How to purchase Video Capture Master

As soon as you make your order, our resellers will verify it. Your order will most likely be processed within 1 hour, but in some VERY rare cases it may take resellers more than 24 hours to process your payment.

The registration key will be automatically generated at our server and e-mailed to you immediately after we receive payment confirmation from our e-commerce reseller.

Please do not worry if you haven't received the registration information right away. Delays usually occur due to the high security settings of spam filters used by our clients. Our message may be rejected as a spam message by the mail service you use.
If you haven't got the registration message after several hours, feel free to contact our Support Team via email.

If you have questions concerning our software, please send e-mail to:

sales@videocapturemaster.com. **We always do our best to help you!**

Video Capture Master

Capture Online Files

Video Capture Master not only enables you to capture files from DV and TV Cards but also to capture files online, such as videos from website like YouTube and from IP Camera. These online capturing steps are almost the same; this part of the user manual guides you to capture video and image from IP Camera. Start now!

Step 1. Type the URL here.

And set related connection timeout and received timeout (only available in PC Camera).

Step 2. Type the user name and password of the video file if necessary.

Step 3. Click the buttons 
to start capture or stop capture.

Step 4. Click the button 
to snap image.

Captured images and videos are auto stored in the default path, you can know more from Settings.

Video Capture Master

Capture from Multimedia

Video Capture Master not only enables you to capture files from DV and TV Cards but also to capture files from other devices, such as digital camera, USB cameras, etc. All Capturing steps are almost the same from multimedia; this part of the user manual guides you to capture video and image from Other (Just follow the same steps to capture video or image from other video devices including TV Cards and DV, etc.). Start now!

Step 1. Select the suitable device here.

Step 2. Adjust the appearance of video.

Step 3. Click the buttons 
to start capture or stop capture.

Step 4. Click the button 
to snap image.

Captured images and videos are auto stored in the default path, you can know more from Settings.

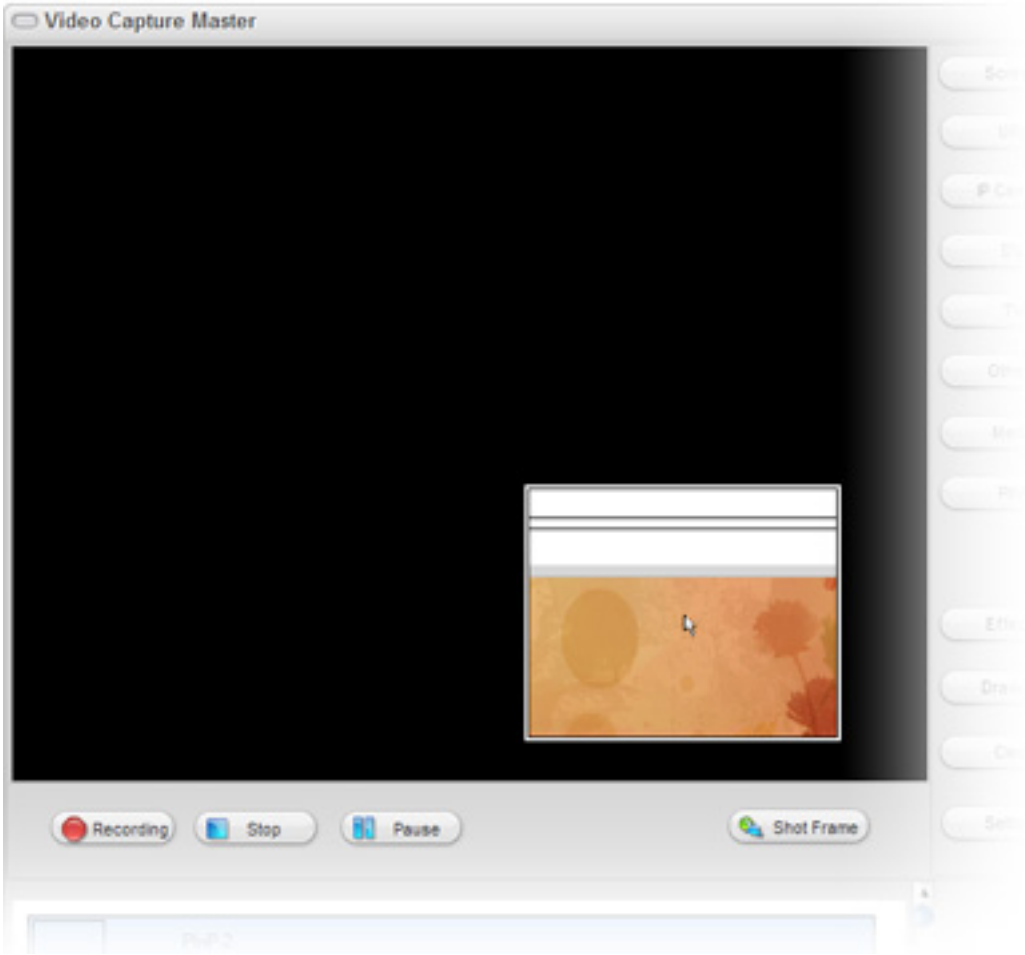
Video Capture Master

PinP Capture

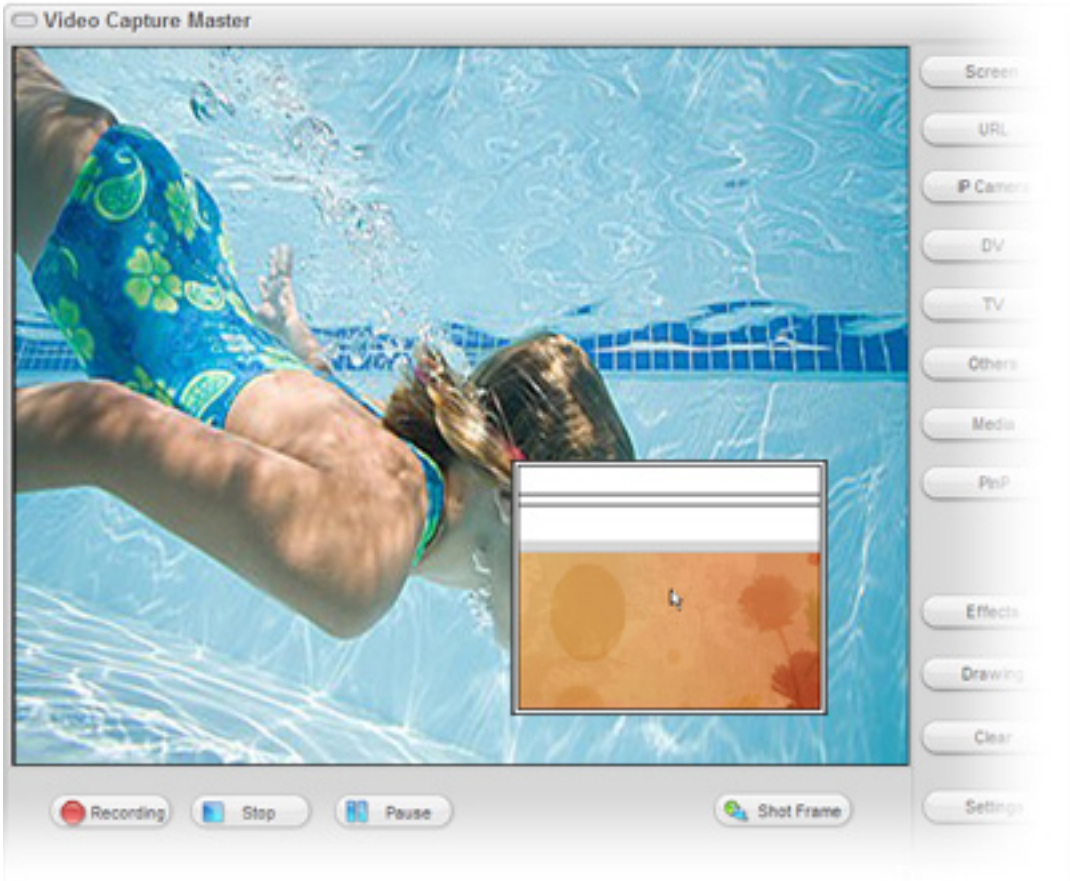
This is an upgrade feature in **Video Capture Master**! It is such a powerful feature in capturing files. Let's try it now!

Step 1. Click add button to add small window. Then click button setting positions to change the window's position.

Step 2. Click one of the buttons 
to choose desired video showed in small window. For example, click "Screen" button, then main screen shows like this:



Step 3. If you want to get video in background at the same time, click the main menu's button first, like button "DV". Then the main screen shows like this:



Step 4. Click the buttons 
to start capture or stop capture.

Step 5. Click the button 
to snap image.

Captured images and videos are auto stored in the default path, you can know more from Settings.

Video Capture Master

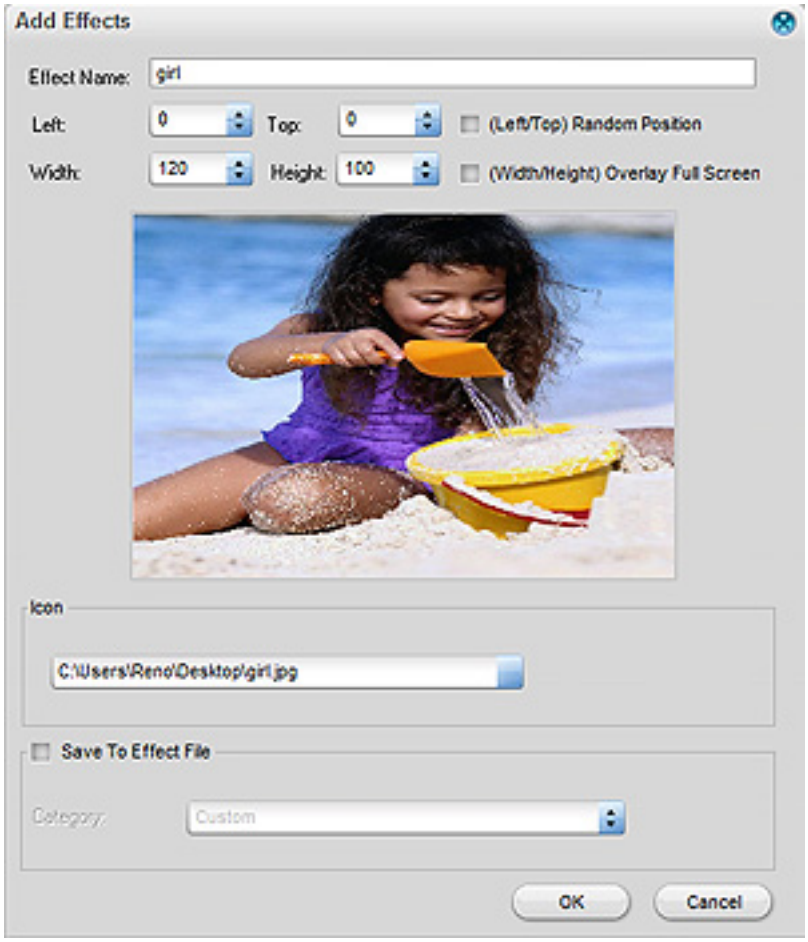
Add Image

Video Capture Master is such a powerful application that can help you add effects on the screen. Users can add image, flash and text on the screen. The steps of adding flash are same with the steps of adding image. So this part of the user manual guides you to add images and texts effects.

Add Image

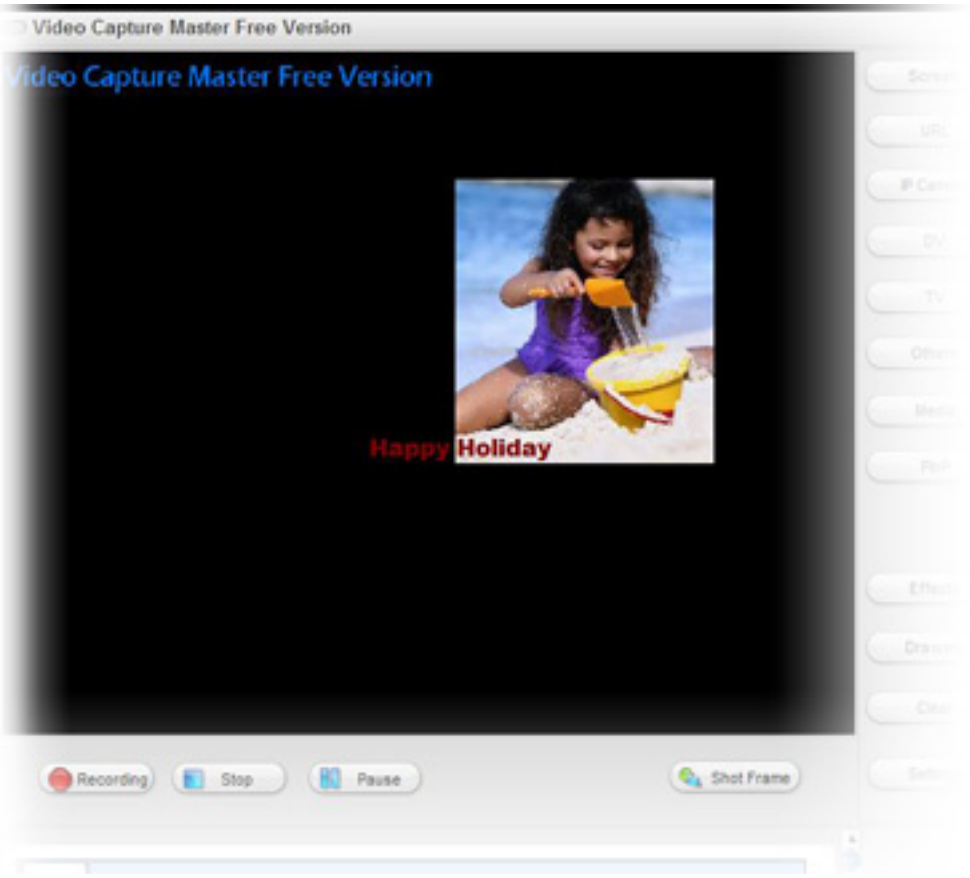
Step 1. Click button "Effects" on main menu. And click button on the top "Add Image".

Step 2. Adjust the appearance of video. Choose the desired image and then a new window pop-up as below:



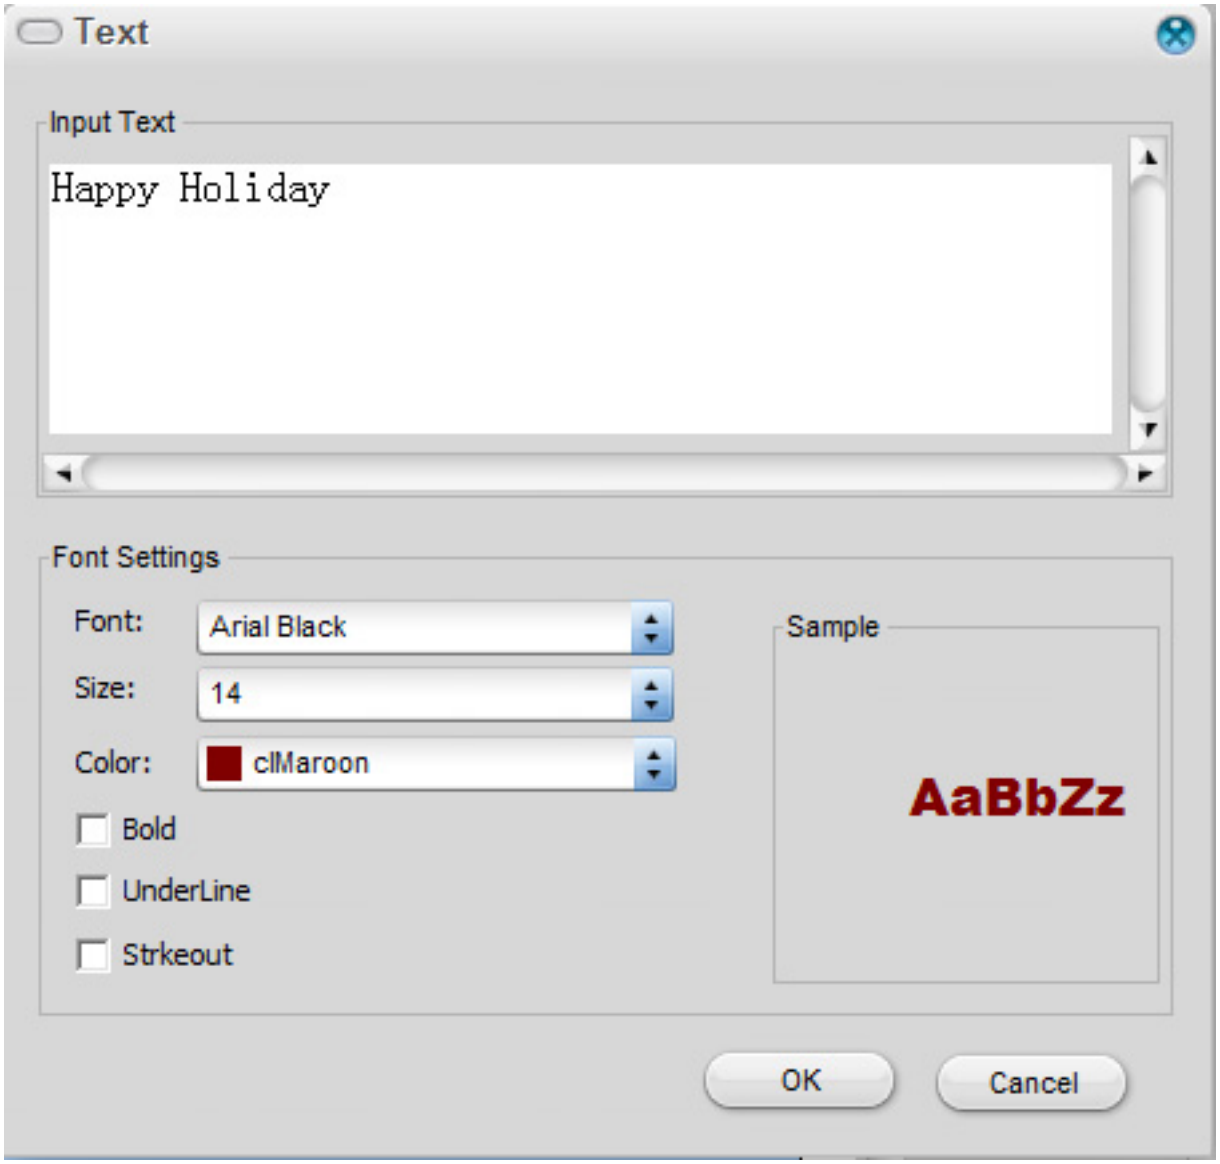
Step 3. Adjust the image, like setting the random position or overlay full screen and adding to effect file.

Step 4. Click button "OK", then this image will be displayed in the screen.



Add Text

Step 1. Click button "Effects" on main menu. And click button on the top "Text".



Step 2. Type the words in "Input Text". And then adjust the font, size and color.

Step 3. Click button "OK", then words will be displayed in the screen.
