SAFETY PRECAUTIONS/MEASURES

Please comply with these precautions/measures to avoid dangerous or illegal situations and to ensure peak performance of your phone.

ROAD SAFETY COMES FIRST

Do not use the phone hand-held while driving. Park the vehicle on the road side, if phone is hand-held.

SWITCH OFF IN AIRCRAFT

Switch your phone off while boarding an aircraft. Signal from your phone can affect aircraft system. You are legally obliged to comply with this recommendation.

SWITCH OFF NEAR EXPLOSIVES

Switch your phone off when entering any explosive area. Observe any provided guidelines or regulations.

SWITCH OFF WHEN REFUELING

Do not use your phone when refueling. You should keep your phone away from fuel and chemicals.

SWITCH OFF IN HOSPITALS

Switch the phone off in hospitals. Follow any instructions if provided.

ENHANCEMENTS AND BATTERIES

Use only approved enhancements and batteries. Do not connect incompatible products.

AVOID INTERFERENCE WITH PACEMAKERS

Maintain a minimum distance of 15 cm between the mobile phone and pacemaker to avoid potential interference.

USE QUALIFIED SERVICING

Only open the phone to replace the battery, SIM and microSD card. You must not open the battery under any other circumstances. All other changes to this device are strictly prohibited and will invalidate the guarantee.

- 1.2.1 When you remove the battery please ensure that the phone is Switched Off
- 1.2.2 With your thumb Lift the battery from the groove provided at the bottom of the battery compartment

1.3 Inserting the SIM Card :

- 1.3.1 Insert the SIM card into the SIM slot as shown in the following picture

Power Key/
End Key

1.4 Inserting the Memory Card :

- 1.4.1 Push the small metal cap towards the battery connector in the compartment and then fit it.
- 1.4.2 Place the memory card within the metal jacket.
- 1.4.3 Close the metal jacket and push toward the SIM card slot to Lock.
- 1.4.4 When you need to remove the memory card first turn off the phone.

1.5 Re-Inserting the battery :

- 1.5.1 Place the battery in the battery compartment
- 1.5.2 Make sure that the connector of the phone and the battery are in contact
- 1.5.3 Push the battery down and ensure that the battery is firmly placed within the compartment

1.6 Putting back the battery cover :

- 1.6.1 Place the battery cover on the Phone
- 1.6.2 Slide the battery cover towards the upward direction

1.7 Switch On/Off the handset by gently pressing the Power Key/End Key :

- 1.7.1 Press the Power Key/End Key and keep it pressed for about 3 – 5 seconds to Switch On and Switch Off the phone

2 BASIC FUNCTION

2.1 MAKE A CALL

In idle screen, enter a phone number and press the Dialing key A to make a call from SIM 1 card or press Dialing key B to make a call from SIM 2 card.

Press the end key to end a call.

2.2 MAKE AN INTERNATIONAL CALL

Double press " * " for entering the international call's prefix (the "+" character replaces the international access code), then enter the country code, area code and the phone number for making an international call. Press the calling key to make a call from the SIM 1 card or from the SIM 2 card.

2.3 ANSWER OR REJECT A CALL

2.3.1 Answer a Call

To answer a call, Press Talk key.

During the conversation, click Options to display the menu which includes: Hold Single call, End Single call, New Call, Phonebook, Message Center, Sound Recorder, Mute and DTMF.

2.3.2 Reject a Call

During the incoming call, press End Key to reject a call.

2.3.3 End a Call

During a call, press End Key to end a call.

2.4 CALLING OPTIONS

During an active call, you can select the following options by pressing Left Soft Key:

Hold single call: To put a call on hold.

End single call: To end a call.

New call: To make a new call during an active call.

Phonebook: Shortcut to Phonebook menu.

Message Center: Enables to read, write and send messages.

Sound recorder: Record the call sound.

Mute: To mute the call.

DTMF: Can select **On/Off**.

On pressing Right Soft key the user will get the following options:

H-Free: To use the phone in hands free mode.

3 PHONEBOOK

You can save 1000 numbers in your mobile phone memory. You can access the Phonebook to search all records saved in the mobile phone and SIM card.

3.1 QUICK SEARCH

Quick Search allows you to quickly search an entry in the Phonebook by entering the key letters or words of the name.

You can quickly locate the number of the person you want to contact. Please enter the initial letter of the person's name, and the related records about it will display in the middle of the screen. Please use the Up/Down key to select the number as desired and then press Talk Key to make a call.

3.2 SEARCH CONTACT

Search contact allows you to search the specified contact by entering some words in the edit interface.

3.3 ADD NEW CONTACT

You can add a new contact entry to the Phonebook of the SIM 1, SIM 2 and Phone memory.

On selecting **SIM 1** and **SIM 2** to save the phone number, you will get the following fields to edit:

- **Name**
- **Number**

On selecting **Phone memory** to save the phone number, you will get the following fields to edit:

- **Name**
- **Number**
- **Home Number**
- **Company name**
- **E-mail address**
- **Office number**
- **Fax number**
- **Birthday**
- **Associate Picture**
- **Associate sound**
- **Caller group**

3.4 COPY ALL

This function enables you to copy all entries both from the SIM cards to Phone and vice versa.

3.5 DELETE

You can delete entries from the SIM card and Phone.

To delete entries from SIM card or Phone select “**From SIM1**”, “**From SIM2**” (if both are inserted in the phone) and “**All from Phone**” respectively.

You can select “**One by One**” to delete entries by selecting particular phone numbers.

3.6 CALLER GROUPS

This feature enables you to create group and customise it with respect to **Name of the group, Associate Sound, Associate Picture and Member list**.

You can create maximum of 5 groups through this feature.

10 ORGANIZER

10.1 CALENDAR

You can use the phone's calendar to keep track of reminders, calls you need to make, meetings and birthdays. You can set the calendar to sound an alarm for your task.

By pressing the left soft key "Option" appears which enables to View Tasks, Add tasks, Jump to Date and Go to weekly view.

View tasks: Enables to view task's list and add tasks.

Add task: Use Navigation key to move to the day you want and press Options to select Add task. You can also select the task type such as: Reminder / Meeting / Course / Date / Call / Anniversary.

Jump to date: Enables to input date to jump to a particular date.

Go to weekly view: Enables to access the monthly view and the weekly view.

10.2 TO DO

You can use your phone to keep a track of Reminders, Meetings, Courses, Dates, Calls and Anniversaries.

10.3 ALARM

You can set the device to sound an alarm at a desired time. Select **Menu > Organiser > Alarm**, to access alarm.

To set the Alarm, select the time and set the Options: On /Off, Time, Repeat Type, Snooze time and Alert type.

You can repeat the alarm **Once, Everyday** or as **User Defined**.

10.4 CALCULATOR

You can use your phone's calculator to add, subtract, multiply and divide.

1. Press the # key to enter decimal point.
2. Press the up, down, left and right key and OK key to select +, -, x, /, + and = respectively.
3. Press Clear to delete the figures.

10.5 CURRENCY CONVERTER

You can use your phone for converting currency. You have to select an amount and currency rate to which it has to be converted.

10.6 WORLD CLOCK

You can scroll to browse every city's time zone in the world map. The related date and time will display at the bottom of the screen.

10.7 E-BOOK READER

Your phone can be used to read the e-books by storing them ***.txt file*** format.

Select **Menu > Organiser > E-Book Reader**, to access/read the books stored in your E-book folder.

11 SERVICES

11.1 SIM APPLICATOR / STK

STK (SIM Application Toolkit) is shown only if it is provided on your SIM card. For further details, please contact your network operator.

11.2 WAP

WAP function enables you to use the phone to surf the internet.

Homepage: Enables you to connect browser to a homepage you have set.

Bookmark: The phone displays a list of stored bookmarks. To add a page to bookmarks go to **Bookmarks > Options > Add bookmark**.

Recent pages: Displays the recent pages visited.

Offline pages: Displays the list of the previously visited pages while you are working offline.

Input address: Enables you to enter the web address of the website you want to visit.

Service inbox: This folder stores all the messages from the operator along with the WAP functional messages.

Settings: Enables to set the browser settings, including Select SIM, Edit profile, Browser options, Service message settings, Clear cache, Clear cookies and Trusted certificates.

11.3 DATA ACCOUNT

This function enables to set the account information:

GSM data: Enables to set Account name, Number, User name, Password, Line type, Speed and DNS.

GPRS: Enables to set Account name, APN, User name, Password and Auth. Type.

APPENDIX I: TROUBLESHOOTING

If you encounter problems while using the phone or if it performs erratically, you can consult the information in the following table. If a particular problem cannot be resolved by using the following information, contact the dealer from whom you had purchased the phone.

Problems	Possible causes	Possible solutions
Poor reception	The network signal is too weak at your current location, for example, in a basement or near a tall building since wireless transmissions cannot reach there effectively.	Move to a location where you can receive the network signal properly.
	The network is busy at the current time, for example, during peak times there may be too much of network traffic to handle additional calls.	Avoid using the phone at such time or try again after waiting for awhile.
	You are too far from a base station for your service provider.	You can request a service area map from your service provider.
Echo or noise	Poor network trunk quality on the part of your service provider.	Press the ending key and dial again. You may be switched to a better quality network trunk or phone line.
	Poor local telephone line quality.	Press the ending key and dial again. You may be switched to a better quality network trunk or phone line.
Battery not charging properly	<u>The battery or battery charger is damaged.</u>	<u>Contact the dealer.</u>
	The temperature of the phone is below -10°C or higher than 55°C.	Adjust the battery charging environment to avoid extremes of temperature.
	Poor contact between the battery and charger.	Check all connectors to make sure all connections have been made properly.
Shortened standby time	The standby time is related to your service provider system configuration. The same phone used with different service providers' systems will not provide exactly the same length of standby time.	If you are located in an area where signaling is weak, temporarily switch off the phone.

	The battery is depleted. In high temperature environments, battery life gets shortened.	Use a new battery.
	If you are not able to connect to the network, the phone will continue to send out signals as it attempts to locate a base station. Doing so consumes battery power and will consequently shorten standby time.	Change your location to one where the network is accessible or temporarily turn off your phone.
You cannot switch your phone on	Battery power has exhausted.	Recharge the battery.
SIM card error	SIM card malfunctions or gets damaged.	Take the SIM card to your service provider for testing.
	SIM card is inserted improperly.	Insert the SIM card properly.
	Debris on the SIM card metal area.	Use a soft and dry cloth to clean the SIM card metal area.
Unable to connect to network.	SIM card invalid.	Contact your service provider.
	You are not within the service area of the service.	Check the service area with your provider.
	Poor signal.	Move to an open space or if you are inside a building, move closer to a window.
PIN code is blocked	You have entered an incorrect PIN code three consecutive times.	Contact your service provider. If the service provider provides the PUK code of the SIM card, use the PUK code to unlock the SIM card.
Unable to enter information into the phonebook	The memory of the phonebook is already full.	Delete unnecessary data from the phonebook.
Unable to select certain features	Your service provider does not support these features or you have not applied for services that provide these features.	Contact your service provider.

APPENDIX II: ABBREVIATIONS AND EXPLANATION

GSM	Global System of Mobile Communication
GPRS	General Packet Radio Service
SMS	Short Message Service
WAP	Wireless Application Protocol
FDN	Fixed Dialing Numbers
SIM	Subscriber Identity Module
PIN	Personal Identification Number
PUK	Personal Unblocking Key
IMEI	International Mobile Equipment Identity
MCC	Mobile Country Code
MNC	Mobile Network Code
Call Waiting	A service provided by the network, which allows you to answer another incoming call without interrupting the active call, but it is different from a conference call. You can only talk to one party at a time, while another party is put on hold.
Call Divert	A service provided by the network, which allows you to divert an incoming call to a specified number according to different circumstances.
Roaming	The phone is not used in the area of its local registered network. It includes international and domestic roaming. In this manual it refers to international roaming only.
STK	SIM Application Toolkit
