Chapter 1

Safety information

Safety information (all countries)

Introduction

All the products have been tested in accordance with the strictest international safety standards. Please read the following sections before you connect the machine to the power supply. These sections contain important information with regard to the user safety and the prevention of equipment problems. Make sure that you observe the safety rules hereinafter. This helps to assure that you can work with the product/system safely. Make sure that you observe all the precautions mentioned below.

NOTE

Depending on the context, the terms: system, machine, and equipment all will be used to designate the Océ product for which this user documentation is applicable. Some parts of the contents of this section may not be applicable to your product. Please refer to the corresponding Safety Data Sheets for specific safety information. You can download the Safety Data Sheets from the support site of your product at "<http://global.oce.com/support/>"

Warning and caution indicators (manual)

The following indicators are used in the manuals to categorize the level of the seriousness of hazard:

WARNING

Indicates a warning concerning operations that may lead to death or injury to persons if not performed correctly. To use the machine safely, always pay attention to these warnings.

CAUTION

Indicates a caution concerning operations that may lead to injury to persons if not performed correctly. To use the machine safely, always pay attention to these cautions.

IMPORTANT

Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the machine correctly, and avoid damage to the machine or property.

NOTE

Indicates a clarification of an operation or contains additional explanations for a procedure. Reading these notes is highly recommended.

NOTICE: Indicates an operation that must not be performed. Read these items carefully and make sure not to perform the described operations

Warning and caution indicators (machine)

The following indicators are used in the machine to warn the user of possible safety risks:

CAUTION

Ignoring this caution could cause injury to skin; see also section "Action in response to troubles"

WARNING

Whenever this label is affixed to parts of the machine that are accessible to the user, a remark can be found in the user documentation, explaining the potential hazard for which the user is warned or cautioned. The user is urged to consult the user documentation in order to understand the safety risk and learn how to avoid damage or injury.

 Caution Hot	Ignoring this caution could cause injury to skin: see also section "Action in response to troubles"
 Warning	Whenever this label is affixed to parts of the machine that are accessible to the user, a remark can be found in the user documentation, explaining the potential hazard for which the user is warned or cautioned. The user is urged to consult the user documentation in order to understand the safety risk and learn how to avoid damage or injury.

Disassemble and modification

WARNING

- Do not remove covers and panels which are fixed to the machine. Some machines have a high-voltage component or a laser beam source inside that could cause an electrical shock or blindness.
- Do not modify this machine, because this could cause a fire, electrical shock or breakdown. If the machine contains a laser, the laser beam source could cause blindness.
- Do not carry out maintenance activities for other components and maintenance materials than the components and materials that are mentioned in the user manual.
- Keep maintenance materials away from children.
- To avoid any risk, only properly qualified and trained service technicians are allowed to modify the machine.
- Do not bridge or disable any safety interlock devices.

CAUTION

- Use maintenance materials or other materials for their intended purpose only.

IMPORTANT

- Do not place any liquids on the machine.
- Do not open any door while the machine starts up or runs, unless the operator panel displays a message that asks you to open one or more doors.
- Do not bridge any mechanical or electrical circuit breakers.

Power cord

WARNING

- Do not scratch, abrade, heat, twist, bend, place a heavy object on or cause any other damage to the power cord. The use of a damaged power cord (exposed core wire, broken wire, for example) could result in a fire or breakdown. If you find any of these conditions, immediately turn OFF the power switch and unplug the power cord from the power outlet. Then call your authorized service representative.
- Do not use an extension lead to connect the machine.
- Do not use any power cable other than the one provided. Never use the power cable with any other electrical device.

Power source

WARNING

- Put the power plug directly into a wall socket that has the same configuration as the plug. The use of an adapter leads can result in an inadequate power supply. If a proper wall outlet is not available, ask a qualified electrician to carry out the installation.
- Do not use a multiple outlet adapter or an extension lead. Contact your authorized service representative if an extension lead is required.

IMPORTANT

- Do not connect the machine to a mains voltage that differs from the value as stated on the power marking label.

NOTE

- If connection to a different mains voltage is required, contact your authorized service representative.

Power plug

WARNING

- For machines that are connected via a wall socket: Place the machine close to a wall socket that is easily accessible. The power plug is intended to serve as a disconnect device.

Grounding

WARNING

- Connect the power cord to an electrical outlet (wall socket) that is equipped with a grounding terminal.
- This equipment has not been designed for connection to an IT power system. An IT power system is a voltage network in which the neutral wire is not connected to ground.

Installation

WARNING

- Make sure that the machine is placed on a level, horizontal surface of sufficient strength.
- Do not place this machine on an unstable or tilted surface.
- Do not place this machine in a location that is subject to lots of vibrations and shocks.
- Do not use flammable sprays, liquids or gases near this product, because this could cause a fire.

Actions in response to troubles

WARNING

- When a piece of metal, water or any other similar foreign matter gets inside the machine, immediately turn OFF the power switch and unplug the power cord from the power outlet. Then call your authorized service representative.
- Immediately stop using the machine if the machine becomes excessively hot, emits smoke, or produces unusual odors or noises. Immediately turn OFF the power switch and unplug the power cord from the power outlet. Then call your authorized service representative.
- Stop using the machine if the machine was dropped or a cover was damaged. Immediately turn OFF the power switch and unplug the power cord from the power outlet. Then call your authorized service representative.

Moving the machine

WARNING

- Make sure that you disconnect the power cord and other cables before you move the machine.
- Make sure that you check the documentation for the correct machine location before you move the machine.
- Make sure that whenever the machine is moved, this is done by properly qualified people who have received adequate instructions.

General use

WARNING

- Do not lean, lie or stand on any part of the machine, including any unit that can be pulled outward (e.g. paper drawers).
- To prevent overbalance of the machine, only one drawer should be opened at the same time.

IMPORTANT

- Unplug the product when you will not use it for a long period of time.

Chapter 2

Regulation notices

Regulation notices

Grounding (Finland (FI), Norway (NO) and Sweden (SE) only)

- FI: Laite on liitettävä suojamaadoituskoskettimilla varustettuun pistorasiaan
- NO: Apparatet må tilkoples jordet stikkontakt.
- SE: Apparatens skall anslutas till jordat uttag.

Translation: The machine must be connected to a grounded power outlet.

FCC approval (USA only)

- This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the Operator's Manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
- Use of shielded cables are required to comply with Class A limits in Subpart B of Part 15 of the FCC Rules.
- Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If you make such changes or modifications, you could be required to stop operation of the equipment .

ICES-003; Interference-causing equipment (Canada only)

- This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

End of Life; WEEE (EU and EEA only)

- This symbol indicates that this product is not to be disposed of with your household waste, in accordance with the WEEE Directive (2002/96/EC) and your national law. This product should be handed over to a designated collection point, e.g. on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit "<http://www.canon-europe.com/environment>". Reference: Directive 2002/96/EC. Contact your local sales and service organization for further information.

Recycled paper (All countries)

- The use of recycled paper benefits the environment. The Océ Dual Tray High Capacity Stacker is designed to use recycled paper, including chlorine free paper, which complies with the requirements of EN12281:2002. Product literature on recommended types of recycled copier paper can be obtained from Océ.

Chapter 3

General information

General information

Caution labels and notations (All countries)

- The power-marking label is located near the mains entrance. If connection to a different mains voltage is required, contact Customer Service.
- Do not remove caution labels or caution notations. If a label or notation is soiled, please clean the label or notation. If you cannot make label or notation legible, or if the label or notation is damaged, please contact your service representative.

Space requirements and operation precautions (All countries)

- The required operating space of this product will be communicated to each customer by the local sales representative during the Site Survey.
- Please refer to the corresponding Safety Data Sheets for specific safety information, including the dimensions of the product, the recommended room volume and ventilation rate. You can download the Safety Data Sheets from the support site of your product at "<http://global.oce.com/support/>".

Operating environment (All countries)

- The environmental requirements for correct operation of the machine are as follows:
Operating temperature (T): 20 °C (68 °F) to 24 °C (75 °F)
Relative Humidity (RH): 30% to 50%

Glanzgrad bei Peripheriegeräten (Germany only)

- Glanzgrad bei Peripheriegeräten (Germany only):
Das Gerät ist nicht für die Benutzung im unmittelbaren Gesichtsfeld am Bildschirmarbeitsplatz vorgesehen. Um störende Reflexionen am Bildschirmarbeitsplatz zu vermeiden darf dieses Produkt nicht im unmittelbaren Gesichtsfeld platziert werden.

Translation:

The equipment is not intended for use within the direct visual field of a workplace equipped with a monitor screen. In order to avoid annoying reflections at the workplace (monitor screen), this product must not be placed within the direct visual field of monitor screens.
