Selfie Pole

With Bluetooth® Wireless

Technology

User Manual

QC8068

Box Contents:

1 x Selfie Pole
1 x Small Smartphone Bracket
1 x Large Smartphone Bracket
1 x USB Charging Cable

Operation:

1.0 Bluetooth Pairing:

1.1 Switch the power button to "ON", which is located on the rear of the Selfie Pole.
The blue LED light on the rear of the unit will start to flash for 3 minutes indicating the Selfie Pole is sending out Bluetooth® signal.

1.2 While the blue LED light is flashing, go to the Bluetooth® menu on your smart phone.
Turn on your Bluetooth® and search for the Bluetooth® device "QC8068"

1.3 Select "QC8068", when the phone asks if you want to pair with it confirm by selecting yes or ok.

1.4 When the pairing is completed, the blue LED light will stop flashing and will turn off.
Please Note: If you want to use the Selfie Pole with another phone, please switch off the Selfie Pole and the Bluetooth® of the phone currently in use.

2.0 Installing Your Smart Phone:

2.1 Place your smart phone in to the correct phone bracket according to the size of your smart phone.

2.2 Select either photo or video mode on your smart phone.

2.3 Extend the Selfie Pole to your desired length and adjust the screw so that your phone is locked into position.

2.4 Press the photo or video button to start shooting selfies

Please Note: When the smart phone is in video mode, use the "photo/video" button which will start and stop the video recording.

3.0 Charging:

3.1 If the blue LED light does not flash after turning the unit on and the phone does not respond to pressing the photo / video button after pairing, it means that the battery is flat.
Please connect the Selfie Pole via the USB charging cable provided and plug into a USB port of a PC or a USB power adaptor (not included) to charge. The LED light on the Selfie Pole will turn red while charging, and will go off after the battery is fully charged. The charging time is approximately 1 hour.
