

 **amaysim Guide to
Internet Settings for HTC Android
OS V4.x and above**

amaysim Guide to Internet Settings for HTC Android OS V4.x and above

Here's a guide to set-up your HTC Android mobile internet connection. Just follow these easy steps. You may need your handset user manual. If you don't have a copy, you can find it online. Search manufacturer's name, model of your handset & user manual (e.g. HTC Wildfire user manual).

As there are a few different versions of Android in the market, we have come up with the basic steps required to get you up and running with the internet. You may notice your mobile's screen will not match the screen shots we have in this guide, but this guide will still assist you with the steps and information you require.

Some key terms

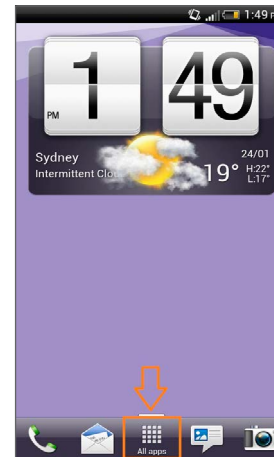

What do we mean by 'TAP' and 'PUSH'? 'TAP' means using your touch screen. 'PUSH' means pushing the hard buttons on your phone.

What is **APN**? **APN** stands for Access Point Name. Setting up the APN on your handset will let you access the internet using your mobile phone.

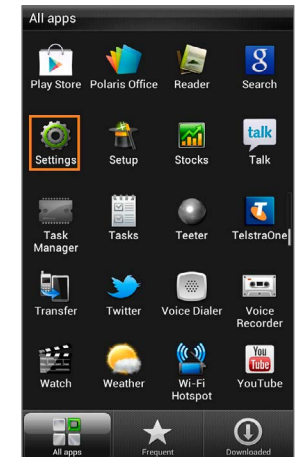

STEP 2

Let's get the internet set-up on your mobile!

Please note, screenshots may be different across devices

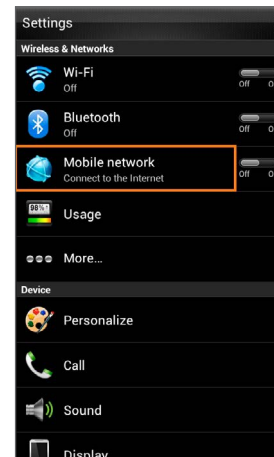

OR

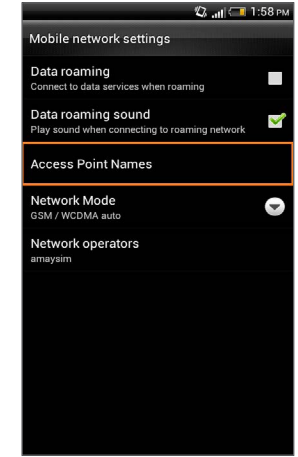

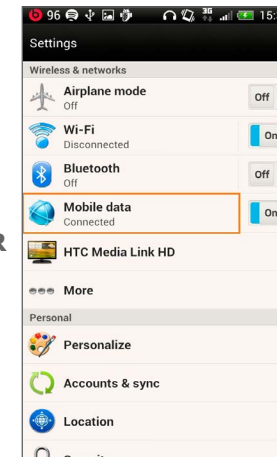

1. Tap the **ALL APPS** button at the bottom of the screen.

2. Tap **SETTINGS**

OR

3. Tap **MOBILE NETWORK** or **MOBILE DATA**
