2 Overview

MT-SAFE, mobile APP software, is specially designed for child tracker P66. It is easy to operate. With it, you can know about your children's location information anytime anywhere.

MT-SAFE has the following functions:

- **Call:** The function is only available for the Android version APP. You can set authorized phone numbers in advance by Meitrack Manager or APP. Then choose **Call** on the APP main interface to implement two-way calling.
- **Historical trace:** Set a time period to query children's trace in this time period.
- **Event report:** Query an event, for example, SOS, low battery, power on report, GPS blind spot, sleep, and enter/exit geo-fence events.
- **Real-time tracking:** After you send a positioning command, the platform can receive positioning results including the longitude, latitude, date, time, and positioning state.
- **Device status:** Check battery power, positioning state, device state, and location information.
- **Device management:** Devices can be added, modified, and deleted. In addition, you can manage multiple devices at the same time.
- **Parameter settings:** Authorized phone numbers, geo-fences, and the data uploading interval can be set on the APP.
- **System settings:** Set functions as required, including **Push notification**, **Parse address**, **Language**, **Map**, **Suggestion**, and **Check update**.
- **Selecting a server:** You can select a server based on the IP address.

3 How to Install

Installation environment: MT-SAFE supports Android and iOS systems.

3.1 Downloading the Client by Mobile Phone

For iOS: Scan the quick response (QR) code in Figure 3-1 to download the client.

For Android: Scan the QR code in Figure 3-2 to download the client.

4 How to Use

4.1 APP Interface

The MT-SAFE main interface includes the following information:

- Icon
- Device name
- Current location
- Battery power
- Device state
- GSM signal
- GPS signal
- Function menu
- Slide menu

Figure 4-1 MT-SAFE Main Interface

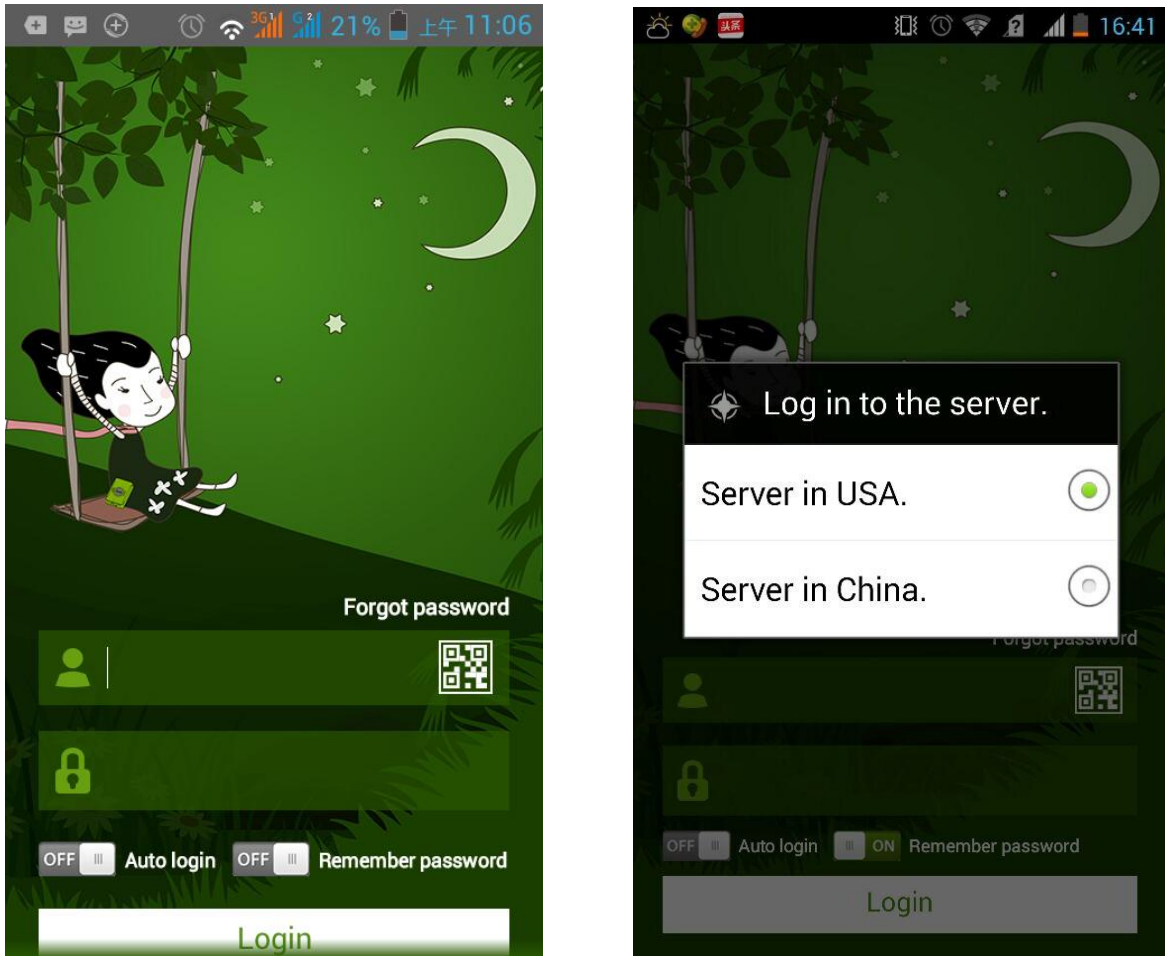

4.2 Selecting a Server

Start the APP to enter the main interface, and select the server in USA (IP address: 67.203.13.26).

Figure 4-2 Login Interface

Figure 4-3 Selecting a Server

4.3 Logging In to the APP

There are two ways to log in to the APP as follows:

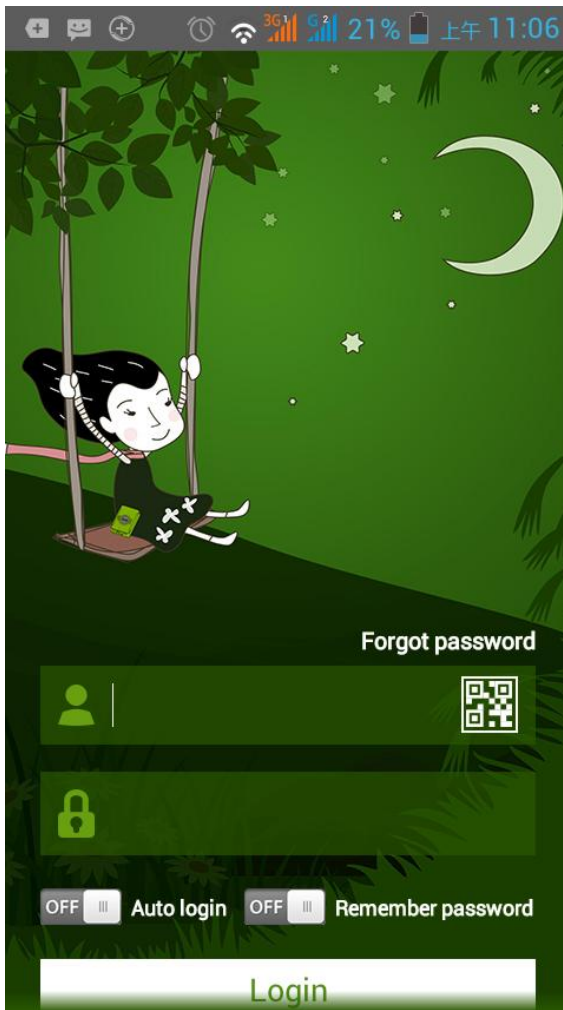

- Enter the bounded user name and password.
- Click  to scan the QR code. You can find the QR code from the packing box or the device.

Figure 4-6 Add Device

- On the main interface, click the device icon to go to the **Device info** page. You can change the icon, device name, SIM phone number, and device password.

Figure 4-7 Device info

4.4.2 Setting Parameters

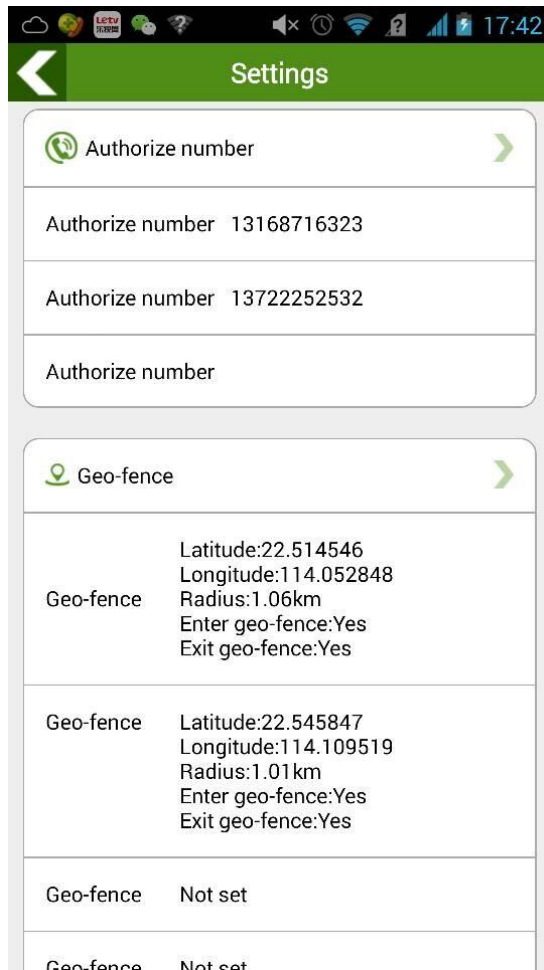

On the main interface, slide the menu, and choose . On the **Settings** page that is displayed, you can set authorized phone numbers, geo-fences, and the data uploading interval.

Figure 4-8 Settings

- **Authorize number:** You can set three phone numbers. When you press the SOS button in an emergency, the device will dial the three phone numbers in sequence.
- **Geo-fence:** It allows parents to create geo-fences or virtual zones. When their children enter or exit one, an alarm will be generated.
- **Interval setting:** After you set the data uploading interval, the device will upload positioning information at the interval, and thus implements real-time tracking.

4.5 Sending a Command

On the main interface, slide the menu to select and send a command. The command will be sent successfully when the device is online.

4.5.1 Call

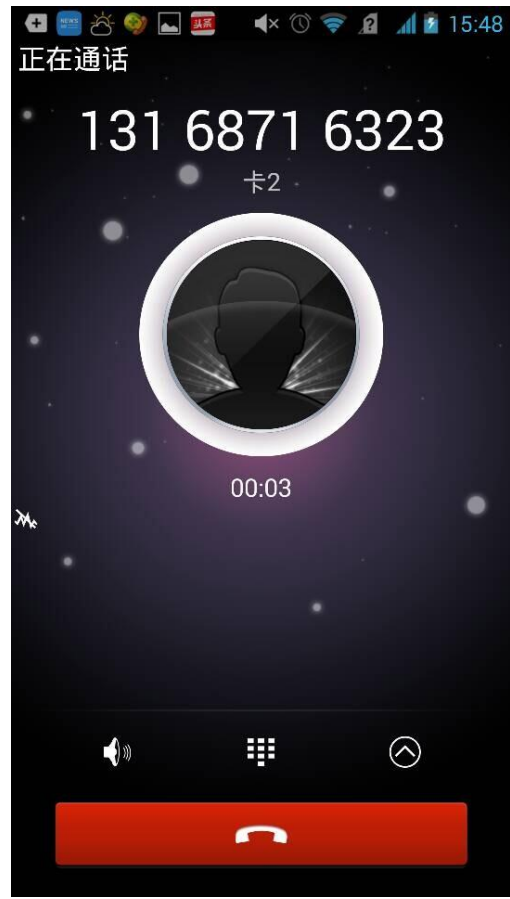

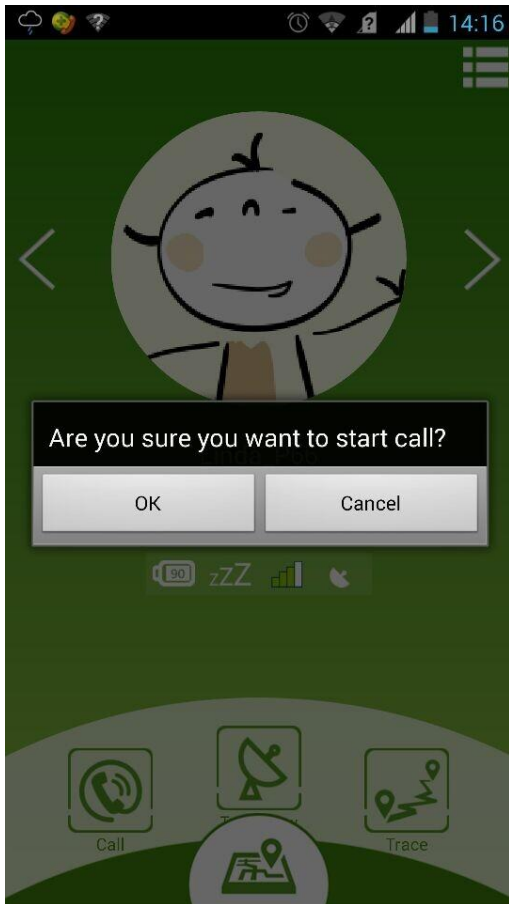

On the main interface, slide the menu, and choose

to dial a preset authorized phone number. In this way, two-way calling can be implemented.
