

THANK YOU FOR PURCHASING THIS ERICA SYNTHS BLACK SERIES MODULE! These are high-end modules with unique functionality. Only the highest quality components are used and all inputs and outputs are protected against undesired overvoltage. When designing the Black Series, we did not economise on the module width, we put design and usability first. Big knobs are assigned to functions that make difference in sound. The Erica Black series are a range of modules that together make an entire synthesizer. Enjoy!

The Erica 8-splitter advanced replacement for stackable patchcables - it is active buffered multiple with signal status LEDs. Use it for splitting CV, audio and/or clock signals without interference among output signals and loosing signal strength!

SPECS:

Max input level.....-10V - +10V
 Power consumption.... +25mA, -25mA
 Module width.....6HP
 Module depth.....25mm

Status LED gives you visual indication on input/output signal amplitude. Especially useful for clock and CV signals.

Apply signal, you wish to split here! Input is DC coupled, so you can use it for splitting CV, clock or audio signals. This module is actually 2x4 multiple, and second input is normaled to the first output, so if nothing is plugged in the second input, you get one signal splitted to 8 outputs, OR if you plug a patchcable in INPUT2, you automatically get 2x4 multiple.

On outputs you get 8 or 4 identical independent signals - exact copies of input signals

SAFETY INSTRUCTIONS

Please follow the instructions for use of this Erica Synths module below, 'cause only this will guarantee proper operation of the module and ensure warranty from Erica Synths.

Water is lethal for most of the electric devices, unless they are made waterproof. Erica Synths module is NOT intended for use in a humid or wet environment. No liquids or other conducting substances must get into the module. Should this happen, the module should be disconnected from mains power immediately, dried, examined and cleaned by a qualified technician.

Do not expose the module to temperatures above +50° C or below -20° C.

Transport the instrument with modules installed carefully, never let it drop or fall over. Warranty does not apply to modules with visual damages.

The module has to be shipped in the original packaging only. Any module shipped to us for return, exchange and/or warranty repair has to be in its original packaging. All other deliveries will be rejected and returned to you. Make sure you keep the original packaging and technical documentation.

You will find Erica Synths terms of warranty at www.ericasynts.lv.

Items for return, exchange and/or warranty repair have to be sent to: Erica Synths Andrejostas Str. 4a, room T8-C, Riga, Latvia, LV-1045

DISPOSAL

This device complies to the EU guidelines and is manufactured RoHS conforming without use of lead, mercury, cadmium and chrome. Nevertheless, this device is special waste and disposal in household waste is not recommended.

Designed and made in Latvia.

User manual by Girts Ozolins@Erica Synths.

Design by Ieva Andrupe.

Copying, distribution or any commercial use in any way is prohibited and needs the written permission by Erica Synths.

Specifications are subject to change without notice.

In case of any questions, feel free to contact us through

www.ericasynts.lv or via e-mail info@ericasynts.lv.
