Rugged Mobile Phone

Outdoor Mobile Phone

1 Welcome

Thanks for purchasing the rugged outdoor mobile phone. Please read this user guide to understand the operation of this device and appreciate its perfect functions and simple operation methods.

This mobile phone is a bar phone designed for GSM/GPRS network (GSM 900/DCS 1800). Besides basic communication functions, it provides you

Dual-SIM

Waterproof (IP 67 standard)

Dustproof (IP 67 standard)

Shockproof

1.3 M camera with continued LED-light

Bluetooth

GPRS service, WAP Browser

Extra-loud hands free function (approx. 90 dB)

LED torch

Extra-long battery life (approx. 400 hrs. standby)

Easy to operate keypad

Micro SD card slot (compatible to micro SD cards up to 2GB capacity)

***GPS** (Optional Function, Please check the Phone Model)

***Digital Compass** (Optional Function, Please check the Phone Model)

***Outdoor Tools like Barometer, barometric Altimeter and Thermometer** (Optional Function, Please check the Phone Model)

This rugged outdoor phone is providing convenience for your work and entertainment. Allow you to understand the operation of the mobile phone completely with this user guide. The rugged mobile phone accords with the GSM Technical Specification and are approved by domestic and foreign authoritative organizations.

The contents of this user guide are subject to changes without prior notices.

3 Safety and Warnings

3.1 Safety Instructions

If your device is lost or stolen, please contact your service provider or a sales agent immediately to restrict your SIM card from being used. This will prevent economic loss caused by unauthorized calls made from your mobile phone. When you contact the service provider or a sales agent, tell them the IMEI number of your mobile phone. Remove the battery to expose the number located on the label on the back of the device. Please copy this number and keep it in a safe place for future use.

In order to avoid the misuse of your mobile phone, please take the following preventative measures:

Set the PIN code of your device's SIM card. This code may prevent the SIM card from unauthorized use.

Please keep the phone out of sight if leaving it in a vehicle. It is best to carry it on or lock it in the trunk.

3.2. Safety Warnings and Precautions

Please read these safety notices before using your mobile phone to assure the safe and proper use of the phone.

3.3. General Notices

Turn off your mobile phone on airplanes, in hospitals and in other places with mobile phone use restricted. Otherwise, the normal operation of electrical equipment and medical instruments will be affected. Please obey local regulations while using your mobile phone.

Obey local laws and regulations with regard to mobile phone use while driving. If you have to talk on the phone while driving, obey the following rules: Concentrate on driving and be aware of traffic conditions; if your mobile phone has a hands-free function, use it in this mode; stop the car before you dial or pick up the phone in case of poor driving conditions.

Obey laws, regulations, and signs when near an area storing fuel, chemicals, or explosive articles.

Keep your device, battery, and charger out of the reach of small children. They may mistake them as tools. This may cause injuries.

In order to prevent damages to your mobile phone, only accessories, such as batteries and chargers, designated by the company may be used with your phone. The use of other batteries or chargers could result in battery leakage, overheating, cracking, fire, or other malfunctions.

Do not use the device near weak signals or precision electronic equipment. Radio wave interference may cause the failure of such electronic equipment and other problems. Special attention must be paid near the following equipment: hearing aids, pacemakers, and other electronic medical equipment, fire detectors, automatic doors, and other automatic control installations. To find out the influence of mobile phones on a pacemaker or other piece of electronic medical equipment, contact the manufacturers or local sales agents of the equipment.

Do not impacts, shake, or throw your device violently, avoiding it from malfunction or a fire.

Do not place the battery, mobile phone, or charger in a microwave oven or high-pressure equipment. This may lead to unexpected accidents such as damage to the circuitry or fire.

Do not use your device near flammable or volatile gases. This could result in failure of the device or a fire.

Do not expose your mobile phone to high temperatures, high humidity, or dusty places. This may cause failure of the device.

Do not place your phone on uneven or unstable surfaces, preventing it from falling and malfunctioning or being damaged.

3.4. Notices about the device

Do not disassemble or modify the mobile phone. This will cause damage to the phone, such as battery leakage or circuitry failure. If needed, please send the device to a professional maintenance point. Nonprofessionals are not allowed to disassemble the device on their own.

Do not subject the LCD to impact or use it to strike things. This could damage the LCD board and cause leakage of the liquid crystal.

There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs, rinse eyes immediately with clean water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

Under very rare circumstances, using the device in certain model cars may negatively affect the internal electronic equipment. In order to assure your safety in such cases, do not use the mobile phone.

If your car is equipped with an airbag, do not place your phone on top of or within the contact area of the airbag in order to avoid seriously hurts towards the driver when the airbag inflates.

Do not use needles, pen tips, or other sharp objects on the keypad. This may damage the mobile phone or cause failures.

Avoid letting the phone come into close contact with magnetic objects such as magnetic cards, as the radiation waves of the mobile phone may erase the information stored on floppy disks, pre-paid phone cards, and credit cards.

Keep small metal objects, like thumbtacks, far away from the receiver. When the speaker is in use, it becomes magnetic and may attract these small metal objects and thus may cause injury or damage the mobile phone.

Keep the device dry and away from water or other liquids. The entering of liquids into the phone could cause short circuit, battery leak, or other failures.

Use the mobile phone in a place away from fixed line telephones, televisions, radios, and automatic office equipment as much as possible to prevent them from being affected.

3.5. Notices about the battery

Do not disassemble or modify the battery. This will cause the battery to leak, overheat, crack, or catch fire.

Do not dispose of old batteries with general domestic garbage. Dispose of them at specified places with specific corresponding rules.

Do not throw batteries into a fire. This could cause the battery to catch fire and explode.

While installing the battery, do not use force or pressure. This could cause the battery to leak, overheat, crack, or catch fire.

Do not short-circuit the battery with metal objects like electrical wire and needles. Do not put the battery and metal objects together.

This may cause the battery to leak, overheat, crack, or catch fire.

Do not solder the contact points of the battery. This will cause the battery to leak, overheat, crack, or catch fire.

If the liquid in the batteries goes into the eyes, there is a risk of blindness. Do not rub the eyes upon this case and immediately rinse eyes with clean water and go to hospital.

Do not use or place the battery near high temperature places, such as a fire or heating vessel. This may cause the battery to leak, overheat, crack, or catch fire.

If the battery overheats, changes in color, or deforms during use, charging, or storage, stop using and replace it with a new one.

If the liquid from the battery contacts skin or clothing, rinse with clean water and seek medical attention immediately if necessary, as this could cause burning of the skin.

If the battery leaks or gives off a strange odor, remove it from the vicinity of the open fire to avoid fire or explosion.

Keep the battery dry. Otherwise, the battery may overheat, smoke, and corrode due to the dampness inside.

Do not use or place batteries in places of high temperature such as in direct sunlight. This could cause the battery to leak and overheat, lowering the performance and shortening the service life.

Do not continuously charge for more than 24 hours.

Place the battery in a cool, shady, and well-ventilated place out of direct sunlight.

The life of all mobile phone batteries is limited. The usable time of batteries decreases with frequent charging. When charging becomes ineffective, this means that the battery is at the end of its service life. Replace it with a new one of the designated type.

3.6. Notices about the charger

Do not disassemble or modify the charger. This may lead to bodily injury, electrical shock, fire, or damage to the charger.

Please use AC 220 volts. The use of any other voltage will cause battery leakage, fire, and damages to the mobile phone and charger.

It is forbidden to short circuit the charger. This could cause electrical shock, smoking, and damage to the charger.

Do not use the charger if the power cord is damaged. This could cause fire or electrical shock.

Clean any dust gathered on the electrical outlet in time.

Do not place vessels with water near the charger in order to avoid water splashing onto the charger and causing an electrical shortage, leakage or other malfunctions.

If the charger contacts water or other liquids, the power must immediately be switched off to avoid a short circuit, fire, electrical shock, or malfunction of the charger.

Do not use the charger in the bathroom or other excessively moist areas. This could cause electrical shock, fire, or damage to the charger.

Do not touch the charger, electrical wire, and power socket with wet hands. This may cause electrical shock.

Do not place heavy objects on or modify the power cord. This may cause electrical shock and fire.

Before cleaning or carrying out maintenance, unplug the charger from the electrical outlet.

While unplugging the charger, hold on to the body of the charger rather than pull on the cord, as pulling on the cord may damage the cord and lead to electrical shock or fire.

Do not charges in high temperature environment like direct sunlight, moist or humid, dusty places or places with excessive vibration, which may cause failure; or near appliances, such as televisions and radios, as the picture and sound effect may be affected.

3.7. Cleaning and maintenance

Do not use the mobile phone, battery, and charger in the bathroom or other excessively moist areas. Avoid them to get wet in the rain as well.

Use a soft and dry cloth to clean the mobile phone, battery, and charger.

Do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone.

A dirty outlet will cause poor electrical contact, loss of power and even inability to

recharge. Please clean regularly.

4 Getting Started

4.1 Removing and installing the battery

The battery owns half electric quantity initially, can be immediately used after unpacking. It performs best after full charge/discharge for the first three times.

4.2 Removing and installing the battery

To Remove the battery, follow the steps below:

- A. Loosen the screws by metal pick, and Remove the battery cover downwards;
- B. Raise the top of the battery;
- C. Take it out from the battery flat.

Warning: Power off the device first or change to assistant battery before taking the SIM card out; otherwise, your SIM card may be damaged.

To install the battery, follow the steps below:

- D. Insert the bottom of the battery into the flat with top metal contact of the battery aligned with that of the flat;
- E. Slide the back cover to the phone until it closes in place.

4.3 Charging the battery

In charging mode, the battery indicator flashes. If the device is switched off during charging, a charging indicator appears on the screen, indicating that the battery is being charged. If the battery is totally discharged, it may take a few minutes before the charging indicator shows.

When the battery is fully charged, the indicator displays full battery and stops scrolling. If your device is turned off, an image indicating that the battery is fully charged appears on the screen. Generally, the charge process takes two and half an hour. During the charge process, your battery, device, and the charger may become warm. This is normal.

When charging is finished, disconnect the AC socket from the charger and your phone.

Note: Please place your phone at the ventilated place with the temperature ranging from -10°C to +55°C. Use the provided charger only. Using unauthorized chargers may cause danger and violate the warranty rules of the phone. If charging causes too high or low temperature, the device warns automatically and charging is stopped, avoiding damages or dangers.

5 Connecting to the network

5.1 SIM card

Please insert a valid SIM (subscriber identity module) card into the phone before use.

Everything about setting connection to the network is saved in the SIM card, together with the information of contacts' names and phone numbers in Phone

Book as well as messages. Do not touch the metal surface of the card in case that information in the card may be lost or destroyed. Keep the card away from electricity and magnetism. This cell phone is dual SIM, one standby.

5.2 Installing and removing the SIM card

Power off your phone; remove the battery; disconnect other outer power sources. Plug an SIM card into the SIM slot.

Please power off your phone and remove the battery before you remove the SIM card.

5.3 Installing and removing the memory card

A. Power off your phone; remove the battery; disconnect other outer power sources.

B. Insert the memory card into the corresponding card slot.

C. Please power off your phone and remove the battery before you remove the memory card.

5.4 Switching on/off the device

Press and hold the End key to power on/off your device. The device will automatically test whether the SIM card is plugged in after power-on. If there is no SIM card, the device will prompt you to "Insert the SIM card". Then, the screen will display the following messages in turn:

Input password—if the password of the phone has been set.

Input PIN—if the password of the SIM card has been set.

Search—the phone starts search signals until a proper network is found and connected.

5.5 Unlocking the SIM card

By setting PIN (personal identification number) code of the SIM card, you can protect your SIM card from illegal use. After this function is activated and the PIN

protection code is set, you have to input the PIN code to unlock the SIM card for regular use every time you power on your phone. Users can clear the code. In this condition, the SIM card cannot be protected from illegal use.

A. Hold the End key to switch on the phone;

B. Input the PIN1 code, press "Clear" to erase the input errors and "Ok" to stop. For example, to set the PIN1 as

"1234", input 1, 2, 3, and 4 in turn; then, press "Ok".

If you enter an incorrect PIN code three times in a row, the network will lock your SIM card and the phone will ask for PUK1 code.

Note: Your network service provider will set a standard PIN code (4-8 digits) for your SIM card. Please change it with your private password soon.

5.6 Unlocking the device

By setting the password of the phone, you can protect your device from illegal use.

After this function is selected, you have to input the password to unlock your phone for regular use. Users can deactivate the phone lock code. In this case, your device may not be protected from illegal use.

A. Hold the End key to switch on the phone;

B. Input the phone password. To clear the error inputs, press "Clear", to end inputting, press "Ok".

For example, if the password is set as "1122", enter 1, 1, 2, and 2 in turn and press "Ok".

If you forget your phone's password, please contact with the dealer or the authorized local customer service center.

5.7 Connecting to the network

After the SIM card is unlocked, the mobile phone will automatically search for the network and the screen displays a searching mark.

Once connected, the name of the network provider appears at the central top of the text and image area. Now you are registered on the network.

Note: The prompt of "SOS" (Emergency call available) shown on the screen indicates that your phone is beyond the network service area or your card is not validated. However, you still can make an emergency call according to the signal strength.

6 Handset Appearance

7 Basic Features

7.1 Making Calls

Once the mark of the network provider appears on the screen, you can make or answer a call. The signal bar on the upper left corner of the screen shows the strength of your phone's connection to the network. The appearance of four bars indicates the strongest signal.

The performance, which can be affected by barriers, may be improved from moving within a small range.

7.2 Making DDD

7.2.1 Enter telephone number-by-number keys.

Press the Call key to make a call. To change a phone number, press the right soft key to clear the number. During dialing, a corresponding animation displays on the screen. Once the other party answers, the screen displays the call status. If the number does not belong to the Phone Book List, the screen of your device only displays the other party's number. Otherwise, the name would be displayed. If the number is saved by your phone, its type (Mobile phone/Home Number/Office Number, i.e.), email, caller picture, and caller group also display on the screen.

7.2.2 Dialing an extension number

For extension number, you have to dial the telephone exchange; then, press * Key to switch in a row until "P" shows on the screen. Now you can call an extension.

Allow you to follow the sequence below to call an extension:

Area code, telephone exchange, extension number, and Call key.

7.3 Making IDD

Press * Key and release it to enter the character "+" which replaces the international access code. This allows you to make a call towards any country without knowing the local international access code, for instance, it is "00" in Germany.

Allow you to follow the sequence below to make an international call: "+", country code, whole telephone number, and Call key.

After inputting the access code, enter your required country code and the complete telephone number. The country code follows the regular practice, such as 49 for Germany, 44 for Great Britain, and 43 for France.

Omit "0" in front of a city code while dialing the number just as you dial the international call.

For instance, to dial the number of Germany Service Hotline from other country, just dial: +49 1805 1188 702

7.4 Dialing the number in the list

All calls you have made or received are saved in the list of Call History. The recently dialed, received, and un-answered numbers are grouped as Calls Dialed, Calls Received, and Calls Un-answered. When the list is full, old numbers will be deleted automatically. To view the list for the following key operations,

A. Press the Call key in standby mode to view all call logs.

B. Allow you to press Call key to dial any number in the list directly.

C. When a number list appears, press Ok to view details. Then, press Option to select an operation like saving the number or delete the number.

7.5 Making an emergency call

As long as the network service is available, which can be checked via viewing the signal strength bar at the bottom left corner of the screen, you can make an emergency call. If your network provider does not provide roaming service in the area, the screen will only display "SOS" (Emergency), indicating that you can make emergency calls only. If you are located in a service area of the network, emergency calls can also be made without an SIM card.

7.6 Answering a call

Press the "Call" key or "Answer" key to answer an incoming call. If an earphone is installed, you can use the key on the earphone to receive a call. For inconveniences, enable the auto answer mode and confirm that the earphone has been installed. Then, your phone will automatically answer an incoming call after the ring or vibration. If "Any Key" in the Answer Mode menu is selected, you can press any key in addition to the End key to receive a call.

7.7 Call history

Your device is able to save information like the recently Un-answered Calls, Received Calls, Dialed Calls, the Last Call Time, Total Sent time, Total Received time.

8 Call options

During a call, press "**Option**" to access the call options or "**H-Free**" to activate hands-free function. To turn off the loud speaker, press the same key. For the operations of call options, refer to that of the function menu.

This feature is only available during a call. Besides, other functions like call waiting and call holding require the support of the network.

Please contact your network supplier.

In the Option, you can select

- **Hold single call**

To pause the current call.

- **End single call**

To end the current call.

- **New Call**

To enter a new interface for you to dial another telephone number.

- **Phone Book**

To access the phonebook menu.

- **Messages**

To access the SMS menu. Because the network service is under use during a call, the SMS function is not available at this time.

- **Sound recorder**

To make a sound record of the dial.

- **Call Background sound**

To make a setting of background sound.

- **Mute**

You can switch on/off. The microphone will be switched off while the Mute option is selected.

- **DTMF**

You can switch on/off. DTMF sound is used to e.g. configure a hotline computer of your bank account or your mailbox. (While DTMF is set to on you can press the numbers on your phones keypad and a sound will be sent to the computer to configure the services.)

9 Multimedia

9.1 Fun & Games

To enter the function to play the games and have a setting of the games. For details about the operation, refer to the corresponding menu.

9.2 Camera

Press the Left Soft key to access the <Camera> function.

In other way, you can also press Option in the preview mode to have the following options: to Photos, Camera Settings, Image Settings,

White balance, Scene mode, Effect Settings, set frame, storage and Restore default.

9.3 Image viewer

By selecting image viewer submenu, it's very convenient for you to view the photo list taken by the camera that are saved in the album, and you can view, edit, browse style, use as, send, Rename, delete, delete all files, sort by, and storage. For using and forward option, you can select to use as to the wallpaper, to Screen saver, to Power on display, to Power off display, caller picture.

9.4 Video recorder

Your phone has Video Recorder function. To enter the Multimedia function, choose Video Recorder to enter.

In the Video Recorder interface, press the middle key to start, press it once again to pause; press right key to stop. Simultaneity, up and down key to adjust the focus; left or right key to have a choose of the EV.

press {option} to enter the submenu

CamCorder Settings: You can have such settings below:

White Balance: to choose Auto, Daylight, Tungsten, Fluorescent, Cloudy, Incandescent, to adjust the lightness of images.

EV: to have a choose of EV.

Night Mode: to turn Night Mode on/off.

Anti-flicker: to have a choose of 50Hz or 60Hz.

Effect Settings: to choose a setting of images.

Storage: to choose phone or memory card.

Restore Default: to have the settings restore default.

9.5 Video player

Select Video Player submenu to access movie list and you can access "Option" for the following operations:

Play: Shift from the player to Video player list to display the video files in the current list.

Use as: to caller video.

Send: as multimedia, via Bluetooth.

Rename: Change the name of the current video file.

Delete: Press it to delete the current video files.

Delete all files: Allow you to delete all video files.

Sort by: Press to sort the video files by name, by type, by time, by size, or none (At random).

Storage: to choose phone or memory card.

9.6 Photo editor

9.6.1 Photo artist

Allow you to select from file, capture from camera, resize image to choose the photo. And then choose auto resize, main LCD clip, manual clip to edit the photo.

Press "Option" for the following operations:

Save as: to choose stored folder and edit filename to save the file.

Send: to choose as multimedia message or via bluetooth.

Add frame: to choose frame for the current photo.

Add icon: to choose icon for the current photo.

Add text: to edit the text and choose the text style for the current photo.

Mirror: to horizontal rotate the current photo.

Rotate: to rotate the current photo.

Add defect: to add masac for the current photo.

Redeye reduction: choosing an area to reduce redeye, it will show the result of processed after selecting done.

Expand canvas: to expand the current to whole canvas.

Undo: to cancel the last step operation.

Exit: to exit photo artist.

Help: to have a check of help.

9.6.2 Image tiles

Allow you to choose 2 image tiles, 4 image tiles, 9 image tiles to edit the image.

9.7 Audio player

In the interface of music broadcaster, use UP/DOWN key to play or stop playing music; Use the 2,8 key to adjust volume; In the interface of music broadcaster, press "options" to access current play list of cell phone. In the Option menu, you can play the music file in the list, view the details, add music into the ring tone database, refresh the play list and set operations.

Specific settings in the setting options of a certain music file:

Pre.play list: to choose phone or memory card.

List auto gen.: Make the switch setting of this option. When this function is set as ON, you can make the operation of "Update Play List" to update the music files in My Music directory in the [File Manager]Memory Card into the play list without manual aid. When this function is set as OFF, you can select the music files in the added file folder in the Option into the play list, move the single music files in the play list and delete all music files in the play list.

For this input method, the keypad is defined as below.

For the keypad definition in English input mode, including Capital English input and Normal English input, refer to the table below. In the column of "Corresponding character or function", the mark ";" works as the division for Smart English ABC and Smart English abc.

When there is no semi-colon, it indicates that the two corresponds to the same characters:

Key name	Description	Corresponding character or function
Number key "0"		0, space
Number key "1"		Symbols
Number key "2"		ABC2; abc2
Number key "3"		DEF3; def3
Number key "4"		GHI4; ghi4
Number key "5"		JKL5; jkl5
Number key "6"		MNO6; mno6
Number key "7"		PQRS7; pqrs7
Number key "8"		TUV8; tuv8
Number key "9"		WXYZ9; wxyz9
* key		Call the symbol input box
# key		Change the input method
Up key		Move the cursor upward
Down key		Move the cursor downward
Left key		Move the cursor leftward
Right key		Move the cursor rightward
Right soft key	Back or Clear	
End key	Return to the standby mode	

18.3.1.1 Using the keypad

For general operations, refer to the part below.

Each key allows you to input more than one character. Press a key repeatedly and fast until your required character shows.

To enter an English punctuation or special symbol, press * key to show the special symbols input box in the English input mode, including capital mode and normal mode.

To change an input method, press # key.

To input a space in English input mode, press Number key "0" once.

To clear one input error, press the Right Soft key. To clear all, press and hold the same key.

18.3.2 Number

Refer to the table below for key definitions in this mode.

For this input method, the keypad is defined as below.

Key name	Corresponding character or function
Number key "1"	1
Number key "2"	2
Number key "3"	3
Number key "4"	4
Number key "5"	5
Number key "6"	6
Number key "7"	7
Number key "8"	8
Number key "9"	9
Number key "0"	0
# key	Change the input method
Up key	Move the cursor upward
Down key	Move the cursor downward
Left key	Move the cursor leftward
Right key	Move the cursor rightward
Left soft key	Ok

Battery or charger is damaged, please replace it;

Some functions cannot be set

Wrong operation;

The network supplier does not support this function or you have not applied for this function.

20 Warranties

This declaration of warranty covers all legal claims. Within the warranty period, all faults will be repaired free of charge or else the unit will be replaced with a new one at no cost if the defect is attributable to a fault in manufacturing or materials.

Excluded from the warranty is any damage due to improper use or due the actions of a third party or force majeure. This also applies to the accessories which are subject to normal wear and tear (batteries etc.). Further claims, such as equalization payments are similarly excluded, even if the damage to the device comes under the warranty.

The mobile phone has undergone rigorous quality control testing. Should you nevertheless still have a problem with the product, please first of all contact with us.
