SLENDERTONE

How it works

Slendertone uses Electronic Muscle Stimulation (EMS) toning technology to create strong, deep muscle contractions to tone your body. It simply mimics the body's natural muscle movements; signals are sent between the pads, switching on the nerves that control your muscles and causing them to contract naturally. EMS technology has been used for over 40 years in hospitals, clinics and physiotherapy practices around the world to strengthen and rehabilitate muscles.

SLENDERTONE Face

The Anti-Aging Facial Exerciser

Improve Facial Tone with Slendertone Face

The foundation of your face is muscles; Slendertone retrains these delicate muscles to restore the youthful shape of your face. Slendertone Face is a revolutionary anti-aging product, harnessing EMS toning technology to work your facial muscles.

Regular, at home use of the product boosts muscle volume which in turn lifts and plumps the skin smoothing out the surface to reduce the appearance of fine lines and wrinkles.

In addition to building muscle volume and lifting the face; the increase in blood flow improves the condition of the skin and gives a radiant complexion.

A convenient head set positions pads on either side of your face to target the Facial nerve which controls all the facial muscles; gently but effectively exercising them to firm and tone - delivering a natural facelift from the inside out.

Your Slendertone Face product includes the following:

- Rechargeable headset-based delivery system and hand held controller.
- 12 sets of headset gel pads.
- 3 built in programmes giving, 0-20 minute treatment options.
- A variable intensity control, to suit all user requirements.

How Face Work

A Natural Face Lift with Muscle Toning
Facial muscles are unique in that they are the only muscle group in the body directly linked to the skin. When these muscles start to waste, they are unable to support the skin so inevitably the face starts to sag and wrinkles appear, advancing the ageing process.

Facial Muscle Toning

By toning and building these muscles, the skin and face structure is lifted and plumped – smoothing out the surface and reversing the typical signs of facial aging: loss of volume and shape, wrinkles and lines. Slendertone Face retrains the facial muscles of expression using electronic stimulation, which gently activates the muscles isometrically. In this way, the muscle is exercised hundreds of times in each session, without unwanted creasing of the skin which could cause wrinkles. The muscle recovers its natural tone, helping to lift and support the face naturally.

Facial Muscles

Facial muscles and Anti-Aging

No-one forgets a face. And little wonder. Your face is what makes you 'You', a unique combination of 21 facial muscles that display your joy, sorrow, surprise and, unfortunately, age.

Like any muscle group in the human body; facial muscles need to be exercised. But unlike the rest of your body, where muscles are attached to bone, facial muscles are attached to the overlaying skin; so when they start to deteriorate and waste they are no longer able to support the skin - causing your face to sag and lose volume.

By stimulating these delicate muscles you can rebuild the youthful shape of your face - preventing the sag, wrinkles and lines that inevitably come with wasting muscle tone.

For a radiant and younger looking face, Add Slendertone

Clinically proven results:

- 94% reported their face felt firmer
- 90% reported improvement in facial tone
- 80% reported their face looked lifted

SLENDERTONE System Plus

Slendertone Female System Plus is the most advanced abs belt in the range delivering firmer and flatter abs in just 4 weeks. Get the stomach you've only seen in Hollywood magazines.

Use the Female System Abs 5 times a week for 4 weeks to achieve firmer and flatter abs - guaranteed.

In independent clinical trials users reported:
100% of users reporting firmer more toned abs
72% increase in abdominal endurance
49% increase in abdominal strength
3.5cm reduction in waist circumference

Replicating abdominal exercises, 20 minutes is equivalent to 120 sits ups targeting the rectus, oblique and transversus abdominis muscles.

*Clinical trial conducted by Prof. Dr. John Porcari, University Wisconsin, La-Crosse

By mimicking the body's natural muscle movements and sending signals to activate the nerves; Slendertone's patented EMS technology delivers a complete abdominal workout to the Rectus, Oblique and Transversus Abdominis muscles. This EMS technology is often used in medical institutions around the world to strengthen and rehabilitate muscles, so you can be confident it works!

Note: rechargeable & interchangeable controller is included. This controller is suitable with all System garments.

Women's System Abs highlights:

- 10 programmes, incl. sports pro crunch and endurance trainer programmes
- 0-150 intensity levels for maximum power
- Built-in warm up and cool down phases to ensure correct muscle usage
- Intelligent training system to auto-progress through the programmes
- Rechargeable & interchangeable controller – suitable with all System garments

SLENDERTONE Flex Go Abdominal Muscle Toner

The Slendertone Flex Go Abdominal Muscle Toner is an effective way to develop firmer, stronger, and more toned abs in just weeks. Clinically demonstrated to deliver real results, the Slendertone Flex Go Abdominal Muscle Toner features FDA-approved technology that tones and strengthens hard-to-train rectus, oblique, and transversus abdominis muscles. Wear it for just 30 minutes a day, 5 days a week, for 6 weeks to see a tighter, firmer, more toned mid-section.

Electrical Muscle Stimulation (EMS) technology works by sending signals to nerves through 3 medical-grade GelPads. These signals stimulate nerves that branch out to all three main abdominal muscles, causing them to repeatedly contract and relax. This process results in deep, strengthening contractions that will firm and tone abdominals in just weeks.

Features and Benefits:

- Uses clinically demonstrated Electrical Muscle Stimulation (EMS) technology
- Causes deep muscle contractions to firm, tone, and strengthen abdominal muscles
- Effectively works entire core
- 2 Toning Programs - Beginner & Advanced
- Adjustable intensity levels 0-99 allow you to customize your workout session
- Visual LED prompts guide you through your session
- Designed for both men & women

Basic Ab Toning Slendertone Flex GO! Ab belt is an easy-to-use abdominal muscle toner. Flex GO! delivers a complete abdominal workout to the rectus, oblique and transversus abdominis muscles. Use 5 times a week for 4 weeks to see firmer, flatter, more defined abs.

Get Strong, Firm, Toned Abs in Just Weeks

- Designed for both men & women
- Uses clinically demonstrated EMS technology
- 2 Toning Programs - Beginner & Advanced
- Adjustable intensity levels allow you to customize your workout session
- Visual LED prompts guide you through your session
- Belt fits waist sizes 24" - 47"

Includes

- Belt - Fits waist sizes 24" - 47"
- 1 set (3 pads) of medical-grade GelPads
- 3 AAA Batteries (Not included with the shipment)
- Carry Pouch

SLENDERTONE Replacement Gel Pads

All Slendertons replacement pads and accessories are manufactured to medical grade standard. The length of time the pads can last is dependant on a number of factors including your skin type, frequency of use, how the pads are stored etc.

It is recommended that you replace your pads after 20-30 sessions.

Save the plastic covers on the top of the GelPads. After use, put the plastic covers back on the top of the pads to protect them from dust and to retain moisture.

Slendertone System-Abs Replacement Gel Pads
 3 PADS IN EACH SET use with the System, Flex, Pro, Max, Start, and Gymbody Abs belts
 FLEX medical-grade GelPads are latex free and each lasts from 20 to 30 sessions.

What it feels like

All Slendertone products use clinically proven EMS (electrical muscle stimulation) toning technology, which works by sending signals to your nerves to contract and relax your muscles, similar to regular toning exercise.

When you first turn it on, the feeling may be a little strange as you are at the lowest setting. As you increase the intensity, the sensation goes from a mild tingly feel, to a distinct muscle contraction. This is when the product (and you!), are working to the optimum!

The muscles simultaneously contract and then relax similar to the regular muscle contraction experienced during normal exercise. You can now feel the Slendertone Sensation and your muscles are working. This sensation is powerful enough to recruit all of the muscle fibers in the targeted region, yet comfortable enough to have a conversation while using it.

Be sure to increase the intensity during your toning session so you always feel the Slendertone Sensation; remember there are at least 99 levels
