## 1. Safety Instructions

### 1.1 Warnings and Cautions

It is normal that the surface becomes hot when using it as a player but do not cover anything over the device.

The product may generate heat when used for long period of time.

Do not attempt to disassemble this product. Doing so may cause fire, electric shock or electrical leakage, and defectiveness in the product itself.

In the event of unusually abnormal sounds, strange odor or smoke, stop using this product immediately. Please shut down your computer, TV set and peripheral devices promptly.

Do not handle, shake or try to remove this product while hard drive is writing and reading data.

Do not expose this product to the following conditions;

1. Strong vibration or shock
2. Direct sunlight or dust ,hot or humid conditions
3. Extreme temperature fluctuations or near magnetic fields

Regular backup is recommended to preserve and store your valuable data.

Before unplugging power you should stop playing first. Then use the POWER or STANDBY/ON button to enter standby mode (the standby LED turns Yellow).

Do plug the power when playing. If the player is disconnected suddenly during file transfer, it may cause data loss and harm the hard disk.

The hard disk must be set as master. When the device is used as a player, make sure that all partitions are primary (not extended).

### 1.11 Limited Liability

The manufacturer importer and dealer can not be held responsible for accidental damage, including personal injury or any other damage, due to inappropriate usage of the product. Information in the user manual is written for the current specification of the product. The manufacturer continues to provide additional functions and apply new technology to it. All specifications may be changed without prior notice to individual user. Manufacturer should not be liable for any special, incidental or consequential damages. Even if informed of possibility there of in advance.

Furthermore, warranty does not apply to:

Damages or problems resulting from misuse, abuse, accident, alteration or incorrect electrical , incorrect voltage, Any product tampered-with damaged warranty seal or serial number barcode or serial number label, Any product without a warranty or serial number barcode or serial number label. AC adapter and any consumable items delivered with or in the equipment.

Every user of MEDIA PLAYER may only use it in connection with materials legally owned by or licensed to the user and only extend such ownership or license rights that will permit such use.

## 2. Installing Product Drivers

### In Windows XP, Vista, Windows 2000 and Windows Me

Upon connecting your media player to a computer for the first time, Windows automatically installs the required drivers. Your media player is detected as Mass Storage Device and no additional drivers are required.

### In Windows 98 SE

1. Upon connecting you media player to a computer for the first time, the Add New Hardware Dialog box appears.
2. Click the Next button.
3. Select the Search for the best driver for your device option, and then click the Next button.
4. Select the CD-ROM drive check box.
5. Insert the Driver Installation CD into your CD/DVD-ROM Drive, and the click the Next button. Windows searches for the necessary files and lists them in the next dialog box.
6. Click the Next button. Windows copies the necessary files to your computer.
7. Click the Finish button to complete the installation.

#### To prevent data loss, ensure that:

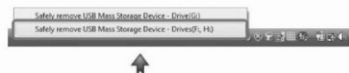

- \* You have disconnected your Portable Hard Disk properly in Windows before unplugging it from the USB port on your computer.(refer to the steps for your respective operating system)
- \* You do not unplug your Portable Hard Disk from the USB port on your computer when files or applications stored on your Portable Hard Disk are in use.

## In Windows Vista

1. Click on the taskbar icon for external hardware

2. Choose your external hard drive and confirm to remove it

## In windows XP, Windows 2000 and windows Me

1. Click the Safely Remove Hardware icon on the Taskbar and Click Safe remove USB Mass Storage Device.

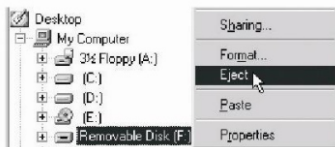

2. Unplug your Portable Hard Disk when you are prompted to do so.

-  \* This prompt appears on the taskbar in Windows XP. On other operating systems, a message box appears on the desktop instead.

## In windows 98 SE

1. Wait at least 10 seconds after all file transfers are completed.
2. In windows Explorer, right-click the **Removable disk** icon and click **Eject**.
3. Unplug your player after 10 seconds.

## Checking Package Contents

Confirm that all items are included in the package.

In case you find any missing item, please contact local dealer.
