

VideoCAM Trek

100K Pixel Internet USB Web Camera

*Compatible with MSN Messenger,
Yahoo Messenger, AIM[®]*

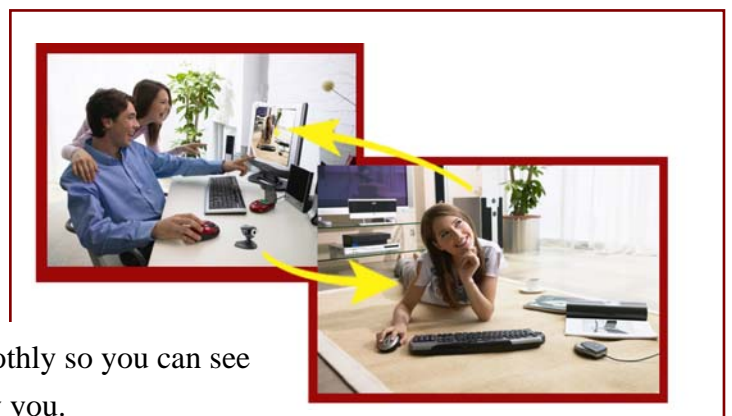

Express your creativity and add live video to your instant messages while you chat. In this stylish shape, it just looks similar to something you've seen from Star Wars.

The 100K pixels image sensor provides a resolution of 352 x 288 pixels. Compatible with MSN Messenger, Yahoo Messenger and AIM[®], VideoCAM Trek also has an "easy touch" snapshot button for quick image capturing with just one click. **The smartly designed 360° adjustable base along with the zoom in/out function allows you to capture any movements around you with a lot more clarity.** The most important thing is you can also use VideoCAM Trek as a security camera to help keep an eye on your surroundings when you're not around.

* Easy touch snapshot button for quick image capture

* The Smartly designed 360° base

The adjustable base swivels 360° smoothly so you can see what happens around by you.

Features:

- Compatible with MSN Messenger, Yahoo Messenger, ICQ, AIM[®]
- Still image capture and motion video clips
- Adjustable base rotates 360 degrees
- Zoom in/out for clarity
- Used also as a security monitoring system
