The main software installation screen displays again. Click **exit**. When the **USB PC Camera Setup Complete** dialog box displays, choose to restart your computer now and click **OK**.

4

connect hardware

1. Connect the USB cable to a USB port on your computer.

connect to a USB port on your computer

2. Place the webcam on a desk or mount it on your computer monitor or other convenient object.

to mount on a monitor, hold the camera in one hand and pull down on the front of the base

then hook the webcam over the top of your monitor

▶ **note** Mount the webcam approximately 3 ft. (1 m) from where you sit at your computer. This ensures the picture is not distorted and that the microphone can easily pick up your voice.

use your webcam

You can start using your webcam immediately for video conferencing with one of the many video conferencing services available over the internet. Additional features are available through the ArcSoft MediaImpression software.
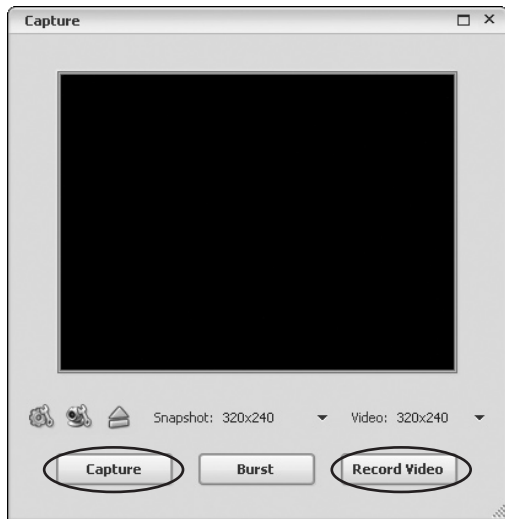

advanced features

Click **Start > All Programs > ArcSoft MediaImpression > MediaImpression** to open the Start Page.

Access all advanced features from this menu.
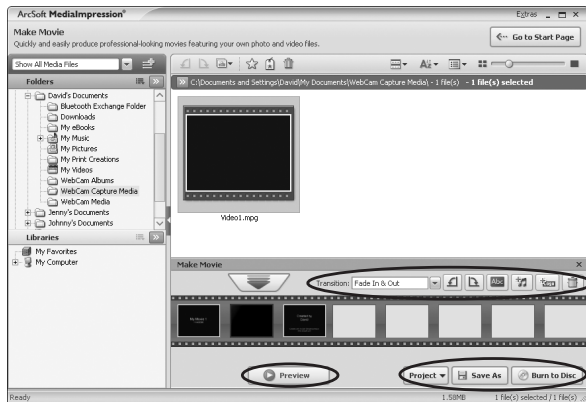

5

capture still shots or videos

1. From the **Start Page**, click **WebCam**. The **Capture** window displays.

- For a still shot, click **Capture**. (You can also take a still shot by pressing the snapshot button on top of the webcam.)
- To record a video clip, click **Record Video**. When done, click **Stop Recording**. (To improve the quality of your videos see "change video settings" on page 8)

2. When capture is complete, close the Capture window. The **Media Browser** displays, showing all stills and video captured, and the directory in which they were saved.

6

3. To turn a video clip into a movie, click **Make Movie**. The **Make Movie** screen displays.

4. Add and remove video and still shots as desired to compose your movie.

Change the movie options as desired.
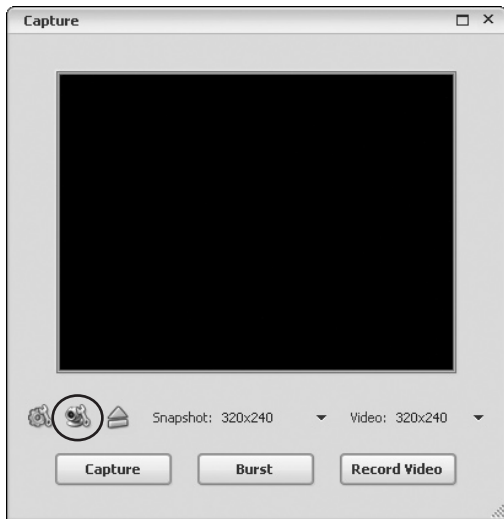

Click **Preview** to view the movie.

5. When done and ready to publish, save the project by clicking **Project > Save**.

To save a copy of the final movie, click **Save As**.

To burn your movie to a DVD or VCD, click **Burn to Disc**.

change video settings

To change video settings and access other webcam settings, click the **webcam settings** button in the Capture window.

The **webcam properties** dialog box displays.

Here you can change image, video and camera settings.

zoom

Your webcam can zoom in as much as 3x. To change the zoom level:

1. Click the **webcam settings** button in the Capture window (see "change video settings" in the previous column).

2. The **webcam properties** dialog box displays. Select the **Camera Control** tab.

3. Click and drag the **Zoom** slider to change the zoom level, left to zoom out and right to zoom in.

4. Click **OK**.

product operating tips

- Turn the ring on the front of the webcam to manually focus the image.
- Press the button on top of the webcam to take a still shot.
- Click **Extras > Help** in ArcSoft MediaImpression for more details on how to use the application with your webcam.

troubleshooting

situation	try this
no video is displayed	• Check that the webcam is connected to the computer. • Use a different USB port. • Connect the webcam to a USB port on the computer, not a USB hub. • Uninstall and reinstall the driver. To uninstall the driver, click **Start** > **Control Panel > Add or Remove Programs**, select **MyLife Webcam Kit** and click **Change/Remove**.
video stutters or stops	• Disconnect and reconnect the webcam. • Ensure the webcam is connected to a USB 2.0 port (not a slower USB 1.1 port).

FCC Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. LifeWorks is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.
