

B-Speech® Prim

BT Handsfree V. 2.1 + EDR

User Manual

Congratulations

Congratulations on your purchase of the B-Speech® Prim multilink-handsfree. This device allows you to communicate wirelessly through your mobile phone and includes a built-in microphone and loudspeaker. It uses BT 2.1 and multilink technology, but is also compatible with mobile phones using older versions.

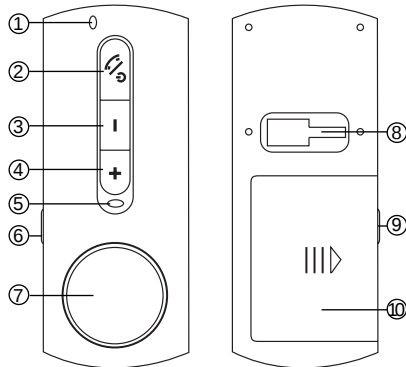

Your B-Speech® Prim handsfree uses a built-in Lithium-Ion rechargeable battery, with long life.

Package contents:

- Handsfree „B-Speech® Prim“
- Fixing clip
- Car charger
- Lithium-Ion Battery
- This manual

Function overview

1. Microphone
2. Multifunction key
3. Volume -
4. Volume +
5. Status LED
6. Microphone mute
7. Speaker
8. Fixing clip
9. Charging port
10. Battery case

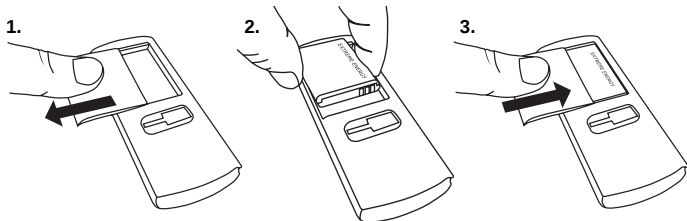

Insert and charge battery

Before you can use the hands-free set, you must place the batteries into the device and charge it fully. The batteries have been included in the package.

Putting in the batteries

1. Following the direction of the arrow, pull out the cover of the battery compartment so that the battery compartment is exposed.
2. Place the batteries into the compartment, making sure that the batteries are inserted correctly.
3. Close the battery compartment.

Charging the battery

1. Plug the cable into a suitable electrical socket.
2. Plug the USB cable into the hands-free set.
3. When charging, the red LED will light up. When charging is complete, the red LED goes out. You can separate the handsfree set from the cable after the red LED goes off.
4. If the red LED blinks while the device is in use, the device has to be charged.
5. The charging time is about 3 hours.

Switching the handsfree on or off

To switch on:

Press and hold the multifunction key (2) for 3-7 seconds until the blue LED comes on.

To switch off:

Press and hold the multifunction key (2) for 3 seconds until the red LED flashes.

Note, if there is no connection with handsfree Prim, the handsfree will switch off automatically. After switching on, Prim will go into auto-pairing mode and connect to the mobiles, which were paired before.

Pairing

Your B-Speech® Prim needs to be paired to your Bluetooth® mobile phone before it can be used. This is a two part process; one part is carried out on the handsfree and the other is carried out on the mobile phone.

Note that different mobile phones use different methods of pairing.

To pair your Prim with an mobile phone:

1. With your handsfree turned off, press and hold the multifunction key (2) for 7-11 sec. The LED will alternate rapidly between blue and red which indicates that the B-Speech® Prim is in pairing mode.
2. Use your phone's menu to search for Bluetooth® audio devices. The phone should indicate it has found the B-Speech® Prim headset. Confirm that you want to pair your mobile phone and handsfree together. If you are unsure how to go through the pairing process on your mobile phone, please refer to the user manual.
3. When asked for a pin key, enter: "0000". Your phone will confirm that pairing has been successful.

Note: that there is usually a time limit to pair devices.

Note for Multi-link use:

In order to pair a second mobile please press the volume - button (3) for 3 seconds, the LED will alternate rapidly between blue and red, B-Speech® Prim will go into pairing Mode and you can pair the second mobile. Please proceed with pairing as described before. Switch your handsfree off and on as described before. The two latest paired mobile phones will be connected automatically.

Phone call use

Making a call from the mobile phone

While your mobile phone is paired with your handsfree, you can use the mobile phone to make phone calls in the same way as normal. The only difference will be that the speaker and microphone functions of the handsfree will be used instead of the phone's.

Answering a call

To answer a call after a ring tone heard from your handsfree, simply press the multifunction key (2).

Note that you can set your mobile phone to automatically answer calls, which means you do not even need to press the multifunction key. Please refer to your mobile phone's user guide for more information about this setting.

Note for Multi-link use:

You must end the first call before you can receive the incoming call of the second mobile (to be automatically re-paired with the second mobile takes 6 -7 seconds) then you will hear the phone ring tone from your handsfree and if you now press the multifunction key (2) you can receive the call of the second mobile. While answering a phone call in the multilink function, the BT link with the other mobiles will be interrupted.

Ending a call

During a call, press the multifunction key (2) to hang up. If the other person hangs up first, then the call will end automatically.

Voice dialling

In order to use the voice dial feature of your handsfree, your phone must support voice dialling and must have voice tags stored. To use voice dialling, the corresponding voice profiles must be stored in your Phone Your Mobile must also support this function. Press the multifunction key (2) briefly. You will hear a short tone. Speak the voice tag immediately. Your phone will make the call.

Last number redial

When the headset is in standby mode (not in conversation), press the volume + key (4) 3 seconds, (tone appear) and your phone will re-dial the last number that you called.

Note: This function only works on Bluetooth® phones that support the Hands-free profile. In the multi-link mode, the number is either the number of the last paired or the last used mobile.

Transferring a single call

When activating a call, you can press the Microphone mute key (6) shortly, to switch the conversation between the handsfree and the mobile phone. Press the Microphone mute key (6) shortly to return to handsfree.

Rejecting Calls

Press the multifunction key (2) for 3 seconds during an incoming phone call to reject the call.

Microphone Mute

While talking using the handsfree, press the Microphone mute key (6) shortly to mute the microphone. Press shortly the Microphone mute key (6) to activate the handsfree microphone.

Adjusting the volume

- To increase the volume, briefly press the increase volume key (4).
- To decrease the volume, briefly press the decrease volume key (3).
