop using immediately.

Note: This step is used when there is tough callus. If there is no tough callus, please start from Step 2.

Step 2: Place the Metal Callus Polishing Blade on the main unit and switch on. Touch the device to the area you want to treat on low speed at first, when you feel comfortable then turn to the high speed. Shave your feet slowly, stop to check the results from time to time. Once you have reached your desired results, switch off the device.

Attention: Don't overuse, soreness on your foot skin may result! If you feel your skin is irritated or if you feel pain, stop using immediately.

Step 3: Place the Nail Polisher on the main unit and switch on. Touch the device to the area you want to treat on low speed at first, when you feel comfortable then turn to the high speed. Shave your feet slowly, stop to check the results from time to time. This Step is used after Step 2 to gain best results. Stop using if you feel the skin is smooth and bright.

- Tips:
- a. For better results, please wet your feet before use this device;
 - b. It is advised to use this device twice a month to gain the best results.
 - c. Two speeds, low and high. Chose the one you feel comfortable.

Applications:

It is a lovely foot care machine that removes the toughest callus and dried skin on your foot. Ergonomically designed fit so perfectly in palm of your hand for good

control and comfort.

This machine uses rotational force to quickly shave off callus and restore your foot back to normal. Aboel Electric Callus Remover has two speed, low and high for different treatment purposes. It also allow fine shaving of callus, so fine that removed callus collected inside the device are in flour-like powder form. After using this device, the skin becomes smooth glass-like texture or soft facial skin.

Callus can be unsanitary and unhealthy since the thick build-up may split and host a great number of germs so it's very important to keep your feet callus-free. So it is very important to take callus out on our skin.
