ENGLISH

IXIO-DT3

Opening & safety sensor for automatic sliding doors

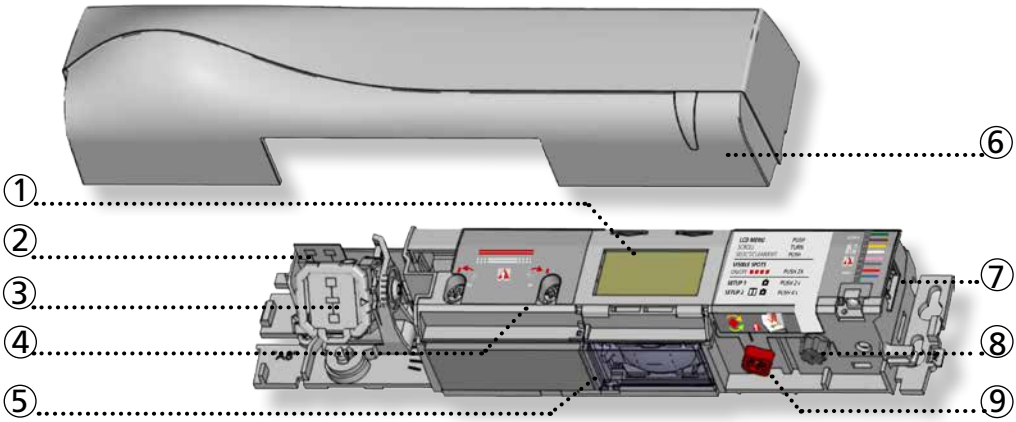
(according to EN 16005 and DIN 18650, including emergency exits)

User's Guide for product version 0400 and higher
See product label for serial number

Download the BEA DECODER app for a quick overview of settings

Google play | App Store

DESCRIPTION



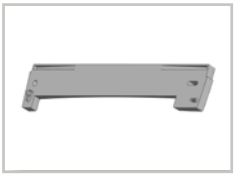
1. LCD
2. radar antenna (narrow field)
3. radar antenna (wide field)
4. IR-curtain width adjustment
5. IR-lenses
6. cover
7. main connector
8. main adjustment knob
9. IR-curtain angle adjustment knob

ACCESSORIES

BA: Bracket accessory

CA: Ceiling accessory

RA: Rain accessory



CDA: Curved door accessory

Retrofit interface

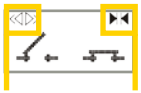
Door bell + interface

Smart Daisy Chain hub

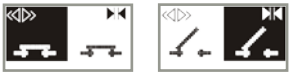
9 V battery

HOW TO USE THE LCD?

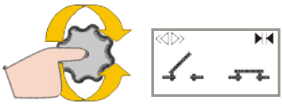
DISPLAY DURING NORMAL FUNCTIONING



Opening impulse — Safety



Negative display = active output



To adjust contrast, push and turn the grey button simultaneously.

During normal function only.

FACTORY VALUE VS. SAVED VALUE

displayed value = factory value

displayed value = saved value

NAVIGATING IN MENUS

Push to enter the LCD-menu

Enter password if necessary

Not during the first minute after power-on of the sensor.

Select your language before entering the first LCD-menu.

During the first 30 seconds after power-on of the sensor or later in the diagnostics menu.

Scroll menu items

Select **Back** to return to previous menu or display.

Select **More** to go to next level:
- basic settings
- advanced settings
- diagnostics

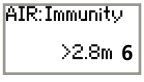
CHANGING A VALUE

Scroll menu up-down

Push to select parameter

current value is displayed

Scroll values up-down



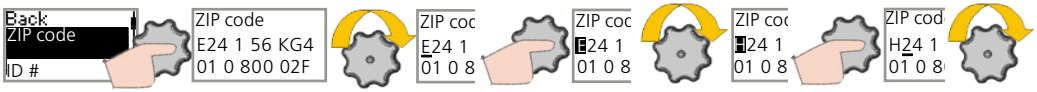
more values are displayed

Push to save new value

new value is displayed

CHANGING A ZIP CODE

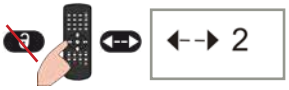
See application note on ZIP CODE



...

Validate the last digit in order to activate the new ZIP code:
- v = valid ZIP code, values will be changed accordingly
- x = invalid ZIP code, no values will be changed
- v/x = valid ZIP code, but from a different product. Only available values will be changed.

VALUE CHECK WITH REMOTE CONTROL

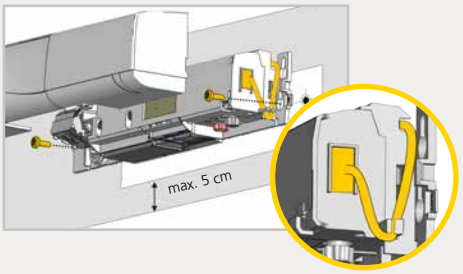


Pressing a parameter symbol on your remote control, displays the saved value directly on the LCD-screen. Do not unlock first.

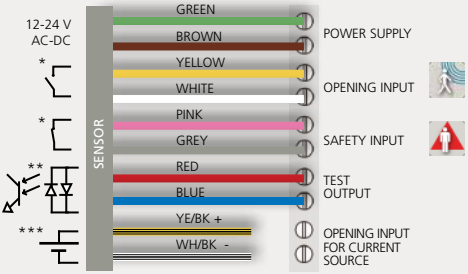
IXIO-DT3: INSTALLATION GUIDE

ENGLISH

1 MOUNTING & WIRING



Fixation is compatible with the ACTIV8.



* Output status when sensor is operational
** For compliance with EN 16005 and DIN 18650, connection to door controller test output is required.
***Current source output for emergency exits

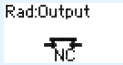
2 RADAR OUTPUT CONFIGURATION

OR

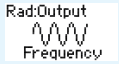
RELAY OUTPUT

NO: normally open

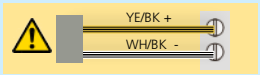
NC: normally closed

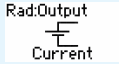


FREQUENCY OUTPUT
for emergency exits



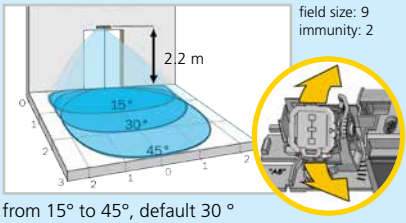
CURRENT SOURCE OUTPUT
for emergency exits



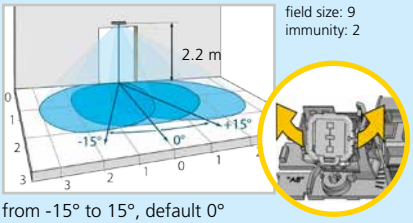


3 RADAR OPENING IMPULSE FIELD

ANGLE

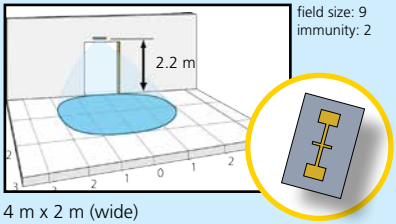


from 15° to 45°, default 30 °

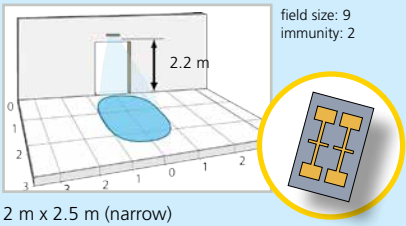


from -15° to 15°, default 0°

WIDTH



4 m x 2 m (wide)

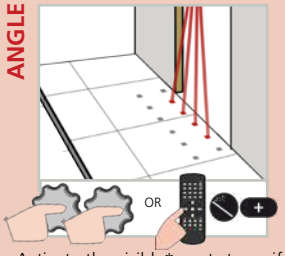


2 m x 2.5 m (narrow)

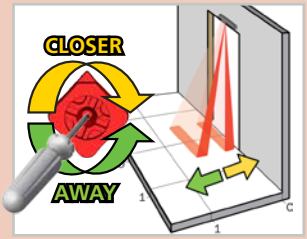
The size of the detection field varies according to the mounting height of the sensor.
In emergency exits the full door width must be covered.

4 INFRARED SAFETY FIELD

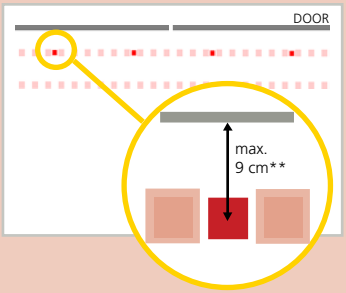
ANGLE



Activate the visible* spots to verify the position of the IR-curtain.

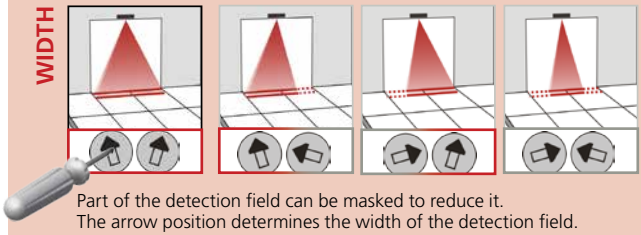


If necessary, adjust the IR-curtain angle (from -7° to 4°, default 0°).

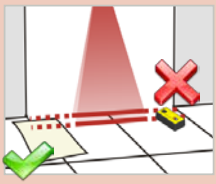


* Visibility depends on external conditions. When spots are not visible, use the Spotfinder to locate the curtains.
** The distance between the inner curtain of the inside door sensor and the inner curtain of the outside door sensor should always be smaller than 20 cm. The distance to the door leaf depends therefore on the thickness of the door leaf.

WIDTH



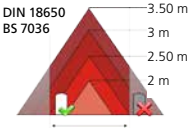
Part of the detection field can be masked to reduce it.
The arrow position determines the width of the detection field.

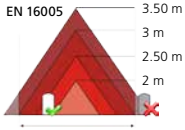


Always verify the actual detection field width with a piece of paper and not the Spotfinder, which detects the whole emitted field.

Additional adjustments are possible by LCD or remote control (see p. 5)

Mounting height	Detection width
2.00 m	2.00 m
2.20 m	2.20 m
2.50 m	2.50 m
3.00 m	d max
3.50 m	d max





The size of the detection field varies according to the mounting height and the settings of the sensor. The full door width must be covered.

5 SETTINGS

Choose one of the following presettings or adjust the sensor manually (see p.5):

STANDARD: standard in- and outdoor installations — Presettings Standard — 1

CRITICAL ENVIRONMENT: critical installations due to surroundings or weather — Presettings Critical env — 2

SHOPPING STREET: installations in narrow streets with pedestrian traffic — Presettings Shopping str — 3

6 SETUP

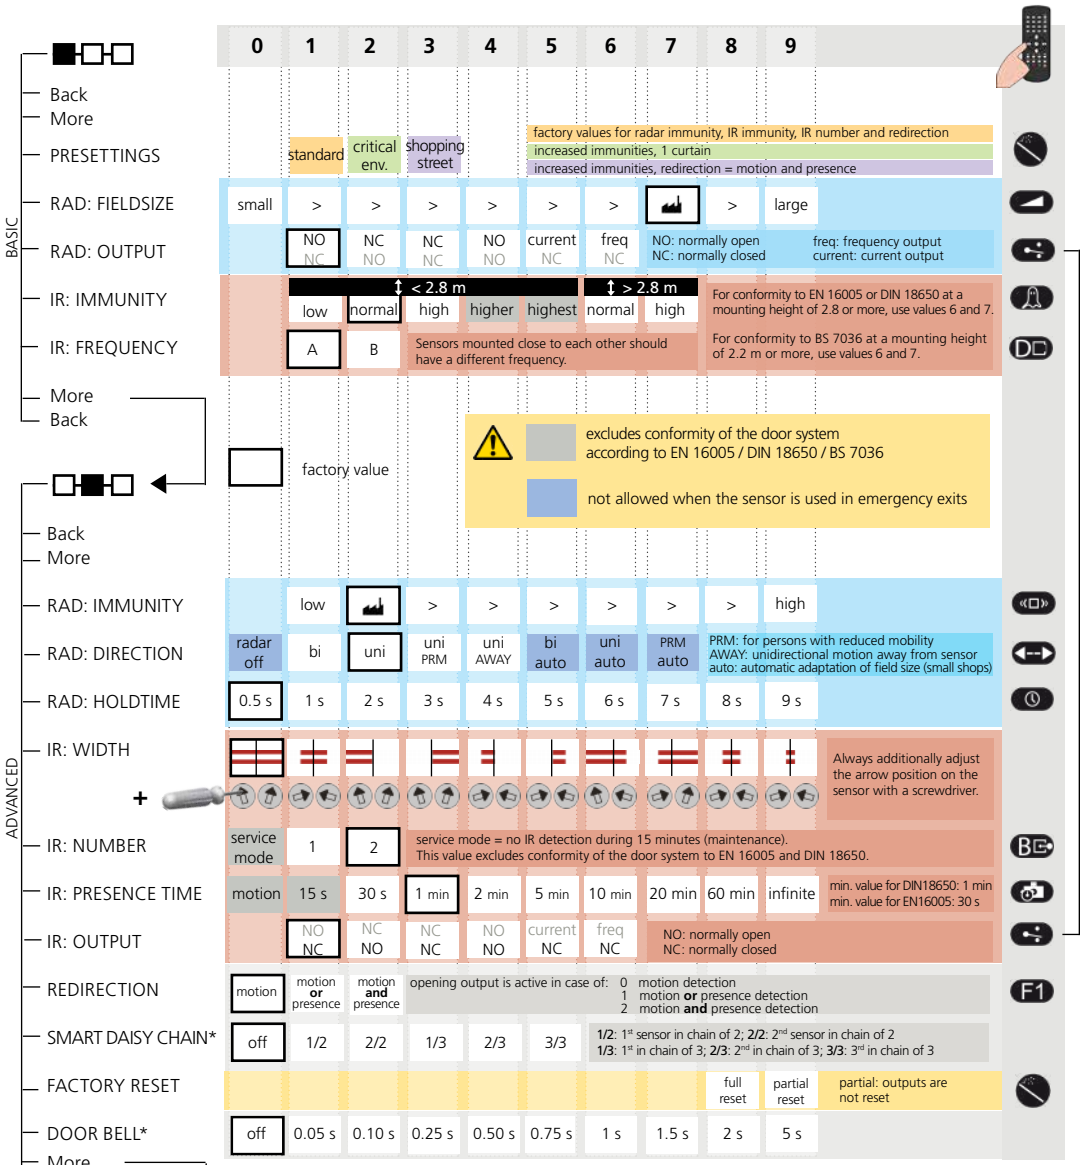
⚠ STEP OUT OF THE INFRARED FIELD!

SETUP 1 (QUICK)
reference picture

SETUP 2 (ASSISTED)
test of full door cycle + reference picture

⚠ TEST THE GOOD FUNCTIONING OF THE INSTALLATION BEFORE LEAVING THE PREMISES!

OVERVIEW OF SETTINGS



* Setting in combination with an accessory (see p. 1).
For more information see user's guide of accessory.

ZIP CODE	*all parameter settings in zipped format (see application note on ZIP CODE)*
ID #	*unique ID-number*
ERROR LOG	*last 10 errors + day indication*
IR: SPOTVIEW	*view of spot(s) that trigger detection*
IR: C1 ENERG	*signal amplitude received on curtain 1*
IR: C2 ENERG	*signal amplitude received on curtain 2*
POWERSUPPLY	*supply voltage at power connector*
OPERATINGTIME	*power duration since first startup*
RESET LOG	*delete all saved errors*
PASSWORD	*LCD and remotre control password (0000= no password)*
LANGUAGE	*language of LCD-menu*
ADMIN	*enter code to access admin mode*

TROUBLESHOOTING

E1 	ORANGE LED flashes 1 x.	The sensor signals an internal fault.	1 Replace sensor.
E2 	ORANGE LED flashes 2 x.	The power supply is too low or too high.	1 Check power supply (in the diagnostics menu of the LCD). 2 Check wiring.
E4 	ORANGE LED flashes 4 x.	The sensor receives not enough IR-energy.	1 Decrease the angle of the IR-curtains. 2 Increase the IR-immunity filter (values >2.8 m). 3 Deactivate 1 curtain.
E5 	ORANGE LED flashes 5 x.	The sensor receives too much IR-energy.	1 Slightly increase the angle of the IR-curtains. 2 Decrease the IR-immunity filter (values 1-3 <2.8 m).
		The sensor is disturbed by external elements.	1 Eliminate the cause of disturbance (lamps, rain cover, door controller housing properly grounded).
E6 	ORANGE LED flashes 6 x.	Faulty radar sensor output	1 Replace sensor.
E7 	ORANGE LED flashes 7 x.	The internal test of the radar is disturbed.	1 Change radar field angle or antenna. 2 Launch a quick setup. 3 If orange LED flashes again, replace sensor.
E8 	ORANGE LED flashes 8 x.	IR power emitter is faulty.	1 Replace sensor.
E9 	ORANGE LED flashes 9 x.	Internal reference of the radar is faulty.	1 Replace sensor.
	ORANGE LED is on.	The sensor encounters a memory problem.	1 Cut and restore power supply. 2 If orange LED lights up again, replace sensor.
	RED LED flashes quickly after an assisted setup.	The sensor sees the door during the assisted setup.	1 Move the IR-curtains away from the door. 2 Install the sensor as close to the door as possible. If needed, use a bracket accessory. 3 Launch a new assisted setup.
	RED LED lights up sporadically.	The sensor vibrates.	1 Check if the sensor is fastened firmly. 2 Check position of cable and cover.
		The sensor sees the door.	1 Launch an assisted setup and adjust the IR angle.
		The sensor is disturbed by external conditions.	1 Increase the IR-immunity filter to value 3. 2 Select presetting 2 or 3.
	GREEN LED lights up sporadically.	The sensor is disturbed by rain and/or leaves.	1 Select presetting 2 or 3. 2 Increase radar-immunity filter.
		Ghosting created by door movement.	1 Change radar field angle.
		The sensor vibrates.	1 Check if the sensor and door cover is fastened firmly. 2 Check position of cable and cover.
		The sensor sees the door or other moving objects.	1 Remove the objects if possible. 2 Change radar field size or angle.
	The LED and the LCD-display are off.		1 Check wiring.
	The reaction of the door does not correspond to the LED-signal.		1 Check output configuration setting. 2 Check wiring.
	The LCD or remote control does not react.	The sensor is protected by a password.	1 Enter the right password. If you forgot the code, cut and restore the power supply to access the sensor without entering a password during 1 minute.

LED-SIGNAL

Presence detection

LED flashes

LED flashes x times

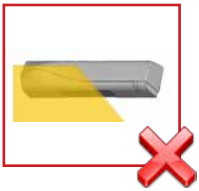
LED flashes red-green

LED flashes quickly

LED is off

INSTALLATION

The sensor should be fixed firmly to avoid extreme vibrations.

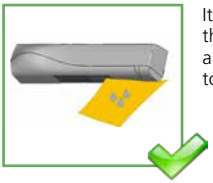


Do not cover the sensor.

Avoid moving objects and light sources in the detection field.

Avoid highly reflective objects in the infrared field.

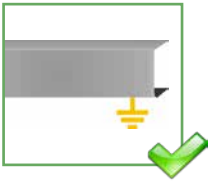
MAINTENANCE



It is recommended to clean the optical parts at least once a year or more if required due to environmental conditions.

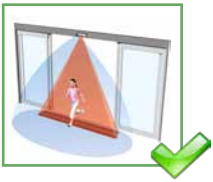
Do not use aggressive products to clean the optical parts.

SAFETY



The door control unit and the door cover profile must be correctly earthed.

Only trained and qualified personnel may install and setup the sensor.



Always test the good functioning of the installation before leaving the premises.

The warranty is invalid if unauthorized repairs are made or attempted by unauthorized personnel.

- The device cannot be used for purposes other than its intended use. All other uses cannot be guaranteed by the manufacturer of the sensor.
- The manufacturer of the door system is responsible for carrying out a risk assessment and installing the sensor and the door system in compliance with applicable national and international regulations and standards on door safety.
- The manufacturer of the sensor cannot be held responsible for incorrect installations or inappropriate adjustments of the sensor.

TECHNICAL SPECIFICATIONS

Supply voltage:	12 V - 24 V AC +/-10% ; 12 V - 30 V DC +/-10% (to be operated from SELV compatible power supplies only)
Power consumption:	< 2.5 W
Mounting height:	2 m to 3.5 m (local regulations may have an impact on the acceptable mounting height)
Temperature range:	-25°C to +55°C; 0-95% relative humidity, non condensing
Degree of protection:	IP54
Noise:	< 70 dB
Expected lifetime:	20 years
Applicable directives:	R&TTE 1999/5/EC; MD 2006/42/EC; LVD 2006/95/EC; ROHS 2 2011/65/EU

Detection mode:	Motion Min. detection speed: 5 cm/s	Presence Typical response time: < 200 ms (max. 500 ms)
Technology:	Microwave doppler radar Transmitter frequency: 24.150 GHz Transmitter radiated power: < 20 dBm EIRP Transmitter power density: < 5 mW/cm²	Active infrared with background analysis Spot: 5 cm x 5 cm (typ) Number of spots: max. 24 per curtain Number of curtains: 2
Output:	Solid-state-relay (potential and polarity free) Max. contact current: 100 mA Max. contact voltage: 42 V AC/DC - in switching mode: NO/NC - in frequency mode: pulsed signal (f= 100 Hz +/- 10%) Galvanically isolated current source No detection: current source ON Open circuit voltage: 6.5 V Output voltage available at 10 mA: 3 V min. Typical load: up to 3 optocouplers in series Detection: current source OFF Open-circuit remained voltage: < 500 mV	Solid-state-relay (potential and polarity free) Max. contact current: 100 mA Max. contact voltage: 42 V AC/DC Holdtime: 0.3 to 1 s
Test input:		Sensitivity: Low: < 1 V; High: > 10 V (max. 30 V) Response time on test request: typical: < 5 ms
Norm conformity:	EN 12978 EN ISO 13849-1:2008 PL «d» CAT. 2 EN 16005:2012 Chapter 4.6.8; DIN 18650-1:2010 Chapter 5.7.4; AutSchR BS 7036-1:1996 Chapter 7.3.2 (only applicable for relay output in frequency mode and current source output)	EN 12978 EN ISO 13849-1:2008 PL «c» CAT. 2 (under the condition that the door control system monitors the sensor at least once per door cycle) IEC 61496-1:2012 ESPE Type 2 EN 16005:2012 Chapter 4.6.8; DIN 18650-1:2010 Chapter 5.7.4 BS 7036-1:1996 Chapter 8.1

Specifications are subject to changes without prior notice.
All values measured in specific conditions.

BEA SA | LIEGE Science Park | ALLÉE DES NOISETIERS 5 - 4031 ANGLEUR [BELGIUM] | T +32 4 361 65 65 | F +32 4 361 28 58 | INFO@BEA.BE | WWW.BEA.BE

BEA hereby declares that the IXIO-DT3 is in conformity with the basic requirements and the other relevant provisions of the directives 1999/5/EC, 2006/95/EC and 2006/42/EC.
Notified Body for EC-type inspection: 0044 - TÜV NORD CERT GmbH, Langemarckstr. 20, D-45141 Essen
EC-type examination certificate number: 44 205 12 405836-001
Angleur, October 2014 Pierre Gardier, authorized representative and responsible for technical documentation
The complete declaration of conformity is available on our website: www.bea-pedestrian.be

Only for EC countries: According to the European Guideline 2012/19/EU for Waste Electrical and Electronic Equipment (WEEE)
