

Tek Partner Universal Remote Control

User's Manual

BW-0561-RD

Your Tek Partner Universal Remote Control is a state of the art device that integrates many different infrared (IR) remote controls into one. The Tek Partner is pre-programmed at the factory so all you need to do is follow the instructions in this manual and you will be ready to go! The Tek Partner replaces up to 4 separate remote controls to operate your television (TV), video cassette recorder (VCR), digital video disc (DVD) and cable box or satellite receiver (CBL/SAT). Once programmed, the Tek Partner functions just like your original remote control. Just aim the Tek Partner at your device and press the desired functions. It's that easy! In addition, the Tek Partner has large, soft buttons that illuminate bright red when they are pressed. No other remote control is as user friendly as the Tek Partner.

Specifications

Operating System: Pre-programmed infrared (IR) remote control.

Compatibility: Replaces most brands of IR remote controls for TVs, VCRs, DVDs, Cable Boxes and Satellite Receivers.

Power Requirements: 4 AA size batteries (not included).

Size: 8-1/2" x 5-1/2" x 2-1/2" (LxWxH)

NOTE: The Tek Partner is not compatible with radio frequency (RF) devices or digital converter boxes.

Hy-Tek Mfg. Co., Inc.
1998 Bucktail Lane
Sugar Grove, IL 60554-9609
Tel: (630) 466-7664
Fax: (630) 466-7678

Setup

1. Remove the battery cover from the back of the remote control.
2. Insert 4 new AA batteries.
 - a. Make sure the polarity of the batteries matches the diagram inside the battery compartment (– matches with – and + matches with +).
3. Push the battery cover back into place.

Programming

MODE (3 seconds) → digit → digit → digit

1. Make sure you are in front of the device you want to program with the power turned on.
2. Using Device Codes (see pages 6-9), locate the brand name of your device.

NOTE: All codes are 3 digits and there may be more than 1 code listed for your device.

3. On the remote control, press and hold the MODE button (TV, VCR, DVD or CBL/SAT) until the indicator light in the upper left hand corner begins to blink (this takes about 3 seconds).
4. As soon as the indicator light begins to blink, release the MODE button.
5. On the remote control, enter the 3 digit code for your device found in Device Codes.
6. Try different functions on the remote control to make sure the correct code was entered.
 - a. If only some or none of the functions work, repeat the steps above and try the next code located in Device Codes. If there are no more codes listed, try Power Scan.

Power Scan

MODE (3 seconds) → PWR → ▲ (PLAY) → ENTER (SELECT)

The Power Scan function checks every pre-programmed code in the remote control. Use Power Scan if:

- A. Your device is not listed in Device Codes.
or
- B. You cannot program the remote control using codes located in Device Codes.

1. Make sure you are in front of the device you want to program with the power turned on.

2. On the remote control, press and hold the MODE button (TV, VCR, DVD or CBL/SAT) until the indicator light in the upper left hand corner begins to blink (this takes about 3 seconds).
3. As soon as the indicator light begins to blink, release the MODE button.
4. On the remote control, press and release the PWR button.
5. On the remote control, slowly press and release the ▲ (PLAY) button until the device (TV, VCR, DVD or CBL/SAT) powers off.
 - a. Each time you press the ▲ (PLAY) button, the remote control is checking the next code and trying to turn off the device.
6. As soon as the device powers off, press and release the ENTER (SELECT) button on the remote control.
 - a. Make sure that you do not press the ▲ (PLAY) button after the device powers off. If you do this, the remote control will move to the next code. When you press the ENTER (SELECT) button, the code is programmed into the remote control.
7. Try different functions on the remote control to make sure it is programmed properly.
 - a. If only some or none of the functions work, repeat the steps above.

NOTE: Be patient, there are dozens of codes for each type of device.

ID Recall

MODE (3 seconds) → MENU/PREV. CH (RECALL)

The ID Recall function will show you the code for any programmed device.

1. On the remote control, press and hold the MODE button (TV, VCR, DVD or CBL/SAT) until the indicator light in the upper left hand corner begins to blink (this takes about 3 seconds).
2. As soon as the indicator light begins to blink, release the MODE button.
3. On the remote control, press and release the MENU/PREV. CH (RECALL) button.
4. As soon as you release the MENU/PREV. CH (RECALL) button, the indicator light in the upper left hand corner will show you the code for your device by blinking the 100's, 10's and 1's of your code.
5. Count the number of blinks to determine the code. A '0' in any location is represented by a fast flicker.

Example: Code 102 is shown as BLINK <pause> FLICKER <pause> BLINK, BLINK.

Volume Punch Through

CBL/SAT (3 seconds) → CBL/SAT (hold) → TV

The Volume Punch Through function allows you to change the volume on your TV while in CBL/SAT mode.

1. Make sure that you program the remote control for your TV and Cable Box/Satellite Receiver.
2. On the remote control, press and hold the CBL/SAT button until the indicator light in the upper left hand corner begins to blink (this takes about 3 seconds).
3. As soon as the indicator light begins to blink, release the CBL/SAT button.
4. On the remote control, press and hold the CBL/SAT button and then press the TV button (while holding the CBL/SAT button) and then release both buttons.

Master Power

MODE (3 seconds) → PWR → PWR

The Master Power function allows you to turn the power on or off for all programmed devices at the same time.

1. Make sure that you program the remote control for all of your devices.
2. On the remote control, press and hold the MODE button (TV, VCR, DVD or CBL/SAT) until the indicator light in the upper left hand corner begins to blink (this takes about 3 seconds).
3. As soon as the indicator light begins to blink, release the MODE button.
4. On the remote control, press and release the PWR button.
5. On the remote control, press and release the PWR button.
6. To disable Master Power, repeat the steps above.

Menu Mode

The Menu Mode allows you to use the blue arrow buttons (\blacktriangle , \blacktriangledown , \blacktriangleleft , \blacktriangleright) to navigate a programmed device.

1. Make sure that the device you want to use has been programmed into the remote control.
2. Press and release the MENU/PREV. CH (RECALL) button.
 - a. In Menu Mode, use arrow buttons (\blacktriangle , \blacktriangledown , \blacktriangleleft , \blacktriangleright) to navigate.
 - b. Once the desired menu item is reached, press and release the ENTER (SELECT) button to select it.

NOTE: If any button other than \blacktriangle , \blacktriangledown , \blacktriangleleft , \blacktriangleright or ENTER (SELECT) is pressed or if no buttons are pressed within 20 seconds, the remote control will exit Menu Mode.

Frequently Asked Questions

Q. Why won't my Tek Partner work?

A. Make sure you have fresh batteries and that they are installed correctly (see Setup on Page 2). If this does not solve the problem, please call (630) 466-7664 for technical support. We are more than happy to help you.

Q. How do I know which code will work for my device?

A. Look up the brand name of your device in Device Codes (see Page 6-9). Each code is 3 digits. Enter one code at a time and test the remote control after each code is entered until you have one that controls all the functions properly. If you do not find a code to match your brand, proceed to Power Scan (see Pages 2-3).

Q. I want my devices to come on all at the same time, what do I do?

A. Program each of your devices separately and make sure they are all functioning properly. Once they are all programmed, hold down the device button (TV, VCR, DVD or CBL/SAT) until the indicator light starts to blink, release the device button and press and release the PWR button twice. Master Power should now be enabled. To disable Master Power just repeat the process again (see Master Power on Pages 4).

Q. I used the Power Scan option to find a code for my device. How do I know what the code is?

A. Please follow the instructions on Page 3 for ID Recall.

Q. I cannot get my volume to work on my satellite receiver or cable box, what should I do?

A. You need to set up Volume Punch Through. See the instructions on Page 3-4.

Care & Maintenance

1. Do not expose the remote control to direct sunlight, extreme high or low temperatures, liquids or mechanical shock.
2. Do not mix old and new batteries as old batteries have a tendency to leak.
3. Do not use corrosive or abrasive cleaners on the remote control.
4. Do not disassemble the remote control as it contains no user serviceable parts.
5. To keep the remote control clean, periodically wipe it with a dry, soft cloth.
