**Heat** - The device should be situated away from sources of high heat such as radiators or stoves.

## Understanding the WhereWolf Locator System

The WhereWolf Locator System consists of unique Locator devices that allow you to easily locate the things with the push of a button that are often misplaced — such as your wallet, keys, purse, remote, tools, etc... These devices create virtual leashes between themselves and to any item you attach them to. In this way you can find any of the items in the system from any of the other items in the system.

This package includes two WhereWolf Locators that can be used to start a new system or add to an existing one. Use these locators to create a virtual leash between your wallet/purse and your keys — any 2 items you don't want to lose. By purchasing and adding more WhereWolf Locator devices you can add up to 36 total devices to a WhereWolf Locator System.

### How does the device locate the intended item?

First, you designate a Device ID code to each Locator that consists of a LETTER(**a-f**) and a NUMBER(**1-6**). You may only assign a Locator with the following letters from A to F and numbers from 1 to 6.

The following is a list of the available Device ID codes

<b>a</b> 1	<b>a</b> 2	<b>a</b> 3	<b>a</b> 4	<b>a</b> 5	<b>a</b> 6
<b>b</b> 1	<b>b</b> 2	<b>b</b> 3	<b>b</b> 4	<b>b</b> 5	<b>b</b> 6
<b>c</b> 1	<b>c</b> 2	<b>c</b> 3	<b>c</b> 4	<b>c</b> 5	<b>c</b> 6
<b>d</b> 1	<b>d</b> 2	<b>d</b> 3	<b>d</b> 4	<b>d</b> 5	<b>d</b> 6
<b>e</b> 1	<b>e</b> 2	<b>e</b> 3	<b>e</b> 4	<b>e</b> 5	<b>e</b> 6
<b>f</b> 1	<b>f</b> 2	<b>f</b> 3	<b>f</b> 4	<b>f</b> 5	<b>f</b> 6

Each Locator is capable of “calling” any of these 36 Identification Codes by simply selecting the code any other device, then only the device with the appropriate Identification Codes will respond with an audible alarm.

Follow the instructions on this card to set up your WhereWolf Locators and begin using your system right away.

# Setting Up the WhereWolf Locator System for the First Time

Follow the procedures below for each of your Locators

## 1. Insert Batteries into the Locator

On the first use of your WhereWolf Locator pull the battery tabs or insert the batteries. The unit will automatically go into the set up mode and all 6 LED lights on the unit will blink. Alternately, you can manually enter the set up mode by pressing and holding  and  for 3 seconds until you hear a “peep” (  ).

## 2. Assign the Locator an Identification Code of your own choosing

Set the first Device ID Letter using  ; press multiple times until the desired LETTER appears above the LED Lights. (example- press 3 times for letter C and the LED light will appear in the C position).

Press  to confirm.

Next, set the Device ID Number using  ; press multiple times until the desired NUMBER appears on the LED Lights.

Press  and the locator will confirm your setting and it is now ready to be used.

Remember to record the Identification Code for each item since you need this code to call up that item. We have provided a card to help you keep track of your Identification Codes.

## 3. Attach each Locator Device to your personal belongings.

The WhereWolf Locators attach easily to your key chain or slip discretely into your wallet or purse. It's flexible design lets you to choose where the Locator Devices go. Simply attach or place the Locator with any item you do not want to loose and that item becomes instantly connected to the system.

## 4. Use Any Locator Device to find others within the system.

Pick up any Locator Device from within the WhereWolf Locator System.

Press to select Letter of the device you are looking for with .

Press to select the number of the device you are looking for with .

Press  to locate the item.
