01 SAFETY INFORMATION

WARNING!!!

Carefully read before installing, powering or servicing.
Nothing to do if anything misunderstand! Installation can be done only by a qualified professional in accordance with relevant local codes.

01.1 Risk of eyes damage

- Do not look directly into LED lamps.
- Do not look into light beam from a distance of less than 40 cm (16 inches)!

01.2 Protection from electric shock

- Shut down power before installation or maintenance.
- Luminaries and recommended AC power supply must be installed by a qualified professional in accordance with relevant local codes. Only acceptable source of AC power and frequency that complies with local building and electrical codes to use.
- Do not use or do not connect the products if the power cable, power plug or fixtures are any way damaged, wet, or if they are overheating.
- Do not modify, alter, or attempt to service the LeaderLight appliance. Doing so will void the warranty.
- Before removing or installing any cover or part of appliance disconnect it from AC power.
- Appliance always connect to earth (eltech).

01.3 Fire prevention

- Follow all safety consideration.
- Thermostatic switches or fuses never to bypass.
- Device never shield. Around the axis of the fitting (180°) must be maintained space for cooling. Minimum distance from the surrounding objects must be 100mm (4 in.) (figure 1.1).
- LEDs never direct cover with filters or other materials.
- Allowing max. ambient temperature is 40°C (104°F).
- Luminaries never use without mounting brackets. The housing never install directly to the surface.

03 INSTALLATION

03.1 Unpacking

- Unpack carefully.
- This is electronic equipment and should be handled carefully.
- Damaged delivered package or if are any mechanical parts broken – it must be claim immediately by the transport company. Photo pictures as evidence are valuable for future claim.

03.2 Physical installation

- Loading capacity of bearing area has to be at least 10 times the weight of all device clusters (luminaries, clamps, cables, ...) (figure 2.1, 2.2).
- Hairbreadth from combustible materials is 0,5m.

03.3 Connecting to AC power

- To tackle all Safety Information- 01!
- For protection from electric shock, the device must be grounded (earthed)!
- It is not necessary to open the fixture before power supply.
- Power supply is solved simple with 1m cable.
- The fixture is equipped with auto-switching power supply that automatically adjusts to any 50-60Hz AC power source from 100-260V.

- Cord plug connections:

Symbol	Pin	Wire Colour	Screw (US)
L	live	brown	yellow or brass
N	neutral	blue	silver
⊕	ground (earth)	yellow/green	green

03.4 Control data connecting

- Control data cable length is specified by Norm IEC929 Annex E4.
- It is not necessary to open the fixture before connecting of DMX512 control signal. Interconnections are realized by 1m cables In/Out with XLR5pin.
- Pin connections:
Pin 1 – ground
Pin 2 – signal negative
Pin 3 – signal positive

04 PERMANENT USE LIMITATIONS FOR HEATING DISSIPATION

- Permanent use limitations for heating dissipation of LL PRO WASH RGBAW body temperature must be less then 55°C

40°C ambient temperature -20% of total power
 30°C ambient temperature -10% of total power
 20°C ambient temperature -0% of total power
 Black version - 30%
 Silver or White version - 50%

Example: Then final permanent value for BLACK colour and 40°C ambient temperature = -30% -20% = 56% = $\max 143 \geq (R + G + B + W + A) / 5$
 It's mean average of power go inside the fixture at DMX signal

Example:
 black LL PRO WASH: $180 \geq (R + G + B + W + A) / 5$
 Silver or White LL PRO WASH: $128 \geq (R + G + B + W + A) / 5$

Value for R or G or B or W or A is 100% = 256 = 8bit levels *** RED 50% = 128 value, RED 75% = 192 value

Final information we don't drop down each colour power with temperature control to get maximum for each colour under total recommendations, therefore you need setup limitations from control desk !!!

05 MAINTENANCE

- To tackle all Safety Information- 01!
- Damage caused by inadequate cleaning or maintenance is not covered by warranty.
- Regular cleaning is demand (dust, dirt, ...).

Maintenance policy:

- Unplug mains before maintenance and at least 10 minutes cool off
- Appliance do not illegal open or demount
- Clean-up dust only from outer surface (for ex. scuttle, diffuser and lenses).
- Use vacuum or dumpy duster (warm water)
- Before reinstalling to check failure-free state – no wet parts!

INSTALLATION SPACE

Mechanical mounting of LL PRO WASH IP65 and Adjustable bracket

The installation of LL PRO WASH IP65 and Adjustable bracket is easy. It is not necessary to open the fixture before the mechanical mounting.

2.1 Fit the adjustable bracket on the fitting and fit with screws.

2.2 The bracket fix to the solid surface with screws (minimal 4pcs).

AIMING POSSIBILITY
 The fixture could be aim to wish position with the bracket.
