Save Config

Open the *General* drawer.

Step 15

15) Enable the module and enter your Treepodia UUID

Enable the module, enter your *Treepodia UUID** and click *Save config*

* - Requires a Treepodia account. If you haven't yet got one visit <http://treepodia.com>

Congratulations!!!

You've successfully setup your Treepodia Magento Extension

Installing your Treepodia Magento Extension - Frontend

Showing Treepodia videos

In `store_root/app/design/frontend/[your_theme]/[your_template]/layout/catalog.xml` - add this code in `<catalog_product_view>` -

```
<block type="video/view" name="video_view"
template="treepodia/video/view.phtml" />
```

Example:

```
<reference name="content">
    <block type="catalog/product_view" name="product.info" template="catalog/product/view.phtml">
        <block type="video/view" name="video_view" template="treepodia/video/view.phtml" />
    </block>
</reference>
```

Showing Treepodia videos embedded on the page

In `store_root/app/design/frontend/[your_theme]/[your_template]/template/catalog/product/view.phtml` - add this code where you want to display the video -

```
<?php echo $this->getChildHtml('video_view'); ?>
```

Example:

```
<?php if ($_product->getShortDescription()):?>
    <div class="short-description">
        <h2><?php echo $this->__('Quick Overview') ?></h2>
        <div class="std"><?php echo $helper->productAttribute($_product,
    </div>
<?php endif;?>

<?php echo $this->getChildHtml('video_view'); ?>

<?php echo $this->getChildHtml('other');?>

<?php if ($_product->isSaleable() && $this->hasOptions()):?>
    <?php echo $this->getChildChildHtml('container1', '', true, true) ?>
<?php endif;?>
```

What this looks like on the shop:

Sony VAIO VGN-TXN27N/B 11.1" Notebook PC
[Email to a Friend](#)
 ★★★★★ (10 Reviews) | [Add Your Review](#)
 Availability: In stock
\$2,699.99
 Qty: OR [Add to Wishlist](#) [Add to Compare](#)

Quick Overview
 Take a load off your shoulders when you're racing for your plane with the sleekly designed and ultra-portable Sony Vaio VGN-TXN27N/B notebook PC.

Double click on above image to view full picture

Treepodia player embedded on page

Showing Treepodia videos via dialog box

In *store_root/app/design/frontend/[your_theme]/[your_template]/layout/catalog.xml* - add this code in where you want the button to open dialog -

```
<block type="video/view_dialog" name="video_view_dialog"
template="treepodia/video/view/dialog.phtml" />
```

Example: Showing the button overlaying or under the product image -

```
<block type="catalog/product_view_media" name="product.info.media" as="media"
    template="catalog/product/view/media.phtml">
    <block type="video/view_dialog" name="video_view_dialog" template="treepodia/video/view/dialog.phtml" />
</block>
```

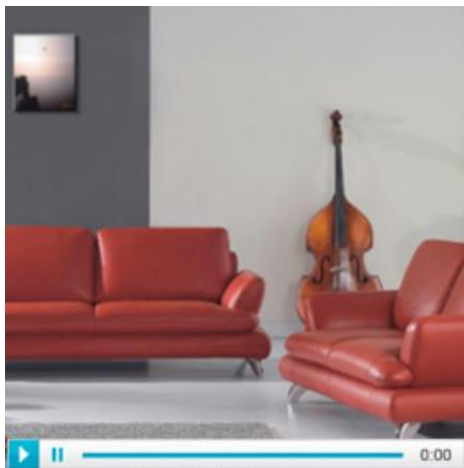

Showing the Treepodia launch button

Add this code where you want to show the button -

```
<?php echo $this->getChildHtml('video_view_dialog'); ?>
```

In media more view product so you have to add this code in *store_root/app/design/frontend/[your_theme]/[your_template]/template/catalog/product/view/media.phtml*

Example 1: Showing the button overlaying product image -

Code sample:

```
<?php if ($_product->getImage() != 'no_selection' && $_product->getImage()): ?>
<p class="product-image product-image-zoom">
  <?php echo $this->getChildHtml('video_view_dialog'); ?>
  <?php
    $_img = '
  <?php
    $_img = '<?php echo $this->__('Double click on abo
<div class="zoom">
  
    <div id="handle"></div>
  </div>
  
```

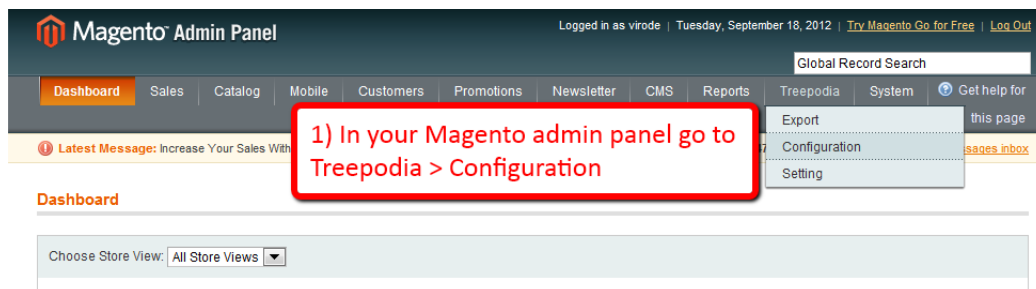

Example:

```
<checkout_onepage_success translate="label">
  <label>One Page Checkout Success</label>
  <reference name="root">
    <action method="setTemplate"><template>page/2columns-right.phtml</template></action>
  </reference>
  <reference name="content">
    <block type="checkout/onepage_success" name="checkout.success" template="checkout/success.phtml"/>

    <block type="video/tracking" name="video_tracking" template="treepodia/video/tracking.phtml" />
  </reference>
</checkout_onepage_success>
```

Configuring your Treepodia Magento Extension

Step 1

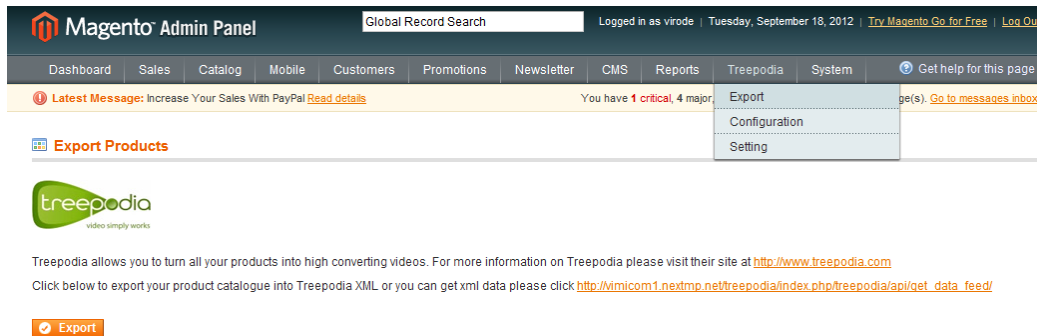

In your Magento admin panel go to *Treepodia > Configuration*

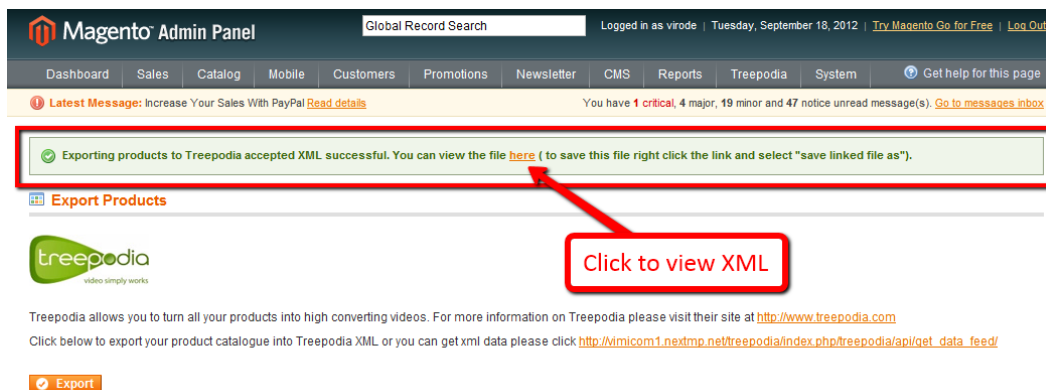

Exporting products as a Treepodia XML

To create a Treepodia product XML visit *Treepodia > Export*, and click the *Export* button.

On completion of the export a message will flash with a link to your Treepodia product XML:

Your xml is accessible at this URL [your_default_url]/export/treepodia_products.xml

Treepodia data feed

You can access the url to auto generate Treepodia xml data by at this url:

[your_default_url]/treepodia/api/get_data_feed/

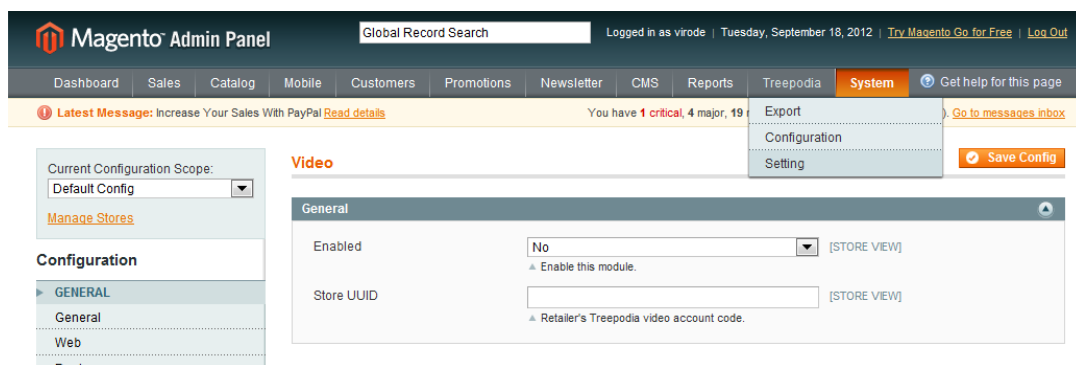

Treepodia Dynamic Video Sitemap

To have your videos indexed by Google or Bing submit the following URL as your video sitemap: `[baseurl]/treepodia/videositemap`

Disabling your Treepodia Magento Extension

To disable your Treepodia extension visit *Treepodia > Setting*, open the *General* drawer, and select *No* in the *Enabled* dropdown. Save your setting via the *Save Config* button.

Troubleshooting notes

- You must have a pre-existing Treepodia account for this module to work.**
Treepodia is a licensed service with a monthly fee. For Treepodia pricing visit [here](#).
- Can't see the Treepodia tab on your Magento backend top bar menu?**
 - Check you've copied the necessary folders and files into place.
 - Try flushing your Magento cache.
- Is your Magento cache enabled?**
Be sure to flush it every time you change the settings on your Treepodia module options screen.

4. **Magento cache enabled and you see a 404 error?** ("Page not found")
On *Treepodia* -> *Settings*, please log out of your backend and then login again.
5. **Not seeing Video play button or Modal / Dialog installation?**
Make sure you've added all FOUR code snippets listed above
