Press to back to the previous page or menu

Note: The remote control may be not applicable to the operation of some game and education APPs, in such a case, we suggest you to use wireless mouse instead.

Wireless mouse

- 1. Find and remove the battery cover in the bottom of the mouse, then insert 2pcs batteries (size: AAA) with the + and - properly aligned, then close the battery cover.
- 2. Insert the wireless USB receiver to the USB port in Cloud TV Box.
- 3. You can use the wireless mouse for operation.

4. Usage:

The left mouse button: click the button to choose and confirm The right mouse button: click the button to return or exit. The middle mouse button: slide the button to move the cursor (focus)

Note: wireless receiving distance is within 33 feet.

Turn on/off the cloud TV BOX

- **1.** Connect your Cloud TV box to your TV by HDMI cable before you turn on Cloud TV Box.
- 2. Power on: plug the power adapter to the power socket, then connect the power adapter to your cloud TV box, then press the power button on the cloud TV Box, the indicator light is green now, your Cloud TV box is starting.
- **3. Power off:** press the power button on the Cloud TV box, and the indicator light is turned off now.
- 4. When the Cloud TV box is running, press the Power button on the remote controller to put your Cloud TV Box into stand-by mode, when your Cloud TV Box is in stand-by mode, press Power button again to start it.
- **5. LED Indicator light:** when your Cloud TV is running, the indicator light is green, and when your cloud TV box is in stand-by mode, the indicator is red.

Connect to Networks

1. WI-FI :

For networked functions, such as Browser, Map, Email, YouTube, Facebook, Market Place..., you need to link to internet firstly. Please operate as follow steps to setup your networks,

Starting from the main menu,

(1) Click "Wifi",

(2) Click "Wi-Fi" and next line "Wi-Fi setting".

Wireless & network settings	And the second se	
Wi-Fi Turn or WI-FI		S.
Wi-Fi settings Set up & manage wireless access points		
VPN settings Set up & manage Virtual Private Network		
Mobile networks Set options for reaming, networks, APNs		

(3) Your TV Box will search wireless routers in your surrounding, and your router will appear on the screen, click on "Your Router".

Wi-Fi settings	
Wi-Fi Disconnected	×.

Trouble Shooting

1. Cannot connect to Network

Make sure Wi-Fi is turned on, and also check if you have input the right password of the Wi-Fi router.

Make sure the Network cable is securely connected and Ethernet works well

2. No signal on the HDTV.

Check the HDMI cable is securely connected. Check if you have selected the correct HDMI input in your HDTV.

3. Cannot turn on your Cloud TV Box

Check if power adapter is plugged into the power socket. Check if power adapter is completely plugged into the DC port of your Cloud TV Box.

Check if Power supply is stable

4. Some HDVTs can't display the entire picture

There are two ways to fix this problem

Set up the ratio of your HDTV as automatic. On your HDTV, go to Menu \rangle Screen \rangle Press the arrow button to select the ratio type \rangle choose automatically display the entire picture.

Adjust the display position of your Cloud TV Box. Pls see the "Screen Adjustment" in the user manual.

5. Remote controller does not respond.

Make sure the batteries are working and inserted properly. Make sure no object block the path between the Remote controller and the signal sensor on your Cloud TV Box. Make sure the distance between the remote controller and the Cloud TV Box is not more than 10m.
