

RollerMouse PRO

The RollerMouse Pro is a black wrist rest with an integrated bar-style pointing device.

The single-finger point & click function provides a simple but fully ergonomic operation, the RollerMouse consists of a keyboard 'cradle', roller bar (to move the mouse pointer up, down, left, right), a scroll wheel, and 5 separate mouse buttons.

The RollerMouse is positioned directly below the Space Bar, to eliminate repetitive reaching, and allow Mouse functions whilst keeping the arms in a relaxed position.

Benefits:

- Single finger point & click functionality.
- 5 buttons - including standard left-click, right-click, 'drag lock' and 'double click'.
- Adjustable click force on rollerbar.
- Smooth steel rollerbar with soft rubber coating, gives excellent feel and cursor control.
- Optical sensor reads bar movement - no mechanical parts to wear out.
- Soft but firm lycra wrist support, removable for easy cleaning.
