Legal Information

First English printing, October 2002

Information in this document has been carefully checked for accuracy; however, no guarantee is given to the correctness of the contents. The information in this document is subject to change without notice. We are not liable for any injury or loss that results from the use of this equipment.

Safety Instructions
Please read all of these instructions carefully before you use the device. Save this manual for future reference.

■ Unplug equipment before cleaning. Don't use liquid or spray detergent; use a moist cloth.
■ Keep equipment away from excessive humidity and heat. Preferably, keep it in an air-conditioned environment with temperatures not exceeding 40º Celsius (104º Fahrenheit).
■ When installing, place the equipment on a sturdy, level surface to prevent it from accidentally falling and causing damage to other equipment or injury to persons nearby.
■ When the equipment is in an open position, do not cover, block or in any way obstruct the gap between it and the power supply. Proper air convection is necessary to keep it from overheating.
■ Arrange the equipment's power cord in such a way that others won't trip or fall over it.
■ If you are using a power cord that didn't ship with the equipment, ensure that it is rated for the voltage and current labeled on the equipment's electrical ratings label. The voltage rating on the cord should be higher than the one listed on the equipment's ratings label.
■ Observe all precautions and warnings attached to the equipment.
■ If you don't intend on using the equipment for a long time, disconnect it from the power outlet to prevent being damaged by transient over-voltage.
■ Keep all liquids away from the equipment to minimize the risk of accidental spillage. Liquid spilled on to the power supply or on other hardware may cause damage, fire or electrical shock.
■ Only qualified service personnel should open the chassis. Opening it yourself could damage the equipment and invalidate its warranty.
■ If any part of the equipment becomes damaged or stops functioning, have it checked by qualified service personnel.

What the warranty does not cover

■ Any product, on which the serial number has been defaced, modified or removed.
■ Damage, deterioration or malfunction resulting from:
  ☐ Accident, misuse, neglect, fire, water, lightning, or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
  ☐ Repair or attempted repair by anyone not authorized by us.
  ☐ Any damage of the product due to shipment.
  ☐ Removal or installation of the product.
  ☐ Causes external to the product, such as electric power fluctuation or failure.
  ☐ Use of supplies or parts not meeting our specifications.
  ☐ Normal wear and tear.
  ☐ Any other causes which does not relate to a product defect.
■ Removal, installation, and set-up service charges.

Regulatory Notices Federal Communications Commission (FCC)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

Any changes or modifications made to this equipment may void the user's authority to operate this equipment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
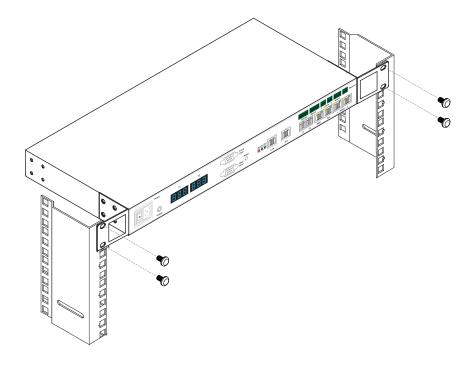

■ Re-position or relocate the receiving antenna.
■ Increase the separation between the equipment and receiver.
■ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Before Installation

■ It is very important to locate the equipment in a suitable environment.

■ The surface for placing and fixing the equipment should be stable and level or mounted into a suitable cabinet.

■ Make sure the place has good ventilation, is out of direct sunlight, away from sources of excessive dust, dirt, heat, water, moisture and vibration.

■ Position the equipment with respect to related facilities.

InfraBox Installation

■ Suggest the installation at the rear top mounting of cabinet

■ M6 screws set not provided.

Content

< 1.1 > Tips for hardware

Prepare a notebook computer

To install IP setup utilities

Start

Configure IP setting

For each InfraBox ONE by ONE

InfraBox installation

Place the rackmount box on the top rear side of the cabinet

Smartcard handle installation

For front & rear door & connect cable to InfraBox

Door sensor installation

Place the sensor to the door corner & connect to the handle

PDU & Fan installation

PDU & Fan daisy chain setting

Sensor & peripheral installation

Connect sensor & peripheral to InfraBox

InfraBox Cascade

Connect InfraBox by daisy chain via Cat5/6 cable

Network setup

Daisy Chain / Star / Mixed connection

Complete

IP Setup for InfraBox

⚠️

Before place the InfraBox to the cabinet, user **MUST** configure the IP setting for the InfraBox. It takes around 1-2 minutes to complete :

1. Prepare a notebook computer to download the | IP setup utilities | from the link below :

    http://www.austin-hughes.com/support/utilities/infrasolutionX/InfraBoxSetup.msi

2. Double click the | InfraBoxSetup.msi | and follow the instruction to complete the utilities installation.

3. Power ON the InfraBox.

4. Go to each InfraBox with the notebook computer & a piece of CAT. 5 / 6 cable to configure the InfraBox as below.

CAT. 5 / 6 cable

To
notebook computer
LAN port

To
InfraBox LAN port
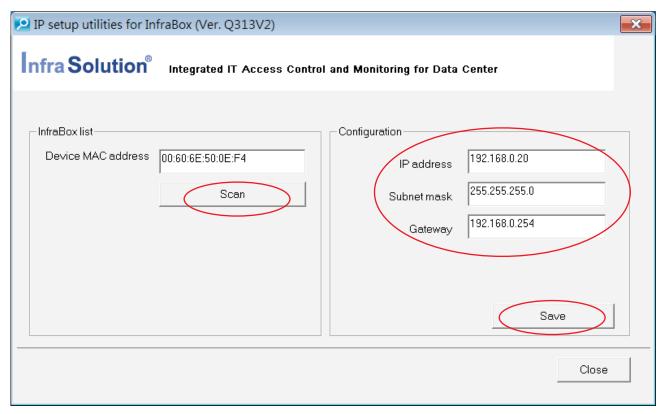

< 2.2 > InfraBox X-1000 / X-2000

IP Setup for InfraBox

⚠️

Write down the new IP address for < 10.2 > MFP - Master Floor Plan

5. Click " **Scan** " to search the connected InfraBox.

6. Change the IP address / Subnet mask / Gateway, then Click " **Save** " to confim the setting of InfraBox.

The default IP address is as below :
IP address: 192.168.0.20
Subnet mask: 255.255.255.0
Gateway: 192.168.0.254
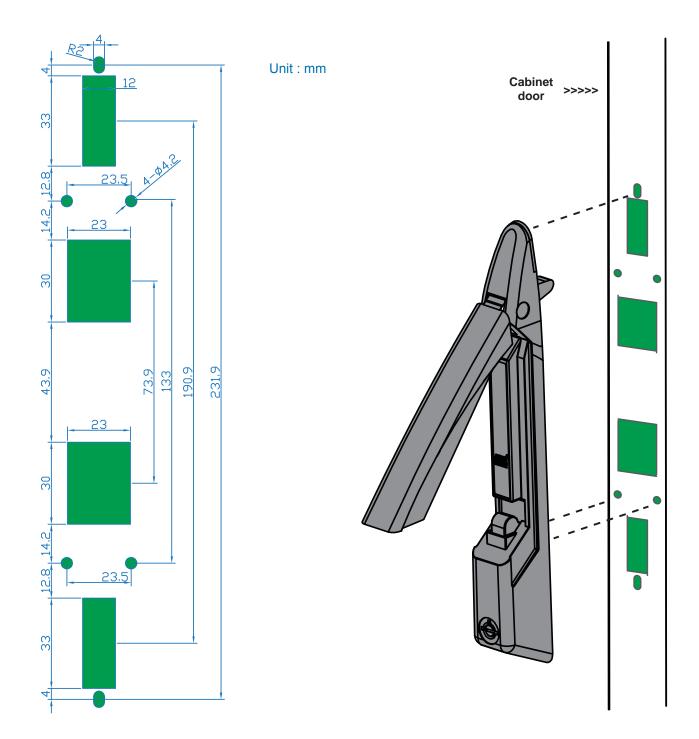

⚠️   **Please take the procedure no. 3 to 6 for all InfraBoxes ONE BY ONE.**

< 2.3 > Handle X-600P / X-600M
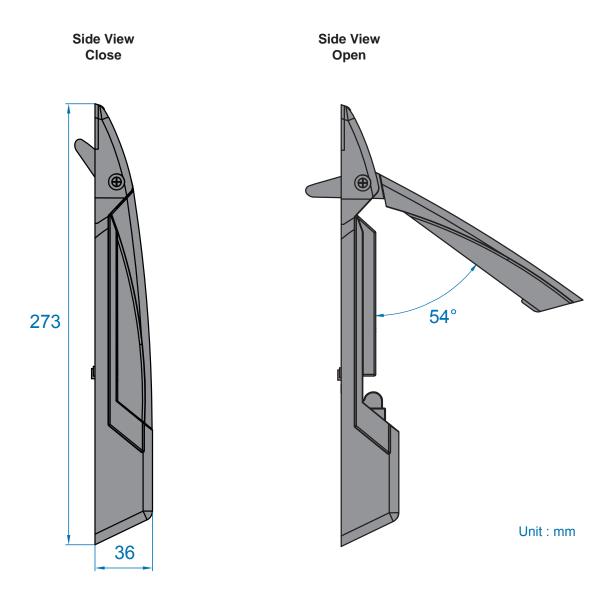

Custom Mounting Cut-out on Cabinet Door for Handle Installation :

⚠️
- It is highly important to make a correct handle mounting cut-out on cabinet door.

- Please **100%** follow the diagram on the below to make the cut-out.

Unit : mm

Cabinet door >>>>>

< 2.3 > Handle X-600P / X-600M

Important Note for Handle
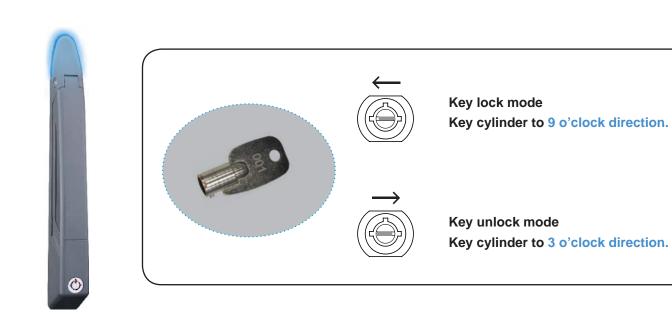

⚠️ • Under Smartcard mode, always keep key cylinder to 12 o'clock direction.

Sensor area

Present the smartcard and touch the handle sensor area for 1 to 2 seconds

SMARTCARD

❌ ⬅️ **Key lock mode**

Key cylinder to 9 o'clock direction
Under key lock mode, even present the smartcard, the handle still keeps locked.

❌ ➡️ **Key unlock mode**

Key cylinder to 3 o'clock direction
Under key unlock mode, the handle keeps unlocked.

✔️ **Smartcard mode** ⚠️

For smartcard operation, keep key cylinder always to 12 o'clock direction.

⚠️

- Unless the smartcard handle is defective, lock / unlock the handle by key is NOT recommended
- Please insert & turn the key with | push force |

Key lock mode
Key cylinder to 9 o'clock direction.

Key unlock mode
Key cylinder to 3 o'clock direction.

Maintenance Key (MK-001)
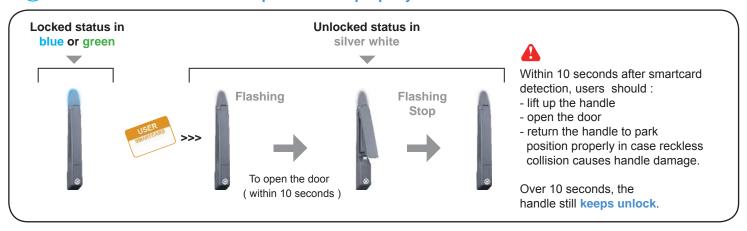

- Improper key usage may cause the cylinder stuck at abnormal direction 1 to 2 o' clock.

- Under this circumstance, the **maintenance key (MK-001)** is required to solve the problem.

- Please insert the **maintenance key** to the cylinder with push force for turning it to normal direction 9 or 12 or 3 o'clock.

< 2.3 > Handle X-600P / X-600M
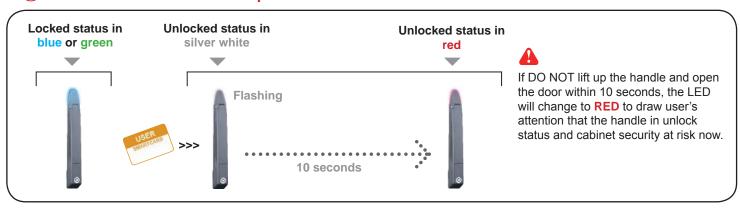

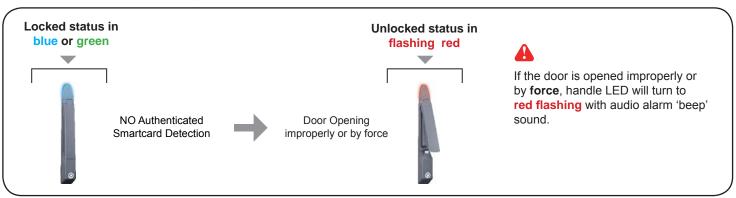

✔ How to unlock the handle & open the door properly

Locked status in **blue** or **green**		Unlocked status in **silver white**	

Flashing

USER SMARTCARD >>>

To open the door (within 10 seconds)

Flashing Stop

⚠ Within 10 seconds after smartcard detection, users should :
- lift up the handle
- open the door
- return the handle to park position properly in case reckless collision causes handle damage.

Over 10 seconds, the handle still **keeps unlock**.

✘ Unlock the handle but NOT open the door

Locked status in **blue** or **green**	Unlocked status in **silver white**	Unlocked status in **red**

Flashing

USER SMARTCARD >>>

. . . .
10 seconds

⚠ If DO NOT lift up the handle and open the door within 10 seconds, the LED will change to **RED** to draw user's attention that the handle in unlock status and cabinet security at risk now.

✘ Unauthorized door-open

Locked status in **blue** or **green**		Unlocked status in **flashing red**

NO Authenticated Smartcard Detection

Door Opening improperly or by force

⚠ If the door is opened improperly or by **force**, handle LED will turn to **red flashing** with audio alarm 'beep' sound.

✔ How to close the door properly

Unlocked status in **silver white**		Locked status in **blue** or **green**

To close the door (within 10 seconds)

⚠ Users should :
- lift up the handle
- close the door
- return the handle to park position properly

Over 10 seconds, the handle will **auto-lock**.
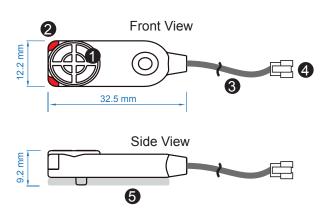

< 2.4 > Door Sensor - Inductive

Inductive Door Sensor, pair (S-DSI)

Features

- light weight / adhesive
- mini size (32.5 x 12.2 x 9.2 mm)
- no custom cutting required on door

Front View

12.2 mm

32.5 mm

Side View

9.2 mm

①	Sensor area
②	Red LED (light up while door opening)
③	2m cable
④	Cable jack (connect to handle)
⑤	2mm adhesive tape

Package content

- Inductive sensor w/ 2m cable x 2
- 2mm adhesive tape x 6

< 2.4 > Door Sensor - Inductive

Installation steps

- connect to the handle
- guide & fix the cable with cable clips (bundle with handle package)
- place the sensor at the top of the door, close to the opening side
- adjust the sensor with adhesive tape to ensure the sensing distance
  between door to frame within 3mm while door in close status

Requirements ⚠
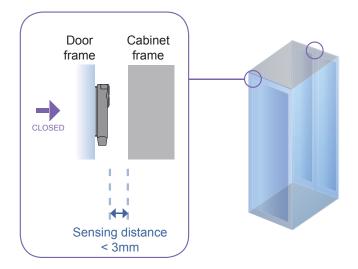

- cabinet frame made of ferrous metal (iron)
- sensing distance 3mm

Suggested
sensor position

Sensor Operation
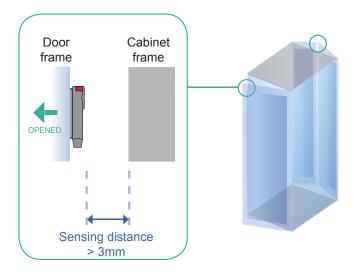

DOOR CLOSE

- close door
- inductive sensor detects the cabinet frame
- DOOR CLOSE SIGNAL sends out

Door frame   Cabinet frame

CLOSED

Sensing distance
< 3mm

DOOR OPEN

- open door
- inductive sensor lose detection with cabinet frame
- Red LED of sensor light up
- DOOR OPEN SIGNAL sends out

Door frame   Cabinet frame

OPENED

Sensing distance
> 3mm
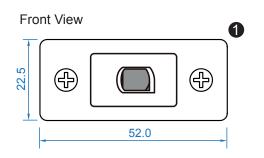

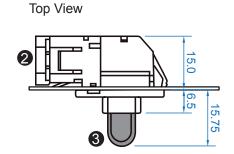

Mechanical Door Sensor （ S-DSW ）
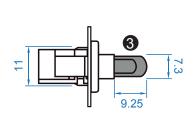

Features

- low cost / precise
- cost efficient integration to new cabinet

unit : mm

Front View   Top View   Side View

❶	Steel mounting plate with 2 screw holes
❷	Cable connector
❸	Press button (total travel distance : 9.25 mm)
	(min. actuation distance : 3.00 mm)

Package content
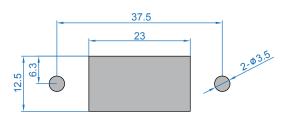

- Mechanical sensor w/ 2m cable x 2
- Mounting screws 6#32x4.5mm x 2

unit : mm

Requirements

- custom hole cutting required on doors
- ordering a sample for custom cutting is highly suggested
- min. actuation distance : 3.00 mm
- total travel distance : 9.25 mm

Dimension of door cutting hole
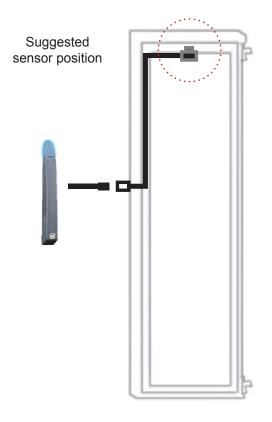

- circle hole x 2 for screw mounting
- rectangle hole x 1 for sensor installation

< 2.4 > **Door Sensor** - Mechanical

Installation steps
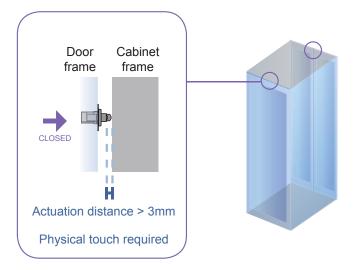

- connect to the handle
- place the sensor at the top middle of the door
- install the sensor in the custom hole
- secure it with bundled mounting screws 6#32x4.5mm x 2

Suggested
sensor position

Sensor Operation
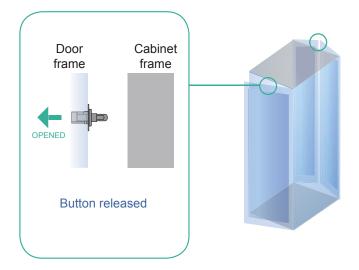

DOOR CLOSE

- close door
- Sensor button is pressed on
- DOOR CLOSE SIGNAL sends out

Door frame   Cabinet frame

CLOSED

Actuation distance > 3mm

Physical touch required

DOOR OPEN

- open door
- Sensor button is released
- DOOR OPEN SIGNAL sends out

Door frame   Cabinet frame

OPENED

< 4.2 >   Smoke Sensor

Smoke sensor comes with a RED LED. When smoke alarm triggers, the RED LED lights on with beep sound continuously.

		Smoke Sensor
Part no.		**IG-S01-1M**

Sensitivity	Smoke sensitivity	0.15 ~ 0.3 dB/m

Alarm Output	Solid State Relay	24VDC@1A
	Alarm LED	Red
	Audio Alarm	80 dB
	Audio Alarm Pattern	Continuous beeps

Power Requirement	Voltage	12VDC, powered by sensor port
	Current Consumption	200uA
	Power ON LED	Red LED flashes every 6 seconds

Housing	Chassis & Cover	ABS plastic
	Color	Ivory White

Connection	Cable Length	1m / 3m (option)

Environmental	Operating	-5 to 50°C Degree
	Storage	-10 to 60°C Degree
	Humidity	5~90%, non-condensing

Dimensions	Product	103L x 103W x 55H mm

Weight	Net	165g

Supply includes	1	Smoke Sensor with 1m cable

Compatibility:	InfraSolution	X-2000 series
	InfraGuard	EC-300M & EC-300

Safety Regulatory	FCC & CE certified

Environmental	RoHS2 & REACH compliant by SGS

< 4.3 >   Shock Sensor

Shock sensor comes with a RED LED. When shock alarm triggers, the RED LED lights on continuously.

		Shock Sensor
Part no.		**IG-V01-1M**

Sensitivity	Detection radius	3.5 m
	Adjustable sensitivity	Internal micro knob with screwdriver cross slot

Alarm Output	Solid State Relay	12VDC@100mA
	Alarm hold time	Approx. 2.0 sec.
	Alarm LED	Red

Power Requirement	Voltage	12VDC, powered by sensor port
	Current Consumption	15mA
	Power consumption	0.18 Watt

Housing	Chassis & Cover	ABS plastic
	Color	White

Connection	Cable Length	1m / 3m (option)

Environmental	Operating	-5 to 55°C Degree
	Storage	-10 to 60°C Degree
	Humidity	5~90%, non-condensing

Dimensions	Product	26 x 85 x 24 mm

Weight	Net	40g

Supply includes	1	Shock Sensor with 1m cable

Compatibility	InfraSolution	X-2000 series
	InfraGuard	EC-300M & EC-300

Safety Regulatory	FCC & CE certified

Environmental	RoHS2 & REACH compliant by SGS

< 4.4 > Water Sensor

		Water Sensor
Part no.		**IG-W01-3M**

	Measurement Range	Wet or Dry (-20°C to 60°C)
	Rope Sensor Length	5m

Power Requirement	Voltage	5VDC, powered by sensor port
	Power consumption	125 mWatt

Connection	Extension cable length	3m (non-detection)

Environmental	Operating	-20 to 60°C Degree
	Storage	-20 to 80°C Degree

Weight	Net	450g (Sensor & extension cable)

Supply includes	1	Rope water sensor
	2	Extension cable

Compatibility	InfraSolution	X-2000 series
	InfraGuard	EC-300M & EC-300

Safety Regulatory	FCC & CE certified

Environmental	RoHS2 & REACH compliant by SGS

< 4.5 > LED Light Bar

Under InfraSolution X software, the LED light bar can be enabled / disabled / always ON.
When the LED light bar is enabled & connected, it will be ON within 10 seconds after the handle lock is released.

		LED Light Bar
Part no.		**CLB-IX-002-2M**

Light	Color	Cool White
	Output	250 Lumens
	Color Temperature	5600-7000K
	Number of LED	18 High Output CREE SMD LED
	Life Expectancy	30,000 hrs

Power Requirement	Voltage	12VDC, powered by sensor port
	Current Consumption	0.375A
	Power consumption	4.5 Watt

Housing	Chassis	Extruded aluminum with silver powder coat
	Diffuser	Acrylic with milky white
	Installation	Magnetic base for unrestricted installation

Connection	Cable Length	2m / 3m (option)

Environmental	Operating	-20 to 50°C Degree
	Storage	-20 to 60°C Degree
	Relative Humidity	5~90%, non-condensing

Dimensions	Product	300L x 20W x 12H mm

Weight	Net	84g

Compatibility	InfraSolution	X-2000 series
	InfraGuard	EC-300M & EC-300

Safety Regulatory	FCC & CE certified

Environmental	RoHS2 & REACH compliant by SGS

< 4.6 >   LED Beacon

The LED Beacon can be stuck firmly by the bundled adhesive tape.

|		LED Beacon
Part no.		**IG-FB03-1M**

Notification	Len Color	Blue
	Light Source	White
	Flash Rate	120 flashes per minute

Power Requirement	Voltage	12VDC, powered by sensor port
	Current Consumption	0.175A

Housing	Cover Len	Polycarbonate
	Color	Blue

Connection	Cable Length	1m / 3m

Environmental	Operating	-20 to 50°C Degree
	Storage	-20 to 60°C Degree
	Relative Humidity	5~90%, non-condensing

Dimensions	Product	72L x 72W x 45H mm

Weight	Net	50g

Supply includes	1	LED Beacon with 1m cable

Compatibility	InfraSolution	X-2000 series
	InfraGuard	EC-300M & EC-300

Safety Regulatory	FCC & CE certified

|	
Environmental	RoHS2 & REACH compliant by SGS

Network Connection

InfraSolution X provides 3 connection ways - **Daisy Chain**, **Star** , **Mixed**.
Which connection applied is subject to the site scale, environment and users' requirements.

< 5.1 > Daisy Chain   Connect all InfraBoxes by Cat5/6 cable, and no any network switch required

Key Benefits

- Simple connection
- No network switch required
- Appropriate for small networks

Client PCs

Management
PC

⚠

Quantity of InfraBox / Cabinet : Up to 50

Total distance in a single daisy chain : Up to 100M

< 5.2 > Star   Connect to network switch by a point-to-point connection

Key Benefits

- Appropriate for large networks
- Increased fault tolerance
- Easy for troubleshooting

Network
Switch

Client PCs

Management
PC

⚠

Network switch required

Total distance for each InfraBox to Network Switch : Up to 100M

Network Connection
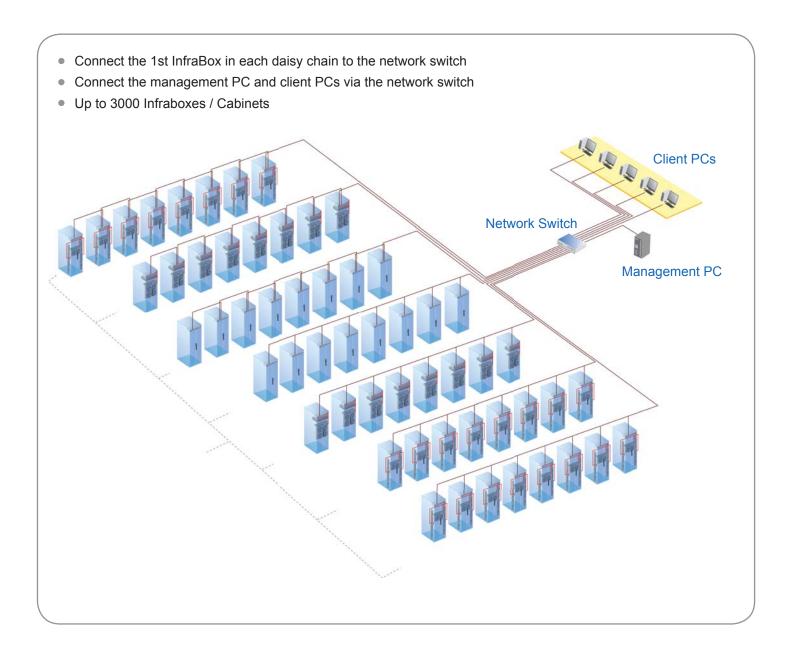

< 5.3 > Mixed   Combining daisy chain with star connection

Key Benefits

- Most effective and practical for large scale of networks
- Take all advantages of Daisy Chain and Star connection
- Flexible to meet a variety of network environments and needs

Up to 50 in each row

Client PCs

Up to 50 in each row

Network
Switch

Management
PC

⚠

Total InfraBox Qty in Mixed Network : Up to 3000

Application

< 6.1 > Data Center
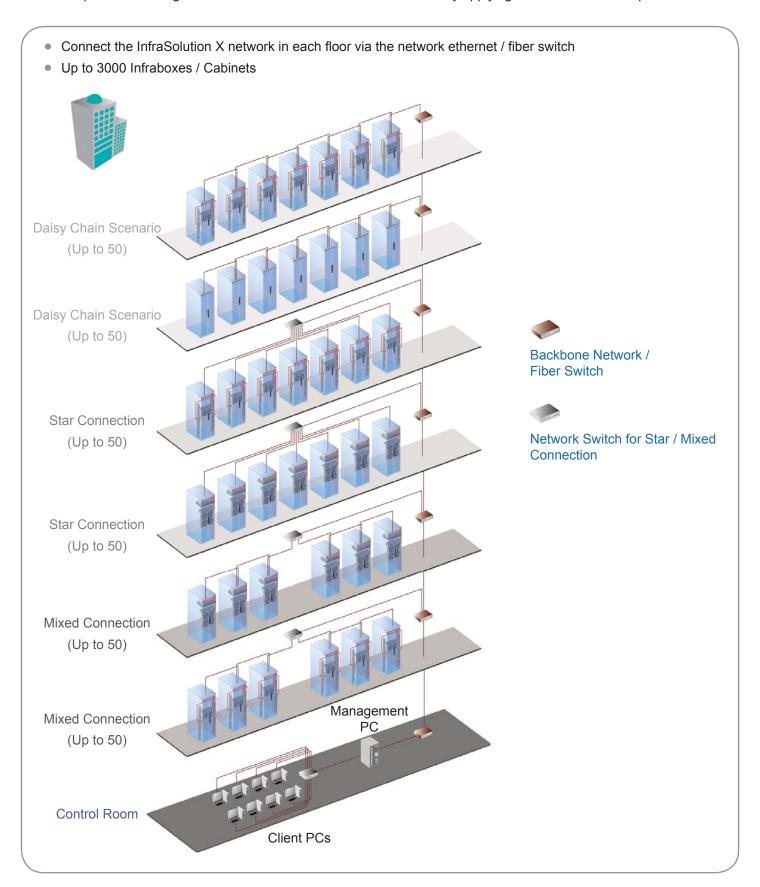

By mixed connection, InfraSolution X can be scalable up to 3000 cabinets. X-2000 and X-1000 InfraBoxes can be coexisted in the same network. Users are enabled to manage and remotely access all cabinets under a centralized and user friendly GUI.
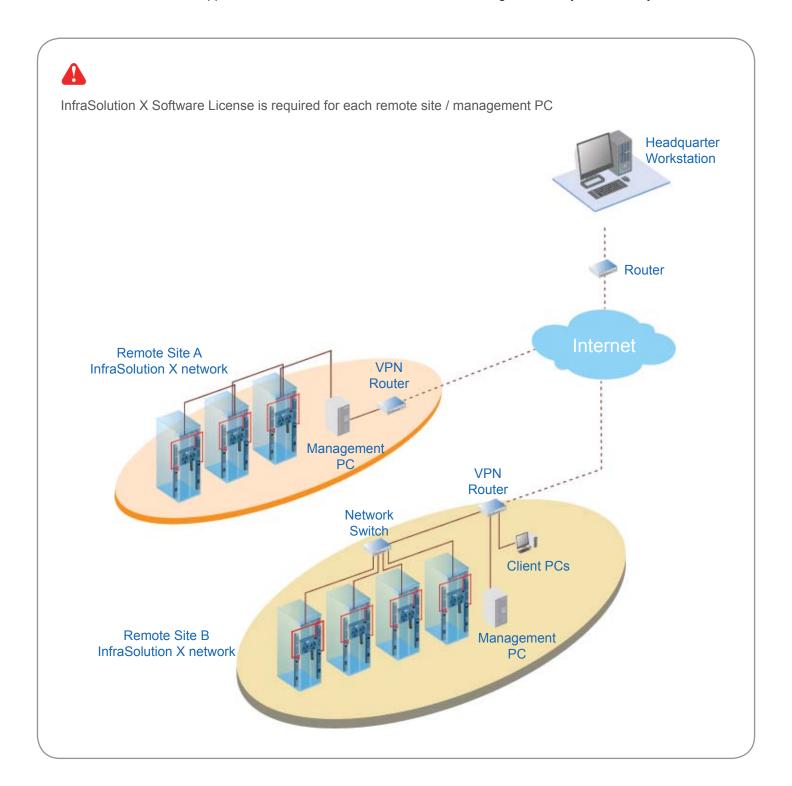

- Connect the 1st InfraBox in each daisy chain to the network switch
- Connect the management PC and client PCs via the network switch
- Up to 3000 Infraboxes / Cabinets

Client PCs

Network Switch

Management PC

< 6.2 > Intelligent Building

It is essential for a Multi-Storey Intelligent Building to be applied with a centralized management system for the building's mechanical and electrical equipment such as security, power, ventilation, and lighting systems, etc.

InfraSolution X system allows equipment to be distributed throughout a building simply by deploying an Ethernet network. To keep capital costs down, InfraSolution X can also be cascaded between boxes up to 100m over a Cat5/6 cable. Signal weakness problem for long distance between InfraBoxes can be solved by applying network hubs with repeater function.
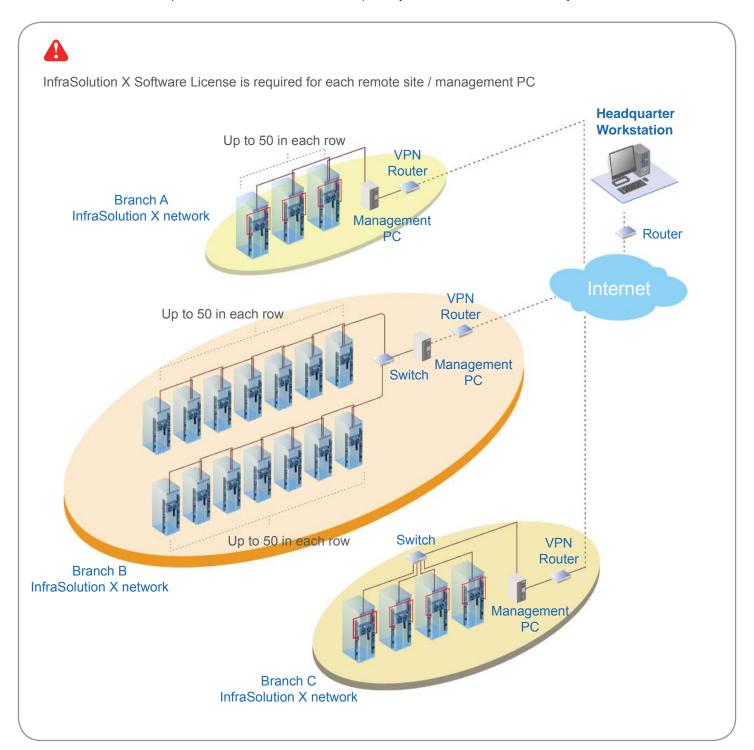

- Connect the InfraSolution X network in each floor via the network ethernet / fiber switch
- Up to 3000 Infraboxes / Cabinets

< 6.3 > Remote Site

InfraSolution X can be also applied to the remote site for access and monitoring over IP anytime and anywhere.

⚠️

InfraSolution X Software License is required for each remote site / management PC

< 6.4 > Branches

For a global or scalable company, it is vital to remote access and monitor the network of their nationwide and worldwide branches. InfraSolution X provides an ideal solution to keep an eye on cabinet access security and environmental condition.

⚠ InfraSolution X Software License is required for each remote site / management PC

< 7.1 > Tips for System Setup

Start

Prepare a management PC

- Install Java SE 6 / 7
- Install Mircosoft Visual C++ 2008
  SP1 Redistributable Package

Software installation

- Disable firewall
- Install InfraSolution X manager
- Reboot management PC

Remote Access Setting

- Enable firewall
- Set incoming port
- Set outgoing port

Software activation

- Activate InfraSolution X manager

MFP - Master Floor Plan

- Create MFP
- Add cabinet
- Configure cabinet IP setting

CA - Control Area

- Create CA
- Load cabinet

User Setup

- Create user

Group Setup

- Create user group

System Setup

- Alarm / email server / temp. unit
- Door opening overdue setting
- Time rule
- Backup & restore

Complete

< 8.1 > Key Word

MFP - Master Floor Plan

- An actual cabinet floor plan.
- Only in MFP, you can create cabinet & configure the IP setting for the cabinet.
- If you want to monitor & control cabinets & their devices, you need to build the control area.
- MFP can be more than one. No. of MFP is subject to the site scale & plan by floor, zone, building, branches
  or remote sites.

CA Loading

- There is a button in MFP - CA Loading. It is to provide a quick and efficient path for the user to move cabinet
  to build the control area.

CA - Control Area

- You can build a Control Area for some specific cabinets which you want to monitor, configure & control.
- All cabinets in the CA should be loaded from the MFP by CA Loading button.
- CA can be more than one. How many CA is subject to your plan.
- CA has 2 modes : Edit mode & View mode.
- Under Edit mode, you can configure not only cabinets but also devices such as PDU, fan unit & sensors.
- View mode is designed for users with limited authority so they can ONLY monitor the status of cabinet & device.

User Setup

- To build a user list. Afterward, you can use the list to build the user group.
- Each user has his own login name & password for remote system login.
- Each user also has his own smartcard for cabinet access.
- However, before users join a user group in next step, they can do nothing.

User Group

- You can form a user group from the user list.
- You can define the user group with authority and which control area / areas to monitor & access.
- Each user subordinated to ONLY ONE user group.
- If the user wants to join another user group, a new login name, password & smartcard MUST BE assigned.
- Each user group must select ONE time rule. All group users can access the cabinet and remote system login
  according to the time period of the selected time rule.
- Without time rule assignment, all group users can do nothing.
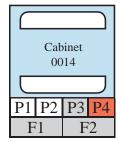

Time Rule

- Time rule is designed for security. It tries to restrict the users with a time period to access the system and cabinet.
- In system setup section < 11.5 >, you can set time rules up to 32.
- Afterward, all time rules will be shown in user group for their selection.
- Only one time rule can be assigned to one user group.

# < 8.1 > Cabinet Icon

Cabinet Icon layer

Cabinet icon has two layers, the layer one by default shows on all control area <u>under view mode</u> for status monitoring. User can click cabinet icon to switch to layer two.

Layer one

Cabinet 0014	- show PDU status (**P1**, **P2**, **P3**, **P4**) - if PDU is enabled & connected, **P** icon in WHITE color - if PDU is enabled BUT disconnected, **P** icon in RED color - if PDU is on alarm status, **P** icon also in RED color - if PDU is disabled, **P** icon in GREY color
P1 P2 P3 P4 F1 F2	- show Fan unit status (**F1**, **F2**) - if Fan unit is enabled & connected, **F** icon in WHITE color - if Fan unit is enabled BUT disconnected, **F** icon in RED color - if Fan unit is on alarm status, **F** icon also in RED color - if Fan unit is disabled, **F** icon in GREY color

Layer two
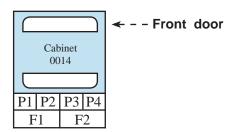

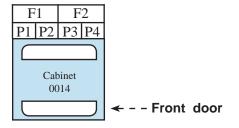

|	
Cabinet 0014	- show TH sensor status (**S1**, **S2**) - if TH sensor is enabled & connected, **S1**, **S2** icon in WHITE color - if TH sensor is enabled BUT disconnected, **S1**, **S2** icon in RED color - if TH sensor is on alarm status, **S1**, **S2** icon also in RED color - if TH sensor is disabled, **S1**, **S2** icon in GREY color
S1 S2 S3 S4 S5 S6	- show smoke & shock sensor status (**S3**, **S4**) - if smoke & shock sensor is enabled & connected, **S3**, **S4** icon in WHITE color - if smoke & shock sensor is on alarm status, **S3**, **S4** icon also in RED color - if smoke & shock sensor is disabled, **S3**, **S4** icon in GREY color
	- show water sensor status (**S5**, **S6**) - if water sensor is enabled & connected, **S5**, **S6** icon in WHITE color - if water sensor is on alarm status, **S5**, **S6** icon also in RED color - if water sensor is disabled, **S5**, **S6** icon in GREY color

Software Installation & Activation

< 9.1 >   Key Features

InfraSolution X Manager X-ISM is a LICENSED cabinet management software to monitor up to 3000 cabinets remotely.
Each InfraBox connects a pair of smartcard handles to secure the cabinet access control.

Each InfraBox can also connect a variety of sensors to provide an environmental monitoring solution.

To enhance the functionality, up to 12000 x kWh PDU / 6000 x Fan Unit can be monitored through InfraSolution X Manager as well.

Up to 100 concurrent users can access the management software remotely to achieve the demand of multi-user / multi-tasking in nowadays' time sharing data center operation.

< 9.3 > Management PC & Client PC Requirement

Management PC requirement

Management PC requirement is highly related to the no. of cabinet. Please refer to the table below :

No. of Cabinet	Processor	Memory	Hard Disk	LCD Resolution	No. of days log file kept in database
2 - 200	Quad Core Xeon x 1	4GB	1TB x 2	1660 x 1200, 1600 x 900, 1920 x 1080	31
201 - 500	Quad Core Xeon x 1	8GB	1TB x 2	1660 x 1200, 1600 x 900, 1920 x 1080	31
501 - 1000	Quad Core Xeon x 1	16GB	2TB x 4	1660 x 1200, 1600 x 900, 1920 x 1080	15
Over 1000	Quad Core Xeon x 2	32GB	4TB x 4	1660 x 1200, 1600 x 900, 1920 x 1080	7

⚠️

- The default service port of web server is 80.

- A dedicated PC to run InfraSolution X Manager X- ISM is recommended.

- If the PC is a notebook computer, the power adapter MUST be plugged in & power ON.

- Make sure the management PC is POWER ON & X-ISM is under operation.

   Otherwise, daily data backup will NOT be proceeded.

⚠️

To legally access Microsoft server software, a Client Access License (CAL) may be required.

For more information, please visit the link below :

http://www.microsoft.com/licensing/about-licensing/client-access-license.aspx

Client PC requirement

Processor	Memory	Hard Disk	LCD Resolution
Dual Core x 1	2GB	500GB	1660 x 1200, 1600 x 900, 1920 x 1080

**For better view of cabinet status, an appropriate LCD size is necessary.
Please refer to the table below :**

No. of Cabinet in CA	Preferred LCD Size
2 - 100	21" (1920 x 1080)
101 to 300	46” (1920 x 1080)

< 9.4 >   OS Platform & Web Browser

OS platform

< 10.3 > CA - Control Area

Edit CA

1. In **< CA – Edit Mode >**, select the CA you want to edit

2. Click " **Edit** "

3. Edit the CA title / Description

4. Click " **OK** " to finish

Edit Control Area

CA Title:	Zone A ABC Company
CA Description:	37/F Data Centre 01

OK   Cancel

Delete CA

1. In **< CA – Edit Mode >**, select the CA you want to delete & Click " **Delete** "

2. Click " **Yes** " in the confirmation window

3. Input login password in validation window to confirm CA deletion

Remove Cabinet from CA
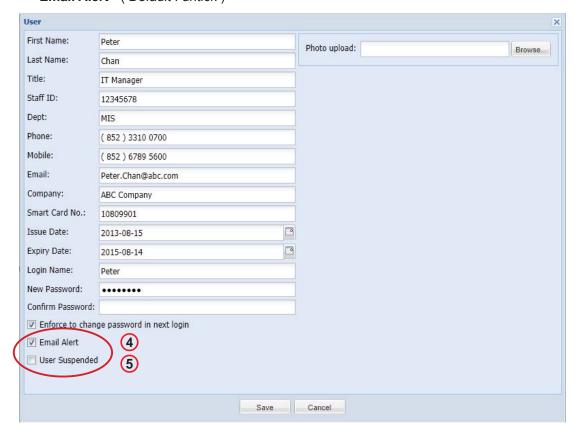

Cabinet removal from CA

1. In **< CA – Edit Mode >**, select the CA you want the cabinet(s) to be removed

2. Select the cabinet(s)

3. Click " ❌ "

4. Click " **Yes** " in the confirmation window to confirm the cabinet removal

< 10.4 > User Setup

- To build a user list. Afterward, you can use the list to build the user group.
- Each user has his own login name & password for remote system login.
- Each user also has his own smartcard for cabinet access.
- However, before users join a user group in next step, they can do nothing.

Add User

1. Click " **User Setup** " tab

2. Click " **Add** "

3. In the user window, please input all the fields.

4. If you want to receive device alarm email, tick
   " **Email Alert** " (Default : untick)

5. If you want to suspend the user authority and access temporarily, tick " **User Suspended** " (Default : untick)

6. Then click " **Save** " to finish

Edit User

1. Select the user you want to edit

2. Click " **Edit** " in " **User Details** " window

3. Edit the field (s) you want

4. Click " **Save** " & Click " **Yes** " in the confirmation window to confirm user edition.

Delete User

1. Select the user you want to delete

2. Click " **Delete** " in " **User Details** " window & Click " **Yes** " in the warning window to confirm user deletion
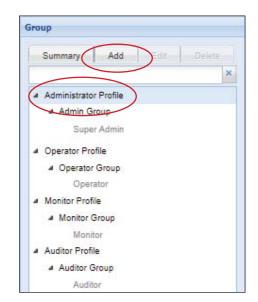

< 10.5 > Group Setup

- You can form a user group from the user list.
- You can define the user group with authority and which control area / areas to monitor & access.
- Each user subordinated to ONLY ONE user group.
- If the user wants to join another user group, a new login name, password & smartcard MUST BE assigned.
- Each user group must select ONE time rule. All group users can access the cabinet and remote system login according to the time period of the selected time rule.
- Without time rule assignment, all group users can do nothing.
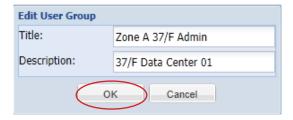

Add group

1. Select the Group Profile where a group you want to add

2. Click " **Add** "

3. Input the Group Title & Description (min. 1 char / max. 32 char)
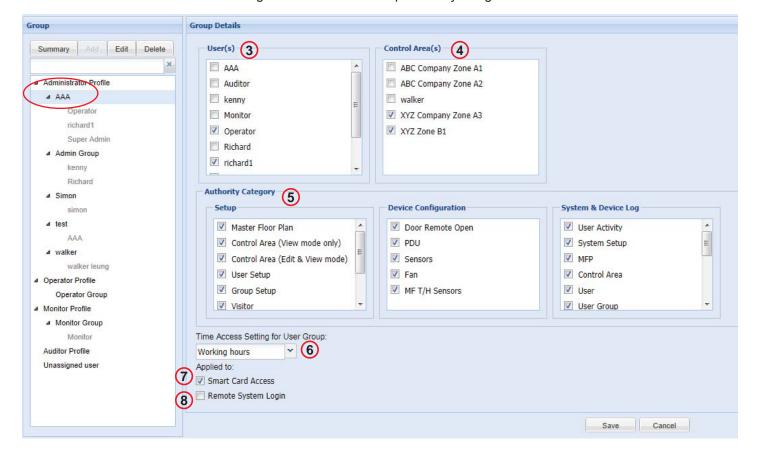

4. Click " **OK** " to finish

Edit group

1. Select the group title you want to edit

2. Click " **Edit** "

3. Edit the Title / Description

4. Click " **OK** " to finish

Assign group authority

To assign authority to User group, please take the steps below :

1. Select the group

2. Click " **Edit** "

3. Tick the user(s) you want to assign to the group

4. Tick the Control Area(s) you want the group to control & monitor

5. Assign appropriate " **Setup** " , " **Device Configuration** " , " **System & Device Log** " authority to the group

6. Select one of the time rule in " **Time Access Setting for User Group:** "

7. ⚠ Tick " **SmartCard Access** ", otherwise the group user CANNOT access the cabinets by smartcard
   (Default : untick)

8. ⚠ If you want the group user can NOT access the software out of the time rule,
   please tick " **Remote System Login** "
   (Default : untick)

9. Click " **Save** " & " **Yes** " in the warning window to finish Group authority assignment

Delete group

1. Select the group you want to delete
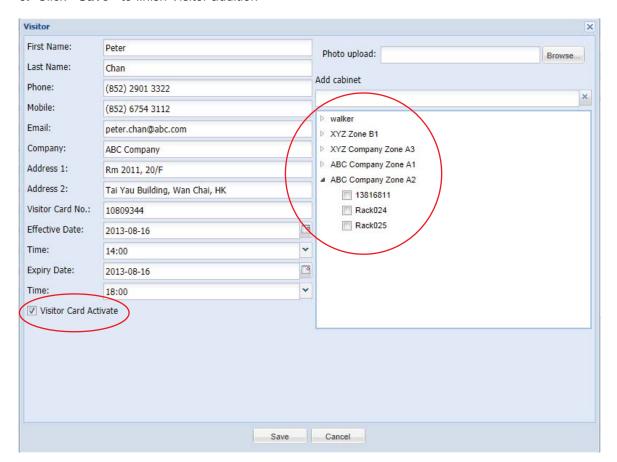

2. Click " **Delete** " & Click " **Yes** " to finish.

⚠ The deleted group's users will be moved to the unassigned user list simultaneously.

< 10.6 > Visitor

Add Visitor

1. Go to " **Visitor** " tab

2. Click " **Add** "

3. Input all the fields in the following window

4. Tick the cabinet(s) to allow visitor to access by smartcard

5. Tick " **Visitor Card Activate** " to activate the smartcard to access the cabinets under a specific time period

6. Click " **Save** " to finish Visitor addition

Edit Visitor

1. Select the visitor you want to edit

2. Click " **Edi**t " in " **Visitor Details** " window

3. Edit the field(s) you want
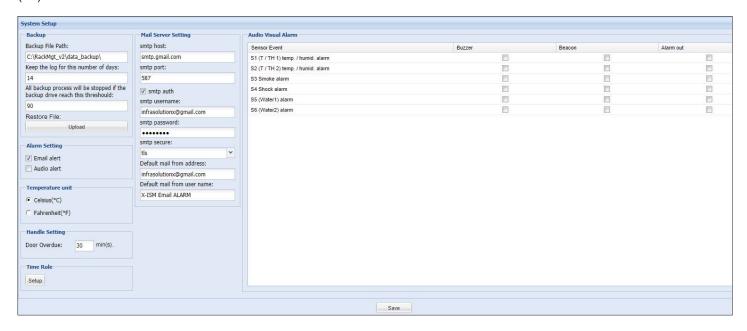

4. Click " **Save** " & Click " **Yes** " to finish

Delete Visitor

1. Select the visitor you want to delete

2. Click " **Delete** " in " **Visitor Details** " window & Click " **Yes** " to finish

System Setup

In System Setup tab, it provides the following settings which apply to the whole system.

（1）Backup & Restore

（2）Alarm Setting, Mail Server Setting, Audio Visual Alarm

（3）Temperature unit

（4）Door opening overdue setting

（5）Time Rule

< 11.1 > Backup & Restore

Backup

You can set
- the backup path of device configuration & system setting
- the time period the system & event log kept in the system
- the drive space used in term of percentage before the backup process STOP

Backup

Backup File Path:

C:\RackMgt_v2\data_backup\

Keep the log for this number of days:

14

All backup process will be stopped if the backup drive reach this threshould:

90

⚠️ Those event log over the defined time period will be saved as CSV format which located at " **Backup File Path** " *logbackdist* folder

The system setup backup file will be saved in the " **Backup File Path** " *sysbackdist* folder

Restore   ⚠️ Restore MUST BE done at the management PC side NOT client side

1. Click " **Upload** " button

Restore File:

Upload

⬇
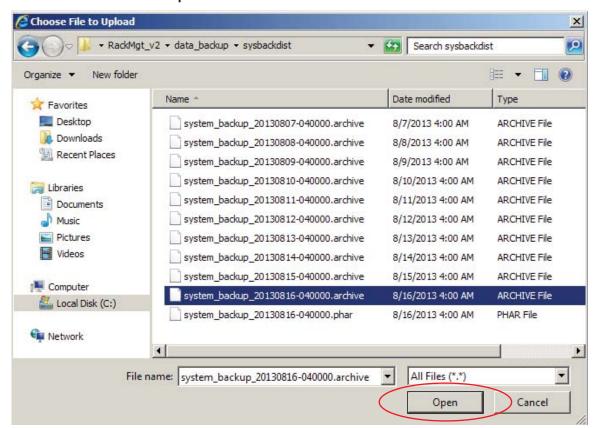

2. Click " **Browse** " to select the file you want to restore

Backup & Restore

This will reset your System Setup Setting back to setting of restore file.

NOTE:

This will take a few moments. Please **DO NOT** close the browser until the process had been completed.

Restore File: Select file [ ]   Browse....

Submit

⬇

3. Select the file & Click " **Open** "

4. Click " **Submit** " to start to restore. When restore is completed, " **Restore succeeded** "
will be displayed in the web page

 • • • • • • • • • **Complete**

⚠ After system restore, users need to activate the software again
if the backup file is from a different management PC

# < 11.2 > Alarm Setting / Mail Server Setting / Audio visual Alarm

Alarm Setting

System will send out device alarm email to user if enable " Email Alert "

Alarm Setting

☑ Email alert

☐ Audio alert

Default : Untick

Mail Server Setting

It is used to setup the sender account to send out the device alarm email to the user

Mail Server Setting

smtp host:

smtp.gmail.com

smtp port:

Default mail from address:

infrasolutionx@gmail.com

Default mail from user name:

X-ISM Email ALARM

Audio Visual Alarm

Enable or disable " **Buzzer** " , " **Beacon** " & " **Alarm out** ".
By this setting, all sensors under alarm status WILL or WILL NOT trigger audio visual alarm accordingly.

Audio Visual Alarm

Sensor Event	Buzzer	Beacon	Alarm out
S1 (T / TH 1) temp. / humid. alarm	☐	☐	☐
S2 (T / TH 2) temp. / humid. alarm	☐	☐	☐
S3 Smoke alarm	☐	☐	☐
S4 Shock alarm	☐	☐	☐
S5 (Water1) alarm	☐	☐	☐
S6 (Water2) alarm	☐	☐	☐

< 11.3 > Temperature unit

Select the temperature unit °C / °F displaying in the system

Temperature unit
- Celsius(°C)
- Fahrenheit(°F)

Default : Celsius

< 11.4 > Door Opening Overdue Setting

Set the door opening overdue time after the cabinet door is open.
When time overdue, user can view overdue timing with mins in cabinet icon.

Handle Setting

Door Overdue: 30 min(s).

Default : 2 mins
(Min. 1 min / max. 9999 mins).

< 11.5 > Time Rule

- Time rule is designed for security. It tries to restrict the users with a time period to access the system and cabinet.
- In this section, you can set time rules up to 32.
- Afterward, all time rules will be shown in user group for their selection.
- Only one time rule can be assigned to one user group.

1. Click " **Setup** " under time rule section

2. Select time rule no. (1 - 32)

3. Edit the " **Time Rule Name** "

4. Tick the time slot to set date-time period & weekday for the time rule

5. Click " **Save** " to finish

6. Repeat step 2 to 5 for other time rules

Operation & Usage

< 12.1 > Individual Cabinet Devices Enable & Disable

Enter **CA – Edit Mode** to enable / disable individual cabinet sensor & device :
- TH Sensors / Sensors / PDU / Fan

**1.** Double click the cabinet icon & show the window below

2. Click " **Edit** " in T / H pane

**3.** Disable if no TH sensors connection (default : disable)
      OR
     Enable if TH sensor connected and set alarm level

4. Click " **Apply** " to finish

< 12.1 > Individual Cabinet Devices Enable & Disable

5. Click " **Edit** " in Sensors pane

6. Disable if no sensors connection (default : disable)
      OR
   Enable if sensor connected

7. Click " **Apply** " to finish

8. In PDU pane**,** disable if no PDU connection (default : disable)
      OR
   Enable if PDU connected

9. In Fan pane**,** disable if no Fan connection (default : disable)
      OR
   Enable if Fan connected

**10.** Click " **Save** " to finish the PDU & Fan section

⚠ When enable or disable PDU & fan,
   the InfraBox will reboot to make the changes effective
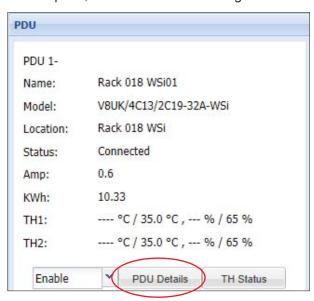

< 12.2 > Individual Cabinet Door Open by Remote

In Door pane, you can proceed
- door open by remote
- view the record of last door open & close record

< 12.4 > Individual Cabinet Fan Unit Configuration & Control

In Fan pane, Double Click " **Fan Details** " to go to Fan Details page

In " **Fan Details** " , you can
- Change " **Name** " & " **Position** " of Fan unit
- Change " **Unit CFM** "
- Click " **Save**" to finish
- Switch ON / OFF Fan unit

In Fan pane, Double Click " **Temp Settings** " to go to Temp Settings page.
You can
- Activate / Deactivate Temp. sensor
- Change " Position " of Temp. sensor
- Enable / Disable Auto CFM Control
- Change the " **Alarm** " of Temp. sensor
- Click " **Save** " to finish

< 12.5 > Console Message

In the bottom side of the web page, you can view the console message pane.
All action related to the cabinet doors will be shown in this area.

To collapse and hide the console message pane, Click

To expand and display the console message pane , Click
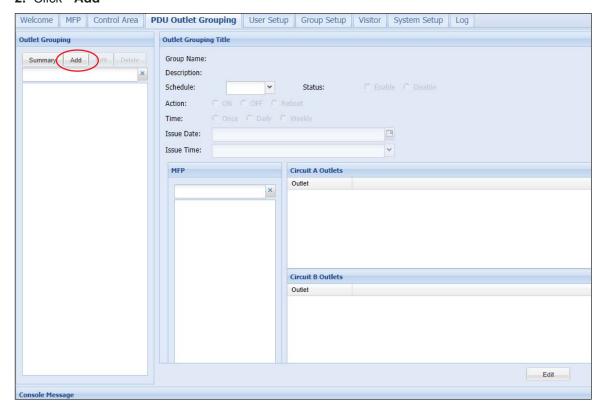

< 12.6 > PDU Outlet Grouping

PDU Outlet Grouping is a feature which you can assign different PDUs for scheduled outlet ON / OFF / Reboot.
Each PDU CAN ONLY BE ASSIGNED to one PDU Outlet Grouping.
In each PDU Outlet Grouping, there are 6 outlet ON / OFF / Reboot schedules on Once, Daily & Weekly basis

To add a PDU outlet grouping, please follow the steps below:

1. Click " **PDU Outlet Grouping** " Tab
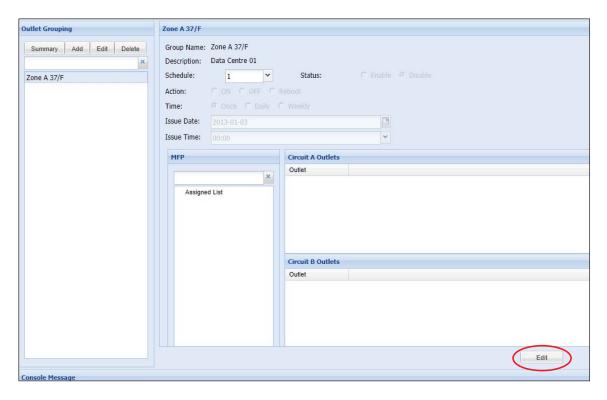

2. Click " **Add** "

3. Input " **Outlet Group Title** " & " **Outlet Group Description** "

4. Click " **OK** " in " **Add New Outlet Group** " window to finish

To enable an outlet schedule, please follow the steps below :
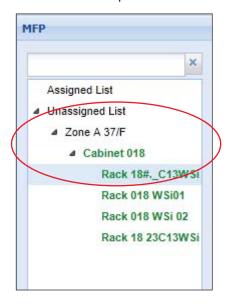

1. Select one of the outlet group

2. Click " **Edit** "

3. Select schedule 1

4. Select " **Enable** "

5. Select " **Action** " (ON / OFF / Reboot)

6. Select " **Time** " (Once / Daily / Weekly)

7. Select " **Issue Date** " & " **Issue Time** "

once

Daily

Weekly

< 12.6 > PDU Outlet Grouping
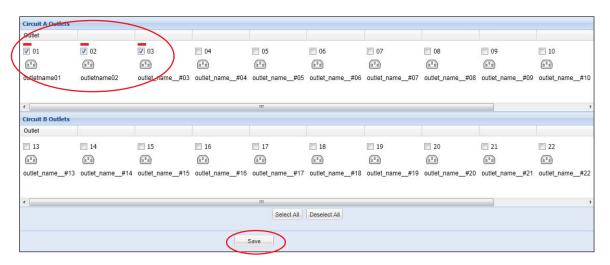

8. Select the PDU you want to add to this schedule by Clicking " **Unassigned List** " > " **MFP** " > " **Cabinet** " > " **PDU** " in MFP pane

⚠ If the PDU already assigned to another outlet schedule in the same outlet grouping, you can select the PDU in the " **Assigned List** "

9. Tick the outlet of the selected PDU for the schedule

10. Repeat step 9 for outlet (s) of other PDU (s) you want to add to the same schedule

11. Click " **Save** " to finish

12. Repeat Step 2 to 11 for other schedules if necessary

⚠ If the outlet schedule is " **Once** ", the schedule will be disabled automatically once the action is completed. To cancel the outlet schedule, select " **Disable** " of the selected schedule & Click " **Save** " to finish

< 12.7 > Device & System Event Log

In " **Log** " tab, it provides device & system events for you to view, print or export in CSV format.
Device event log includes:
- Cabinet
- Door Access
- Fan
- PDU
- Sensors
- T / H Sensor

System event log includes:
- Console
- Control Area
- MFP
- Outlet Grouping
- System Setup
- User
- User Activity
- User Group
- Visitor

You can view all the log records or the log records in a specific time period.

You can print the event log records by Clicking " **Print** ".

You can export the event log records in CSV format by Clicking " **CSV** ".

< 13.1 > SNMP

(I). Accessing MIB Files

Use the World Wide Web (WWW) to download the SNMP MIB file at this URL:
http://www.austin-hughes.com/support/utilities/infrasolutionX/X-ISM-MIB.mib
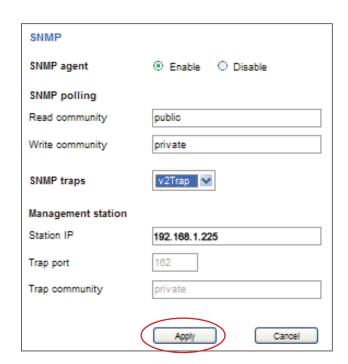

(II). Enabling SNMP Support

The following procedure summarizes how to enable the InfraBox for SNMP support.

1. Connect the InfraBox to a computer.

2. Open the Internet Explorer (I.E.) version 8.0 or above

3. Enter the configured IP address of InfraBox into the I.E. address bar.
Default IP address is " **192.168.0.20** "

4. Enter " **Login name** " & " **Password** ".
Default login name & password are " **00000000** "

5. Select SNMP from the left navigation pane

6. The SNMP Settings window appears as below:

7. Click " **Enable** " in " **SNMP Agent** " to start the SNMP agent service

8. Input " **Read Community** ". Default is " **public** "

9. Input " **Write Community** ". Default is " **private** "

10. Select " **disabled** " or " **V2Trap** " in " **SNMP Traps** "

⚠️   If select " **V2Trap** " , please input IP address of the SNMP management station in " **Station IP:** "

11. Click " **Apply** " to finish the SNMP settings

< 14.1 > FAQ & Troubleshooting

InfraSolution X Manager – X-ISM

1.   What is InfraSolution X Manger – X-ISM?
InfraSolution X Manager X-ISM is a LICENSED cabinet management software to monitor up to 3000 cabinets remotely.

Each InfraBox connects a pair of smartcard handles to secure the cabinet access control.

Each InfraBox can also connect a variety of sensors to provide an environmental monitoring solution.

To enhance the functionality, up to 1920 x kWh PDU / 960 x Fan Unit can be monitored through InfraSolution X Manager as well.

Up to 100 concurrent users can access the management software remotely to achieve the demand of multi-user / multi-tasking in nowadays' time sharing data center operation.

2.   What OS platform does X-ISM support?
MS Windows 2008 Server Standard edition with SP2 (32 & 64 bit, English edition only)
MS Windows 2008 Server R2 Standard edition with SP1 (English edition only)

3.   What is the login name & password of default administrative account?
Default login name " **admin** " & password " **admin** "

4.   How many cabinets & remote clients does X-ISM support?
3,000 cabinets and 100 remote clients (max.)

5.   How can I receive the alarm email?
- Enable email alert in System Setup
- Configure mail server setting in System Setup
- Enable email alert in User Setup
- Enable email alarm in Cabinet IP configuration

6.   After close the web browser, I cannot login the software UI again using the same user account immediately?
Ensure clicking the " logout " button to exit. If clicking the " close " button, you need to wait around 1 min before you can login again.

InfraBox

1.   Does the InfraBox has dual power input?
Yes (MUST order before delivery)

2.   How many PDUs does InfraBox support?
4 PDUs max. (for InfraBox X-2000 only)

3.   How many fan units does InfraBox support?
2 fan units max. (for InfraBox X-2000 only)

< 14.1 > FAQ & Troubleshooting

Sensors

1. How accurate is the Temp. & Humid sensor?
It is accurate to +/- 0.5 C (typical) and +/- 4.5% RH (typical)

2. How accurate is the Temp. sensor?
It is accurate to +/- 1.0 C (typical)

3. What is sensitivity of smoke sensor?
0.15 ~ 0.3 dB/m

4. What is the detection radius of shock sensor?
3.5m

5. What is the lumen of the LED light bar?
250

6. How long is the LED light bar ON after the handle lock is released?

within 10 seconds

Others

1. Can I use a notebook computer as a management PC?
Yes, but ensure the power adapter is plugged in & power ON.

2. Where can I find the Catalogue / User manual / Model list of InfraBox?
Please visit www.austin-hughes.com

3. How can I get a further support?
Please send an email to support@austin-hughes.com or sales@austin-hughes.com

InfraBox Disconnection

1. GUI shows | a certain InfraBox in a DAISY CHAIN / MIXED network | **disconnected**

    Step 1 - InfraBox power off?

        Check the InfraBox is power ON or not

    Step 2 - Can ping the IP address?

        i. Make sure the IP address can be found and configured using the " **IP setup utilities for InfraBox** "

        ii. Make sure the IP address of the InfraBox is the same as the IP address of the cabinet configuration in the InfraSolution X Manager GUI

2. GUI shows | the whole daisy chain group of InfraBoxes in a DAISY CHAIN / MIXED network | **disconnected**

    Step 1 - Cat. 5 / 6 cable disconnected, loose or defective?

    Check the Cat. 5 / 6 cable connection between the first InfraBox and network device. Make sure the connectors are firmly attached. And check if any defects on your cable or not. If yes, replace a new one.

    Step 2 - First InfraBox failed?

    Disconnect the InfraBox from the network and try to direct connect the Cat. 5 / 6 cable from the < **LAN** > port to a computer network port and use IP Setup Utilities to check if the InfraBox can be found or not. If it cannot be found, the InfraBox may be failed

3. GUI shows | a certain InfraBox in a STAR network | **disconnected**

    Step 1 - InfraBox power off?

    Check the InfraBox is power ON or not

    Step 2 - Can ping the IP address?

        i. Make sure the IP address can be found and configured using the " **IP setup utilities for InfraBox** "

        ii. Make sure the IP address of the InfraBox is the same as the IP address of the cabinet configuration in the InfraSolution X Manager GUI

    Step 3 - Cat. 5 / 6 cable disconnected, loosed or defective?

    Check the Cat. 5 / 6 cable connection between the InfraBox and network device.

    Make sure the connectors are firmly attached. And check if any defects on your cable or not. If yes, replace a new one.

< 14.1 > FAQ & Troubleshooting

Replacement of InfraBox

1. **How to replace a failed InfraBox in a DAISY CHAIN network with a new one?**

    Step 1 - Configure the IP address of the new InfraBox as the failed one

    (Please refer to user manual < 2.2 > InfraBox X-1000 / X-2000 for details)

    Step 2 - Prepare an appropriate length Cat. 5 / 6 cable

    Step 3 - Use a Cat. 5 / 6 cable to bridge over the failed InfraBox which will be replaced to minimize data loss

    Step 4 - Remove all connected handles, sensors, PDUs and fan units from the failed InfraBox

    Step 5 - Power off and remove the failed InfraBox from connection

    Step 6 - Install the new InfraBox, cancel the cable-bridging and reconnect the InfraBox to the previous and next one

    Step 7 - Power on the new InfraBox

    Step 8 - Reconnect the removed handles, sensors, PDUs and fan units to the new InfraBox

    Step 9 - Configure the new InfraBox in < **CA – Edit Mode** >

    ⚠️ Ignore step 2 and 3 if the InfraBox is in the last position of the daisy chain

2. **How to replace a failed InfraBox in a STAR network with a new one?**

    Step 1 - Configure the IP address of the new InfraBox as the failed one

    (Please refer to user manual < 2.2 > InfraBox X-1000 / X-2000 for details)

    Step 2 - Remove all connected handles, sensors, PDUs and fan units from the failed InfraBox

    Step 3 - Power off and remove the failed InfraBox from connection

    Step 4 - Install the new InfraBox to the connection and power it on

    Step 5 - Reconnect the removed handles, sensors, PDUs and fan units to the new InfraBox

    Step 6 - Configure the new InfraBox in < **CA – Edit Mode** >
