# Message from the Chairman

Quickly growing from three people working in the spare bedroom of a terraced house to 50 people working in 30,000sq.ft of well equipped premises, the company also has subsidiaries in Australia and Germany. With an extensive distribution network Don Whitley Scientific Limited can offer scientists everywhere an unrivalled range of products and services.

Our product range has become truly world class, specified by discerning scientists in over 40 countries.

Research and development activities focus on the utilisation and enhancement of existing technologies and the development of innovative and novel products for use in microbiology and cell culture.

Ten percent of our turnover – considerably more than the UK average – is invested in product development and has allowed us to achieve the objective of one major product launch each year.

Established over 15 years ago, the contract microbiology laboratories deliver specialist microbiological support services to a range of industries at home and abroad. Highly qualified laboratory staff provide customer support, devise new applications and protocols, and conduct research studies including specific experience with all aspects of antimicrobial development programmes. As customers you will appreciate the quality of work produced from these purpose-built GLP-compliant laboratories.

Don Whitley Scientific Limited recently celebrated 30 years in business – these have been exciting and dynamic years for us all.

Don Whitley  
Chairman

Don Whitley was presented with the 'Lifetime Achievement Award' at the 2004 Lab News dinner.

# Don Whitley Scientific – Company Profile

## Company history

Don Whitley Scientific Limited develops, manufactures and sells instrumentation and associated products for microbiological and cell culture applications. It also provides microbiological contract services in its GLP-compliant laboratories. The company sells to both public and private sectors, is based in Shipley, West Yorkshire and is an independent, family-owned business.

The company currently sells a range of microbiology products to customers in 40 countries. These products range from anaerobic jars to automated instrumentation for the detection and enumeration of microorganisms, to a high quality microbiology contract service.

Established in 1976, the company enjoys a wealth of experience in microbiology, design, engineering and marketing. It was granted Millennium Product status for two of its products – the range of Whitley Anaerobic Workstations and the WASP spiral plater. A key factor in Don Whitley Scientific's success has been a consummate pride in offering customers a professional and efficient service. This awareness of customers and their needs prompted investment in improved service back-up and the construction of a suite of microbiology laboratories.

In the UK, Australia and Germany products are sold directly by Don Whitley Scientific. In other countries the products are sold through exclusive agreements with distributors.

The contract microbiology services are all handled directly from the Shipley laboratories. The contract research studies embrace all aspects of antimicrobial development programmes – including efficacy, safety, and clinical trial studies with an increasing emphasis on antimicrobial resistance work. The laboratories also have extensive experience in working within the animal feed industry as well as with the medical device, textile and chemical industries.

## Company structure

Whilst the company can be divided into the listed functions – Sales, Production, Service, Laboratory, Product Development, Warehousing, Accounts, and Administration – each part makes up the whole and it is this team effort that provides quality products and service to its customers. We are ISO 9001:2008 registered.

Don Whitley Scientific products are manufactured at the company headquarters in Shipley. This site totals 300m<sup>2</sup> and includes dedicated microbiology laboratories, service support suite and new product development facilities – thus concentrating all technical expertise on one site alongside production, sales and administration functions.

## Research and development

The company's research and development activities are focused on the enhancement of existing technologies and the development of novel microbiological and tissue culture products and services. The company seeks to enhance its competitive position through a process of continuous product improvement and new product development.

Over the years the company has won a number of Department of Trade & Industry competitive SMART awards to help fund research and development. One of the grants led to the development of the range of Whitley Anaerobic Workstations.

The contract research business is also supported by a strong internal R&D programme which has focused on the development of in vitro model test systems relevant to the study of antimicrobial residues.

# Whitley Workstations

Whatever modified atmosphere is applicable to your needs, we offer solutions ranging from basic gas jars to the most sophisticated workstations on the market.

We have tried to protect your investment at all levels by ensuring that our systems can be modified and adapted as your needs change – for example:

Jars can be upgraded to work with Whitley Workstations ...

... and using the Whitley Jar Gassing System dramatically reduces operating costs when compared with the use of gas generating envelopes

The Whitley DG250 Workstations can be operated as an anaerobic or microaerobic workstation giving you greater flexibility as your workload increases.

And for laboratories with high sample throughput or where a number of anaerobic experiments are carried out at the same time, the Whitley 1000 Workstation, with its 1080 plate capacity, is particularly effective.

One of the requirements of the design brief for the Whitley Workstations range was to offer as many workstation configurations and atmospheric variations as possible.

We are confident you will agree that our comprehensive workstation range more than fulfills this objective.

# Anaerobic Jars

Our anaerobic jars are robustly constructed in stainless steel and are simple to use. They have a positively located lid fitted with the unique Whitley Schrader® Valve System and carrier clips for Oxoid Low Temperature Catalyst Sachets. They can be used with either Gas Generating Envelopes or cylinder gas and will vent automatically if excess pressure is applied.

**A00002**     **48 Plate Anaerobic Jar**  
 10 litre capacity  
 330mm high  
 250mm deep (internal)  
 215mm diameter (internal)

**A00005**     **9 Plate Anaerobic Jar**  
 3 litre capacity  
 220mm high  
 140mm deep (internal)  
 155mm diameter (internal)

9 & 48 Plate Anaerobic Jars

## Accessories

- A00007**     **48 Plate Petri Dish Holder**  
To fit inside a 48 plate stainless steel jar
- A02534**     **10 Plate Petri Dish Holder**  
To fit inside a 9 plate stainless steel jar
- A00027**     **Pair of Chuck and Clips**  
For use with Whitley Schrader® Valve Venting System
- A00028**     **Dial Manometer Mounted on Chuck**  
For use with Whitley Anaerobic Jars

## Consumables

- A00010**     **Oxoid Low Temperature Catalyst Sachets (pack of 5)**

## Spare Parts

- A00016**     **Nitrile Rubber 'O' Ring**  
Used to seal Whitley 48 plate jars
- A00017**     **Nitrile Rubber 'O' Ring**  
Used to seal Whitley 9, 10 & 12 plate jars
- A00025**     **Schrader Valve**

All jars are supplied complete with 2 valves, the appropriate number of Oxoid Low Temperature Catalyst Sachets and an 'O' Ring.

In addition, the following spares are packed inside the jar: 2 Valve Cores, an 'O' Ring, the appropriate number of Oxoid Low Temperature Catalyst Sachets and 6 Nitrile Washers.

# Whitley DG250 Anaerobic Workstation

The revolutionary way to grow anaerobes and microaerophiles in micro. Our award-winning design team has created a workstation that provides both a generous working area and an incubation capacity of 240 x 90mm Petri dishes. This gives the Whitley DG250 Workstation an impressive 33% more capacity than any other unit of comparable size. Where space in the laboratory is limited, the DG250 Workstation requires just 810mm of bench width. It has a lift-off 'all-in all-out' facility to allow the convenient addition and removal of bulk samples and equipment.

- A02534     [10 Plate Petri dish holder \(basket\)](#)

## Consumables

- A03120     [Catalyst recharge \(460g\)](#)
- A03130     [Anotox™ recharge \(2 x 380g\)](#)
- A00069     [Drylube Lubricating Powder for Gloves and Sleeves \(200g pack\)](#)

# Whitley A35 Anaerobic Workstation

The Whitley A35 Anaerobic Workstation is the latest innovation in workstation technology. Complete with built-in, rapid airlock and intuitive touch-screen control panel, this workstation allows you to work completely glove and sleeve-free. The 12 litre airlock has the capacity to transfer up to 40 Petri dishes into the workstation in 60 seconds. Options and accessories are available to tailor the workstation to your requirements.

- A07000    **Whitley A35 Sleeveless Anaerobic Workstation**  
 10 litre capacity  
 330mm high  
 250mm deep (internal)  
 215mm diameter (internal)

Whitley A35 Sleeveless Anaerobic Workstation

## Factory Fitted Options

- A06121    Removable Front with Instant Access Ports  
 A06103    15cm Letterbox  
 A06106    Double Internal Power Socket  
 A02945    Spare Cable Gland

## Software Options

- A07200    Data Logging of Temperature, Pressure and Humidity  
 A07201    Electronic Anaerobic Monitoring System

## Accessories

- A06110    Trolley  
 A06114    Internal Storage Tray (maximum 2 per unit)  
 A00006    Gas Leak Detector  
 A02750    Basket Tag Set  
 A02534    10 Plate Petri Dish Rack

# Whitley A85 Anaerobic Workstation

The Whitley A85 is an anaerobic workstation with a 30 litre airlock, environmental control systems, touch screen interface, and our unique motorised gloveport system. Each gloveport also acts as a mini-airlock for up to 20 plates each. Both the working and storage areas of the chamber are temperature controlled with a low temperature gradient throughout. This allows the full internal chamber volume to be used for incubation if desired (maximum 500 plates). It is dual gas operated and temperature can be controlled from 5°C above ambient up to 45°C.

A07300 Whitley A85 Sleeveless Anaerobic Workstation

## Factory Fitted Options

A02711 9cm Letterbox  
A02617 Double Internal Power Socket  
A02945 Spare Cable Gland  
A06116 Automatic Sleeve Gassing System  
A02780 20 Plate Adaptor Kit  
A05009 Refrigeration Unit

Whitley A85 Anaerobic Workstation

## Software Options

A02129 Anotox  
A02130 Catalyst  
A02490 Airlock Transfer Tray

# Whitley Anaerobic Workstations

In the following pages we will describe the features and capacities of the Whitley Anaerobic Workstation range.

- A05000 Whitley MG500 Anaerobic Workstation
- A05012 Whitley MG500 Anaerobic Workstation (110 volt)
- A05001 Whitley MG1000 Anaerobic Workstation
- A05014 Whitley MG1000 Anaerobic Workstation (110 volt)
- A05024 Whitley MG500 Anaerobic Workstation with MG Airlock Module
- A05025 Whitley MG500 Anaerobic Workstation with MG Airlock Module (110 volt)
- A05032 Whitley MG1000 Anaerobic Workstation with MG Airlock Module
- A05033 Whitley MG1000 Anaerobic Workstation with MG Airlock Module (110 volt)
- A05007 Whitley MG Airlock Module
- A05043 Whitley MG Airlock Module (110 volt)

The above systems require a cylinder of anaerobic gas mixture (10% H<sub>2</sub>, 10% CO<sub>2</sub> and 80% N<sub>2</sub>) to operate. Workstation only - anaerobic gas supply connects to the workstation top-box. Workstation with airlock - anaerobic gas supply connects to the rear of the airlock.

- A05018 Whitley DG500 Anaerobic Workstation
- A05008 Whitley DG500 Anaerobic Workstation (110 volt)
- A05028 Whitley DG1000 Anaerobic Workstation
- A05029 Whitley DG1000 Anaerobic Workstation (110 volt)
- A05026 Whitley DG500 Anaerobic Workstation with MG Airlock Module
- A05027 Whitley DG500 Anaerobic Workstation with MG Airlock Module (110 volt)
- A05034 Whitley DG1000 Anaerobic Workstation with MG Airlock Module
- A05035 Whitley DG1000 Anaerobic Workstation with MG Airlock Module (110 volt)

The above systems require a cylinder of anaerobic gas mixture (10% H<sub>2</sub>, 10% CO<sub>2</sub> and 80% N<sub>2</sub>) and a cylinder of nitrogen (N<sub>2</sub>) to operate. Workstation only - both gas supplies connect to the workstation top-box. Workstation with airlock - anaerobic gas supply connects to the rear of the airlock and the nitrogen supply connects to the workstation top-box.

- A05022 Whitley MG500 Anaerobic Workstation with TG Airlock Module
- A05023 Whitley MG500 Anaerobic Workstation with TG Airlock Module (110 volt)
- A05030 Whitley MG1000 Anaerobic Workstation with TG Airlock Module
- A05031 Whitley MG1000 Anaerobic Workstation with TG Airlock Module (110 volt)
- A05005 Whitley TG Airlock Module
- A05021 Whitley TG Airlock Module (110 volt)

The above systems require three separate cylinders of H<sub>2</sub>, N<sub>2</sub> and CO<sub>2</sub> to operate. This enables the use of our patented three-gas system, which considerably reduces operating costs. Workstation only - this system is only available when an airlock is fitted. Workstation with airlock - all three gas supplies connect to the rear of the airlock.

Whitley 1000 Anaerobic Workstation

## Options

### A05009 Refrigeration Unit

Designed to maintain a lower than normal temperature within the incubation and working area. The standard refrigeration unit is designed to operate at  $8\pm 1^{\circ}\text{C}$  when located in an ambient temperature of  $21\pm 2^{\circ}\text{C}$ . Other set temperatures are achievable, but require discussion with our Product Development department in advance. Must be ordered at the time of build

### A02711 Single Plate Entry System (Letterbox)

For quick and easy transfer of individual plates. Must be ordered at the time of build

### A02617 Internal Power Socket

Must be ordered at the time of build

## Accessories

### A02580 Microscope and Bracket Assembly

A long focal length microscope, complete with bracket, fixtures and fittings

### A05002 Whitley Workstation 500 Trolley

A new, flat-pack trolley has been designed for the Whitley Workstation 500 or 500 and Airlock. One of the main advantages, particularly for our international customers, is that this version of the trolley fits into the package with the workstation so there is no additional freight cost.

### A05003 Whitley Workstation 1000 Trolley

A purpose-designed tubular steel trolley of welded construction with white powder-coated finish, equipped with heavy duty castors for ease of mobility. Suitable for any Whitley 1000 workstation

### A05006 Trolley Extension to accommodate Whitley Workstation Airlock

Converts any Whitley 500 or 1000 trolley to accommodate an airlock module

### A00054 Hydrogen / Anaerobic Gas Mixture Regulator – Two-Stage

Suitable for anaerobic gas mixture or hydrogen – with fittings

### A00056 Carbon Dioxide Regulator – Two-Stage

Includes fittings

### A00057 Nitrogen Regulator – Two-Stage

Includes fittings

### A02563 Hydrogen Reservoir – Unvented (4 Litre)

Required when hydrogen is supplied for a TG system via a hydrogen generator. Complete with box and fittings

### A05019 Whitley Workstation Anaerobic Indicator Pump (Bubbler)

Bubbles internal atmosphere through anaerobic indicator solution to provide an indication of suitable anaerobic conditions

Battery requires charging from socket so A02617 must be specified on the Whitley Workstation or battery transferred through parts

### A02750 Basket Tag Set

Seven colour tag set containing 20 x 7 assorted colours

### A02780 20 Plate Adaptor Kit

Right and left porthole attachment, thumb nuts, 2 x 20 plate Petri dish holders

### A02534 10 Plate Petri Dish Holder (Basket)

### A02718 20 Plate Petri Dish Holder (Basket)

This is the basket used with the A02780 Whitley 20 Plate Adaptor Kit

### A00210 30 Plate Petri Dish Holder (Basket)

### A02490 Airlock Transfer Tray

## Consumables

### A02129 Anotox™ Sachet

### A02130 Catalyst Sachet (400g)

### A00038 Anaerobic Indicator of A & B Solutions (to make 1 litre)

### A00069 Drylube Lubricating Powder for Gloves and Sleeves (200g pack) (UK Only)

### A00243 Pressure Relief Fluid (1 litre)

### A01923 Foam Cleanser (UK Only)

### D00003 Labdet 100 (5 litres)

## Workstation Sleeves

We offer a comprehensive range of sleeves and gauntlets alongside our recently introduced sleeve/cuff system. Neoprene is available in most of our formats to cater for those customers who have experienced difficulties working with latex.

### Sleeve Kits

The sleeve components come as ready-assembled kits for ease of use. The standard unit is supplied with a flexible, robust latex wrist seal – one size fits all.

For customers concerned about latex allergies, the sleeve assemblies are available with Neoprene wrist seals – available in standard and large sizes.

Replacement sleeves and cuff rings are available should either of these components need replacing. Pairs of replacement wrist seals can also be purchased should they start to show signs of wear.

Sleeve Kit

## Whitley Anaerobic Workstations

### Complete sleeve kits

- A02820 Sleeve kit with latex wrist seal (one size fits all) (pair)
- A02830 Sleeve kit with Neoprene wrist seal (standard) (pair)
- A02840 Sleeve kit with Neoprene wrist seal (large) (pair)

### Replacement components for latex sleeve kits

- A02821 Latex wrist seals (one size fits all) (pair)
- A02715 PVC Sleeve (single)
- A02716 Plastic sleeve cuff ring (single)

### Replacement components for neoprene sleeve kits

- A02831 Neoprene wrist seals (standard size) (pair)
- A02841 Neoprene wrist seals (large) (pair)
- A02715 PVC Sleeve (single)
- A02716 Plastic sleeve cuff ring (single)

# Whitley MK3 Workstations

## Complete sleeve kits

A02850	Sleeve kit with latex wrist seal (one size fits all) (pair)
A02860	Sleeve kit with Neoprene wrist seal (standard) (pair)
A02870	Sleeve kit with Neoprene wrist seal (large) (pair)

## Replacement components for latex sleeve kits

A02821	Latex wrist seals (one size fits all) (pair)
A02762	PVC Sleeve (single)
A02716	Plastic sleeve cuff ring (single)

## Replacement components for neoprene sleeve kits

A02831	Neoprene wrist seals (standard) (pair)
A02841	Neoprene wrist seals (large) (pair)
A02762	PVC Sleeve (single)
A02716	Plastic sleeve cuff ring (single)

The component parts of the DWS sleeve system are available fully assembled and ready to be fitted to your workstation.

As the sleeve system can be broken down into its component parts, you can simply replace the cuffs rather than the complete sleeve, making these sleeves more cost effective than the old style.

## One Piece Sleeves and Gauntlets

### Whitley Anaerobic Workstations

A02645	28" Latex Gauntlets (small) (pair)
A02647	28" Latex Gauntlets (medium) (pair)
A02648	28" Latex Gauntlets (large) (pair)
A02649	28" Latex Sleeves (small) (pair)
A02650	28" Latex Sleeves (medium) (pair)
A02651	28" Latex Sleeves (large) (pair)

All the above sleeves and gauntlets have been specially designed to fit the Whitley Workstation porthole

### All other Don Whitley Workstations

A02433	28" Latex Gauntlets (extra small) (pair)
A00121	28" Latex Gauntlets (small) (pair)
A00118	28" Latex Gauntlets (medium) (pair)
A00123	28" Latex Gauntlets (large) (pair)
A02434	28" Latex Sleeves (extra small) (pair)
A00033	28" Latex Sleeves (small) (pair)
A00034	28" Latex Sleeves (medium) (pair)
A00035	28" Latex Sleeves (large) (pair)
A00068	28" Neoprene Gauntlets (medium) (pair)
A00202	28" Neoprene Gauntlets (large) (pair)

# Whitley Variable Atmosphere Workstations

In the following pages we will describe the features and capacities of the Whitley VA Workstation range.

A05004	Whitley VA500 Workstation
A05017	Whitley VA500 Workstation (110 volt)
A05040	Whitley VA500 Workstation with VA Airlock Module
A05041	Whitley VA500 Workstation with VA Airlock Module (110 volt)
A05036	Whitley VA1000 Workstation
A05037	Whitley VA1000 Workstation (110 volt)
A05038	Whitley VA1000 Workstation with VA Airlock Module
A05039	Whitley VA1000 Workstation with VA Airlock Module (110 volt)
	The above workstations require four separate cylinders of CO <sub>2</sub> , N <sub>2</sub> , 10% H <sub>2</sub> in N <sub>2</sub> and compressed air
A05016	Whitley VA Airlock Module
A05042	Whitley VA Airlock Module (110 volt)

## Whitley VA Workstations can be used by two different groups of scientists

1. Those involved in the culture of micro-organisms such as helicobacter spp & campylobacter spp
2. Those involved in the culture of mammalian cells under hypoxic environments typically in cancer research, research into stroke mechanisms, stem cell research and embryology.  
The user can specify the oxygen levels in the workstation from  $\leq 1.0\%$  up to 22.0% and therefore create the exact environment they require.

(Catalyst and Anotox™ will be required for very low oxygen environments. The user should consider an anaerobic chamber if the oxygen levels required are consistently below 1.0%)

## Options

### A05009 Refrigeration Unit

Designed to maintain a lower than normal temperature within the incubation and working area. The standard refrigeration unit is designed to operate at  $8\pm 1^{\circ}\text{C}$  when located in an ambient temperature of  $21\pm 2^{\circ}\text{C}$ . Other set temperatures are achievable, but require discussion with our Product Development department in advance. Must be ordered at the time of build

### A02711 Single Plate Entry System (Letterbox)

For quick and easy transfer of individual plates. Must be ordered at the time of build

### A02617 Internal Power Socket

Must be ordered at the time of build.

## Accessories

### A02580 Microscope and Bracket Assembly

A long focal length microscope, complete with bracket, fixtures and fittings

### A05002 Whitley Workstation 500 Trolley

A new, flat-pack trolley has been designed for the Whitley Workstation 500 or 500 and Airlock. One of the main advantages, particularly for our international customers, is that this version of the trolley fits into the package with the workstation so there is no additional freight cost.

### A05003 Whitley Workstation 1000 Trolley

A purpose-designed tubular steel trolley of welded construction with white powder-coated finish, equipped with heavy duty castors for ease of mobility. Suitable for any Whitley 1000 workstation

### A05006 Trolley Extension to accommodate Whitley Workstation Airlock

Converts any Whitley 500 or 1000 trolley to accommodate an airlock module

### A00054 Hydrogen / Anaerobic Gas Mixture Regulator – Two-Stage

Suitable for anaerobic gas mixture or hydrogen – with fittings

### A00056 Carbon Dioxide Regulator – Two-Stage

Includes fittings

### A00057 Nitrogen Regulator – Two-Stage

Includes fittings.

### A01554 Air Regulator – Two-Stage

Includes fittings.

### A02750 Basket Tag Set

Seven colour tag set containing 20 x 7 assorted colours

### A02780 20 Plate Adaptor Kit

Right and left porthole attachment, thumb nuts, 2 x 20 plate Petri dish holders

### A02534 10 Plate Petri Dish Holder (Basket)

### A02718 20 Plate Petri Dish Holder (Basket)

This is the basket used with the A02780 Whitley 20 Plate Adaptor Kit

### A00210 30 Plate Petri Dish Holder (Basket)

### A02490 Airlock Transfer Tray

## Consumables

### A00069 Drylube Lubricating Powder for Gloves and Sleeves (200g pack)

### A00243 Pressure Relief Fluid (1 litre)

### A01923 Foam Cleanser (UK Only)

### D00003 Labdet 100 (5 litres)

# Whitley Jar Gassing System

A fast, automated system for incubating anaerobic or microaerophilic organisms. The Whitley Jar Gassing System runs from one cylinder of mixed gas and easily fits into any laboratory routine. There are separate cycles to prepare anaerobic or microaerobic conditions.

- A05020 Whitley Jar Gassing System**  
 Microaerophilic conditions created in 15 seconds  
 Anaerobic conditions created in less than 2 minutes  
 Single button operation  
 Built-in diagnostic checks  
 Reduces the cost of creating microaerobic conditions by up to 98%  
 Compatible with all Whitley Workstations

Whitley Jar Gassing System with 10 Plate Polycarbonate Jar

- A05077 Whitley Jar Gassing System 10 Plate Polycarbonate Jar**  
 2.5 litre capacity  
 250mm high  
 215mm deep (internal)  
 115mm diameter (internal)

- A05075 Whitley Jar Gassing System 9 Plate Stainless Steel Jar**  
 3 litre capacity  
 220mm high  
 140mm deep (internal)  
 155mm diameter (internal)

Whitley Jar Gassing System with 10 Plate Polycarbonate Jar

- A05076 Whitley Jar Gassing System 48 Plate Stainless Steel Jar**  
 10 litre capacity  
 330mm high  
 250mm deep (internal)  
 215mm diameter (internal)

All the jars mentioned above are fitted with a lid connector to make them compatible with the Whitley Jar Gassing System.

## Accessories

- A00007 48 Plate Petri dish holder** To fit inside a 48 plate stainless steel jar  
**A02750 Basket Tag Set**  
 Seven colour tag set containing 20 x 7 assorted colours  
**A05072 Adaptor kit for Whitley Jar Gassing System 10 plate polycarbonate jar \***  
**A05080 Adaptor kit for jars fitted with pre-drilled holes \***  
**A00010 Oxoid low temperature catalyst sachet** (pack of 5)  
**A05073 Catalyst sachet holder** To fit Whitley Jar Gassing System 10 plate polycarbonate jar  
**A05083 Gas line tee-piece to connect Whitley Jar Gassing System to existing gas line**  
**A02854 Lid connector**  
**A02878 'O'Ring** To fit Whitley Jar Gassing System 10 plate polycarbonate jar  
**A02913 Mixed Gas Regulator**

# Whitley H35 Hypoxystation

The H35 Hypoxystation is specifically designed to create normoxic, hypoxic and anoxic conditions within a controlled and sustained workstation environment. This workstation is ideal for research requiring the ability to accurately control oxygen, carbon dioxide, temperature and humidity.

- A06000 H35 Hypoxystation**  
 Control O<sub>2</sub> in 0.1% increments from 0.1% to 20%  
 Control CO<sub>2</sub> in 0.1% increments from 0.1% to 15%  
 Carry out straightforward calibration of gas sensors  
 Control temperature easily and precisely  
 Control relative humidity up to 90%

Whitley H35 Hypoxystation

## Factory Fitted Options

- A06100 CO<sub>2</sub> Monitoring**  
**A06101 Removable Front**  
**A06102 Vacuum Take-off Port**  
**A06103 15cm Letterbox**  
**A06104 Humidification System**  
 Adds moisture in minute droplet form enabling rapid, sustained and accurate humidity control up to 90% RH.  
**A06123 Humidification System with 15cm Letterbox**  
**A06106 Double Internal Power Socket**  
**A06107 Gas Sample Port**

## Software Options

- A06109 Data Logging**  
**A06108 Data Logging with Oxygen Profiling**

## Accessories

- A06110 Trolley**  
**A02130 Catalyst**  
**A02129 Anotox**  
**A06114 Internal Storage Tray (maximum 2 per unit)**  
**A03113 Automatic Sleeve Gassing System**  
**A02945 Spare Cable Gland**

Whitley H35 Hypoxystation with removable front

# Whitley H85 Hypoxystation

The H85 Hypoxystation is also designed to create normoxic, hypoxic and anoxic conditions within a controlled and sustained workstation environment. This Hypoxystation has a large 30 airlock, remote controlled motorised gloveports, and has the option of a refrigeration unit.

## A06002 H85 Hypoxic Workstation

Control O<sub>2</sub> in 0.1% increments from 0.1% to 20%  
 Carry out straightforward calibration of O<sub>2</sub> sensors  
 Control temperature between 5°C above ambient and 45°C  
 Control relative humidity up to 90% RH  
 (ambient temperature dependant).

Whitley H85 Hypoxystation

## Factory Fitted Options

A06100	CO <sub>2</sub> Monitoring
A06102	Vacuum Take-off Port
A03113	Automatic Sleeve Gassing System
A02945	Spare Cable Gland
A06107	Gas Sample Port
A02711	Single Plate Entry System
A02617	Double Internal Power Socket

## Optional Accessories

A02490	Airlock Transfer Tray (maximum 2 per unit)
A05002	Trolley
A05006	Trolley Extension to Accommodate Airlock

## Software Options

A06109	Data Logging
A06108	Data Logging with Oxygen Profiling

## For Anoxic Atmosphere

A02129	Anotox Sachet
A02130	Catalyst Sachet
A02643	Anotox or Catalyst Sachet Cradle

# Spiral Plating

Spiral Plating as a method for the enumeration of micro-organisms is both well documented and validated. With in excess of 3,000 spiral platers in use worldwide, this method of enumeration is now regarded as the de facto standard for plate counts by most advanced laboratories.

The WASP 2 (Whitley Automatic Spiral Plater) takes advantage of contemporary technology to offer microprocessor-controlled stepper motor motion to streamline and automate traditional spiral plate techniques.

WASP 2:

- eliminates the need for serial dilutions
- requires minimal set up time
- reduces cost per test
- standardises counting methods

Spiral platers are used extensively in the food industry to test for safe levels of bacteria; non-food applications include pharmaceuticals, cosmetics, water, and mouth and skin bacteria.

## S00600 WASP 2 (Whitley Automated Spiral Plater)

Includes:

Water Pots, Spare Bleach Bottle, Disposable Beakers and Tool Kit

WASP 2 Spiral Plater

## S00602 Whitley Vacuum Source and Reservoir

This complete system provides the steady 18-20" Hg of vacuum necessary for spiral plater operation

Includes:

Spare Flask

Whitley 602 Vacuum Source

## Options

### S01742 15cm Plate Option Kit (for MIC testing)

Please state serial number of existing unit if purchased separately

## Accessories

### S01861 SC5 Stuart Colony Counter

Pressure sensitive colony counter for quick and accurate counting of bacterial and mould colonies

### S00113 Manual Counting Grid for Spiral Plates

Two of these grids are included with each WASP

### S02230 Compressed Spiral Counting Grid

### S02232 Compressed Spiral Counting Tables Pack

(Includes instructions, counting grids and laminated tables)

## Consumables

### S01419 Autoclavable water pot for sterile water (pack of 10)

### B00039 5ml Disposable Beaker (pack of 1,000)

Specifically designed sample beaker for WASP

### S01391 Bleach Reservoir Bottle

### S02070 Powdered Ink (PINK) – makes up to 250ml of blue ink for the dye plate test

### A01923 Foam Cleanser (UK Only)

# Whitley Spiral aCOLyte

The new Whitley Spiral aCOLyte provides rapid, efficient colony counts from spiral plates. Simple and convenient to use, it introduces huge time savings and significantly improves efficiency in any laboratory.

aCOLyte was developed in response to a demand for rapid plate processing. The Whitley Spiral aCOLyte incorporates a sophisticated image analysis software to ensure rapid and accurate counts with minimum user intervention. With a compact, modern design it is simple to use. Load the software and start counting. An on-screen wizard helps you set up the system. Full colour images of each plate are displayed and also stored for future reference.

Users can select from either the 'Click and Count' or 'Supercount' software, depending on throughput. In 'Click and Count' mode, the Whitley Spiral aCOLyte counts up to four colonies per second – just point and click for instant logging. Total plate count and dilutions are calculated automatically and transcription errors are eliminated. Upgrading to 'Supercount' provides instant, fully automatic detection of up to 500 colonies per second which is 100 times faster than manual methods.

The Whitley Spiral aCOLyte is suitable for counting colonies on any 90mm spiral plate and can be used for a wide range of microbiology applications.

S01990 Whitley Spiral aCOLyte Click and Count

S02000 Whitley Spiral aCOLyte Supercount

Whitley Spiral aCOLyte

## Accessories

- S02008 **Powered 4 Port USB Hub**  
(if your PC does not have sufficient USB ports)
- S02010 **aCOLyte Compatible PC**
- S02011 **aCOLyte Compatible TFT Monitor and Speakers**
- S02012 **HP Inkjet Printer**
- S02036 **USB Printer Connection Cable**

# ProtoCOL2 Colony Counter and Zone Reader

**ProtoCOL2** is a fully automatic colony counting and zone sizing system specifically designed for microbiology and virology applications. A high specification CCD camera complete with a system of LED lighting and wrap-around doors help to eliminate the effects of external lighting and provide perfect illumination for imaging any coloured colony plate. Colonies as small as 43 microns can be counted on standard pour plates, surface inoculated plates, spiral plates, and a range of other application options. Zones can be automatically measured for potency testing, antibacterial susceptibility and virology applications.

ProtoCOL2 has been designed to offer the microbiologist full compliance with Good Laboratory Practice and support of 21CFR Part 11.

**ProtoCOL UV** is a powerful imaging system used to count both UV and white light illuminated colonies. This system allows you to instantly capture, print and save images such as: dark, light and multi-coloured colonies; fluorescent colonies; colonies expressing Green Fluorescent Protein; zones of inhibition; and viral plaques.

**S02200**     **ProtoCOL2 Colony Counter**  
Complete with touch screen colour monitor, ProtoCOL2 Colony Counter software, cables and instruction manual.

**S02201**     **ProtoCOL2 Zone Reader**  
Complete with touch screen colour monitor, ProtoCOL2 Zone Reader software, cables and instruction manual.

**S02175**     **ProtoCOL UV**  
Imaging system for counting UV and white light illuminated colonies.

ProtoCOL 2

ProtoCOL UV

## Options

- S02202**     **Counting software module for spiral plates**  
Includes validation plate
- S02203**     **OPKA software module**  
Used to evaluate *Streptococcus pneumoniae* vaccines
- S02204**     **Ames software module**  
Used to test the mutagenic potential of chemical compounds
- S02205**     **Multi-sector plates software module**  
Used for such processes as air sampling
- S02206**     **SBA software module**  
Used to measure immunity to *Neisseria meningitides*
- S02207**     **UDS software module**  
Includes validation plate
- S02208**     **Zone module for use on ProtoCOL2 Count** (including validation)
- S02209**     **Count module for use on ProtoCOL2 Zone** (includes 3 validation plates)  
Includes validation plate

# RABIT

## Rapid Automated Bacterial Impedance Technique

The way forward for automation in the microbiology laboratory. Direct and indirect impedance measurements and modular design provide a totally flexible screening system with Windows™ – based software adding usability and value. Unlike the standard plate methods which only measure microbial activity at a single point in time, RABIT monitors real time activity and thereby produces two significant benefits:

- results are determined in a significantly shorter time frame compared to conventional microbiology
- information not normally produced using standard methodology is made available, thereby improving the understanding of microbial activity in the test system.

Up to 32 re-usable cells can be incubated in a single module and the system can be expanded up to a total of 16 modules to give a capacity of 512 individual tests.

The basic RABIT system consists of a PC, additional data logging board, standard QWERTY keyboard, mouse, high resolution colour monitor, laser printer and an incubator module. This system offers the following benefits:

- Flexible modular design
- Fast detection times
- Increased throughput
- Simplicity of use
- Re-usable test cell
- Low cost per test
- Direct and indirect techniques
- Variable sample volume
- Access to culture during tests

**R02000**     **RABIT for Windows™**  
RABIT Computer, Keyboard,  
Laser Printer, Colour Monitor,  
1 Ream of Paper, User Manual,  
500gm WIB Media and a  
comprehensive range of accessories  
including cleaning aids

**R01020**     **32 Channel Incubator Module**  
96 Impedance Cells, Rack for cells,  
Baskets, spare electrode, 'O' rings and  
pressure seal caps with silicone inserts

**R02002**     **RABIT 4 Windows™ Upgrade**

**R01146**     **SPC Software**  
Automatic downloading of RABIT data into a statistical process control package, allowing accurate and simplified trend analysis and permitting implementation of systems such as HACCP

RABIT for Windows™ System shown with  
2 x 32 channel incubator modules

## Accessories

**R01052**     **Rack to hold up to 4 RABIT Modules and the CPU Unit**  
Units may be linked either back-to-back or side-by-side. If a side-by-side configuration is required, each rack needs to be attached to a load-bearing wall

**R01140**     **RABIT Test Cells**  
A set of calibrated temperature and impedance test cells – a must for customers who are working within the framework of a quality system such as UKAS

**R01073**     **Rack for 40 RABIT Cell**

Windows is a registered trademark of Microsoft Corporation

## Consumables

R00405	Borosilicate Inner Tubes (pack of 1,000)
R00407	Rubber Bungs (pack of 10)
R00995	RABIT Impedance Cells (pack of 8)
R00283	Cell Cleaning Brush (pack of 10)
R00334	Polypropylene Outer Tube (pack of 8)
R00335	Electrode Complete with 'O' Rings (pack of 8)
R00338	Spare Electrode 'O' Rings (pack of 100)
A01429	Scotchbrite Hand Pad For cleaning electrode pins
R00336	Pressure Seal Cap with Silicone Insert (pack of 8)
R00337	Silicone Insert for Cell Cap (pack of 8)

RABIT Cells

## Impedance Media

G50001	Whitley Impedance Broth (500g)
G50003	Whitley Enterobacteriaceae Broth (500g)
G50004	Whitley Gram Negative Broth (500g)
G50006	Whitley Anaerobe Broth (500g)
G50007	Whitley MacConkey Broth(500g)
G50008	Easter Gibson Salmonella Media (100g)
G50009	TMAO Supplement (10 x 100ml)
G50010	Wort Broth (500g)
G50011	Maximum Recovery Diluent (500g)
G50013	Buffered Peptone Water (500g)
G70003	Chloramphenicol for use with Wort Broth 1 vial/500ml (Pack of 10 vials)
G70004	Oxytetracycline for use with Wort Broth 1 vial/500ml (Pack of 10 vials)

## Dilumat S Diluter

The Dilumat S incorporates an innovative central structure to support a rotating dispensing arm. This enables the arm to rotate away from the sample preparation area once the diluent has been dispensed. An improved pump arrangement makes the unit easier to clean and larger bore tubing speeds up the whole process without any loss of precision.

### S02170 Dilumat S Diluter

Includes:  
 2 Complete Tubing Sets  
 1 Pump Head  
 1 Bag Holder  
 1 Set of Adhesive Pads for Bags  
 50 Standard Unfiltered Bags  
 1 Manual

Dilumat S Diluter

## Options

### M10464 Thermal Ticket Printer

### S01713 Bowl/Beaker Stand

This replaces the blender bag holder and allows the use of bowls or beakers

### S02171 Additional Pump Head

Includes: 2 Tubing Set

## Accessories

### M10094 Priming Tube and Connector for Media Dispensing

### M10493 Priming Nozzle

### S01156 2 Litre Reservoir

### S01157 5 Litre Reservoir

### S02059 Driptube Assembly

### S02180 RS232 Cable for PC Connection

### S02112 External Bar Code Reader

## Consumables

### M30035 Silicone Tubing (per metre)

### S00388 Adhesive Pads For Bags (pack of 50)

### S01779 Puradisc Filter 0.2 $\mu$ (single)

### S01977 Pre-Cut Pump Tubing (pack of 5)

### S02173 Complete Tubing Set

### S02179 Labels for Thermal Printer

# Dilumat 4 Diluter

## S01910 Dilumat 4 Diluter

Includes:

- 2 Complete Tubing Sets
- 1 Pump Head
- 1 Bag Holder
- 1 Set of Adhesive Pads for Bags
- 1 User Manual

This instrument can be upgraded to a dual pump system by adding an additional pump head (S01935)  
This will allow the use of 2 different diluents.

Dilumat 4 Diluter

## S02120 Dilumat 4 x 4 Diluter

Includes:

- 4 Complete Tubing Sets
- 4 Pump Heads
- 1 User Manual

This instrument will allow the use of 4 different diluents

Dilumat 4x4 Diluter

## Options

### S01935 Additional Pump Head

Includes: 2 Tubing sets

### S01984 Twin Pump Head Turbo Kit

This can only be fitted to a standard Dilumat 4 (not 4x4) and will improve the instrument's cycle time. The kit includes an additional pump head and appropriate tubing, which piggy backs onto the existing pump/s. It will not allow the use of a separate diluent but will halve the dispensing time by allowing the diluent to be dispensed simultaneously by both pumps.

## Accessories

S01743 Blender Bag Holder/Opener (acrylic)

S01732 Blender Bag Holder/Opener (holder only )

S02021 Blender Bag Holder/Opener (holder only )

This blender bag holder is specifically for Euro blender bags with attachment holes

S01741 Blender Bag Holder to Hold 10 bags (acrylic)

## Consumables

S01975 Complete Tubing Set

S01976 Complete Tubing Set without Nozzle

S01977 Pre-Cut Pump Tubing (pack of 5)

S01982 Dilumat 4 Turbo Tubing Set without Nozzles

S01983 Dilumat 4 Turbo Pre-Cut Tubing (pack of 5)

M30035 Silicone Tubing (per metre)

S01779 Puradisc Filter 0.2 $\mu$  (single)

S00388 Adhesive Pads For Bags (pack of 42)

M30037 Tie Wraps (pack of 10)

# EasyMIX

The EasyMIX blender gives high quality sample preparation by combining superior blending with a fast mix speed. An accurate electronic timer sets and stores the time for homogenisation.

Time savings of up to 50% can be made in this area with no compromise of homogenisation of sample or distribution of bacteria. EasyMIX is easy to maintain and clean as all the components, including the two removable paddles, are made of stainless steel.

## S02125 EasyMIX Blender

Includes:  
50 sterile 400ml bags

## Options

### S01972 Waste Drawer

## Accessories

- S00172 Blending Bag Rack to hold 10 bags (perspex)
- S01744 Blending Bag Rack to hold 1 bag (perspex)
- S01741 Blending Bag Holder to hold 10 bags (acrylic)
- S01743 Blending Bag Holder to hold 1 bag (acrylic)

## Consumables

- B00199 Bag Closing Clips (pack of 50)
- S00388 Adhesive Pads for Bags (pack of 42)

EasyMIX Blender with Waste Drawer

# Smasher

Probably the quietest blender on the market, Smasher® features a peristaltic effect blending action (patent pending). It is considerably quieter than any other instrument available and now with the easily removed paddles (no tools required) is very easy to clean.

S02128 Smasher

Includes:  
Waste Drawer  
50 sterile 400ml bags

Smasher

## Accessories

- S00172 Blending Bag Rack to hold 10 bags (perspex)
- S01744 Blending Bag Rack to hold 1 bag (perspex)
- S01741 Blending Bag Holder to hold 10 bags (acrylic)
- S01743 Blending Bag Holder to hold 1 bag (acrylic)

## Consumables

- B00199 Bag Closing Clips (pack of 50)
- S00388 Adhesive Pads for Bags (pack of 42)

# Labelmaster

Labelmaster® is an automated system for labelling and organising Petri dishes. It has been designed to print barcode labels and affix them to Petri dishes to help laboratory staff identify and sort samples quickly, easily and accurately. A printing unit outputs labels that are directly applied to the edge of the bottom part of the Petri dish. These are then stacked and sorted, sample by sample.

Labelmaster® handles up to 1000 plates per hour with a pneumatic plate delivery system to improve speed and accuracy. It has the capacity to stack 1075 dishes as standard. An optional storage unit increases this capacity to 1900.

## M00044 Labelmaster

Process up to 1000 plates per hour  
Hold 1075 plates as standard or up to 1900  
with optional storage unit

## Options

### M00046 Optional Storage Unit

Labelmaster

## Automatic Pourer / Stackers

Either of the systems below will produce up to 750 plates per hour without the operator having to be on hand throughout the process.

**M00040**    **APS320 90mm Automatic Pourer Stacker**  
Standard format for 90mm Petri dishes

Includes:  
3 Tubing Sets and Refrigeration Plate

**M00041**    **APS320 55mm Automatic Pourer Stacker**  
Special format for 55mm Petri dishes

Includes:  
3 Tubing Sets and Refrigeration Plate

APS320 Pourer Stacker

## Options

**M00105**    **APS540 Carousel - available for 90mm plates only**  
This will adapt an APS300 or APS320 to an APS540 and increases plate capacity

**M00034**    **Second Pump Kit**

**M00035**    **Bi-Plate Option**

This must be specified at the time of order and cannot be retro fitted

**M00027**    **Shaker Option - available for 90mm plates only**

This must be specified at the time of order and cannot be retro fitted

**M10095**    **UV Lamp**

**M10202**    **Footswitch**

## Accessories

**M30034**    **Pouring Tip**

**M30031**    **Tubing for Blood Addition**

**M30022**    **Distribution Side Nozzle**

## Consumables

**M20023**    **Pre-Cut Pump Tubing Set (pack of 5)**

**M20024**    **Pre-Cut Tubing for Hand Lance (pack of 5)**

**M30035**    **Silicone Tubing (per metre)**

This is the uncut silicone tubing supplied by the metre to customers wishing to make up their own tubing sets

**M30037**    **Tie Wraps (pack of 10)**

These are the special tie wraps used on all our Tubing Sets

## APS One

The APS One is the latest product in the pourer/stacker range, designed to be compact (only 845mm tall) yet process 800 plates (18ml) in an hour. The carousel can hold 550 Petri dishes as standard with an optional store to bring the capacity up to 800. It is adapted for all 90mm and 55mm Petri dishes.

- M00065    **APS One Automatic Pourer Stacker**  
For 90mm Petri dishes  
Standard capacity of 550 plates  
Includes easy load peristaltic pump.
- M00075    **APS One Automatic Pourer Stacker**  
For 55mm Petri dishes  
Standard capacity of 550 plates  
Includes easy load peristaltic pump
- M010593    **APS One Automatic Pourer Stacker with 800 Plate Carousel**

APS One Pourer Stacker

## Options

- M10607    800 Plate Carousel Kit
- M10603    APS One Footswitch
- S01984    Turbo Pump
- M10602    LINX 4900 Printer Fitting Kit
- M10464    Thermal Ticket Printer Including Adaptor

## Consumables

- M10604    Distribution Nozzle for 90mm Plates
- M10605    Distribution Nozzle for 55mm Plates
- M10592    90mm Turbo Tubing Set (without dispensing nozzle)
- M10608    55mm Tubing Set (with dispensing nozzle)
- M10609    90mm Tubing Set (with nozzle)
- M10610    55mm Tubing Set (without nozzle)
- S01977    Pre-cut Tubing (Pack of 5 lengths)

## Accessories

- M10601    Kit for 90mm Plates

# Masterclave 09 Media Preparator

The Masterclave 09 is easy to operate and can be linked to plate pouring devices or gravimetric diluters. The user will have the flexibility required for hands-free preparation of a wide range of agars and fluid media.

- M00050**    **Masterclave 09 Media Preparator**  
 9 Litre Capacity  
 Accepts up to 40 customised programmes  
 Sterilisation temperature 95 – 125°C  
 Dispensing temperature 30 – 80°C

Masterclave 09 Media Preparator

## Options

- M00024**    **Chart Recorder**  
 This provides full traceability for QA validation
- M10239**    **Quick Release Connector (x2)**  
 For water supply and drain. Supplied with 4 jubilee clips

## Accessories

- M10238**    **Trolley**
- M10214**    **Autoclave Basket**

## Consumables

- M10080**    **Chart Recorder Paper**
- M10079**    **Ink Ribbon**
- M10083**    **Decompression Filter**
- M10162**    **Water Filter**
- M10094**    **Priming Tube and Connector for Media Dispensing**
- M30037**    **Tie Wraps (pack of 10)**  
 These are the special tie wraps used on all our Tubing Sets

## Calibration & Validation

Ask us about the full range of services, including UKAS, that we can offer for autoclaves and media preparators.

# Masterclave 528 Media Preparator

With a minimum of 5 and a maximum of 28 litres capacity, the Masterclave 528 effectively bridges the gap between small and large laboratories.

One cost effective option is to use the Masterclave 528 to produce diluent which can be dispensed into dilution blanks or stomacher bags with one of our gravimetric diluters or peristaltic pumps.

- M00055**    **Masterclave 528 Media Preparator**  
 5 to 28 Litre Capacity  
 Accepts up to 40 customised programmes  
 Sterilisation temperature 95 – 125°C  
 Dispensing temperature 25 – 80°C  
 Cost-effective when compared to smaller preparators  
 Supplied with castors

Masterclave 528 Media Preparator

## Options

- M00024**    **Chart Recorder**  
 This provides full traceability for QA validation
- M10239**    **Quick Release Connector (x2)**  
 For water supply and drain. Supplied with 4 jubilee clips

## Accessories

- M10493**    **Complete Priming Tube Assembly**  
 Includes: Tube, Cap and Seal
- M10469**    **Pourer Stacker/Dilumat Connection Nozzle**  
 Used to connect media preparator to APS320 or dilumat
- M10470**    **Power Supply Adaptor**  
 From 380v to 220v (only for dispensing)
- M10471**    **Additional Temperature Probe**
- M10472**    **PT100 Probe PCB**

## Consumables

- M10080**    **Chart Recorder Paper**
- M10079**    **Ink Ribbon for Chart Recorder**
- M10394**    **Decompression Filters (pack of 10)**
- M30037**    **Tie Wraps (pack of 10)**  
 These are the special tie wraps used on all our Tubing Sets

## Calibration & Validation

Ask us about the full range of services, including UKAS, that we can offer for autoclaves and media preparators.

# Masterclave 60 Media Preparator

With a huge capacity the Masterclave 60 is the first choice for those labs with either a large sample throughput or the need to supply plates to outlying sites.

The Masterclave 60 also offers huge cost savings when used to produce sterile diluent.

- M00060**    **Masterclave 60 Media Preparator**  
 60 Litre Capacity  
 Accepts up to 40 customised programmes  
 Sterilisation temperature 95 – 125°C  
 Dispensing temperature 25 – 79°C  
 Cost-effective when compared to smaller preparators  
 Supplied with wheels, chart recorder, a graphics screen  
 and a security cover

Masterclave 60 Media Preparator

## Options

- M10239**    **Quick Release Connector (x 2)**  
 For water supply and drain. Supplied with 4 jubilee clips

## Accessories

- M10361**    **Calibrated Dipstick**  
**M10433**    **Basket Support for Autoclaving**  
**M10434**    **Basket for Autoclaving**

## Consumables

- M10431**    **Decompression Filters (pack of 5)**  
**M10349**    **Stainless Steel Take Off Port Nozzle**  
**M30037**    **Tie Wraps (pack of 10)**  
 These are the special tie wraps used on all our Tubing Sets  
**M10080**    **Chart Recorder Paper**  
**M10079**    **Ink Ribbon**

## Calibration & Validation

Ask about the full range of services, including UKAS, that we can offer for autoclaves and media preparators.

## Peristaltic Pump and Dispenser

The PM05 will dispense volumes from 1ml to 10 litres with a high degree of accuracy. The combination of a PM05 and a XY dispenser makes high volume output possible. This is the system of choice for many GLP compliant laboratories.

### Options for PM05

- S02085 Megatron Star Printer for narrow printouts
- M00011 Sterilisation Unit – 1.5 litres
- M00012 Sterilisation Unit – 2.0 litres

### Options for XY500

- M10235 252 Tube Adjustable Rack

### Tubing Sets

We offer various options of tubing to cater for a variety of dispensed volumes

- M30027 Tubing Set with Nozzle (1.7 – 5.0mm diameter)
- M30028 Tubing Set with Nozzle (3.1 – 6.3mm diameter)
- M30029 Tubing Set with Nozzle (6.4 – 7.0mm diameter)
- M30030 Tubing Set with Nozzle (4.8 – 8.1mm diameter)
- M30032 PM05 Tubing Set

### Consumables

- M30037 Tie Wraps (pack of 10)  
These are the special tie wraps used on all our Tubing Sets

PM05 Peristaltic Pump

XY500 Dispenser

## LINX Printer

For those users who require batch details printing onto their plates, the printer of choice is the LINX 4900. It has a tough and stylish stainless steel enclosure with easy ink and solvent refilling. It can be supplied with a bottom or side printing kit to print on the side or base of the plates depending on user preference.

M00038 LINX Inkjet Printer – Model 4900

### Options

M00032 Printing Kit (Side)

M10028 Printing Kit (Bottom)

M00037 90 Degree Print Head

LINX 4900 Printer

### Consumables

M20027 Ink / Solvent Combi Pack

## Tubing Sets

### APS300/320 Pourer Stacker

- M30026 **Tubing Set only**  
This tubing set is supplied without the connectors to any specific preparator
- M20023 **Pre-Cut Pump Tubing Set** (pack of 5)

### APS300/320 Pourer Stacker to S8000 & Masterclave 09 Media Preparators

- M30024 **Complete Tubing Set**  
This tubing set includes the connectors necessary for the Pourer Stacker to operate with the S8000 Preparator

### APS300/320 to Masterclave 19

- M30025 **Complete Tubing Set**  
This tubing set includes the connectors necessary for the Pourer Stacker to operate with the Masterclave 19 Preparator

## Consumables

- M30037 **Tie Wraps** (pack of 10)  
These are the special tie wraps used on all our Tubing Sets
- M30035 **Silicone Tubing** (per metre)  
This is the uncut silicone tubing supplied by the metre to customers wishing to make up their own tubing sets

# Systemc Autoclaves

Systemc produces a range of autoclaves that make autoclaving easier, safer, more reproducible and faster. There are now 45 models in the range - an autoclave for every laboratory and every sterilisation task.

With both freestanding, horizontal models and benchtop, front-loaders, there are also three different performance standards to choose from:

**Xpert Range** - an autoclave for specialist applications - when you need a system that can be tailored to the particular needs of your laboratory.

**Everyday Range** - a robust, reliable autoclave, the workhorse of the laboratory. This model is designed for routine laboratory use.

**Basic Range** - specifically developed for straightforward laboratory applications so if you just want to load up, switch on and go, then this could be the autoclave for you.

## Printing & Software Options for All Models

- C00122 PC Software for Windows
- C00178 Printer
- C00179 Printer paper (20 rolls)

## Rapid Cooling

Rapid cooling for liquids with cooling water only for open vessels without support air:

- C00409 for DX-23, DX-45, DE-23 and DE-45
- C00417 for DX-65, DX-90, DE-65 and DE-90
- C00164 for DX-100 to DX-200 and DE-100 to DE-200

- C00468 for VX-40, VX-55, VE-40 and VE-55
- C00417 for VX-65 to VX-95 and VE-65 to VE-95
- C00164 for VX-100 to VX-150 and VE-100 to VE-150

Rapid cooling for liquids with cooling water, without loss of liquid in the sterilised goods for open and hermetically closed vessels with support pressure by sterile filtered compressed air:

- C00416 for DX-23, DX-45, DE-23 and DE-45 / VX-40 to VX-55 and VE-40 to VE-55
- C00418 for DX-65, DX-90, DE-65 and DE-90 / VX-65 to VX-95 and VE-65 to VE-95
- C00165 for DX-100 to DX-200 and DE-100 to DE-200 / VX-100 to VX-150 and VE-100 to VE-150
- C00131 [Feed Water Softening Equipment](#) (for DX, DE, VX and VE models)
- C00133 [Built-in Internal Radial Ventilator](#) (for DX, DE, VX and VE models)

Accelerated cooling via ambient air ventilation for open vessels only:

- C00419 for DX-23, DX-45, DE-23 and DE-45 / VX-40 to VX-55 and VE-40 to VE-55
- C00424 for DX-65, DX-90, DE-65 and DE-90 / VX-65 to VX-95 and VE-65 to VE-95
- C00132 for DX-100 to DX-200 and DE-100 to DE-200 / VX-100 to VX-150 and VE-100 to VE-150

- C00130 [Re-circulation Cooling Unit](#) (for DX, DE, VX and VE models)
- C00134 [Spray Cooling by recirculation of sterile water](#) (for DX, DE, VX and VE models)
- C00135 [Laminar Stainless Steel Plate](#) (for DX, DE, VX and VE models)

## Air Compressor for Rapid Cooling Systems

- C00137 [Silent 50 Air Compressor](#) (for DX-65 to DX-200 and DE-65 to DE-200 / VX-65 to VX-150 and VE-65 to VE-150)

Systec Stainless Steel Baskets

## Vacuum & Drying Options

- C00166 Vacuum and Drying System (for Xpert Models Only)
- C00167 Superdry Wall Heating System (for Xpert Models Only)
- C00297 Sterile Air Drying (for Xpert Models Only)
  
- C00141 Connection to steam supply (for Xpert Models Only)
- C00426 Connection to steam supply (for Everyday Models Only)

## Shelves, Support Tables, Transport and Loading Carriages for all Desktop Models

Height-adjustable middle shelving:

- C00410 for Systec D-65
- C00411 for Systec D-90 (D-90 2D)
- C00412 for Systec D-100
- C00413 for Systec D-150 (D-150 2D)
- C00523 for Systec D-200 (D-200 2D)

Stainless steel support table with shelf:

- C00414 for Systec D-23
- C00415 for Systec D-45
- C00420 for Systec D-65
- C00421 for Systec D-90
- C00422 for Systec D-100
- C00423 for Systec D-150
- C00425 for Systec D-200

Transport carriages:

- C00320 for Systec D-65, D-90, D 90 2D
- C00321 for Systec D-100, D-150, D-150 2D
- C00322 for Systec D-200, D-200 2D

Loading carriages:

- C00323 for Systec D-65
- C00324 for Systec D-90, D-90 2D
- C00325 for Systec D-100
- C00326 for Systec D-150, D-150 2D
- C00327 for Systec D-200, D-200 2D

## Miscellaneous

- C00138 Air exhaust filtration
- C00140 Integrated Hoist for Systec V series only
- C00142 Condensate collection vessel (25 litre)
- C00144 Demineralisation cartridge for Systec X & E series only
- C00145 Digital conductivity meter for Systec X & E series only
- C00168 Magnetic stirrer
- C00177 Extension of temperature and pressure range up to 150°C and 5 bar for Systec X & E series only
- C00181 4 guidable caster-rollers with fixing brakes
- C00298 Temperature holding function for liquid media after re-cooling for Systec X & E series only
- C00296 Feed water vessel for steam generation for Systec X series only
- C00299 Aquastop for Systec X & E series only
- C00315 Durham-Program for Systec X & E series only
- C00316 Agar dissolution program for Systec X & E series only

## Calibration & Validation

Ask about the full range of services, including UKAS, that we can offer for autoclaves and media preparators.

# Systemc Media Preparators

Automatic media preparators prepare high quality, ready to use, agar or broth media and under controlled conditions. Media is homogenous and sterilised at the correct temperature for the right length of time – something which can be difficult to achieve with a standard autoclave.

C00308	Mediaprep 10
C00309	Mediaprep 20
C00310	Mediaprep 30
C00311	Media prep 45
C00312	Mediaprep 65
C00313	Mediaprep 90
C00314	Mediaprep 120

## Options

C00122	PC Documentation Software for Windows (95 & higher)
--------	---

## Accessories

C00120	Printer for temperature, pressure and time data
C00136	Silent 40 Air Compressor for Quick Cooling For MediaPrep 45 and 65
C00137	Silent 50 Air Compressor for Quick Cooling For MediaPrep 70 and 120
C00258	Double Stirring Bar
C00287	6mm Media Take-off Port Connector For Mediaprep 10, 20 & 30
C00297	6mm Media Take-off Port Connector For Mediaprep 45, 65, 90 & 120

## Consumables

C00179	Printer paper (20 rolls)

Chamber Volume: 770 litres

## Crystal

- C01548 Crystal 200DS Autoclave - Direct Steam  
Chamber Volume: 200 litres
- C01549 Crystal 250DS Autoclave - Direct Steam  
Chamber Volume: 250 litres
- C01550 Crystal 300DS Autoclave - Direct Steam  
Chamber Volume: 300 litres
- C01551 Crystal 200DS VAC Autoclave - Direct Steam and Vacuum  
Chamber Volume: 200 litres
- C01552 Crystal 250DS VAC Autoclave - Direct Steam and Vacuum  
Chamber Volume: 250 litres
- C01553 Crystal 300DS VAC Autoclave - Direct Steam and Vacuum  
Chamber Volume: 300 litres
- C01554 Crystal 200E Autoclave - Electrically Heated  
Chamber Volume: 200 litres
- C01555 Crystal 250E Autoclave - Electrically Heated  
Chamber Volume: 250 litres
- C01556 Crystal 300E Autoclave - Electrically Heated  
Chamber Volume: 300 litres
- C01557 Crystal 200E VAC Autoclave - Electrically Heated and Vacuum  
Chamber Volume: 200 litres
- C01558 Crystal 250E VAC Autoclave - Electrically Heated and Vacuum  
Chamber Volume: 250 litres
- C01559 Crystal 300E VAC Autoclave - Electrically Heated and Vacuum  
Chamber Volume: 300 litres
- C01560 Crystal 300E VAC Double Entry Autoclave - Electrically Heated and Vacuum  
Chamber Volume: 300 litres
- C01561 Crystal 300DS VAC Double Entry Autoclave - Direct Steam and Vacuum  
Chamber Volume: 300 litres

Rodwell Crystal Autoclave

# Labguard Monitoring System

This wireless monitoring system is available as single user or networkable, and will monitor up to 1000 parameters.

- T00002 Network Software**  
Includes:  
1 off visualisation for client server  
1 off visualisation for a client and 1 off validation file
- T00003 Additional Visualisation Licence for Networked Installations**  
Additional visualisation for a client (Network Only)
- T00020 RS232 Radio Receiver**  
Includes: Mains Power Supply (T00034), serial lead, mounting bracket & Europlug adaptor (T00115)

## Options – Temperature Monitoring

- T00030 Single Probe Radio Transmitter (Battery Power Only)**  
Includes: 1 x -80°C to +80°C probe (T00040) and 1 x Lithium Battery (T00117)
- T00031 Double Probe Radio Transmitter (Battery Power Only)**  
Includes: 2 x -80°C to +80°C probe (T00040) and 1 x Lithium Battery (T00117)
- T00032 Single Channel Analog (4-20mA) Radio Transmitter (Battery Power Only)**  
Includes: 1 x Lithium Battery (T00117)  
Requires: 1 x T00106 Convertor to operate with the following probes: T00042/ 48/121/122/123/124
- T00034 Mains Power Supply Unit**  
Includes: Europlug Adaptor (T00115)  
This power supply offers an alternative to battery power for the T00030/31/32/33  
Requires: 1 x T00118 for T00030, T00031 & T00033 OR 1 x T00119 for T00032  
Mains Power is necessary if temperature readings are required at intervals of less than one hour
- T00118 Electrical Supply PCB (fitted internally to T00030/31/33)**
- T00119 Electrical Supply PCB (4-20mA) (fitted internally to T00032)**
- T00106 PT100 or Thermocouple Converter (4-20mA)**  
Includes: Mains Power Supply (T00034)  
Must be used in conjunction with T00042/48/121/122/123/124
- T00042 PT100 Probe with Metal Sheath (-80°C to +260°C)**  
Please note: this probe is not resistant to pressure and therefore not suitable for use in an autoclave
- T00048 Thermocouple Probe (-200°C to +1200°C)**  
Please note: this is the probe we would recommend for use in autoclaves
- T00041 125°C Waterproof Probe**  
To be used with: T00030 & T00031
- T00110 High Temperature or Alarm Contact**  
To be used with: T00030 & T00031

Labguard 2 Monitoring System

# Temperature Probes for Special Applications

- T00122 [PT100 Probe for Blood Plasma Bag Applications](#)
- T00123 [PT100 Probe, 1mm Diameter Glass Tip \(-80°C to +200°C\)](#)  
For use only with microtitre plate heating blocks (Cat 3 Laboratories)
- T00124 [PT100 Probe, 1mm Diameter Metal Tip](#)  
For use only with microtitre plate heating blocks (Cat 3 Laboratories)

## Options – Software

- T00010 [Calibration Software Module](#)  
This software requires the purchase of a COFRAC Calibrated Temperature Probe (T00125/126)
- T00011 [Incubator Temperature Mapping Software Module](#)
- T00012 [Laboratory Floor Plan Software Module](#)
- T00013 [Alarm Transfer Software Module](#)  
Includes: Modem for connection to a standard analog telephone line to transmit voice or fax messages. For SMS messaging a T00114 is required.
- T00014 [Webserver Software Module](#)

## Options – CO2 Monitoring

- T00032 [Single Channel Analog \(4-20mA\) Radio Transmitter \(Battery Power Only\)](#)  
Includes: 1 x Lithium Battery (T00117)  
Requires: 1 x T00106 Convertor to operate with the following probes: T00042/ 48/121/122/123/124
- T00034 [Mains Power Supply](#)  
Includes: Europlug Adaptor (T00115)  
This power supply offers an alternative to battery power for the T00032  
Requires: 1 x T00119  
Mains Power is necessary if CO2 readings are required at intervals of less than one hour
- T00119 [Electrical Supply PCB \(4-20mA\)](#) (fitted internally to T00032)
- T00047 [0-20% Carbon Dioxide Sensor](#)  
Includes: 1 x 12 volt Power Supply Unit and 1 x 2 pin mains lead (T00116)

## Options – Humidity Monitoring

- T00032 [Single Channel Analog \(4-20mA\) Radio Transmitter \(Battery Power Only\)](#)  
Includes: 1 x Lithium Battery (T00117)
- T00034 [Mains Power Supply Unit](#)  
Includes: Europlug Adaptor (T00115)  
This power supply offers an alternative to battery power for the T00032 only  
Requires: 1 x T00119  
Mains Power is necessary if humidity readings are required at intervals of less than one hour
- T00119 [Electrical Supply PCB \(4-20mA\)](#) (fitted internally to T00032)
- T00045 [0-70% Relative Humidity Sensor](#)  
Requires: T00111 – 24 volt Power Supply
- T00046 [0-100% Relative Humidity Sensor](#)  
Requires: T00111 – 24 volt Power Supply
- T00111 [24 Volt Power Supply](#)

## Options - Hardware

- T00102    **50cm Flat Cable**  
This cable is used to insert a probe round a door seal
- T00103    **1 Metre Flat Cable**  
This cable is used to insert a probe round a door seal
- T00104    **5 Metre Extension Lead**  
This is for extending T00040/41 probe cables
- T00105    **10 Metre Extension Lead**  
This is for extending T00040/41 probe cables
- T00113    **USB to Serial Port Adaptor**  
Required if PC is not equipped with a spare serial port
- T00114    **GPRS Modem**  
Includes: Europlug Adaptor (T00115)  
This modem is necessary if SMS messaging is required. The customer must provide the relevant SIM card from their preferred supplier
- T00033    **Repeater Only**  
Includes: 1 x Lithium Battery (T00117)  
Must be used with T00034, T00118 & T00115

## Options – COFRAC Calibration Labguard 2

- T00010    **Calibration Software Module**  
This software requires the purchase of a COFRAC Calibrated Temperature Probe (T00125)
- T00125    **Single Probe Radio Transmitter (Battery Power Only)**  
With COFRAC Calibration at 0°C & 55°C. Checked at -20°C, 0°C & 55°C
- T00126    **Single Probe Radio Transmitter (Battery Power Only)**  
With COFRAC Calibration at 0°C & 55°C . Checked at -20°C, 0°C ,55°C & an additional temperature point. For example - 80 °C
- T00034    **Mains Power Supply Unit**  
Includes: Europlug Adaptor (T00115)  
This power supply offers an alternative to battery power for the T00030/31/32/33  
Requires: 1 x T00118 for T00030,T00031 & T00033 OR 1 x T00119 for T00032  
Mains Power is necessary if temperature readings are required at intervals of less than one hour
- T00118    **Electrical Supply PCB** (fitted internally to T00030/31/33)

## Accessories

- T00115    **Europlug Adaptor**
- T00120    **Transmitter Sealing Resin**  
To be used if a transmitter is be sited in a damp or cold environment.  
Sufficient to seal one transmitter
- T00108    **Velcro (Roll)**  
Used in squares for mounting transmitters

## Consumables

- T00109    **Lithium Battery**  
Suitable for T00130/131 Transmitters
- T00117    **Lithium Battery**  
Suitable for T00030/31/32/33 Transmitters

## Sampl'Air Lite and Sampl'Air Pro

Sampling is an essential step in the monitoring of airborne contamination. Sampl'Air produces accurate and reproducible results with a minimum of operator involvement.

Stainless steel heads came as standard on these units so they comply with the requirements of the pharmaceutical industry.

M00042 Sampl'Air Lite

M00043 Sampl'Air Pro  
Complete with:  
Data manager software  
PC connection cable

Sampl'air Pro

### Sampl'Air Lite Accessories

M10461 Additional Stainless steel sample head

M10090 Adjustable aluminium tripod

### Sampl'Air Pro Accessories

M10463 Barcode Reader

M10464 Ticket printer

M10461 Additional Stainless steel sample head

M10090 Adjustable aluminium tripod

## Tomkey

The TomKey is an extremely versatile USB key that enables the temperature of food or clinical samples to be monitored during transportation. It records and displays temperature readings from  $-40$  to  $+80^{\circ}\text{C}$ , providing continuous traceability in a simple and economical way. TomKey features an easy to read LCD display that allows you to see the temperature readings at a glance.

- T00135      Tomkey Software
- T00136      Tomkey Data Logger 8MB
- T00137      Tomkey Data Logger 16MB

Tomkey Data Logger

# ASpecT

ASpecT is a new, fully-automated inoculating and streaking device that rapidly and efficiently manages the processing of liquid phase samples. The machine de-caps, inoculates, streaks, labels and then re-caps the container without operator intervention.

## V00900 ASpecT

Liquid sample processing for microbiology  
One instrument to process all swab samples and urines  
Manages a diverse range of specimen types and sample containers  
Standardised streaking for greater accuracy  
Universal bar code reading system  
User-friendly touch screen control

ASpecT

## Options

- V00911 Plate Sorter for Incubation Conditions
- V00912 Hepa Filter Unit
- V00913 Racks
- V00914 Large Screw-cap Container Opener Kit
- V00915 De-capping Cup
- V00916 Docking Station
- V00917 Ski-chute

## Consumables

- V00918 Tri Loop Inoculation Tool 1ul
- V00919 Tri Loop Inoculation Tool 10ul
- V00920 Tri Loop Inoculation Tool 30ul

# Petri-Flow™

Petri-Flow™ is a laboratory solution that automates the transportation of Petri dishes from receipt of sample to analysis. From a base unit conveyor system a variety of options can be added to tailor the Petri-Flow™ system for individual requirements. For example, you can add printers, agar dispensing systems, analysis/dilution/inoculation workbenches, barcode scanners, run-off benches, stacking systems, buffers, sorting units, mixing and cooling units. Available with LIMS connection to ensure sample information is printed directly onto each dish.

# Consumables & Accessories

## A00002 48 Plate Anaerobic Jar

10 litre capacity  
330mm high  
250mm deep (internal)  
215mm diameter (internal)

## A00005 9 Plate Anaerobic Jar

3 litre capacity  
220mm high  
140mm deep (internal)  
155mm diameter (internal)

The ideal vehicle for transportation of samples from patient to laboratory. DWS anaerobic jars have long enjoyed a good reputation for a wide range of anaerobic culture applications including pre-reduction of poured plates and large scale anaerobic culture and class work. Whitley jars have positively located lids fitted with the unique Whitley Schrader® valve system and carrier clips for Oxoid low temperature catalyst sachets.

## B00039 Disposable Beakers (5ml) (Box of 1,000)

Our general purpose disposable beakers are suitable for a wide variety of general laboratory procedures. The beakers are supplied in handy, pull-down dispensers to aid the withdrawal of one beaker at a time. Each dispenser tube contains 100 beakers and they are sold in boxes of 10 tubes.

## A02750 Basket Tag Set (seven colour tag set containing 20x7 assorted colours)

Basket tags enable you to colour code individual stacks of Petri dishes. The re-usable tags can be attached to any of our Petri dish racks and are manufactured from polypropylene for durability. A set comprises of 140 tags: 20 tags of each of the following colours – yellow, blue, red, green, white, orange, grey.

## A04040 Automatic Gas Change Over Unit

The Whitley Automatic Gas Change Over Unit offers complete peace of mind to owners and users of workstations by ensuring the gas supply is always maintained - even when a cylinder needs to be changed at night, at weekends or any other time the laboratory is unoccupied, such as public holidays.

Designed specifically to suit the operational requirements of all workstations in the Don Whitley Scientific range, the unit functions by using the gas pressure from the connected cylinders - and does not require an electrical supply.

## A02534 10 Plate Petri Dish Holder (Basket)

## A02718 20 Plate Petri Dish Holder (Basket)

## A00210 30 Plate Petri Dish Holder (Basket)

To help you sort, stack and store your Petri dishes we offer a range of 3 sizes of wire rack: 10 plates, 20 plates and 30 plates. All racks are manufactured for easy cleaning and durability.

**D00001      Autoclave Deodorant Capsules (pack of 100)**

Autoclave deodorant capsules improve the working environment by neutralising odours associated with the routine autoclaving of laboratory waste. The capsules are scientifically formulated to cancel out and modify gaseous malodours produced by organic and inorganic compounds in autoclaved waste. The compact capsule design releases its contents automatically as the autoclave heats up, keeping your laboratory smelling fresh and clean. Capsules are packed in bottles of 100.

**D00003      Labdet 100 (5 litres)**

Laboratory detergent and radioactive decontaminant. Labdet 100 is free-rinsing, biodegradable and phosphate-free. It may be mixed with hypochlorite solutions to make a steriliser/detergent for discard pots etc.

**A02820      Sleeve kit with latex wrist seal (one size fits all) (pair)**

**A02830      Sleeve kit with Neoprene wrist seal (standard) (pair)**

**A02840      Sleeve kit with Neoprene wrist seal (large) (pair)**

Sleeve systems are available as ready-assembled kits or as individual component parts. Wrist seals come in two options - latex or neoprene - and can be ordered as part of the kit or separately. We also have a range of gauntlets available in latex or neoprene.
