## Quick Start Guide

To get started follow steps as shown.

### 1. Install WEB CAM drivers and application

Insert the supplied installation CD into the computer's CD-ROM drive. Click the **WEB CAM driver** button and click the **eDVR Create** button to install the **eDVR Create** application for file transferring.

### 2. Charging

Turn on your computer and connect the Multipod 5 in 1 to your computer's USB port. It will begin to charge the battery. Charge your Multipod 5 in 1 a minimum of 2.5 hours before using it.

### 3. Web Cam Mode

Make sure camera power is off, then hold the power / mode button down until a small 'BEEP' is heard and  is displayed. Plug the Multipod 5 in 1 into your USB port.

**Caution:** You must install the Web Cam Driver before using your Multipod 5 in 1 as a Web Cam.

### 4. Transferring files to your PC

Connect the Multipod 5 in 1 to your computer's USB port to transfer your files.

**Caution:** Do not unplug the Multipod 5 in 1 during file transferring.

### 5. Taking Pictures, Recording Audio and Movie Clips

Press **Power** to turn on the Multipod 5 in 1. Press the **Mode** button to change operating modes.

Displayed = **Digital Camera** –Press the **Snap** button to take a picture. When you take a picture, LCM will show  to indicate the percentage of free memory remaining.

Displayed = **Audio Clip Recorder** -Press the **Snap** button to begin recording an audio clip and press the **Snap** button to stop it.

Displayed = **Digital Video Recorder** -Press the **Snap** button to begin recording video and press the **Snap** button again to stop it.

Displayed = **Settings** -Change  or  settings by pressing the **Snap** button.

## Quick Start Guide (continued)

Displayed = **Formatting** -Press the **Snap** button and you are ready to begin formatting.

**Co** will flash, then press the **Snap** button to format.

**Ft** will flash indicating formatting is occurring.

Displayed = Indicates a Low Battery. The machine will beep then turn itself off.

**Caution:** The Multipod 5 in 1 uses the FAT(FAT16) file system. Don't format to the other types. A PC can be used to format back to FAT16.

**Caution:** Our product adopts the latest Multimedia technology; please make sure to update with the latest Microsoft Media Player version available. You can download it from the Microsoft website: <http://www.microsoft.com/windows/windowsmedia/default.aspx> or you can use Internet Explorer to update your Media Player version. From the tools menu simply select '**Windows Update**' and follow the instructions on the Windows Update website.

<i>LED Color</i>	<i>Description</i>
<b>AMBER</b>	Taking a Movie Clip
<b>YELLOW</b>	Taking an Audio Clip
<b>GREEN</b>	Taking a Picture
<b>BLANK</b>	Formatting

## WEB CAM Driver

The WEB CAM Driver enables the Multipod 5 in 1 to be used as a Web Cam.

1. Insert the included **CD** into your CD-ROM drive, setup should begin automatically. If setup does not begin, double click the CD-ROM icon in "My Computer" and then double click on "Setup.exe" to launch the setup program.

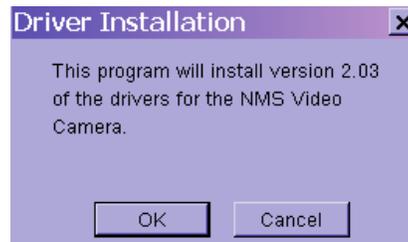

2. Click the **WEB CAM Driver** button from the main eDVR software menu to install the drivers.

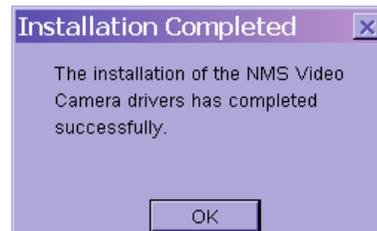

3. Please select your desired language.

4. When prompted, please click the **OK** button to continue installation of the web cam drivers.

5. When the installation of the web cam drivers has completed, please click the **OK** button to finish.

## eDVR Create

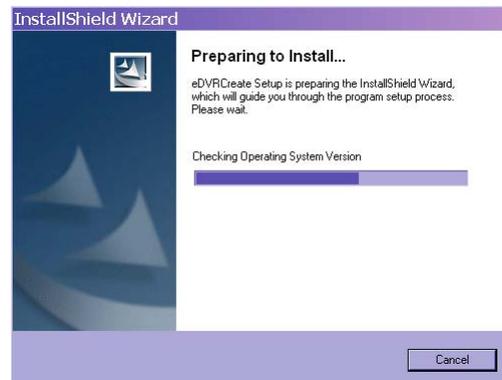

The Multipod 5 in 1 records video in .STJ format files. eDVR Create converts the .STJ files to .ASF files – a Microsoft multimedia format.

1. Insert the included **CD** into your CD-ROM drive, setup should begin automatically. If setup does not begin, double click the CD-ROM icon in “My Computer” and then double click on “Setup.exe” to launch the setup program.

2. Click on the **eDVR Create** button from the main eDVR software menu to launch the install application.

3. Please follow the on-screen instructions to install the **eDVR Create** application.

4. When prompted please select 'I accept the agreement' to update DirectX.

## eDVR Create (continued)

5. Select the “Yes, I want to restart my computer now.” option and click the **Finish** button to restart your computer.

6. Once you have installed the eDVR Create application, simply connect your Multipod 5 in 1 via USB and double click on any of the **STJ** files shown on the device. The software will automatically recognize and convert the **STJ** files to **ASF** format and save the **ASF** files to the folder you select.

**Caution:** If you cannot play the **ASF** files, please make sure you have the latest version of Windows Media Player. You can download it from the Microsoft website: <http://www.microsoft.com/windows/windowsmedia/default.aspx> or you can use Internet Explorer to update your Media Player version. From the tools menu simply select '**Windows Update**' and follow the instructions on the Windows Update website.

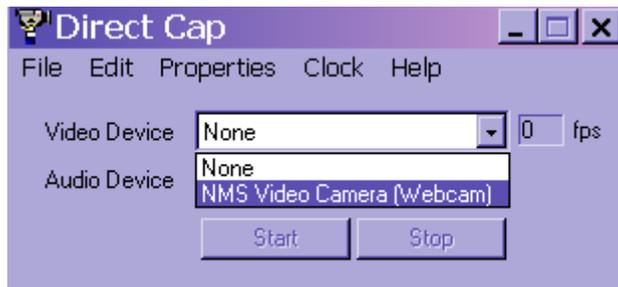

## DirectCap Create

DirectCap Create turns the Multipod into a Camcorder for the PC.

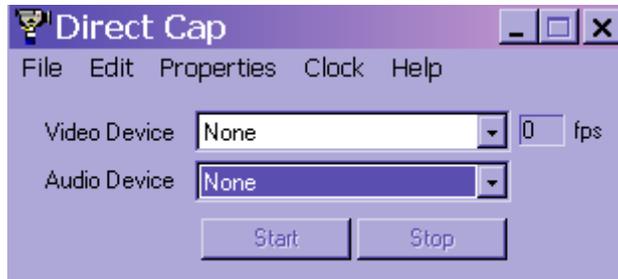

1. Insert the included **CD** into your CD-ROM drive, setup should begin automatically. If setup does not begin, double click the CD-ROM icon in "My Computer" and then double click on "Setup.exe" to launch the setup program.
2. Click on the **DirectCap** button from the main eDVR software menu to launch the install application.

3. Please follow the instructions to install the **DirectCap** application.
4. To start streaming video, select 'NMS Video camera (Webcam)' from the drop down menu next to **Video Device** then press the **Start** button to begin recording. To stop, press the **Stop** button.

5. To start streaming audio, select your own device (if available) from the pull down menu next to **Audio Device** then press the **Start** button to begin recording. To stop, press the **Stop** button.

Video and audio may be streamed simultaneously, but the 'preview' function will show a short time lag for audio. When streaming to a file, the time lag does not occur.

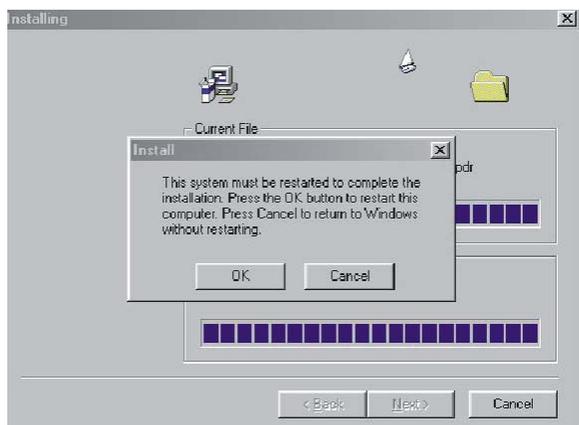

## Windows 98 Driver

Windows 98 Driver allows Windows 98 PCs to connect to the Multipod 5 in 1.

1. Insert the included **CD** into your CD-ROM drive, setup should begin automatically. If setup does not begin, double click the CD-ROM icon in "My Computer" and then double click on "Setup.exe" to launch the setup program.
2. Click on the **Win98 driver** button from the main eDVR software menu to install the drivers.

3. Please follow the instructions to install the **Win98 drivers**.
4. Press the **OK** button to continue the **Win98** driver installation program.
5. Press the **OK** button to restart your computer.

## Web Cam

1. Make sure camera power is off, and then hold the power / mode button down until a small 'BEEP' is heard and  is displayed.
2. Plug the Multipod 5 in 1 into your USB port.

**NOTE:** WEB CAM mode requires drivers to be installed prior to use to enable the streaming video capability.

## USB Storage

1. Connect the Multipod 5 in 1 to your computer's USB port
2.  will be displayed.

**NOTE:** For file transfer,  (data out) will flash when the computer reads files,  (data in) will flash when files are being written to the device.

**Caution:** Do not unplug the Multipod 5 in 1 while data transfer is occurring.

## Taking a Picture

1. Press **Power/Mode** button to turn on your Multipod 5 in 1.
2. It will 'beep' once and  will be displayed on the LCM.
3. To take your picture, keep your Multipod 5 in 1 steady and press the **Snap** button to capture and store your pictures.

**NOTE:**  is the default setting and the resolution is VGA (640x480).  
 setting is QVGA (320x240) resolution.

## Audio Clip Capture

1. Press the **Power/Mode** button until  is displayed.
2.  should now be displayed on the LCM.
3. Press the **Snap** button to begin record an audio clip and press the **Snap** button again to stop it.

**NOTE:**  is the default setting and the audio sample rate is 11KHz.  
 setting is an 8KHz audio sample rate.

## Movie Clip Capture

1. Press the **Power/Mode** button until  is displayed.
2.  should now be displayed on the LCM.
3. Press the **Snap** button to begin recording a movie clip and press the **Snap** button again to stop it.

**NOTE:** Movie clips recorded in  mode are stored in a proprietary file format with the filename extension **STJ**. The eDVR Create application is required to convert this file. Please follow the instructions on page 9 for installing and using the eDVR Create application.

 is the default setting at a rate of 30 FPS and an 11KHz audio sample rate.

 setting is 15 FPS and an 8KHz audio sample rate.

## Settings

1. Press the **Power/Mode** button until **SE** is displayed.
2. **SE** should now be displayed on the LCM.
3. Change settings to **Hi** or **Lo** by pressing the **Snap** button.

## Formatting

1. Press the **Power/Mode** button until **FE** is displayed.
2. **FE** should now be displayed on the LCM.
3. Press the **Snap** button to start formatting.
4. **Co** will be displayed and flashing.
5. Press the **Snap** button to confirm you wish to format.
6. **FE** will start flashing to indicate formatting has begun.

**Caution:** The Multipod 5 in 1 **ONLY** supports the **FAT(FAT16)** file system, please set your formatting options **FAT(FAT16)** if formatting directly from your Computer's Operating System.

## Troubleshooting

1. If the Multipod 5 in 1 freezes try pressing the reset button with a paper clip to reset the device. Please see page 4 for location of reset button.
2. If you format the Multipod 5 in 1 using the fat32 or NTFS file system, it will cause the device to stop functioning. Please format your Multipod 5 in 1 using the FAT(FAT16) file system.
3. Please install the Windows 98 driver before using the Multipod 5 in 1 on a computer using the Windows 98 operating system.
4. DirectX 8.1 or above is required to play movie clips that you record.
5. If you cannot play **ASF** files please make sure you have the latest version of Media Player from Microsoft.

**TIP:** You can download the latest version of Media Player from the Microsoft website:  
<http://www.microsoft.com/windows/windowsmedia/default.aspx>  
or you can use Internet Explorer to update your Media Player version. From the tools menu simply select '**Windows Update**' and follow the instructions on the Windows Update website.
