PRODUCT OVERVIEW	

# WE CONNECT PEOPLE AND TECHNOLOGY

We believe in the power of simplicity. Our solutions are developed to make your dictation workflow user-friendly to improve your day-to-day working life by streamlining the communication between the author and the typist. With speech-to-content solutions from Philips, the needs of all users in a dictation environment are met. Our outstanding reputation for quality and reliability has made us number one in the professional dictation market. Philips is the only full solution provider for all speech-to-content needs, such as software, hardware, and services. Practical technology, sophisticated yet simple, allows you to enhance your working environment and simply work smarter.

From the no. 1  
in professional dictation

TAILOR-MADE FOR  
YOUR COMPANY

Philips knows that no two organizations are alike. Therefore, our range of professional dictation solutions is built on established corporate core requirements and can be easily combined and customized with additional features and modules. They redefine the role of dictation in your organization and make our solutions the key to letting you work the way you want to. In short - Philips supports every dictation scenario.

**ANALOG VERSUS DIGITAL**

By changing over to a digital dictation workflow, companies can achieve efficiency increases of up to 25 %. Digital dictation shortens organizational processes thanks to automatic forwarding of the voice file and makes it easier to edit dictations.

# STREAMLINE YOUR WORKFLOW

Our solutions support every dictation scenario. This is the key to letting you work the way you want – and to providing individual solutions to the diverse requirements that are typical in enterprise-wide workflows.

**BASIC MODULES**

- SPEECHEXEC ENTERPRISE DICTATE**  
This powerful dictation module processes voice files from digital portables (Pocket Memo), as well as from stationary dictation devices (SpeechMikes).
- SPEECHEXEC ENTERPRISE TRANSCRIBE**  
Flexible computer-based transcription software features high-efficiency access, management of digital voice files, and visual workflow management.
- SPEECHEXEC ENTERPRISE MANAGER**  
The central administration module for the system defines user settings, job information settings and licenses, and supports Microsoft's Active Directory services.
- SPEECHEXEC ENTERPRISE LICENSE SERVER**  
The license server manages licensing for the dictation and transcription modules, the Workflow Manager, the Statistics Module, and the Web Director.

**OPTIONAL ACCOMPANYING MODULES**

- SPEECHEXEC ENTERPRISE FOR BLACKBERRY**  
Recording, editing, and submitting dictation files via a BlackBerry offers users the utmost flexibility and reduces document turnaround time substantially.
- SPEECHEXEC ENTERPRISE FOR iPhone**  
The Philips Recorder for iPhone is designed to fit perfectly into the Philips SpeechExec Enterprise suite. Record, edit, and send dictation files directly from your iPhone.
- SPEECHEXEC MOBILE SERVER**  
The Philips Mobile Server application manages the user administration of the iPhone and BlackBerry dictation recorders and distributes the recorded files automatically.
- SPEECHEXEC REMOTE DEVICE MANAGER**  
The Philips Remote Device Manager allows IT administrators to centrally configure all Philips Digital Pocket Memos and SpeechMikes.
- SPEECHEXEC WORKFLOW MANAGER**  
Set up and automate a workflow for moving, copying, and deleting dictation files based on predefined rules and schedules, and send automatic e-mail notifications.
- SPEECHEXEC STATISTIC MODULE**  
The Statistic Module displays comprehensive statistics on dictation, transcription, job status, and workload. The module offers graphical output for better and clearer analysis.
- SPEECHEXEC WEB DIRECTOR**  
The Web Director is an online Web interface for exchanging dictation files and associated documents. Users can upload dictations and documents or make them accessible for others from any computer with Internet access.
- DPM CONNECT**  
Smart footprint application for downloading dictation files from a Digital Pocket Memo (DPM) to client PCs.

SpeechExec transfers the dictation files to the right destination, supports the transcription process, archives and organizes the documents, and sends them back to the predefined targets.

INNOVATIVE VOICE PROCESSING

In many companies, rapid changes are occurring in the area of mobility. Studies have shown that a third of working hours now occur outside of the workplace. We have designed our dictation products and solutions in line with this trend. Enjoy your freedom, even when dictating.

PRODUCT HIGHLIGHTS

**DICTATION WORKFLOW SOLUTION**  
Smart speech-to-content solutions link authors, typists, managers, and administrators, facilitating communication, individual workflow settings, and organizational flexibility.

**CENTRAL ADMINISTRATION**  
Increase your organization's productivity by managing users, licenses, and system settings remotely. The central administration function facilitates the configuration of work list columns, filters, and job information.

**WORKSTATION-INDEPENDENT**  
SpeechExec software solutions from Philips let you decide for yourself how you want to work. Workstation-independent password settings allow users to log onto any computer within the company network and access their settings and familiar working environment.

**FAST DOCUMENT CREATION**  
Record directly into predefined templates to speed up the document creation process. Use roaming profiles for workstation-independent speech recognition.

**AUTOMATED WORKFLOW**  
All work routing, definition of work groups, and linkage between author and transcriptionist are centrally defined within the system using an intuitive interface. Set up a schedule to determine which dictation files should be sent when and to whom, and the files are reliably transferred according to the predefined settings.

**LOCATION-INDEPENDENT**  
SpeechExec Enterprise enables you to transcend all geographical boundaries, securely connecting headquarters with its subsidiaries, branches with home offices, and mobile users with their typist. The SpeechExec Enterprise Recorder for iPhone and BlackBerry turns your smartphone into a wireless digital dictation recorder. Record dictation files at home, in the office, on a plane, or anywhere you need to record and send voice files.

**DATA SECURITY AND BACKUP**  
File encryption, password-protected login, and secure file transfer via SSL allow only authorized individuals to access your documents. The optional automatic backup function protects your data against accidental loss.

**SEAMLESS INTEGRATION**  
The seamless integration into Philips digital dictation solutions guarantees superb audio quality, highly accurate speech recognition, automatic download of dictation files onto the computer, and easy hardware administration.

**SPEECH RECOGNITION INTEGRATION**  
SpeechExec Enterprise connects seamlessly with Dragon NaturallySpeaking Professional or Legal speech recognition software to control the entire document creation workflow within one single application. The complete speech recognition process is managed within SpeechExec.

**ACTIVE DIRECTORY SERVICES**  
SpeechExec supports Microsoft Active Directory services for central and easy administration of user and work groups.

**MODULAR STRUCTURE**  
SpeechExec Enterprise features modules and functionalities that extend beyond simple recording and transcription. With the Statistics Module, the Workflow Manager, and the Web Director, SpeechExec Enterprise offers three optional modules to adapt the software to every professional dictation and transcription need.

**GEARED FOR CITRIX AND TERMINAL SERVER**  
Support for Citrix and terminal server environments allow on-demand application delivery. SpeechExec can be virtualized, centralized, and managed in the data center and instantly delivered as a service to users anywhere. SpeechExec Enterprise has been successfully certified as Citrix-ready.

# MAKE THE MOST OF YOUR SOLUTION

The big picture is only as good as the sum of its small details. Therefore, the Philips SpeechExec remote device management software allows administrators to centrally configure Philips dictation devices, saving valuable time and resources.

**ONE FOR ALL**  
Simplicity in operation is the top priority not only for the person giving dictation. With the Remote Device Manager, IT administrators for the first time have the ability to centrally control and maintain individual dictation devices or whole device groups.

## APPLICATION EXAMPLES

A lawyer's Digital Pocket Memo is lost whilst traveling. After arriving at his branch office, he picks up a new recorder. The administrator registers the new serial number and uploads his settings to the new Digital Pocket Memo. He is able to continue working with his new recorder programmed in exactly the same way – without having to configure any setup.

An attorney is assigned to a new team that works with file encryption. The administrator changes the settings of the attorney's device. The settings are updated with the next file download, without the attorney having to lift a finger.

A department upgrades to bar code scanning. When the new hardware is issued, the administrator simply updates the group settings of the department, and all of the devices in that group are configured automatically. All radiologists now have a new Digital Pocket Memo or SpeechMike bar code unit, pre-configured with their required settings.

## PRODUCT HIGHLIGHTS

	<b>CENTRAL CONFIGURATION OF HARDWARE</b> With the unique Philips SpeechExec Remote Device Manager Philips dictation devices can be conveniently managed centrally and device configurations can be assigned to users, device types, and even individual units.	<b>FREE VERSION FOR UP TO TEN DEVICES</b> A free version of the Philips SpeechExec remote device management software is available via an online download. It supports reliable management and programming of up to ten devices.	
	<b>CENTRALLY CONFIGURABLE SETTINGS</b> Administrators can easily manage, update, and maintain the configuration and settings of individual units, groups of units, or all units with the Philips SpeechExec remote management software. The changes can then be automatically uploaded to assigned devices.	<b>AUTOMATIC FIRMWARE UPDATES</b> Easily upload firmware files for Pocket Memo, SpeechMike USB, and SpeechMike Air. The version of the firmware will be read automatically and stored in the database. After uploading the firmware, it can be assigned to all concerning device configurations in one operation.	
	<b>REMOTE DEPLOYMENT OF SETTINGS</b> All major functions of Philips Pocket Memos, SpeechMikes, and foot controls can be centrally configured and then rolled out remotely to any device within the organization. Fully location-independent.	<b>REMOTELY RESTORE SETTINGS</b> Individual user settings of Philips dictation devices can be remotely restored and backed up by administrators anytime and anywhere – in case of loss or unintentional deletion, as well as for new-device setup.	
	<b>SEAMLESS INTEGRATION OF PHILIPS DICTATION DEVICES</b> The Philips SpeechExec remote device management software seamlessly integrates Philips Pocket Memos, SpeechMikes, and foot controls for central configuration on an unprecedented scale.		

## SMARTPHONE DICTATION

Thanks to modern telecommunications and the new SpeechExec Enterprise software for the iPhone and BlackBerry, you can record your dictations wherever you want and send them immediately to your office. Just imagine: you are sitting on an airplane, dictating and sending, and by the time you arrive, you have already received your finished text document by e-mail.

# PRODUCTIVITY ON THE GO

The Philips Recorder for iPhone is designed to fit perfectly into the Philips SpeechExec Enterprise suite. Recording, editing, and sending dictation files from your iPhone offers mobile flexibility and reduces document turnaround times.

## PRODUCT HIGHLIGHTS

### PROFESSIONAL RECORDING CONTROL

The Philips Recorder for iPhone takes full advantage of the touch interface. It offers editing functions such as insert, overwrite, and append for professional recording control.

### EASY-TO-USE TOUCH-SCREEN CONTROL

The display shows all recording functions, and the main interface allows the user to record and navigate within recordings. Additionally, users can prioritize a recording, define a keyword and/or a category, or simply edit the recording name.

### PRIORITY SETTING

With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.

### LOCATION-INDEPENDENT

The Philips Recorder for iPhone turns your smartphone into a wireless digital dictation recorder. Record dictation files at home, in the office, on a plane, or anywhere you need to record and send voice files. The ability to send dictation files through wireless transfer decreases turnaround time and dramatically increases personal productivity.

### CLEAR USER INTERFACE

The clear user interface makes it fast and easy to find what you're looking for. It guides you through the dictation and upload process quickly and intuitively.

### EXPRESS RECORDER MODE

Shake, record, send: the Express Mode is quick and easy. Shake to record, and shake again to save your recording or have it sent immediately to your SpeechExec Mobile server.

### SPEECHEXEC MOBILE SERVER

The Philips Mobile Server application distributes the recorded files automatically to its registered users via e-mail or directly to a network folder, making your dictation workflow more convenient than ever before.

### AUTOMATIC ENCRYPTION

To avoid people accidentally getting access to your audio files, the highly secure Philips Recorder for iPhone offers not only the capability to encrypt files, but the application itself can be encrypted. In addition, the file transfer is also encrypted via SSL technology.

## THERE IS A NAME FOR DESKTOP DICTATION: SPEECHMIKE

Listening to the feedback of our partners and professional users has made the Philips SpeechMike the accepted standard for digital PC dictation – in both small offices and large organizations operating around the globe. With its ergonomic design and the incorporation of the latest technological advancements, Philips has once again positioned the SpeechMike at the forefront of professional digital dictation.

**FOR MORE THAN 50 YEARS**

From the beginning, Philips was a driving force in the development and production of innovative dictation and voice technologies. Digital dictation and efficient document creation help companies save time and money. Philips is the number one in professional dictation worldwide for good reason.

# ERGONOMIC. INNOVATIVE. RELIABLE.

The Philips SpeechMike Air is specifically designed to meet the tough challenges of document-intensive professions. It represents the perfection of desktop dictation, no longer restraining it by a cord. The pure, timeless design, its outstanding ergonomics, and the sophisticated functionality in conjunction with superb recording quality make it a milestone in professional dictation.

## PRODUCT HIGHLIGHTS

**INTEGRATED TRACKBALL**

The Philips SpeechMike Air offers an integrated trackball that allows the user to easily navigate through documents and files without using a mouse.

**NOISE-CANCELING MICROPHONE**

The superior microphone reduces background noise and is optimized for speech recognition. The built-in headset socket allows you to attach the noise-canceling headset for hands-free recording and even more accuracy in a noisy environment.

**WIRELESS DICTATION**

On top of the unparalleled wireless user experience, the SpeechMike Air features high connection reliability, low power consumption, and an expedient data transfer rate. The AirBridge and AirPort form the interface between SpeechMike Air and the PC. The AirPort docking station provides convenient charging of the dictation microphone, while the AirBridge serves as the PC connection. Voice data is encrypted and securely transferred from up to 33 feet away. While traveling or at home, simply attach the AirBridge to your laptop and continue working.

**CRYSTAL-CLEAR PLAYBACK**

The advanced built-in front speaker and the integrated sound card guarantee crystal clear playback of your dictation files.

**GEARED FOR SPEECH RECOGNITION**

The SpeechMike features preconfigured buttons for direct control of Dragon NaturallySpeaking, the voice recognition solution from Nuance.

**READY FOR INTEGRATION**

Philips provides a software development kit (SDK) for speech, office, and business application developers that allows for convenient programming of interfaces when integrating the SpeechMike into professional information and dictation solutions.

**ERGONOMIC ZONE DESIGN**

Designed with three ergonomic zones, it has been tested and proven by users to have the most comfortable fit in the human hand. The dictation zone is optimized to keep thumb movement to a minimum and allows for blind operation. The buttons needed for the actual dictation functions take up the greatest amount of space in the central area of the device. Less frequently needed function buttons are clearly arranged above and below. The trackball uses a laser sensor that allows precise cursor movements. It contains an integrated confirmation button for simple control of PC functions and can also be used to control playback volume.

# BOOST YOUR PRODUCTIVITY

The professional SpeechMike USB microphone takes stationary dictation to a new level. It delivers excellent speech recognition capabilities, an antimicrobial surface for improved hygiene, and refined ergonomics for easy operation.

## 43 % LOWER ENERGY CONSUMPTION

The SpeechMike USB dictation microphone is a milestone in professional dictation. Besides having outstanding technical characteristics, the product is also an environmental trailblazer. The new version has an impressive 43 % lower energy consumption, 51 % reduction in packaging materials, and 16 % reduction in product weight.

## PRODUCT HIGHLIGHTS

### NOISE-CANCELING MICROPHONE

The advanced microphone design and an optimized frequency response rate cater for the best speech recognition results.

### ANTIMICROBIAL SURFACE

The antimicrobial surface is important for use in a clinical environment. This feature was achieved by adding a substance to the plastic that impedes the reproduction of microorganisms, thus improving hygiene.

### ERGONOMIC ZONE DESIGN

Designed with three ergonomic zones, it has been tested and proven by users to have the most comfortable fit in the human hand. The dictation zone is optimized to keep thumb movement to a minimum and allows for blind operation. The buttons needed for the actual dictation functions take up the greatest amount of space in the central area of the device. Less frequently needed function buttons are clearly arranged above and below. The trackball uses a laser sensor that allows precise cursor movements. It contains an integrated confirmation button for simple control of PC functions and can also be used to control playback volume.

### GEARED FOR SPEECH RECOGNITION

The SpeechMike features preconfigured buttons for direct control of Dragon NaturallySpeaking, the voice recognition solution from Nuance.

### READY FOR INTEGRATION

Philips provides a software development kit (SDK) for speech, office, and business application developers that allows for convenient programming of interfaces when integrating the SpeechMike into professional information and dictation solutions.

### INTEGRATED BAR CODE SCANNER

Link client or patient data to a recorded file simply by scanning a bar code. The scanned information is automatically attached to the dictation file, streamlining the documentation process. All identifying information is entered accurately, increasing security and potential for cost savings.

### CRYSTAL-CLEAR PLAYBACK

The advanced built-in front speaker and the integrated sound card guarantee crystal-clear playback of your dictation files.

## PROFESSIONAL DICTATION ON THE GO: POCKET MEMO

The increasingly mobile business community, growing volumes of documentation, and the pressure of rising costs make digital dictation crucial for law firms, hospitals, and other professional businesses. Our range of portable dictation solutions is engineered to perfectly adapt to your organization's requirements, thus enabling you to optimize your workflow and enhance productivity.

FORM FOLLOWS FUNCTION

Philips Design is one of the largest design organizations in the world. In the ranking tables of International Forum Design Hannover, Philips takes a place at the top with its product designs and innovations.

COMMITTED TO YOUR BUSINESS

The Philips Pocket Memo digital recorder sets new standards in advanced functionality and style. The ergonomically shaped light-weight metal body is ideal for working over longer periods of time, and the intuitive one-thumb operation offers unparalleled user-friendliness. Coupled with a docking station for uploading your files, going from your voice to your text document has never been quicker.

PRODUCT HIGHLIGHTS

**SLIDE-SWITCH OPERATION**  
With the professional slide switch, you don't have to change your working habits and can enhance your dictation workflow. It offers a fast response and is designed for single-handed operation.

**PROFESSIONAL EDITING FUNCTIONS**  
Easy and quick file editing (insert, overwrite, append) via convenient slide-switch operation.

**HIGH-QUALITY MICROPHONE**  
The unique high-quality built-in microphone delivers increased recording sensitivity and enhanced sound quality.

**DSS PRO ENCODING**  
The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate and reduce file size, network traffic, and required storage capacity. The format also allows additional information, such as client/patient name or document type, to be stored in the file header, further facilitating file organization.

**FILE ENCRYPTION**  
The Philips Pocket Memo uses technology to encrypt dictations in real time. Furthermore, it can be protected against unauthorized use or file playback by assigning your personal identification number.

**VOICE COMMANDS**  
Assign job data such as keywords simply by saying them. This increases efficiency and minimizes the probability of errors.

**SMART BUTTONS**  
Two "smart buttons" let you scroll through the menu options and quickly make selections. Navigating through the menu to assign work types and other commands is fast and intuitive.

**USB DOCK**  
The Pocket Memo digital recorder can be fast charged through the USB connection to your PC. This gives you the assurance that your recorder will always be ready to work when you are. Furthermore, your files will be transferred to your PC automatically.

# OPTIMIZE YOUR WORKFLOW

The transcription set is a digital document creation solution specifically designed to make transcription easy and intuitive. The ergonomic accessories let you manage your jobs easily.

## PRODUCT HIGHLIGHTS

**PROFESSIONAL HEADPHONES**  
Lightweight, under-the-chin-style stereo headphones designed to deliver excellent sound quality, with soft ear cushions for enhanced wearing comfort.

**PRIORITY SETTING**  
With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.

**GEARED FOR SPEECH RECOGNITION**  
The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech recognition software guarantee superb audio quality, high recognition accuracy, and easy hardware administration.

**SEAMLESS INTEGRATION**  
The professional transcription set can be seamlessly and easily integrated into existing Philips digital dictation solutions.

**ERGONOMIC FOOT PEDAL**  
Ergonomic foot pedal for hands-free control of all transcription and playback functions. The slim, ergonomic design guarantees operation with minimal physical strain.

**INDIVIDUAL SORT AND FILTER OPTIONS**  
SpeechExec Pro Transcribe enables users to search for specific dictation files or filter their dictation list by user-definable criteria. Furthermore, the easy-to-use list-sorting options for single and multiple dictations guarantee a quick overview of dictation files.

**SEVEN TIMES FASTER THAN WRITING**  
Thoughts are formed in words, and the spoken word is known to be fast. Ten times faster than typing yourself and seven times faster than making notes by hand. When you dictate, you save time, leaving you with more time for the important things.
