Functions of the NorSap 1500 chair

- 1. Packing net on backside of chair (This document should be stored here)
- 2. Eccentric adjustment of armrest angle (Armrests can be tilted to an upright position)
- 3. Back rest adjustment release/tighteners
- 4. Seat forward/aft adjustment
- 5. Back rest adjustment gas strut release
- 6. Column height adjustment gas strut release (Not applicable in all models)
- 7. Swivel/turn release of chair top
- 8. Seat angle adjustment (Seat can be tilted to an upright position)
- 9. Foot rest height adjustment release (Foot rest can be tilted to an upright position)

Replacing seat pillows

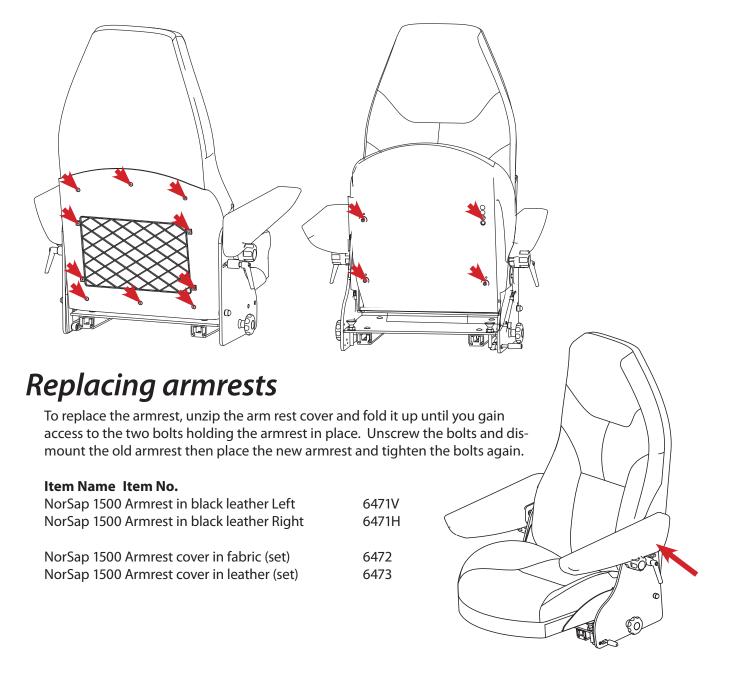

If your upholstery is damaged or worn, its recommended to replace the whole part. To re-fit new leather (or other fabric) on existing cushions is not recommended.

If the chair is intended to be used under extreme conditions, an additional seat cover is advised. This comes in two different materials, water repellent and fabric.

Item Name Item No.	
Seat cover in fabric	6470
Seat cover in water repellent	6451

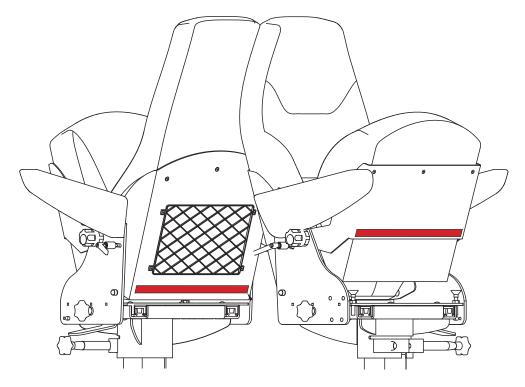

To replace the back rest cushion, unscrew the 10 marked wood-screws on the illustration below. Replace the cushion with the new one, re-mount the cushion with the wood-screws.

To replace the seat rest cushion, flip up the seat and unscrew the 4 marked wood-screws on the illustration below. Replace the cushion with the new one, re-mount the cushion with the wood-screws.

Securing additional seat cover

To secure seat cover, place Velcro tape on the lower back rest and underneath the seat as illustrated below.

Care and maintenance of leather

Most leather qualities have originally received one or another type of surface protection treatment. When the furniture is taken in use, grease from hand and neck will be in contact with the leather on a regular basis. Without proper cleaning the leather will over a period of time leave grease spots or discoloration's. To avoid this clean with Soft Cleaner on a regular basis, we advise once a month. Use Leather Protection Cream or a leather cream with impregnation 2-4 times a year. This will protect against spots, increase wear resistance and preserve the leathers softness. By following these instructions you will ensure a long and lasting leather quality.

Avoid direct sunlight over a longer period of time. Do not place a heat source within a distance of 20-30 cm. Remove dust or vacuum, use Soft Cleaner once a month.

Contact us or an authorized leather producer or furniture dealer for more cleaning medium or for further cleaning details.

Preferred supplier of cleaning medium is: Leather Master AS - 6220 Straumgjerde - NORWAY - Tel +47 70 25 35 50 - Fax +47 70 25 35 58 - www.leathermaster.no - service@leathermaster.no

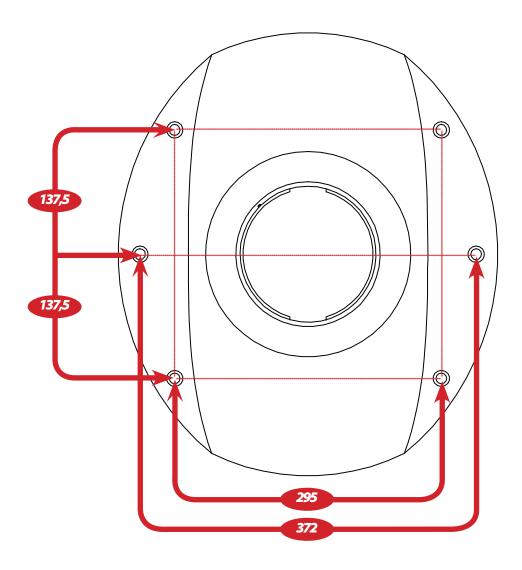

Care and maintenance of fabric

Remove dust or vacuum, use a neutral cleaning agent, such as soapy water when needed.

Mounting holes measurements

A strong and level foundation is required to secure the installation of the base.

It may occur that during storage or transport that the telescope column fastens in the lower position. This can easily be adjusted by fastening the lockable arm for swing, lift up the release handle at the same time pull up the chair.

Mounting on a deck rail

First make sure to have mounted the deck rail according to its user manual.

The bolts for mounting the chair to the deck rail is already in place on the carrier wagon.

- If you have an electrical deck rail and the cabling of the switch is done by quick-connections already implemented in the chairs column.
- If you have a manual deck rail with release from seated position, the mounting of the release lever is shown in the deck rails user manual.
- If you have a basic deck rail, the wiring and mounting of the release lever is shown in the deck rails user manual.

Cabling of extra equipment in armrests

The diagram below shows how to cable the wires thru the chair and column.

Receiving the chair prepped for additional equipment in the armrests, the wiring of your equipment should follow these steps.

- 1. Release the hand wheel (**pos 1**) holding the equipment holder in place.
- 2. Mount your equipment, making sure the cable is going thru the pipe.
- 3. Pull the cables out from underneath the arm rest (pos 2), open the zipper to gain access.
- 4. Use a flexible cable channel (**pos 3**) to secure the cables

going from the armrest all the way to the column top. Leave enough play for chair adjustments.5. Either use existing holes underneath the square top of the column (**pos 6**) or

drill new holes corresponding with the size of the cables / cable channel (pos 5).

6. Place the cables thru the column top. Make sure to have enough play of the cables to

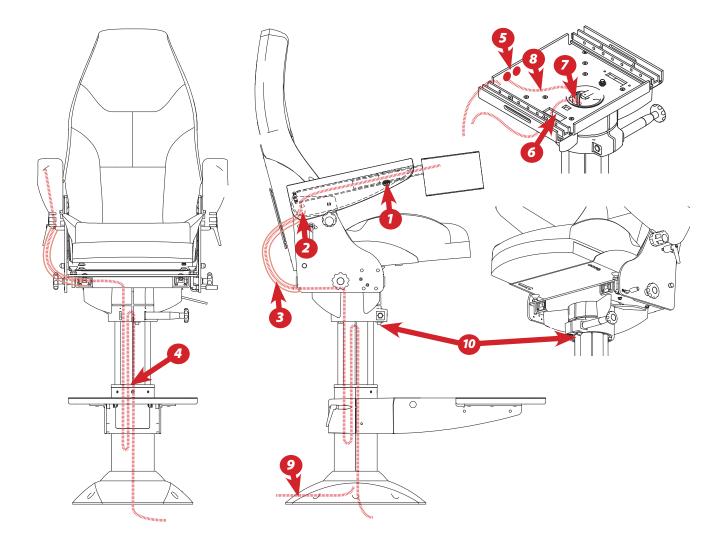

compensate adjustments of the seat, swivel (see # 10) and height (pos 4).

- 7. Find a suitable place to strip tight the cables (**pos 8**).
- 8. The cable is connected to further wiring solutions from under the pedestal.

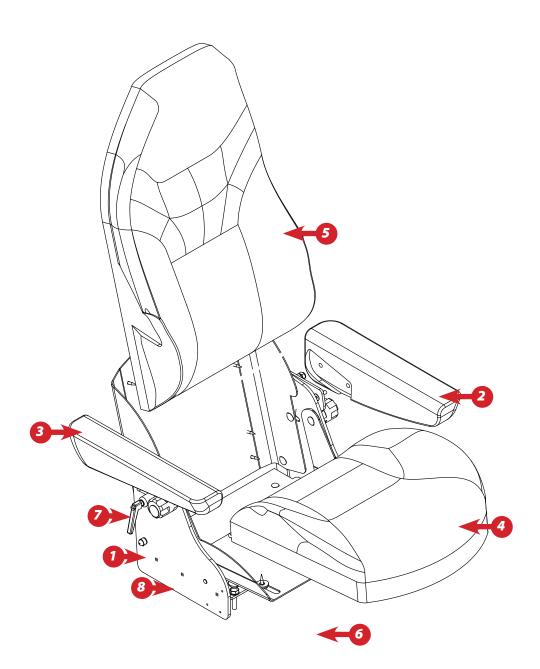

If mounted on a deck rail, please view the deck rails user manual for further info.

- 9. If needed, you may drill a hole in the pedestal for extraction of the cable and
- pull the cables through a designated hole in the lower part of the column. (pos 9)

10. To avoid breakage of cables/wires within the column, a 360° swivel restriction needs to be applied. Place an B415-M8x16 bolt (**pos 10**) with a B480-M8 washer.

Foot rest

The NorSap 1500 comes either with or without foot rest.

Maintenance of moving parts

The glide parts of the chair can be lubricated with a silicone based lubricant. If the chair is on a deck rail, its important that the deck rails railway is NOT lubricated.

Safety

All moving parts has a potential squeezing hazard. Be sure to keep hands and fingers out of moving parts areas when operating the chair.

Shipping and storage specifications

The chair should be shipped and stored in an upright condition. No other materials should be shipped or stored on top of a the chair or deck rail.

The chair should be shipped and stored at temperatures between -20°C and +40°C. The chair should not be operated until its been acclimatized between 0°C and +30°C. The chair should be kept in a clean, dry environment.

Upon receipt, we recommend that the shipping packaging be immediately examined for damage. Any damage should be noted on the delivery receipt and a request for inspection by the transportation company should be made. The shipping packaging should be opened immediately and the chair or the deck rail examined for concealed shipping damage.

If the chair appears to be damaged, a concealed bad order report should be immediately filed with the transportation company.
