MAD BULL XM-CHARGER User Manual

NOTE: WEAR GOGGLE ALL THE TIME!

Step 01 : Attach XM-CHARGER onto your CO2 tank.

Step 02 : There should be CO2 output. If not, please follow the steps below: The CO2 tank valve is not pushed by the XM-CHARGER's brass screw. Not all tank valves are built the same and you need to do with the height of the pin located at the center of the valve.

You can also adjust the brass screw inside the XM-CHARGER. In this case, you need to use screw driver and counter-clockwise to turn the brass screw up.

Important Notice:

1. This CHARGER is only for Airsoft. Unauthorized modified will cause damage.
2. Modify is not allowed. If you find problems with your CHARGER, consult with your local dealers.
3. Maintenance: Please use silicon oil to lubricate the components frequently.
4. Only replaced with the original factory parts in order to ensure the quality and safety.

Product Advisory for ALL Airsoft related products

MADE IN TAIWAN

Step 03 : Take off the XM-CHARGER when you totally run out all CO2. If there is still CO2 in the tank, go to Step 04.

IMPORTANT!!

Always apply vertical force or the fill stem will be broken

Step 04 : Removing the adaptor from a partially charged CO2 tank: You need to do the following.

Loosen the adaptor about 1/2 - 3/4 turn, and then press the stem against a hard surface to release the trapped CO2.

(Important !! Apply vertical force onto CO2 tank only or the fill stem will be broken.)

Once this is done, the adaptor should come off the rest of the way with no trouble at all.

This is the much the same procedure we use when removing the tank from a paintball gun.

On the paintball guns you'll see they've provided a small vent hole, which aids in the release of that bit of gas pressure.

There is also a vent hole on the XM-CHARGER which provides the same function.
