ATLAS
BRACE TECHNOLOGIES

ATLAS CARBON NECK BRACE

A complete redesign for 2015 is impossibly light, flexible, and showcases a sleek, sexy, simplistic, and sophisticated new design that is the perfect combination of fashion and function. Carbon fiber is a naturally rigid material, but to make the Holy Grail of neck protection we won't accept that. Flexibility is the key to absorption, dispersion, and mobility so we tested countless weave combinations and layering techniques to obtain the most amount of flex possible out of an extremely rigid material. As it turns out, we achieved a significant increase in flexibility, and a lower weight, making the Atlas Carbon the Holy Grail of neck protection.

- Split-Flex Frame helps mimic natural body movements to create the best experience possible
- All new Easy Open system allows for quick, repeatable entry and exit with a simple push of a button, in any weather condition
- One mount, six positions, reversible to adjust size, and choose from a -10, 0, or +10 back support angle in either position
- All new long travel front chest suspension features 30mm of travel (a 300% increase), and is slightly stiffer to help dampen a wider range of impact forces
- Choose from two possible height adjustments to create the best fit for your body type and helmet choice
- All new back supports increase contact with the body by 8% over the previous model, and avoids your spine by sitting on the surrounding muscles
- All new chest support design is stronger, lighter, more compatible with chest protectors, and still sits around your sternum
- Hybrid Strap combines the comfort of a chest strap, with the function and versatility of elastic X straps
- New weight (575 grams) is 12% lower than the previous model (Medium size/Optional pads removed)
- By sitting on 27% more of the body than the competition, comfort is maximized, and forces are distributed more efficiently over the body

Note: Chest circumference is measured high on the chest, right below the arms.

Grey

L	720988	499.99			

Fitting Guidelines:

Optimal fitment is achieved by selecting the correct rear mount offset and opting to use (or not use) the optional shoulder padding for height adjustment that suits your body and range-of-motion of your head/neck, as described in the Atlas Brace™ user manual. While fitting a brace, there are two key steps to follow for length and height adjustment.

1. While standing straight up, the brace should fit snug on your chest and back and the shoulder padding should be resting on your body. If the shoulder padding does not rest flush on the body, there will be a gap between the shoulder padding and the body. This shows the brace is too tight on the chest and the rear mounts, supplied with the brace, should be reversed to change the offset. This will add length to the brace to create a better fit and allow the shoulder pad to rest on the body as it should.
2. Once the brace is properly fitted for your chest size, determine which height setting is right for your individual body type and neck length so that you will have proper range-of-motion before starting activity. Put on a helmet to determine which setting is right for you and if you do not feel the proper range-of-motion is sufficient, remove the optional shoulder padding from your Atlas Brace™ by pulling down on the outer edge of the bottom shoulder pad. The padding will simply "pop" out of the top shoulder pad. Repeat for the opposite side. Make sure the brace still fits snug on the body and the shoulder padding is resting on your shoulders.

ATLAS AIR BRACE

The complete redesign for 2015 is impossibly light, flexible, and showcases a sleek, sexy, simplistic, and sophisticated new design that is the perfect combination of fashion and function. Lighter and tougher padding material in vibrant new colors, and a redesigned innovative tether that eliminates the need for multiple tools. The overall height of the product has been reduced, yet the amount of surface area in contact with the body has been increased in order to maximize the distribution of impact forces. A smaller and lighter product feels like you are wearing less, greatly enhancing the user experience of a neck brace.

- Split-Flex Frame helps mimic natural body movements to create the best experience possible
- All new Easy Open system allows for quick, repeatable entry and exit with a simple push of a button, in any weather condition
- One mount, six positions, reversible to adjust size, and choose from a -10, 0, or +10 back support angle in either position
- All new long travel front chest suspension features 30mm of travel (a 300% increase), and is slightly stiffer to help dampen a wider range of impact forces
- Choose from two possible height adjustments to create the best fit for your body type and helmet choice
- All new back supports increase contact with the body by 8% over the previous model, and avoids your spine by sitting on the surrounding muscles
- All new chest support design is stronger, lighter, more compatible with chest protectors, and still sits around your sternum
- Combining the comfort of a chest strap, with the function and versatility of elastic X straps
- New weight (599 grams) is 20% lower than the previous model, (medium size/optional pads removed)
- By sitting on 27% more of the body than the competition, comfort is maximized, and forces are distributed more efficiently over the body

ATLAS
 BRACE TECHNOLOGIES

ATLAS PRODIGY NECK BRACE

The Atlas Prodigy truly lives up to its name. Created as the perfect stepping stone for teens and small women, the Prodigy bridges the gap for all those "in-between" growing young bodies searching for the best equipment. Redesigned for 2015, lighter and tougher padding material in vibrant new colors, and a redesigned innovative tether that eliminates the need for multiple tools. Everyone deserves proper fitting equipment, even at those awkward "in-between" size stages in life.

- Split-Flex Frame helps mimic natural body movements to create the best experience possible
- All new Easy Open system allows for quick, repeatable entry and exit with a simple push of a button, in any weather condition
- One mount, six positions, reversible to adjust size, and choose from a -10, 0, or +10 back support angle in either position
- All new long travel front chest suspension features 30mm of travel (a 300% increase), and is slightly stiffer to help dampen a wider range of impact forces
- Choose from two possible height adjustments to create the best fit for your body type and helmet choice
- All new back supports increase contact with the body by 8% over the previous model, and avoids your spine by sitting on the surrounding muscles
- All new chest support design is stronger, lighter, more compatible with chest protectors, and still sits around your sternum
- Combining the comfort of a chest strap, with the function and versatility of elastic X straps
- Feather weight (550 grams)
- By sitting on 27% more of the body than the competition, comfort is maximized, and forces are distributed more efficiently over the body

Note: Chest circumference is measured high on the chest, right below the arms.

ATLAS DEFENDER PROTECTOR

- Protection designed specifically for your Atlas Brace
- The Defender design incorporates unique fit, function, and adjustment based around the features of our brace family
- Interchangeable parts and straps allow for eight unique configurations that can be worn with or without a neck brace, over or under a jersey, and in either full or front only versions
- High performance foam is lightweight, tough, comfortable, and waterproof. No more added water weight or damp feeling after washing.
- Unique waist straps have built in magnets that help keep the straps in place during use
- The Defender is available in one adult size, and is the perfect additions to any brace
- GoPro Ready, optional mount bolts directly to your Defender to get a perfect view of your riding, racing, or other extreme sports activity (camera not included)

EVS R4 PRO RACE COLLAR

- We took our proven race collar technology and stepped it up to the next level. The new R4 Pro improves upon existing lightweight feel and incredible fit by incorporating the use of carbon fiber, high impact injection grade bio-foam and an all new innovative air bladder shock absorption system. In addition, we improved the harnessing system by providing an all new bilateral torso strapping system.
- Minimizes risk of axial compression, hyperflexion, hyperextension and lateral hyperflexion
- Easy front entry system provides amazing range of motion of head
- Soft rubberized edges for increased comfort
- Adjustable sizing
- Works well with most chest protectors
- Ultra lightweight and low profile
- Weight: Adult = 585 grams Youth = 336 grams
- Rapid Lock Front Closure, makes getting in and out of the collar fast, easy and safe
- Carbon Fiber Top Cap, absorbs and disperses energy to the bio-foam and air bladder system
- Integrated Air Bladder Shock Absorbing, eases the tension on shoulders/spine when faced with direct impact from helmet
- Deflects and absorbs the impact energy through a deformation that uses energy, while also dispersing energy, thereby evening out the forces across the body naturally
- Adjustable Rear Strut, offers adjustments of 10°-12° between pin locations for a more customized fit
- Rear Axial Load Absorber "Tail" transfers impact energy across width of shoulders instead of blunt force to spine
- Bio-Foam Liner serves as an extra layer of absorption while offering added comfort
- Removable/washable
- Bi-lateral Torso Strapping System (X-Strap Harness), ensures a safe, secure fit throughout the entire duration of your ride

ANSR

ANSWER APEX ROOST DEFLECTOR

Our premium Apex roost deflector is easily the best-fitting roost deflector on the market highlighted by a hinged back that allows the unit to “hug” your body in addition to huge amounts of shoulder adjustment and pivot.

- Polycarbonate and polypropylene panels create maximum protection against flying debris
- EVA shoulder foam provides premium impact absorption with maximum comfort
- Pivoting rear lower panel allows deflector to move with and “hug” rider
- Three position front and back shoulder strap adjusters offer a fine tuned fit
- Will accommodate neck braces
- Adult: 115-180 lbs./5’6” - 6’

MOBIUS™ X8 KNEE BRACES

- The most comfortable brace ever designed
- Lightweight PM glass filled nylon shell conforms to your leg shape creating 360° of protection that won't rotate or slip
- The CCRS (Continuous Cable Routing System) adjusts the fit with a simple turn of the locking CNC Forged 6061-T6 anodized aluminum dial. The Figure-8 cable and behind-the-knee adjustment pad greatly strengthen the joint yet work as freely as your body's own ligament system. (Patent Pending)
- Overlapping patella area with zero degree CNC Forged 6061-T6 anodized aluminum stop leaves no gap exposed regardless of how far the knee is bent
- Plush molded EVA foam and impact absorbing rubber internal padding
- CNC Forged 6061-T6 anodized aluminum hinge plates

EVS TECHNOLOGY FEATURES:

Strut Compression System:

Made of reinforced carbon fiber, advanced lateral structural rigidity, offers further peace of mind.

Dual Defense: Total tracking knee cup for full time knee protection, knee cup tracks along a full length guide strap.

Tru-Motion 2.0: Anatomically correct hinges, track natural knee movement and reduces migration, adjustable hypertension lock-outs.

ClickTec: Quick release buckle system, fully adjustable for easy strap adjustment, adjust once, get in and out fast.

Perfect FormFit Frame: Frame forms to all leg contours, lightweight and impact resistant injection molded shell.

Comfort Liner: Dry-Suede ultra breathable liner keeps you cool and dry, removable/washable for easy maintenance, three compression straps ensure a solid secure fit.

EVS True-Motion 2.0: Patented EVS Tru-Motion 2.0 hinge (TM5+) enables the RS8 PRO to stay suspended on the leg in the intended position during the full range-of-motion with the natural roll and glide movement that mimics the natural arthokinematics of the knee. If a brace has migrated down the leg and the hinges are not aligned with the medial and lateral condyles of the knee - midline, hyperextension cannot be controlled effectively and injury can occur; the TM5+ hinges and RS8 PRO are designed to reduce the risk of that occurring.

EVS WEB PRO KNEE BRACE

The latest evolution in our premium knee brace delivers a sleek, ultra lightweight low profile carbon composite frame. Designed with an anatomically engineered fit and the proven Tru-Motion 2.0 hinges. Also comes equipped with a dual defense knee cup system and offers a fully modular design.

- Ultra-lite: Lightweight and durable carbon fiber construction
- Perfect FormFit Frame: Lightweight injection molded frame provides impact protection and knee stabilization
- Dual Defense total tracking knee cup design: Full protection at all times
- Tru-Motion 2.0 anatomically correct hinges: Keeps the brace in place no matter how much you ride
- Adjustable hyperextension lock-outs allow personalized fitment
- Modularity: Straps, D-rings, knee cups and liners are all removable and replaceable
- Thermo Fit Liner: Molds to your leg for a customized fit

EVS AXIS PRO KNEE BRACE

The Axis Pro Knee Brace showcases an industry first: an aluminum and carbon fiber construction. The monocoque aluminum hinge allows for a low profile structure, which results in a very lightweight, rigid brace. With a large amount of attention paid to the comfort of this brace the Axis Pro features an all new fit and will be like nothing you've ever worn before.

- Carbon Fiber upper and lower cuffs
- Adjustable hyperextension lock-outs allow personalized fitment
- Dual defense total tracking knee cup design, full protection at all times
- Ultra lightweight and durable construction
- Perfect FormFit frame
- Tru-motion 2.0 anatomically correct hinges
- Thermo fit liner

EVS EPIC KNEE PAD

A step up from your traditional knee guard, the Epic offers complete shin and patella coverage. Using many design elements handed down from our high end knee brace technology, the Epic utilizes our full floating knee cup, asymmetrical FormFit chassis and Full-Flex dual pivoting hinge system. The Epic also provides a plush contour molded biofoam liner and quick release positive locking buckles with fully adjustable Dry-Suede straps.

- Flex-Frame Technology, upper and lower cuffs contour around the leg for a custom feel
- Floating Patella System, Patella cup floats over the knee for maximum protection
- Full-Flex Hinges, durable hinges with full flexing construction
- Quick Adjustment Strapping System, adjustable strapping system for various leg diameters

Note: Sold in pairs.

EVS SC06 KNEE GUARDS

Whether you ride motocross, hit trails on your mountain bike or drop in at your local BMX track, the SC06 is your complete two-wheel knee/shin guard. Designed as a multi-sport knee/shin guard, the perforated neoprene construction along with a molded biofoam upper delivers a comfortable form fit along with impact protection. The SC06 also features an injected molded knee cup and shin guard to protect from big hits and pedal bites. The SC06 also incorporates a pre-curved "race shape" and compression comfort cuff to reduce migration. The newly designed SC06 is your preferred knee shin guard for all your two-wheeled activities

- Injection molded knee cup for increased patella protection
- Injection molded shin guard
- Dual wrap around upper and lower calf strapping system
- Molded biofoam upper for increased impact absorption
- Compression comfort cuff reduces migration
- Breathable perforated neoprene construction
- Moisture wicking liner
- Great multi-sport knee/shin guard

EVS CORE TEMPERATURE REGULATOR VEST (CTRV) COOLING VEST

Keeping your inner temperature as low as possible during extreme fitness is always challenging.

- Constructed of thin, strategically placed layers of "Super Absorbent Polymer"
- Once saturated with water, polymer retains and slowly disperses to keep you cool
- Strategic sections will keep your core temperature down longer
- Helps to maximize your riding session

EVAPORATOR

undergarb

ANSWER EVAPORATOR SHIRTS

- Spun fabric construction with wicking and anti-bacterial treatments creates a reactive moisture transfer system that keeps the body cooler and dryer than cotton
- After 60 minutes of exercise the Evaporator fabric releases 80% of it's moisture after 30 minutes of rest. Cotton releases only 40% of it's moisture after the same amount of time
- Inner layer contains fibers that will wick the moisture off skin quicker, creating a cooler interior climate. Once moisture is separated from your skin, the outer layer will evaporate the moisture fast and evenly

MSR® BASE LAYER SHORT & LONG SLEEVE

- Base Layer fabric is 50% lighter than the standard cotton t-shirt. After 60 minutes of exercise the Base Layer fabric releases 80% of its moisture after 30 minutes of rest, cotton releases only 40% of its moisture after 30 minutes of rest
- Made with compression fabrics that will hold your muscles in place longer and reduce body fatigue. Less chance for pulled and sore muscle tissue
- Two different layers of fabric: inner layer contains fibers that will wick the moisture off the skin quicker, creating a cooler inner climate. Once the moisture is separated from your skin the outer layer will evaporate the moisture evenly and fast
- Fabric is spun with wicking and anti-bacterial treatments

Short Sleeve

2XL	331208	34.95

MSR® BASE LAYER SKINS

- Reactive moisture transport system keeps the body cooler and dryer than cotton
- Made with stretch Lycra® for greater mobility in the fabric for stretch and fabric recovery
- Compression garment that will hold your muscles in place longer and reduce body fatigue
- Less chance for pulled and sore muscle tissue
- Fabric is spun with wicking and anti-bacterial treatments
- Comfortable elastic waist

MSR® D30® HIP PADS

- Compatible with all MSR® pants
- D30® intelligent shock absorption is a patented shock absorbing material engineered with intelligent molecules
- D30® is a rate-sensitive material, meaning when moved slowly the molecules flow freely, making it soft and flexible
- At high speeds (like an impact) the molecules lock together, making the material an excellent shock absorber
- The whole process is repeatable, occurs instantly and returns to its original state as soon as the impact is over
