A maysim Guide to MMS Settings for HTC Android OS V4.x and above

amaysim Guide to MMS Settings for HTC Android OS V4.x and above

Here's a guide to set-up MMS on your HTC Android mobile. Just follow these easy steps. Before you start, you may need your handset user manual. If you don't have a copy, you can find it online. Search manufacturer's name, model of your handset & user manual (e.g. HTC Wildfire user manual).

As there are a few different versions of Android in the market, we have come up with the basic steps required to get you up and running with the internet. You may notice your mobile's screen will not match the screen shots we have in this guide, but this guide will still assist you with the steps and information you require.

Some key terms

What do we mean by **`TAP'** and **`PUSH'**? **`TAP'** means using your touch screen. **`PUSH'** means pushing the hard buttons on your phone.

What is **APN**? **APN** stands for Access Point Name. Setting up the APN on your handset will let you access the internet using your mobile phone.

STEP

Check your software version here.

Let's set-up your MMS!

Please note, screenshots may be different across devices

1. Tap the **ALL APPS** button at the bottom of the screen.

3. Tap MOBILE NETWORK or MOBILE DATA

2. Tap SETTINGS

4. Tap ACCESS POINT NAMES

5. You should see the following if you already have the internet settings installed. If not then please do this first.

6. Tap the MENU KEY

Menu

7. Tap new APN

8. Tap **NAME** and type in **amaysim mms** (not case sensitive)
