

Water Analysis

Product Selection

With over 10 years of experience supplying equipment and consumables to laboratories across Australia, Pacific Laboratory Products, a former Radiometer Analytical agency, specializes in sourcing the latest technologies to facilitate processes along the broad range of water analysis applications.

This product guide showcases a comprehensive range of instruments handpicked specially for the water industry.

Starter Series pH, DO & Conductivity portable meters

ST300-G

Low-cost Portable Meters packed with productive features

- Lightweight design ideal for field testing
- Compact and ergonomic design offers a user friendly experience
- Clear, well-organized LCD screen
- Reliable calibration results in accurate measurement screen

Applications

- Academic • General Laboratory Use
- Food & Beverage
- Field Use • Water Analysis

Developed with versatility in mind, these meters can be operated in the lab with the support of the built-in stands or in the field thanks to their lightweight design. The portable Starter Series also boasts IP54 protection which shields the meter from damage by water and dust particles and it also offers an integrated labeling area which can be customized for quick identification. Each meter can store 30 sets of data memory and has the ability to quickly recall calibration data and stored information with one quick touch.

Starter 300 pH Meter

Starter 300 marries portability with precise pH measurement. An ORP or temperature electrode can also be easily connected to provide additional functionality.

- Auto buffer recognition stores calibration data and helps to avoid errors during the calibration process.
- Automatic and manual temperature compensation helps ensure accurate readings.

ST300-G

Starter 300C Conductivity Meter

Starter 300C is the reliable and accurate choice for measurement of the conductivity and TDS levels of liquids. With a variety of features that protect the meter from more extreme elements, Starter 300C can be used for a wide variety of applications.

- The 4-pole linear electrode offers a large conductivity range that safeguards itself from polarization and pollution effects.
- Automatic temperature compensation with an adjustable temperature coefficient.

ST300C-G

Starter 300D Dissolved Oxygen Meter

Starter 300D provides accurate and reliable dissolved oxygen measurement that is critical to aquatic life and water quality.

- Push-button toggling between ppm, mg/L and percentage.
- The galvanic electrode can be used immediately after being powered on without the wait time typically associated with dissolved oxygen meters.

sensION+ Benchtop Meter & Probe Kits

Choose from basic kits or advanced kits for your lab testing needs. All benchtop kits include: workstation with integrated stirrer, buffers, standards, storage solutions, calibration flasks, and accessories for quick start up.

- LPV2010T.97.0002** Basic pH (general) Benchtop Kit sensION+ PH3 meter with universal **5010T** pH and temperature electrode. For general aqueous applications.
- LPV2011T.97.0002** Advanced pH (dirty samples) Benchtop Kit sensION+ PH3 meter with open junction **5011T** pH and temperature electrode. For high solid content and/or viscous media samples.
- LPV2014T.97.0002** Advanced pH (high performance) Benchtop Kit sensION+ PH3 meter with dual junction **5014T** pH and temperature electrode. For sulfurs, reducing sugars or media that reacts with Ag⁺ ions.
- LPV2021T.97.0002** Advanced pH (difficult samples) Benchtop Kit sensION+ PH3 meter with clog-free **5021T** pH and temperature electrode. For low ionic strength, colloidal, emulsions and cream samples.
- LPV2111T.97.0002** Advanced pH (general) Benchtop Kit sensION+ PH31 GLP meter with open junction **5011T** pH and temperature electrode. For high solid content and/or viscous media samples.
- LPV3070.97.0002** Basic Conductivity Benchtop Kit sensION+ EC7 meter with universal **5070** conductivity and temperature cell. For general aqueous applications.
- LPV3170.97.0002** Advanced Conductivity Benchtop Kit sensION+ EC71 GLP meter with universal **5070** conductivity and temperature cell. For general aqueous applications.
- LPV4140.97.0002** Advanced pH (high performance) & Conductivity Benchtop Kit sensION+ MM374 pH, conductivity & ISE GLP meter with dual junction **5014** pH and universal **5070** conductivity with temperature cell.
- LPV4160.97.0002** Advanced pH, Conductivity and Dissolved Oxygen Benchtop Kit sensION+ MM378 pH, conductivity & DO GLP meter with dual junction **5014** pH, universal **5070** conductivity cell with temperature and **5131** DO electrode.

✓ Recommended Acceptable Not recommended Risk of damage

There is a Radiometer Analytical electrode for every application. The above table indicates the many applications for which Radiometer Analytical electrodes can be used. Where possible, choose an electrode which is "Recommended" but where one electrode is required for several applications, it may be necessary to select one which is "Acceptable".

Full specifications of the electrodes featured in the table are given on the following pages.

In addition to your application, there are other considerations when choosing an electrode. Length and diameter obviously depend on the sample size and sample vessel. RadiometerAnalytical offers electrodes with various lengths for specialist applications and small diameters for microsamples.

When measuring at high temperatures, the electrochemical system within the electrode needs to be considered. Radiometer Analytical offers Ag/AgCl electrodes specially designed for high-temperature measurements.

To avoid chloride interference, a reference electrode with a chloride-free reference system must be used (e.g. Hg/Hg 2SO₄ with K₂SO₄ salt-bridge) or a reference electrode with a double salt-bridge construction.

Service and Support

Our team of factory trained service engineers and product specialists is committed to customer satisfaction, working actively in the field to support our complete range of scientific instrumentation. Additionally, Pacific Laboratory Products offers service and maintenance for the equipment supplied.

Our product specialists, with years of practical experience in their respective fields and comprehensive product knowledge, are able to provide detailed application support and training required to ensure that you can realise the full potential of the instrumentation. In addition to breakdown service support, Pacific Laboratory Products offers a range of service agreement options that enable you to tailor a package to suit your needs.

Starter Series pH / Conductivity / ORP Benchtop Meters

Whether it is a basic or advanced model that you are looking for, you can rely on Starter Series bench meters to meet your water analysis needs.

Applications • Academic • General Laboratory Use • Food & Beverage • Water Analysis

Starter 2100 pH

Cost-effective and reliable pH Meter for Laboratory Applications

- With the attached quick guide, five clearly marked keys and user-friendly software, novices can operate the meter with minimal training.
- The built-in electrode holder provides uncomplicated and convenient all-in-one operation while the large LCD display screen clearly displays results.
- Auto buffer recognition, electrode condition icon, automatic temperature compensation and reference input, all work together to ensure accurate results.

ST2100-F

ST3100-F

Starter 3100 pH/ORP

Starter 3100 offers premium features at a cost-effective price point for reliable and convenient pH and ORP measurements

- Starter 3100's intuitive software includes three point calibration, three buffer groups, automatic and manual endpoint functions, as well as a 99 item library.
- Adjustable stand-alone electrode holder + large backlit LCD display.
- Simple documenting measurement data thanks to the RS232 which can be used to connect peripheral devices such as printers or computers to the meter.

Starter 3100C Conductivity

With plenty of advanced intuitive features, Starter 3100C is the ideal meter for standard testing of conductivity, total dissolved solids (TDS) and salinity.

- Starter 3100C's intuitive software includes 1 point calibration, 4 pre-defined standards, automatic and manual endpoint functions, and one touch conversion between measurement modes.
- Among Starter 3100C's user-friendly features that support ease-of-use are an adjustable stand-alone electrode holder and large backlit LCD display.
- Documenting measurement data is made simple through the RS232 which can be used to connect peripheral devices such as printers or computers to the meter.

ST3100C-F Kit	ST3100C-B (3100C Meter, Stand-Alone Electrode Holder, Conductivity Standards 1413 µS/cm and 12.88 mS/cm (20 mL Bottles) + STCON3 Conductivity Probe (Range 70 µS/cm – 200 mS/cm), In-use Cover			
Compatible Electrodes (Find the complete range on page 26)	ST210, ST230, ST310 , ST320, ST350, STMICR05, STPURE, STORP1, STORP2, STREF1, STREF2, STTEMP30			

ST3100

Starter Series pH / ORP Benchtop Meters

Starter ST5000 pH / ORP Bench Meter

Cost-effective High Performance
Bench Meter for universal applications

Applications

- Academic
- General Laboratory Use
- Pharmacy
- Water Analysis

ST5000-F

The Starter 5000 provides accurate pH and ORP measurement for high-level experiments and research. Enhanced features, advanced technology, and high performance have been combined to support complex laboratory tasks requiring pH measurement.

- The Starter 5000's performance is propelled by a 1000 item library, 10 sensors for calibration storage, 8 predefined and 1 self-defined buffer groups, 3 endpoint modes and GLP mode.
- Advanced Software and Technology Support Complex Applications and Intuitive Operation. Starter 5000 has a user-friendly interface, similar to other smart devices used daily. With a large LCD touchscreen display, users will find themselves intuitively navigating through all applications.
- Enhanced Features Offer Protection & Simple Use of this Advanced Meter — Starter 5000 also has many features that promote ease of use, convenience, as well as protection, including a standalone electrode arm, IP54 housing and in-use cover.

- High resolution:
0.001/0.01/0.1pH as well as 0.01/0.1/1 mV

- IP54 housing protects the meter from damage by water and dust particles
- Built-in USB host port to export data or RS232 to connect a printer

- 4.3" high-resolution color touchscreen has large digits and well-arranged icons to facilitate simple operation

Starter Series pH / ORP Benchtop Meters

Specifications

Model	ST5000
Package	ST5000-F
Part Number	30129896
Measurement Range	-2.000...20.000 pH, -2000.00...+2000.00 mV, -30°C...130 °C
Resolution	0.1/0.01/0.001pH, 1/0.1/0.01mV, 0.1 °C
Error Limits	± 0.002 pH, ± 0.03% FS mV, ± 0.1 °C
Calibration	1 Point, 4 Predefined Standards
Buffer Group	8 predefined groups, 1 self define group
pH Calibration	1-9 points
Memory	1000 sets, with 10*10 calibration data
Power Supply	110-240V/50-60Hz, 9 V DC
Size/Weight	220 W × 175 D × 78 H mm / 0.55 kg
Display	Color Touch-Screen LCD
Input	BNC, impedance >3*10e+12 Ω, Cinch, NTC 30 kΩ
Output	USB & RS232
Temperature Compensation	ATC and MTC
Housing	ABS

Compatible Electrodes (Find the complete range on page 26)	ST210, ST230, ST310, ST320, ST350, STMICRO5, STPURE, STORP1, STORP2, STREF1, STREF2, STTEMP30

pH Electrodes, Ohaus Starter Series

The Starter Series of electrodes includes pH, reference, oxidation-reduction potential (ORP), conductivity, dissolved oxygen (DO) and temperature electrodes that can be used in conjunction with our bench and portable meters. This catalog contains background information on each electrochemistry substance, information about our electrodes that measure these substances, as well as buffers and solutions.

Reference Electrodes

Model		
Part Number	30059254	30059253
Description	Saturated Calomel (SCE)	Silver/Silver Chloride (Ag/AgCl)
E vs. SHE (Standard Hydrogen Electrode) (V)	0.241	0.198
Connector	2mm Banana	2mm Banana
Dimensions (Shaft)	120 x 12 mm	110 x 12 mm
Cable Length	1m	1m
Description	STREF2 is saturated calomel electrode (SCE)(Hg/Hg ₂ Cl ₂ in saturated KCl) which traditionally is the most widely used electrode.	STREF1 is Silver/Silver Chloride (Ag/AgCl in Saturated KCl) which has become the most widely used reference electrode since SCE became less popular.

ORP Electrodes

Model		
Part Number	30038553	30038555
Shaft Material	Glass	Plastic
Temperature Range	0-100 °C	0-80 °C
Internal Reference Type	Ag/AgCl	Ag/AgCl
Refillable/Non-refillable	Refillable	Non-refillable, Gel
Reference Junction Type	Annular Ceramic	Ceramic Pin
Refilling Reference Electrolyte	3M KCl Solution	3M KCl Gel
Dimensions (Shaft)	120 x 12 mm	120 x 12 mm
Cable Length	1 m	1 m
Temperature Sensor	No	No
Connector	BNC	BNC
Zero Potential Value	86mV±15mV	86mV±15mV
Grade Difference	≥ 165mV	≥ 165mV

DO Electrode

Model	
Part Number	30031639
Connection	BNC
Cable Length	1.1 m
Shaft Length	120mm
Shaft Diameter	12mm
Temperature Range	0-50 °C
Shaft Material	Plastic
Measurement Range	0-200%
Storage Solution	10% NaCl

Conductivity Electrodes

Model		
Part Number	83033972	30080693
Connection	Mini-Din	Mini-Din
Cable Length	1 m	1 m
Shaft Length	130mm	95mm
Shaft Diameter	14mm	12mm
Temperature Range	0-50 °C	0-60 °C
Measurement Range	70 µS/cm - 200mS/cm (0.5% accuracy) 2 µS/cm - 70µS/cm (1% to 5% accuracy)	0.02 µS/cm - 200µS/cm (accuracy: 0.02µS/cm)

Temperature Electrode

Model	
Part Number	83033970
Shaft Material	Stainless Steel
Shaft Length	120mm
Temperature Range	0-100 °C
Cable Length	1 m
Connection	Cinch

miniLAB® Pocket pH Meters

Virtually unbreakable non-glass pH meters give stable readings in seconds

Pocket-size, waterproof, rugged pH meter allows single point calibration

Applications

- Beverage
- Collection Systems
- Field Use
- Food QC Lab
- Oil & Gas
- Wastewater

Designed to Last

Unlike disposable pocket-sized pH meters, Hach's miniLab Pocket pH Meters contain a virtually unbreakable non-glass silicon chip sensor that gives stable readings in seconds.

Part of the H-Series family of non-glass probes, miniLab meters use ISFET (Ion-Sensitive Field Effect Transistor) sensor technology that contains several proprietary layers deposited selectively on a silicon substrate. The final layer possesses an affinity for hydrogen ions only. The quantity of hydrogen ions at or near the sensor surface causes an electrical effect that is detected and measured as pH.

All miniLab meters offer water proof (IP67) operation, automatic temperature compensation and economical measurement of small sample volumes. A replaceable reference electrode further extends the longevity of the meter.

The sensor stores dry, therefore requiring no storage solutions. To clean the meter, simply use a toothbrush and a detergent solution.

Model / Part Number	H130	H135	H138
Description	One Point Pocket pH Meter with 1-point calibration	Professional Pocket pH Meter with 1-, 2- or 3-point calibration	Elite Pocket pH Meter with 1-, 2- or 3-point calibration
Battery Operation	Two 3v lithium batteries (CR2032) included		
Battery Life	Up to 200 hours continuous warning with 10 hour advance low battery and automatic power off		
Temperature	Range: 5 to 40°C; Automatic Resolution: 0.1°C or 0.1°F Accuracy: ±0.5°C		
Display	LCD with Temperature		
IP Rating	IP67		
pH	Suggested Range: 5.0 to 9.0 pH Range: 2.0 to 12.0 pH Resolution: 0.1 pH Repeatability: ± 0.1 pH Input Accuracy: ≤ 0.1 pH	Range: 2.0 to 12.0 pH Resolution: 0.1 pH Repeatability: ± 0.1 pH Input Accuracy: ≤ 0.1 pH	Range: 2.0 to 12.0 pH Resolution: 0.01 pH Repeatability: ± 0.03 pH Input Accuracy: ≤ 0.01 pH
Calibration	1-point	1-, 2-, or 3-point	1-, 2-, or 3-point
Automatic Buffer Recognition	pH 7.00 pH 6.86	pH 4.01, 7.00, and 10.01 pH 4.01, 6.86, and 9.18	pH 4.01, 7.00, and 10.01 pH 4.01, 6.86, and 9.18
Dimensions	155 x 33 x 20 mm (6 1/8" L x 1 1/4" W x 3/4" H)		
Weight	77 g (0.17 lbs.) -meter on

DR 1900™ Portable Spectrophotometer

The DR 1900 combines the ruggedness and portability of a field instrument with over 220 of the most commonly tested water methods.

Applications:

- Drinking Water
- Wastewater
- Field Use
- Industrial Water
- Power

The DR1900 excels in the field because it is the lightest and most compact portable spectrophotometer.

Carry Anywhere

The lightest, most compact portable spectrophotometer available easily goes where you need to go.

Test What You Need

Analyze your water with more preprogrammed methods than any other portable spectrophotometer, or easily create your own methods to suit your unique needs.

Ensure Accuracy in the Field

Wavelength range of 340 to 800 nm. provides accuracy typically seen only in laboratory instruments.

Portable device

Rugged construction keeps the elements out, which means you can perform your tests even in the most demanding conditions.

Easier Testing

Simple, easy-to-use interface plus the widest range of vial sizes makes testing flexible.

DR 1900™ Portable Spectrophotometer

Specifications*

Operating Mode	Transmittance (%), Absorbance and Concentration
Source Lamp	Xenon Flash
Wavelength Range	340 to 800 nm
Wavelength Accuracy	± 2 nm (range 340 - 800nm)
Wavelength Selection	Automatic
Wavelength Reproducibility	± 0.1 nm
Spectral bandwidth	5 nm
Photometric Measuring Range	0 to 3 Abs (wavelength range 340 – 800 nm)
Photometric Accuracy	± 0.003 Abs @ 0.0 - 0.5 Abs
Photometric Linearity	< 0.5 % (0.5 - 2.0 Abs)
Stray Light	< 0.1 %T at 340 nm with NaNO ₂
Display	Graphical display 240 x 160 pixel (LCD, b/w, backlit)
Data Logger	500 measured values (Result, Date, Time, Sample ID, User ID acc. to GLP)
Preprogrammed Methods	> 220
User Programs	50
Sample Cell Compatibility	13 / 16 mm and 1 inch round adapter, 1 inch square and 10x10mm
Dimensions (H x W x D)	3.9 in x 7 in x 10.5 in (98 mm x 178 mm x 267 mm)
Weight	3.31 lbs. (1.5 kg)
Operating Conditions	10 to 40 °C (50 - 104 °F), max. 80 % relative humidity (non-condensing)
Storage Conditions	-30 to 60 °C (-22 to 140 °F), max. 80 % relative humidity (non-condensing)
Enclosure Rating	IP67

Ordering Information

DR1900 Portable Spectrophotometer includes basic printed instrument manual, dust cover, 1-in. square glass sample cells, AA batteries and adapter set.

DR1900-01H	DR 1900 Portable Spectrophotometer
9624700	DR 1900 Portable Spectrophotometer with USB+Power Module

Accessories

LZV804	Power Module Includes module, universal power supply, and manual
LZV813	USB+Power Module Includes module, universal power supply, standard USB cable, special USB cable adapter, and manual
LZV949	USB Module includes module, standard USB cable, special USB cable adapter, and manual
2960100	Citizen PD-24 Printer Package

DR 3900™ Spectrophotometer

 Built with the future of water analysis in mind, the DR 3900 will give consistently accurate results in a simpler testing format.

Applications

- Beverage
- Drinking Water
- Wastewater
- Food QC Lab
- Power

Hit the play button!

Guided Procedure

The DR 3900 guides you step-by-step through the testing procedure like a GPS, so you can get the accurate results you need every time.

Elimination of False Readings

Scratched, flawed, or dirty glassware becomes a non-issue when your machine takes 10 readings and eliminates outliers.

Hands Free Updates*

RFID technology automatically updates the program calibration factors when you place a TNTplus box near the machine.

Flexible Connectivity

Built with 1 ethernet and 3 USB ports, the DR 3900 easily connects to your computer and is programmed to easily interface with Hach WIMS™ or any LIMS system.

Sample Tracking*

Sample bottles with smart tags can easily be tracked with the optional Hach RFID sample-ID system, eliminating sample mix-ups and providing better sample traceability.

DR 3900™ Spectrophotometer

DR 6000™ UV-VIS Spectrophotometer

The industry's most advanced laboratory spectrophotometer

Applications

- Beverage
- Drinking Water
- Industrial Water
- Pharmaceutical
- Power
- Wastewater

Hit the play button!

With UV and Visible Spectrum capabilities, over 250 pre-programmed methods including the most common testing methods used, guided procedures, and integrated quality assurance software, the DR 6000 ensures you are ready to handle your comprehensive water testing needs.

Your Water Testing Needs, All in One Spectrophotometer

The DR 6000 has the most pre-programmed testing methods, including high-speed wavelength scanning across the UV and Visible Spectrum.

Accessories for High Volume and High Accuracy Testing Needs

A carousel sample changer allows up to seven sequential measurements. The Sipper Module, an instrument-controlled sample delivery system, increases precision by constant optical characteristics.

Advanced Quality Assurance at Your Fingertips

The DR 6000 comes with integrated QA software for scheduling, documenting and interpreting all of your needed quality measurements.

Guided Procedures and Elimination of False Readings

The DR 6000, when used with TNTplus® reagent vials, provides the accurate results you need by guiding you stepby-step through your testing procedures. With TNTplus, the instrument averages 10 readings and eliminates outliers, making scratched, flawed or dirty glassware a non-issue.

Automatically Avoids Errors

RFID* technology automatically updates the program calibration factors when you place a TNTplus reagent box near the DR 6000. The instrument identifies chemistry expiration dates via a barcode on the vials, and detects chemistry coefficient factors to avoid errors that can occur in lot-to-lot variations in the chemistry.

DR 6000™ UV-VIS Spectrophotometer

Specifications*

Operating Mode	Transmittance (%), absorbance and concentration (wavelength, time)	Display	TFT 7 inch WVGA color touch
Source Lamp	Tungsten (visible range), deuterium (UV range)	Data Logger	5000 data points (result, date, time, sample-ID, user-ID)
Wavelength Range	190 - 1100 nm	Preprogrammed Methods	> 250
Wavelength Accuracy	± 1 nm	User Programs	200
Wavelength Reproducibility	< 0.1 nm nm	Sample Cell Compatibility	Rectangular: 10, 20, 30, 50 mm, 1 inch; round: 13 mm, 16 mm, 1 inch
Wavelength Resolution	0.1 nm		Optional 100 mm rectangular cell with additional adapter
Wavelength Selection	Automatic, based on method selection	Dimensions	8.5 in x 19.7 in x 18.1 in
Spectral Bandwidth	2 nm	(H x W x D)	(215 mm x 500 mm x 460 mm)
Scanning Speed Photometric	900 nm/min (in 1 nm steps)	Weight	24.25 lbs. (11 kg)
Measuring Range	± 3 Abs	Operating Conditions	10 at 40 °C, max. 80% relative humidity (non-condensing)
Photometric Accuracy	5 mAbs at 0.0-0.5 Abs <1% at 0.5-2.0 Abs at 546 nm	Storage Conditions	-25 to 60 °C max. 80% relative humidity (non-condensing)
Photometric Linearity	0.005 - 2 Abs ≤ 0.01 at > 2 Abs with neutral glass at 546 nm	Enclosure Rating	IP20 with closed lid
Stray Light	KI-solution at 220 nm < 3.3 Abs/ < 0.05%	Interfaces	USB type A (2), USB type B, Ethernet, RFID module

Easy and safe
Dosi-Cap Zip-
freeze-dried
reagent integrated
into sealed cap

Narrow neck
minimizes
chance for
reagent spills

Optically
superior
glassware

Vials are color-coded
by parameter and
range for easy
recognition and
error elimination

Barcode makes
testing hands-free
and fast-instrument
automatically
detects and runs
the correct method

Flat bottom improves handling
vial stands on its own

 [Learn more!](#)
[Watch the video](#)

Hit the play button!

TNTplus vials work exclusively with the DR 6000, DR 3900, and DR 1900 Spectrophotometers.

Principle of Operation

Hach's TNTplus chemistries and spectrophotometers are made to work seamlessly with each other.

- Many of the tests are EPA compliant.
- Over 35 tests available including these popular EPA Approved Parameters:

- Ammonia
- COD
- Chlorine
- Chromium
- Iron
- Nitrate
- Nitrite
- Nitrogen
- Phosphorus
- Sulfate

How TNTplus works

1. Barcode recognition

Simply drop in the vial and get results immediately with automatic method detection.

2. Reference detector

Monitors and compensates for optical fluctuations.

3. 10X Measurement and Outlier elimination

Dirty, scratched. Or flawed glassware, including fingerprints, is no longer an issue-instrument averages 10 readings and rejects outliers.

4. Self-Contained Packaging-Reagents Inside Sealed Cap

Reduces exposure to chemicals-no need to open pillows or clean glassware.

Pocket Colorimeter™ II

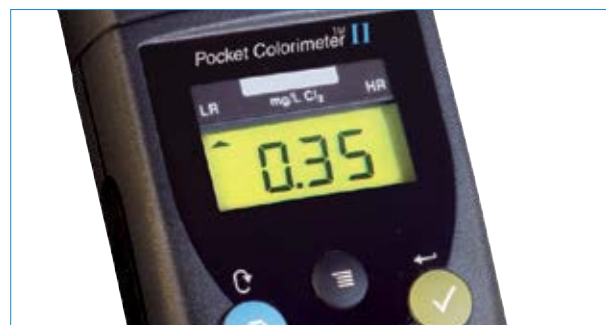

Small in size,
big on precision
and easy operation

Measure one or two parameters
quickly and easily

Applications

- Drinking Water
- Wastewater
- Power
- Industrial Water
- Field Use
- Beverage
- Food QC Lab

The Pocket Colorimeter II offers accuracy and reproducibility comparable to other more expensive laboratory instruments, it was designed for a long working life in harsh conditions. A long-lasting LED is used as the light source, and low power requirements assure long battery life.

Measures One or Two Parameters

The Pocket Colorimeter II is factory programmed for one or two of more than 30 possible parameters. Many are based on EPA approved methods. No manual calibration is ever required. Simply zero the instrument with a blank, insert the reacted sample, and read the result. Wavelength-specific models without factory calibration are also available for programming custom methods.

Waterproof, Rugged, and IP67 Rated

The IP67 rating means the Pocket Colorimeter II will resist the elements and still function properly. A tough, impact-resistant shell protects the electronics and optics, while a lanyard keeps the cap attached to the colorimeter.

Weighing only 0.2 kg—about a half pound—the colorimeter easily travels anywhere you do.

Logs Last Ten Data Points with Measurement Time

The Range Indicator icon on the colorimeter's display indicates either the instrument range or the parameter being tested. For many parameters, the instrument can measure in two different ranges. The instrument logs the ten most recent data points and the time the measurements were made—no need to record results manually.

Simple to Use

Just four buttons on the Hach Pocket Colorimeter II allow easy operation. The Read/Enter key is used when measuring sample concentrations or to confirm menu choices. The Menu key provides quick menu navigation and selection. Use the Zero/Scroll key to zero the instrument or to scroll through menu options. The Power/Backlight key turns the instrument on and toggles the display backlight for low light conditions.

Find the right
Pocket Colorimeter
according to your
applications.

Pocket Colorimeter™ II

Specifications*

Lamp	Light Emitting Diode (LED)	Display	LCD, backlit
Detector	Silicon	Power Supply	4 AAA batteries; approximate life of 2000 tests (use of backlight reduces this number)
Enclosure	IP67, waterproof at 1 m for 30 minutes (battery compartment excluded)	Compliance	European CE mark
Wavelength	Fixed wavelength ± 2 nm, varies with model	Warranty	2 years
Filter Bandwidth	15 nm	Dimensions	6.1 x 15.5 x 3.5 cm (2.5 x 6.2 x 1.4 in.)
Absorbance Range	0 to 2.5 Abs	Weight	0.23 kg (0.5 lbs.)
Sample Cell Pathlength	1 cm and 1-in. (25 mm)		
Operating Conditions	0 to 50°C (32 to 122°F) 0 to 90% relative humidity		

*Subject to change without notice.

DR 900 Handheld Colorimeter

Fastest and simplest
water testing
for the most demanding
field environments

Applications

- Drinking Water
- Wastewater
- Industrial Water

Hit the play button!

The hand-held DR 900 allows quick and easy access to your most-used testing methods. This colorimeter is waterproof, dustproof and field durable, with an intuitive user interface, easy data transfer abilities, and the ability to test up to 90 of the most commonly tested water methods, the DR 900 makes water testing in harsh field environments a little less challenging.

Your Favorites at Your Fingertips

Save time by storing your most standard methods for quick access in less than 4 clicks.

Field Ready in EveryWay Possible

This hand-held, rugged colorimeter is waterproof and dustproof. Drop tested and shock resistant for greater quality assurance.

Intuitive User Interface

Improved user interface allows quick selections and easier testing.

Simple Data Communication

Stores data for up to 500 tests, and comes with a USB port for easily downloading or transferring information.

Satisfies Your Core Testing Needs

A single handheld instrument provides access to 90 of the most common parameters.

DR 900 Handheld Colorimeter

Specifications*

Source Lamp	Light Emitting Diode (LED)
Wavelength Range	420 nm, 520 nm, 560 nm, 610 nm
Wavelength Selection	Automatic
Operating Mode	Transmittance (%), Absorbance and Concentration
Sample Cell	1 inch round or 16 mm round
Compatibility	(with adapter)
Data Logger	500 measured values (Result, Date, Time, Sample ID, User ID)
Enclosure Rating	IP67 (vial cover closed)
Battery Requirements	4, AA size alkali cells
Battery Life	6 months (typical) @ 5 readings a day / 5 days / week without backlight**
	** Backlight usage will decrease battery life.
Display	Graphical display 240 x 160 pixel (Backlit)
User Interface Language	English
Interface	USB type Mini IP67
Dimensions (H x W x D)	9.1 in x 3.8 in x 1.9 in (231 mm x 96 mm x 48 mm)
Weight	1.32 lbs. (0.6 kg) with battery
Includes	DR 900 Colorimeter, two 1-inch glass sample cells marked at 10, 20 and 25 mL, two 1 cm plastic sample cells, 1 x 16-mm COD/Test 'N Tube™ adapter, 4 AA alkaline batteries, printed multilingual instrument manual, instrument and procedure manuals on CD, USB Mini to USB Cable, European CE mark.

SL1000 Portable Parallel Analyzer™ (PPA)

Water Quality Testing dramatically streamlined

Applications • Drinking Water

Hit the play button!

The new Hach SL1000 Portable Parallel Analyzer (PPA) performs the same tests with less than half the manual steps. Get highly accurate results with less opportunity for errors in a fraction of the time. Up to six parameters tested simultaneously.

Faster Testing

Perform up to four colorimetric and two probe-based measurements in parallel, and complete the entire test suite in 25% of the time. Complete more tests on site, get the results you need faster, and visit more sites in each shift.

Less Hassle

A single instrument combines colorimetric and probe testing in a field kit that requires fewer bulky accessories. There are no powder pillows or glass vials to handle. All chemicals and processes are entirely contained inside the Chemkey.

Less Variability

Avoid manual steps that can introduce variability, even when performed by experienced testers. Automation and internal temperature control make the entire process consistent and repeatable, while applying the same processes and reagents as current Hach methods.

Patented Chemkey™ Technology

Chemkey reagents contain the same chemicals and execute the same process steps that you have trusted for decades - now delivered in a simple, self-contained package. EPA-approved for reporting of Free and Total Chlorine.

SL1000 Portable Parallel Analyzer™ (PPA)

Specifications*

Battery Requirements	Rechargeable Lithium-Ion battery pack
Battery Life	>200 Chemkey tests per full battery charge
Certifications	CE Compliant
Detector	Silicon photodiode
Dimensions Metric	258.3 mm x 130.8 mm x 58.9 mm (H x W X D)
Interfaces	Mini USB
Measurement Modes	Transmittance (%), Absorbance (abs) and Concentration (Conc)

Highly accurate
testing in
3 simple steps

ANDalyze Fluorimeter

Heavy Metal Testing in Water Obtain results in less than one minute!

Ideal for testing Lead, Uranium, Copper, Mercury, Cadmium, Zinc and More...

- Tests drinking water, environmental water and industrial water for soluble concentrations
- No special knowledge of chemical testing required
- Highly sensitive and selective (low ppb ranges)
- One instrument tests for multiple contaminants

Applications

- Drinking water
- Environmental water
- Food safety
- Ground water
- Industrial
- Mining
- Sewage
- Surface water
- Wastewater

Simple, One Minute Test

Quick, simple menu navigation and one button push for sample analysis.

Fluorescence Based Sensing

DNAzyme reaction produces quantitative fluorescence based results.

Data Capture & Reporting

Time and date stamped and site labeled results. Data downloadable and recharging through a USB cable.

Safe and Maintenance Free

CE Marked and water and dust resistant with IP54 enclosure rating. Free software upgrades via USB connection over the Internet.

Video Training On-board

Embedded instructional video trains users without documentation.

Environmentally Friendly

No harmful reagents and minimal waste. No test materials need special disposal.

Supports Multiple Languages

Selectable display languages including English, Chinese, Spanish, Portuguese, and German.

Sensor Kit

Each disposable color-coded sensor is designed for a specific heavy metal test target. Kits provide everything needed to test.

Hit the play button!

ANDalyze Fluorimeter

EPA Award winning technology

ANDalyze was developed as a hand-held fluorimeter and DNAzyme sensors for field testing of soluble heavy metal content in water supplies. It provides highly accurate readings in seconds.

The unique ANDalyze Fluorimeter is a breakthrough in efficiency, testing accuracy and ease-of use for field applications. It requires no special skill or knowledge of chemistry to operate. Furthermore, no hazardous materials or harmful reagents are required. In addition, the ANDalyze's technology reduces overall testing costs by reducing testing time and complexity.

[Learn more! ANDalyze successful case study](#)

DNAZYME Technology

ANDalyze's proprietary Catalytic DNA sensors use a DNAzyme reaction that fluoresces in the presence of a target contaminant substance such as lead. The fluorescence of the reaction is measured to determine the soluble concentration of the target heavy metal and is reported in parts per billion (ppb).

The test is performed by taking a 1 milliliter water sample, injecting it through the sensor, and into the fluorimeter. This sample is then automatically analyzed and reports results in less than one minute.

Specifications

TitraLab® AT1000 Series Automatic Titrators

12
Months
Warranty

AT1102.97

Titration has never been this simple!

- Quick setup and titration
- Practical USB based applications
- Obtain reliable titration results
- Low cost and simple maintenance
- Customize the device to your routine and pay just for what you need!

Applications

- Food and Beverage
- Drinking Water
- Wastewater
- QC Laboratory
- Petrochemical Industry

A revolutionary device capable of analyzing and delivering accurate results in just a few steps.

Titration can be simple! The TitraLab AT1000 from Hach uses pre-set functions that eliminate complex programming and provide accurate results.

Customize the device based on your most used applications and avoid unwanted device add-ons, to find out more simply contact one of our product experts at sales@pacificlub.com.au

Simple Setup and Titration

Application-specific functions to eliminate complex titration setup and analysis.

Reliable Titration Results

Eliminates operator interpretation and manual processes with automatic titration to quickly deliver accurate and repeatable results.

Pre-programmed titration methods detect end points and eliminate manual calculations to make results easier to achieve without advanced programming.

Small Footprint

The new Titration Series will occupy a relatively small space on your laboratory bench, ideal for the labs with reduced space.

Unique USB upload of application - specific titrations makes it quick for anyone to set up and operate a test.

Ease to use, large graphic color display. Hit the start button and let the device do the work for you.

Hach's unique application kits make it quick for anyone to set up and operate a test.

The Hach 2100Q and 2100Qis Portable Turbidimeters offer unsurpassed ease of use and accuracy in turbidity measurement. Only Hach offers this combination of advanced features including assisted calibration, simplified data transfer, and innovative measurement techniques that give you accurate results every time.

Easy On-Screen Assisted Calibration

The 2100Q Portable Turbidimeter provides confidence your measurements are right every time. On-screen assisted calibration and verification save you time and ensure accuracy. With an easy-to-follow interface, complicated manuals are not needed to perform routine calibrations. Single-standard RapidCal™ calibration offers a simplified solution for low level measurements.

Simple Data Transfer

Customizable power and connectivity modules provide smooth data transfer and flexibility. Optional USB+Power Module allows data download to any computer via USB port, providing superior data integrity and availability.

Accuracy for Rapidly Settling Samples

The innovative Rapidly Settling Turbidity™ mode provides accurate, repeatable measurements for difficult to measure, rapidly settling samples. An exclusive algorithm that calculates turbidity based on a series of automatic readings eliminates redundant measurements and estimating.

Convenient Data Logging

Up to 500 measurements are automatically stored in the instrument for easy access and backup. Stored information includes: date and time, operator ID, reading mode, sample ID, sample number, units, calibration time, calibration status, error messages and the result.

Optical System for Precision in the Field

The two-detector optical system compensates for color in the sample, light fluctuation, and stray light, allowing you to achieve laboratory-grade performance on a wide range of samples, even under difficult site conditions.

Two Models for Specific USEPA Requirements

The 2100Q Turbidimeter is compliant with EPA Method 180.1 design criteria. The 2100Qis Turbidimeter is compliant with ISO 7027 design criteria.

2100Q & 2100Qis Portable Turbidimeter

Specifications*

Measurement Method	Ratio turbidimetric determination using a primary nephelometric light scatter signal (90°) to the transmitted light scatter signal.	Operating Conditions	Temperature: 0 to 50°C (32 to 122°F) Relative Humidity: 0 to 90% @ 30°C, 0 to 80% @ 40°C, 0 to 70% @ 50°C, noncondensing
Regulatory	2100Q: Meets EPA Method 180.1 2100Qis: Meets ISO 7027	Storage Conditions	-40 to 60°C (-40 to 140°F), instrument only
Light Source	2100Q: Tungsten filament lamp 2100Qis: Light-emitting diode (LED) @ 860 nm	Interface	Optional USB
Range	0 to 1000 NTU (FNU)	Instrument Enclosure	IP67 (closed lid, battery Rating compartment excluded)
Accuracy	±2% of reading plus stray light from 0 to 1000 NTU	Protection Class	Power Supply: Class II
Repeatability	±1% of reading, or 0.01 NTU (FNU), whichever is greater	Certification	CE certified
Resolution	0.01 NTU on lowest range	Sample Required	15 mL (0.3 oz.)
Stray Light	<0.02 NTU (FNU)	Sample Cells	60 x 25 mm (2.36 x 1 in.) borosilicate glass with screw cap
Signal Averaging	Selectable on/off	Dimensions	22.9 x 10.7 x 7.7 cm (9.0 x 4.2 x 3.0 in.)
Detector	Silicon photovoltaic	Weight	527 g (1.16 lb) without batteries 618 g (1.36 lb) with four AA alkaline batteries
Reading Modes (user selectable)	Normal (Push to Read) Signal Averaging Rapidly Settling Turbidity		
Data Logger	500 records		
Power Requirement	110-230 Vac, 50/60 Hz (with Power or USB+Power Module) 4 AA alkaline batteries Rechargeable NiMH (for use with USB+Power Module)		

*Subject to change without notice.

Ordering Information

Hach portable turbidimeters are supplied with four AA alkaline batteries, a carrying case with insert, StablCal primary calibration standards in 1" sealed vials (20, 100, 800 NTU), 10 NTU primary verification standard, 6 sample cells with screw-tops, instrument manual (printed and on CD-ROM), quick start guide, silicone oil and oiling cloth.

- ☑ **2100Q-01** 2100Q Portable Turbidimeter (meets EPA method 180.1)
- ☑ **2100QIS-01** 2100Qis Portable Turbidimeter (meets ISO 7027)

Optional Accessories

- LZV813** USB+Power Module (includes: universal power supply, USB cables, instruction sheet)
- LZV804** Power Module (includes: universal power supply, instruction sheet)
- 2960100** Citizen PD-24 Printer Package
- 2971304** Battery, NiMH AA, pk/4
- 4397500** Degassing Kit
- 4397510** Sample Filtration and Degassing Kit
- 2971210** StablCal 100 mL calibration kit, 2100Q
- 2971200** StablCal 500 mL calibration kit, 2100Q
- 2464105** Gelex Secondary Standard Set

2100 Series Laboratory Turbidimeters

With four models for specific requirements, Hach 2100 Series Laboratory Turbidimeters offer superior accuracy and sensitivity in any application

Applications

- Drinking water
- Wastewater
- Process water
- QC Chemicals

Since Hach introduced the first laboratory turbidimeter for testing drinking water more than 40 years ago, the system has evolved to include advances in optics, digital signal processing, and software.

2100N and 2100N IS Turbidimeters

With Hach's patented* optical system and 40 years of design evolution, the 2100N and 2100N IS Turbidimeters meet the needs of most laboratories for fast, accurate turbidity testing over a wide range of samples.

The 2100N is equipped with a tungsten lamp, while the 2100N IS is equipped with an 860 nm LED light source.

2100AN and 2100AN IS Turbidimeters

In addition to providing all the capabilities of the above models, the 2100AN and 2100AN IS Turbidimeters are ideal for testing colored samples and higher ranges of turbidity. Many features, such as signal averaging and recorder outputs, are programmable in the 2100AN and 2100AN IS models. Enhanced features include interchangeable color filters and user-defined, Application-Specific Calibration (ASC).

Ratio Measurement

One keystroke initiates Ratio Measurement (not available for all models) and activates an array of detectors in addition to the 90-degree nephelometric detector. Ratio Measurement corrects for color interference, enhances calibration stability, and allows the measurement of turbidity at levels greater than 1,000 NTU.

Regulatory Reporting

The 2100N and 2100AN Turbidimeters are equipped with a stable halogen-filled, tungsten filament lamp to meet the reporting requirements of EPA Method 180.1.

The 2100N IS and 2100AN IS Turbidimeters are equipped with an 860 nm LED light source to meet ISO 7027 Turbidity Measurement Standards.

Air Purge Prevents Condensation in Sample Chamber

Measure cold and hot samples. A built-in connection is provided to purge the sample compartment with dry air to prevent light scattering caused by condensation.

Smart Self-Diagnostics

Relax. The instrument will alert you if you make a mistake such as inserting the wrong calibration standard.

2100 Series Laboratory Turbidimeters

Ordering Information

Each instrument is supplied with six sample cells, a complete set of StablCal® Primary Calibration Standards in sealed vials, silicone oil and oiling cloth, dust cover, instrument and operations manuals, and a power cord.

Model 2100AN also includes a 455 nm filter for Pt-Co color measurement. Models 2100AN and AN IS also include printer paper.

EPA-Compliant, Models 2100N and 2100AN

4700002 2100N Laboratory Turbidimeter, with power cord and fuse

4700102 2100AN Laboratory Turbidimeter, with power cord and fuse

ISO-Compliant, Models 2100N IS and 2100AN IS

4790002 2100N IS Laboratory Turbidimeter, with power cord and fuse

4790102 2100AN IS Laboratory Turbidimeter, with power cord and fuse

Accessories

4744900 Manual Flow Cell Kit

4745000 Automated Flow Cell Kit, 115 Vac

4745002 Automated Flow Cell Kit, 230 Vac

4397500 Sample Degassing Kit

4397510 Sample Filtration & Degassing Kit

2489500 Branson Ultrasonic Bath, for cleaning cells

3036300 Color Filter Module, for 410 nm wavelength

1999800 Color Filter Module, for 455 nm wavelength (incl with 2100AN)

3031200 Color Filter Module, for EPA compliance (incl with 2100N and 2100AN)

3036700 Color Filter Module, for 500 nm wavelength

3037100 Color Filter Module, for 560 nm wavelength

3037300 Color Filter Module, for 610 nm wavelength

3037600 Color Filter Module, for 810 nm wavelength

1999900 Color Filter Module, for 860 nm wavelength

2662105 StablCal Turbidity Standards Calibration Kit, for 2100N / N IS Turbidimeter, sealed vials (<0.1, 20, 200, 1000, 4000 NTU)

2659505 StablCal Turbidity Standards Calibration Kit, for 2100AN / AN IS Turbidimeter, sealed vials (<0.1, 20, 200, 1000, 4000, 7500 NTU)

246149 Formazin Turbidity Standard, 4000 NTU, 500 mL

The 2100 Benchtop Turbidimeter series come with tungsten (EPA variants) or LED (ISO variants) light sources and proven optics offering reliable, accurate, and stable measurements.

Vacuum Pumps **ROCKER**

100 Hours test!
Watch the video

Hit the play button!

Applications

- Filtration for microbiology
- Air sampling
- Suspended solid test
- Vacuum Filtration

Rocker 400

Rocker 300

Rocker 410

No air pollution, maintenance free

The Rocker 300 Pump is piston-driven, does not require lubricants, oil changes or costly maintenance

Prote™ overow protection

Rocker series pumps are equipped with Prote™ lter cartridge which can prevent a large amount of liquid from being sucked into the pump by negligence. It can also lter particle and moisture to prolong the service life of pump.

Thermal protection device

Each motor of Rocker series pumps has a built-in thermal protection device to shut o the pump automatically when overheated and then resume working when the temperature cools down.

Specifications	Rocker 300 	Rocker 400 	Rocker 410 
Part Number	PV4132	PV4071	PV4072
Voltage	220V/50Hz		
Max. power (W)	60	80	
Max. current (A)	0.3	0.4	
Max. vacuum	- 670 mmHg		730 mmHg
Max. flow rate	18 L/min	34 L/min	20 L/min
Moisture Trap / Vacuum Regulator	Yes		
Overflow protection	Yes		
Motor rotation	1450 RPM		
Horse power	1/8 HP	1/6 HP	
Noise level	50 dB	52 dB	
Port thread	5/16 inch (8 mm)		
Net weight	4.1 Kg	5.2 Kg	
Dimension (L x W x H)	27.2 x 12.1 x 16.5 cm	29.8 x 14.3 x 17.2 cm	
PS: 1 mmHg ≈ 0.1333 kPa ≈ 1.333 mbar , 1 l/min ≈ 0.035CFM			

Filtration Systems

47 mm Filtration Sets

PES (Polyethersulfone) / Autoclavable

Hit the play button!

- Spin-lock connection facilitates fast and stable installation without clamp.
- Built-in overflow protection to keep the filtrate from overflowing when waste bottle is full.
- Excellent smash, high temperature resistance and autoclavable (LF30-LF31)
- Funnel graduated in 50ml, receiver in 100ml increments for measurement (LF30-LF31)
- Stainless steel funnels offers excellent chemical resistance and can be fastly sterilized by flame (LF32-LF33).

Vacuum Filtration Systems

Special design for large number samples The BioVac 321B and 321C are economical models for large sample filtration. Each system includes vacuum pump, manifold, waste bottle and filter holders.

Light and handy aluminum design Manifolds are made of anodized aluminum which is autoclavable, light and cost-effective.

Suitable for different filter holders Manifolds can accommodate different types of filter holders through the supplied No. 8 silicone stoppers.

4 Litre PP waste bottle with drain The large capacity of 4000ml waste bottle with drain offers convenience of collecting and draining waste solution.

Specifications	BioVac 321B		BioVac 321C 	BioVac 330B	BioVac 630B
Max. Flow rate	34 L/min				62 L/min
Max. vacuum	- 670 mmHg				- 650 mmHg
Waste bottle	4000 ml, made of PP with drain				
Number of branches	3				6
Filter diameter	47 mm / 50 mm				
Funnel capacity	100 ml	300 ml		100 ml	100 ml

Multi-Branch Manifolds

Applications

- Microbiology testing
- Chemical experimentation
- General laboratory filtration

BioVac 320

BioVac 321

BioVac 330

BioVac 620

BioVac 630

Made of SUS316 The parts of BioVac 320 and BioVac 620 manifolds are made of SUS316, which offers excellent chemical resistance and can be fast sterilized by flame, steam and oven.

Light aluminum design The BioVac 321 is made of anodized aluminum and plated copper, making it light, cost-effective and autoclavable.

Patented Spin-Lock Design facilitates fast and stable installation without clamp.

Individual control valve Each branch permits individual control.

Compatible with different sizes of filter holders BioVac 320, 321 and 62 manifold include no.8 silicone stoppers which are available to fit various types of filter holders at option. BioVac 330 and 630 manifolds are available to fit 100, 300, 500ml funnel at option.

Radiometer Analytical, Hach & Chem Supply Buffers and Solutions

Pacific Laboratory Products can to assist you to identify the appropriate solution for your tests.

For more information please contact one of our product specialists at sales@pacificlab.com.au.

Radiometer Analytical IUPAC Series Certified pH Standards

Each bottle of certified pH or conductivity standard manufactured by Radiometer Analytical is supplied with two certificates: a Certificate of Conformity and Traceability drawn up according to ISO Guide 31(4) and a DKD Calibration Certificate. The back of the first certificate contains information about the composition and preparation of the standard as well as recommendations for storage and use to ensure optimum performance.

Safe storage
thanks to the
airtight can.

A guaranteed value
the nominal value of the standard is guaranteed until first
opening, even after several years' storage.

A useful reference
a pH or conductivity temperature
dependence table is printed on the bottle.

GLP - every day
the number of uses can be
marked directly on the bottle
in line with Good Laboratory
Practice.

**GLP -
right from the start**
the date of opening can
be marked
directly on the bottle.

**Recommended
shelf life**
the observed typical
shelf life after opening
is printed on the bottle,
ensuring timely
use (2-3 months
depending on the
standards).

Accurate values
the nominal value
and the tolerance
of pH standards
are given with a
resolution of 3
significant
decimals.

**Foolproof
calibration**
each bottle of pH
standard is supplied
with 25 colour-coded
beakers.

Buffers & Standard Solutions

Buffers General

Code No	Product Information	Pack
2319145	Phosphate, Butterfield'S Buffered	450 mL
2319110	Phosphate, Butterfield'S Buffered, 450 mL Bottle	Pk/10
2962266	Respirometric BOD, Buffer Solution, Pillows	Pk/50
45249	Sulfate Type, Buffer Solution	500mL
99949	Wash Water, Buffer Solution	500mL

2319110

Buffers Hardness 1

Code No	Product Information	Pack
42453	Hardness 1 Buffer Solution	1000mL
42449	Hardness 1 Buffer Solution	500mL
42432	Hardness 1 Buffer Solution, MDB	100mL
42426	Buffer Solution, HDNS 1, SCDB	50mL

42432

Buffers pH Standarization

Code No	Product Information	Pack
2974036	Buffer Solution, pH 9.18, Colorless	15mL
2973936	Buffer Solution, pH 6.86, Colorless	15mL
2227195	Buffer Solution, pH 10.01, Powder Pillows Blue	Pk/15

2227195

Buffer Set for MiniLab Meters

Code No	Product Information	Pack
CB40	Buffer Kit, pH 7 Solutions in Dropper Bottles	3 x 15ml
CB45	Buffer Kit, pH 4, 7, 10 Solutions in Dropper Bottle	3 x 15ml

CB45

Buffers Special Use

Code No	Product Information	Pack
43149	Phosphate Buffer Solution	500mL
2155353	Buffer Solution, pH 7.00, Phosphate	1L

2155353

Cleaning Solutions

Code No	Product Information	Pack
S16M001	Cleaning Solution Renovo N Normal Overnight Soak	250ml
S16M002	Cleaning Solution Renovo X Strong Quick Soak	250ml
C20C380	Cleaning Solution Thiourea for Electrode AgCl Pin Maintenance	250ml

S16M001 - S16M002 - C20C380

Hach Test Kits

Code No	Product Information	Pack
2107469	Acid Reagent Silica High Rng	Pk/100
2122332	Alkaline Cyanide Reagent MDB	100mL
2824349	Ammonia ISA Solution	500mL
TNT830	Ammonia TNT+, ULR, .02-2.5mg/L	Pk/25

Code No	Product Information	Pack
2415925	COD Digestion Vial, HR	Pk/25
2415915	COD Digestion Vial, HR	Pk/150
2125925	COD Digestion Vial, HR Hw	Pk/25
2125915	COD Digestion Vial, HR Hw	Pk/150

Buffers & Standard Solutions

Hach Test Kits

Code No	Product Information	Pack	Code No	Product Information	Pack
TNT832	Ammonia TNT+, HR (2-47 mg/L)	Pk/25	2125825	COD Digestion Vial, LR Hw	Pk/25
2484600	Ampule Breaker, Pourite	Pk/25	1404169	Cyaniver 5 Reagent PP 25mL	Pk/100
1429449	Bleaching 3 Reagent Powder Pillows	Pk/100	230166	Ferrozine Reagent Solution Plws	Pk/50

Maintenance Solutions

Code No	Product Information
S91M001	GK ANNEX Electrode Maintenance Kit. The GK ANNEX Electrode Maintenance Kit contains all you need for regular maintenance of combined pH, glass and reference electrodes with saturated potassium chloride salt-bridge: - Solutions for normal and intensive cleaning - KCl as saturated and crystals for refilling - GLP Logbook to keep note of calibration and maintenance procedures - Utensils and easy-to-follow instructions

Molar KCl solutions, Radiometer Analytical

Code No	Product Information	Pack
C20C250	Solution 0.1M KCl (12.88mS/cm at 25°C) KS910	500mL
C20C270	Solution 0.01M KCl (1.413 mS/cm at 25°C) KS920	500mL
C20C280	Solution 0.001M KCl (146.9us/cm at 25°C) KS930	500mL

C20C250

S11M012

pH 4 - pH 7 - pH 10 Series

Code No	Product Information	Pack
S11M012	Buffer Solution, pH 4.00 Clear at 25°C Technical Grade	500mL
S11M013	Buffer Solution, pH 7.00 Clear at 25°C Technical Grade	500mL
S11M014	Buffer Solution, pH 10.00 clear at 25°C Technical Grade	500mL

Buffers & Standard Solutions

pH Buffer Pillows

Code No	Product Information	Pack
2226995	Buffer Solution, pH 4.01, Powder Pillows R	Pk/15
2226966	Buffer Solution, pH 4.01, Powder Pillows R	Pk/50
2226964	Buffer Powder Pillows, pH 4.01 (NIST), Color - Coded Red	Pk/250
2227095	Buffer Powder Pillows, pH 7.00 (NIST), Color - Coded Yellow	Pk/15
2227066	Buffer Powder Pillows, pH 7.00 (NIST), Color - Coded Yellow	Pk/50
2227064	Buffer Powder Pillows, pH 7.00 (NIST), Color - Coded Yellow	Pk/250
2227195	Buffer Solution, pH 10.01, Powder Pillows Blue	Pk/15
2227166	Buffer Solution, pH 10.01, Powder Pillows Blue	Pk/50
2227164	Buffer Solution, pH 10.01, Powder Pillows Blue	Pk/250
2299264	Buffer Solution, pH 4.01, Red and pH7.00	10 Pillows x 2

Colourless

Code No	Product Information	Pack
1405566	Buffer, pH 6.00, Powder Pillows	Pk/50
1409895	Buffer, pH 6.86, Powder Pillows	Pk/15
1407995	Buffer, pH 8.00, Powder Pillows	Pk/15
1410766	Buffer, pH 9.00, PP 50mL	Pk/50
2657364	pH Storage Solution Pillows	Pk/20

Color-Coded

Buffers with pH values of 4.01, 7.00, and 10.01 are color-coded for added convenience.
pH is ± 0.02 at 25°C

2226966

2227064

pH Buffer Solutions Colorless

pH 4.01 Colorless (NIST)

Code No	Product Information	Pack
1222336	Buffer Solution, pH 4.01, Colorless	15mL
1222349	Buffer Solution, pH 4.01, Colorless	500 mL
1222356	Buffer Solution, pH 4.01, Colorless	4L

pH 7.00 Colorless (NIST)

Code No	Product Information	Pack
1222249	Buffer Solution, pH 7.00	500mL
1222256	Buffer Solution, pH 7.00	4L

pH 10.01 Colorless (NIST)

Code No	Product Information	Pack
1222149	Buffer Solution, pH 10.01	500mL
1222156	Buffer Solution, pH 10.01	4L
