## 1.0 GENERAL INFORMATION

This section provides the system overview, the project reference and the point of contact and support for Question Based Assessment in Tutorial Dialogues.

### 1.1 System overview

Question Based Assessment in Tutorial Dialogues and is an interface designed especially to evaluate the focus ability of a student or of a company staff member. AIML dialogues boxes are to allow the communication between you and the software. You ask the system a question related to a topic previously taught. The program reviews the question and returns the answer as well as a mark showing how interesting, relevant or poor the question was. You are given five chances to improve your mark. At the end of the course a final mark is issued and you can select the name of your preferred lecturer via a list box. Question Based Assessment in Tutorial Dialogues also allows submitting the mark as well as comments and feedback to the chosen lecturer via email.

### 1.2 Project references

Here is the list of the references that were used in preparation of this document:

- <http://www.alicebot.org/>
- <http://www.yawiki.org:2001/>
- <http://dialogues.h1088483.serverkompetenz.net/Sevilla/>
- ProgramE by Paul Rydell
- Server2Go by Timo Haberkern

### 1.3 Point of Contact and Support

The end of each lecture 5 offers an email facility to email feedback on the system. Contact Support must be selected from the list box offer at the end of each lecture 5.

The Email Result button is used to submit your query.

If the system is down, the contact details to be used are:

Phone: 0877855986

Email: [pascal.cesari@gmail.com](mailto:pascal.cesari@gmail.com)

## **2.0 SYSTEM SUMMARY**

Question Based Assessment in Tutorial Dialogues has been designed to provide a way that allows you to study a topic of your choice while having your focus skills evaluated by a system. The software allows to feedback to a particular lecturer.

The system is based on AIML dialogues box; you can ask the system a question that relates to a topic just taught using an input box and the answer is revealed through an output box. The program does review the level of richness of the question and returns the answer as well as a mark showing how interesting, relevant or poor the question was. At the end of the course a final mark is be issued and you get to select the name of the preferred lecturer via a list box. You are also encouraged to submit comments on the topic taught and the system. The final mark and the comments are then emailed to the lecturer who'll know how well or not you have followed the course. The lecturer receives then an email with the date of submission, your mark and comments.

## **2.1 System configuration**

The minimum system required to use Question based Assessment in tutorial dialogues are:

- PC or laptop
- 128 MB RAM
- VGA graphics (640 x 480)
- A working Internet Connection
- Internet Explorer 6.0 or Mozilla 1.5.07

## **2.2 User Access Levels**

Question Based Assessment in Tutorial Dialogues is designed for students or company staff as part of a training system.

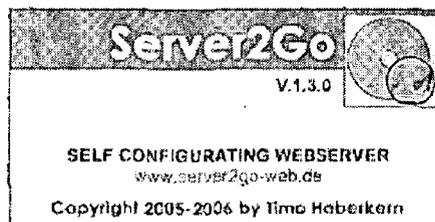

There is no user access level as no restriction has been implemented during the development of this software however it recommended to have full administration rights enable in your operating system user profile if your computer is connected to a private or professional network.

Note that firewalls should be configured or disabled in order to allow access to Server2Go.

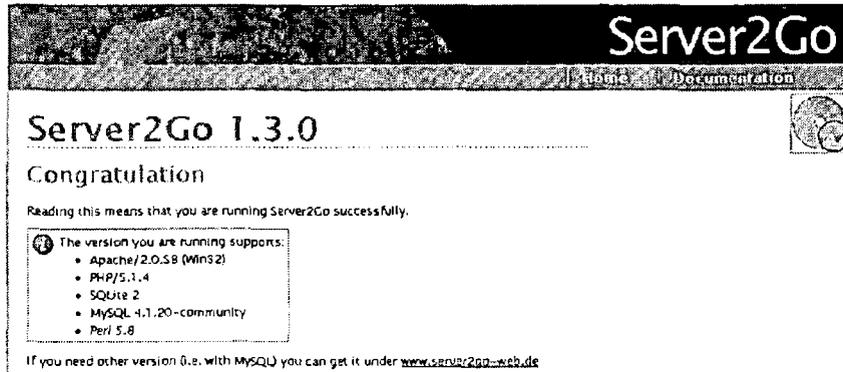

## 3.0 INSTALLATION

### 3.1 Running Server2Go for the first time

- i. Insert the installation CD into your CD-ROM/DVD-ROM drive. Your CD should start automatically.
- ii. Double-click the **My Computer** icon. Alternatively, click **Start → My Computer**.
- iii. Right-click the CD-ROM/DVD-ROM drives, and then click **Autoplay**.
- iv. Copy the **Question based Assessment in tutorial dialogues folder** onto your Desktop or any location of your choice on your computer hard drive.
- v. Double-click the Question based Assessment in tutorial dialogues folder, then double-click the Server2Go folder, finally double-click the **Server2Go.exe** icon to proceed.
- vi. The logo below appears for a few seconds.

- vii. The Server2Go screen appears confirming the execution of Server2Go, see below.

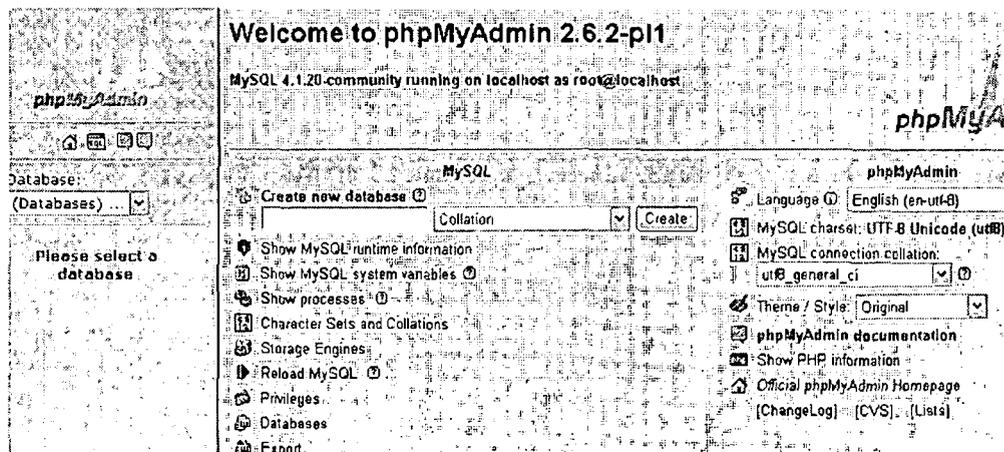

- viii. The bottom of this menu provide a PhpMyAdmin link

[phpMyAdmin](#)

- ix. Click on the PhpMyAdmin link to access its configuration screen.

## 3.2 Configuring PhpMyAdmin

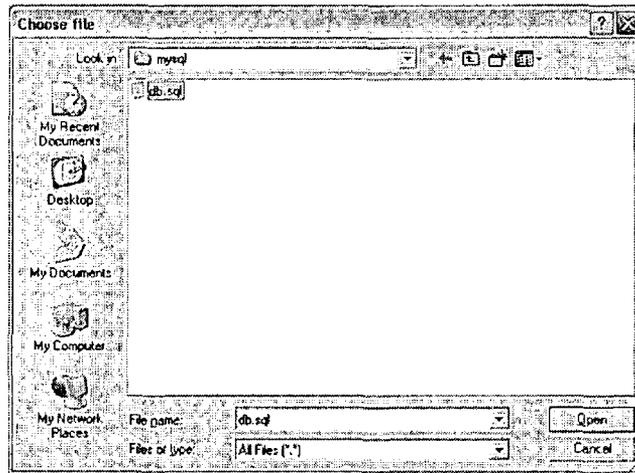

- i. The PhpMyAdmin welcome screen appears

- ii. Enter the name “bot” in the **Create new database** field, then click **Create**
- iii. Click the SQL button → 
- iv. Under Location of the text file, click **Browse**
- v. Locate the **Question based Assessment in tutorial dialogues** folder previously copied onto your hard drive and browse through it following this path:

C:\...\Question based Assessment in tutorial dialogues\Server2Go\htdocs\programe\sql\mysql\db.sql

- vi. Select **db.sql** and click **Open**.

- vii. Click **Go** → 
- viii. The following message appears confirming the successful query:

**Your SQL query has been executed successfully**

- ix. Close **PhpMyAdmin**.

### 3.3 Modifying dbprefs.php

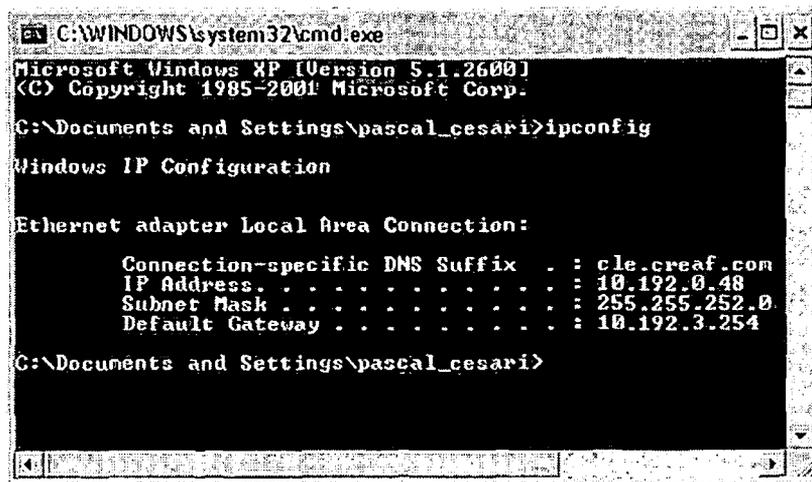

- i. Locate the file **dbprefs.php** located in  
**Server2Go\htdocs\programe\src\admin** folder
- ii. Right-click on **dbprefs.php**, select **Open with**, and then choose **Notepad**.
- iii. Apply the below amendments:

```
$rootdir="./aiml/";  
$DB_HOST="localhost";  
$DB_UNAME="root";  
$DB_PWORD="";  
$DB_DB="bot";
```

## 4.0 USING QUESTION BASED ASSESSMENT IN TUTORIAL DIALOGUES

### 4.1 Running Question Based Assessment in Tutorial Dialogues

- i. Run **Server2Go** and maximize its windows.
- ii. Click **File, New, Window**.
- iii. In your web browser address field enter the following and hit **Enter** on your keyboard:  
  
`http://YOUR IP ADDRESS/programe/src/admin/botloader.php`
- iv. If you don't know what your IP address is, In Windows, click **Start, Run**, type **CMD** and click **OK**.  
If you know already your IP address, go directly to **vii**.
- v. In the prompt, type **ipconfig** and hit **Enter** on your keyboard.

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\pascal_cesari>ipconfig

Windows IP Configuration

Ethernet adapter Local Area Connection:

    Connection-specific DNS Suffix  . : cle.creaf.com
    IP Address. . . . .               : 10.192.0.48
    Subnet Mask . . . . .             : 255.255.252.0
    Default Gateway . . . . .         : 10.192.3.254

C:\Documents and Settings\pascal_cesari>
```

vi. According to the example above, the following must be entered in the address field of your web browser.

<http://10.192.0.48/programme/src/admin/botloader.php>

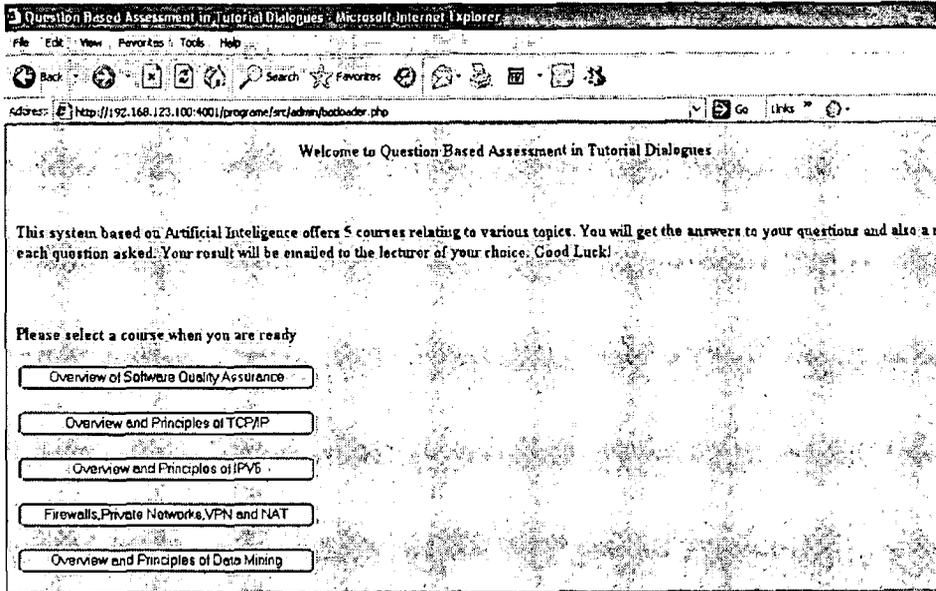

Hit the Enter key on your keyboard to run Question Based Assessment in Tutorial Dialogues.

vii. The menu screen of Question Based Assessment in Tutorial Dialogues offers the following five different courses:

- Overview of Software Quality Assurance
- Overview and Principles of TCP IP
- Overview and Principles of IPV6
- Firewalls, Private Networks, VPN and NAT
- Overview and Principles of Data Mining

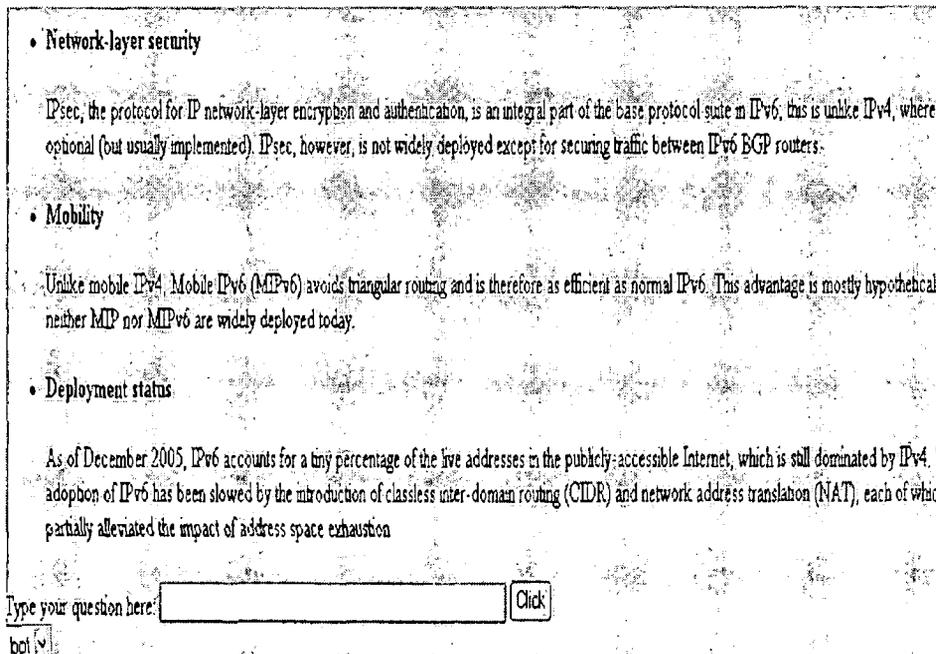

Click on the button corresponding to the course you want to study to begin.

Note that each course includes five lectures.

## 4.2 Entering a question

- In order to enter a question and submit it for evaluation, you must use the input box and a **Click** button located at the end of each lecture.

### Important syntax rules!

- Each question must begin by a capital letter.
- Each question must be entered in lower case except the first letter.
- No question mark, no exclamation mark, no commas and no semi-column can be entered.

### Example of valid questions

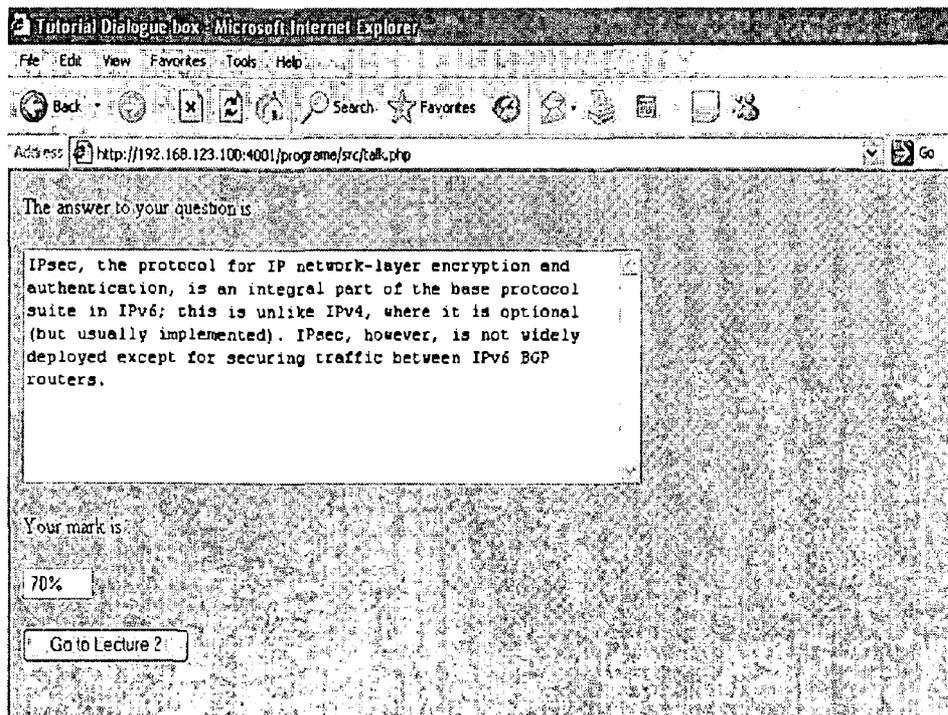

- What is mobility
- Explain ipv6 addressing

### Example of invalid questions

- what is mobility?
- Explain ipv6 addressing now!

## 4.3 Getting answers and marks

When a question is submitted the answer to the question and the mark appear within two separate output boxes

## 4.4 Submitting feedback to a lecturer

- i. At the end of a course, the mark and a feedback can be emailed to a lecturer. To proceed, select the lecturer of your choice among the list offered.

Address: <http://192.168.123.100:4001/programefsrc/ta/ta.php> Go

The answer to your question is

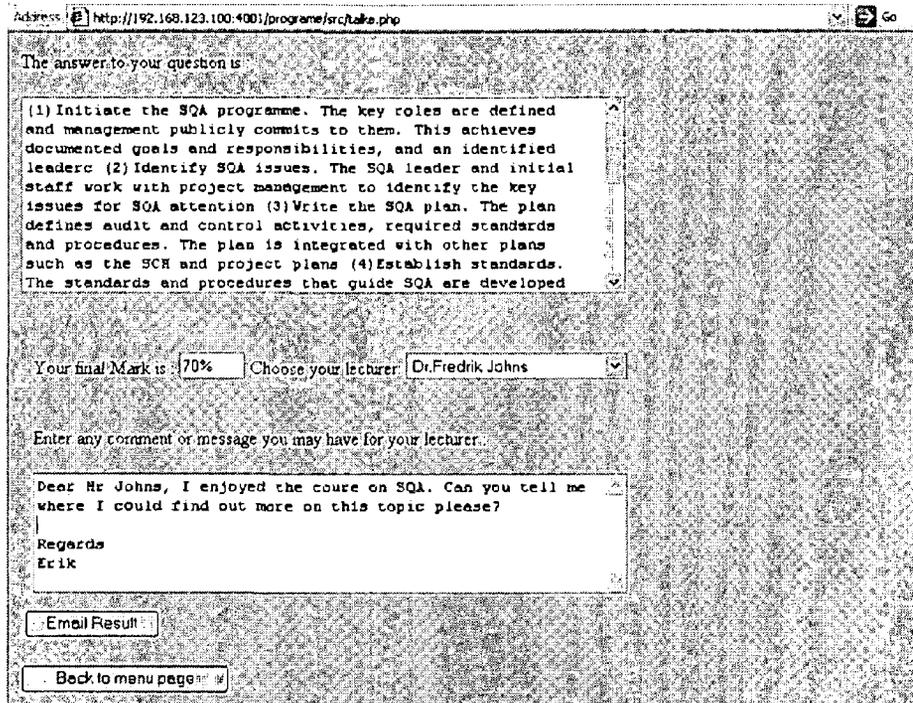

(1) Initiate the SQA programme. The key roles are defined and management publicly commits to them. This achieves documented goals and responsibilities, and an identified leader (2) Identify SQA issues. The SQA leader and initial staff work with project management to identify the key issues for SQA attention (3) Write the SQA plan. The plan defines audit and control activities, required standards and procedures. The plan is integrated with other plans such as the SCM and project plans (4) Establish standards. The standards and procedures that guide SQA are developed

Your final Mark is:  Choose your lecturer:

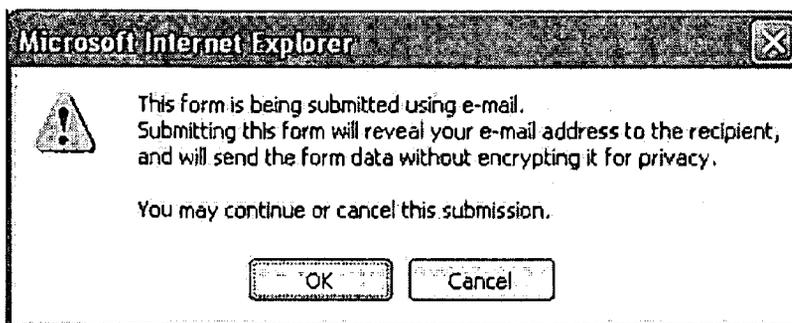

Enter any comment or message you may have for your lecturer:

Dr. Fredrick Johnson  
Simons Merks  
Judy Perkins  
Igor Gorscha  
Johanna Idelgo

- ii. Once a lecturer is selected, you can enter any comment or message you like and email it to the lecturer using the form available.

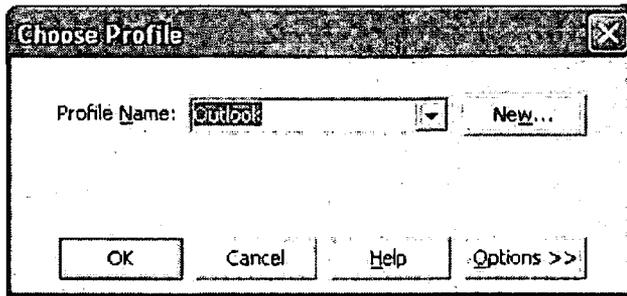

- iii. Once you are happy with your feedback and your choice of lecturer, click the **Email Result** button
- iv. Your web browser will display the following message. Click **OK** to continue.

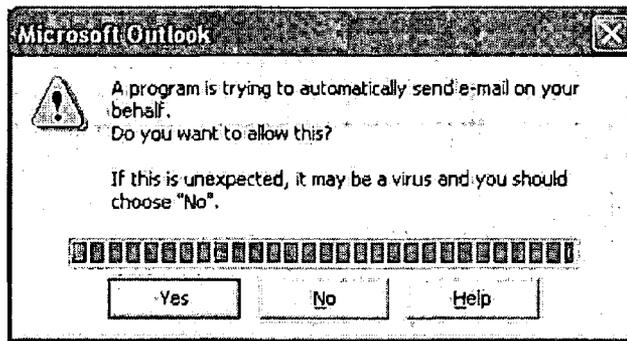

Note that Microsoft Outlook must be installed as set as you default email software.

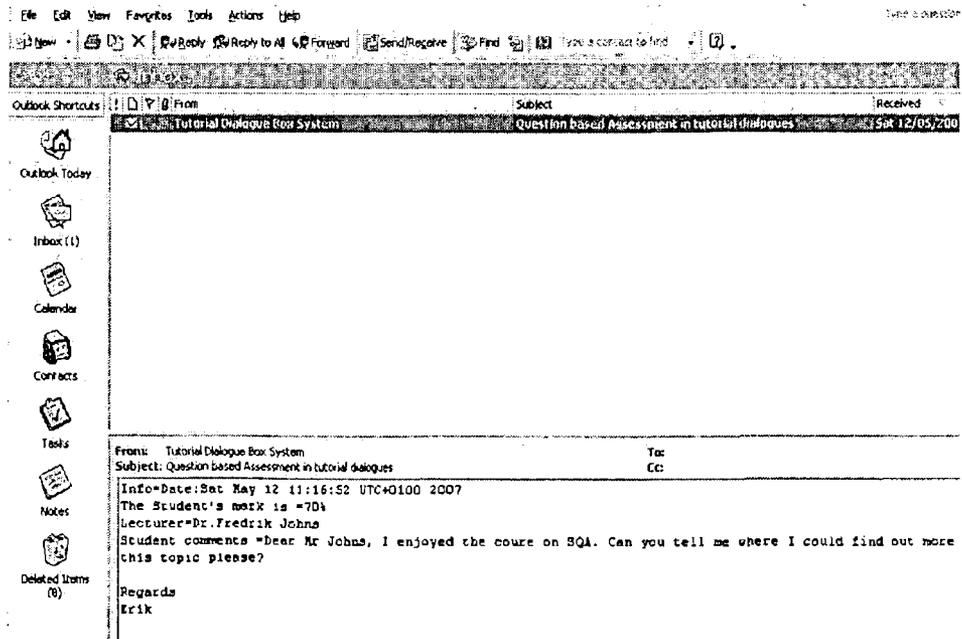

- v. If Microsoft Outlook prompts to choose a profile, click **OK**.

- vi. When the following confirmation screen appears, click **OK** to send your email

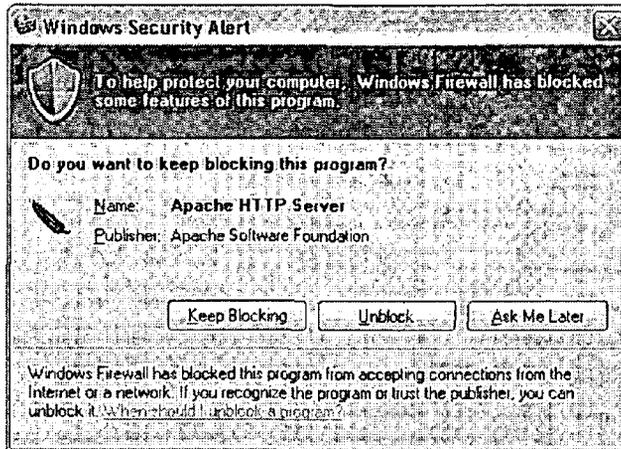

- vii. Your lecturer receives your mark, your feedback and the time of the date of submission

## 5.0 MAINTAINING THE SYSTEM

### 5.1 Known issues and Solutions

#### i. My firewall displays a security alert when I run Server2GO

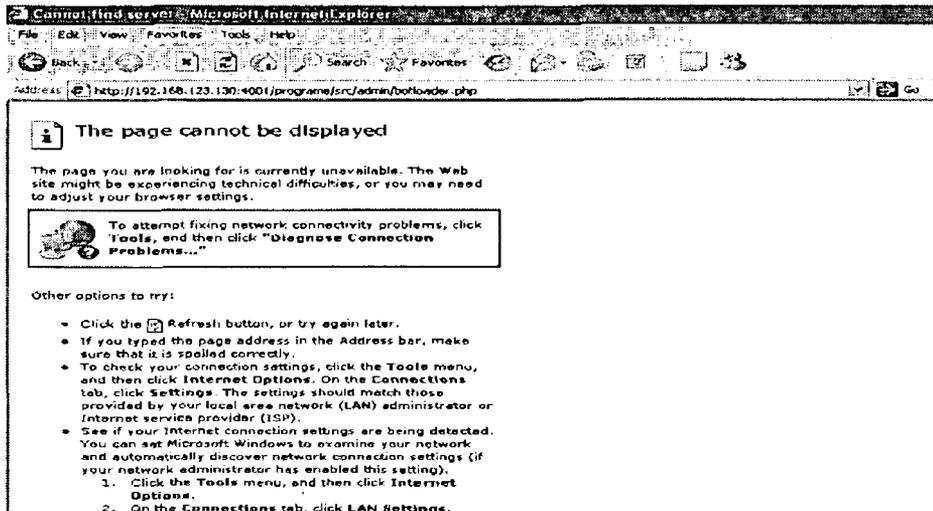

#### **Solution:**

Running Question Based Assessment in Tutorial Dialogues requires access to Server2GO which is based on Apache server.

If the a firewall security alert appears, make sure to click **Unblock** or **Allow** in order to access Server2Go and run Question Based Assessment in Tutorial Dialogues

ii. My web browser displays a connection error when I am trying to run Question Based Assessment in Tutorial Dialogues

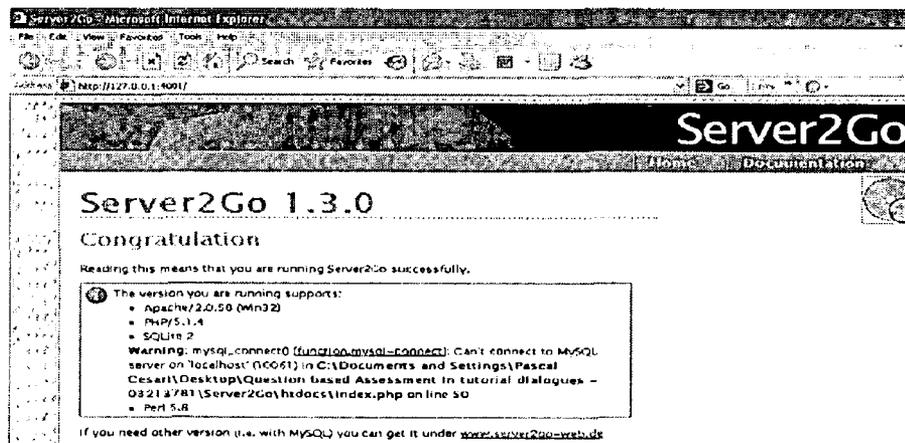

**Solutions:**

Check you Internet connection first; this might be the result of a network failure.

Make sure to enter the correct path including your current IP address in your web browser address field

iii. My web browser displays a warning error when I am trying to run Server2Go

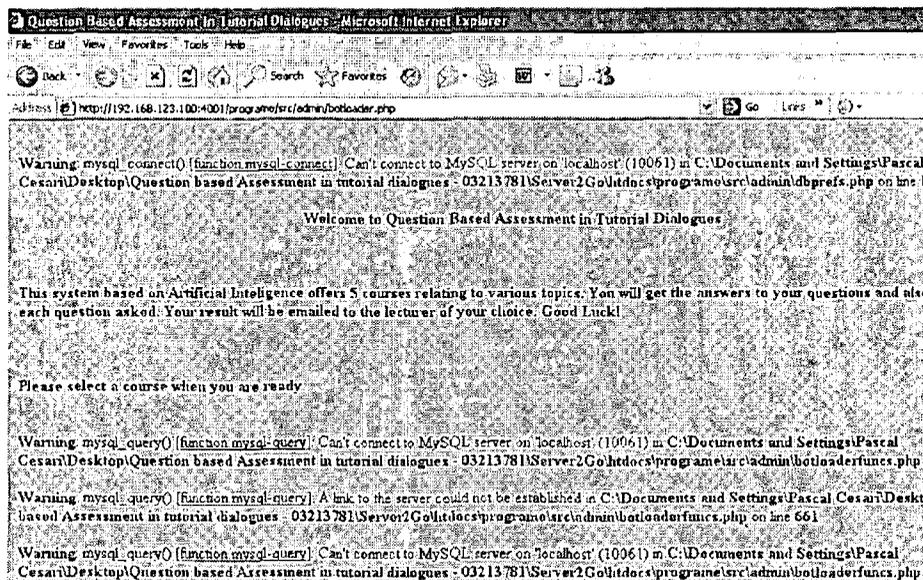

## Solutions:

Check you Internet connection first; this might be the result of a network failure.

A process of Server2Go was possibly running when you ran Server2Go. End the Server2Go process and run Server2Go again

To access Windows Task Manager, press **Ctrl + Alt + Delete** simultaneously on your keyboard, select the Server2GO.exe and click **End Process**.

### iv. My web browser displays a connection error when I am trying to run Question Based Assessment in Tutorial Dialogues

## Solution:

A process of Server2Go was running when you ran Server2Go. End the Server2Go process and run Server2Go again

To access Windows Task Manager, press **Ctrl + Alt + Delete** simultaneously on your keyboard, select the Server2GO.exe and click **End Process**.
