**Replacement of cartridges**

**Filling the water tank**

**ATTENTION !!! : switch off power before removing the hood**

**Daily maintenance (automatic cleaning of mixing bowls )**

In order to assure optimum delivery of your beverages and meet the hygiene standards a daily cleaning of the mixing mechanism is recommended. This will also prevent clauging of the machine by remaining powder residu.

It is not necessary to remove the cartridges...

Switch the machine off

Install a big cup under the beverage outlet

Push and keep the hot water button while switching the machine on again (green led blinks)

Push coffee button to clean the coffee mixing mechanism – empty the cup when done

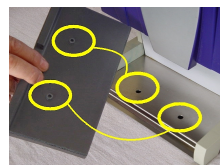

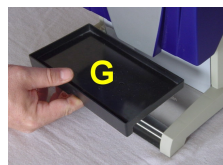

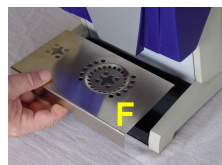

Push the cappuccino button to clean the cappuccinomixing mechanism – empty the cup when done

After 10 seconds, green led is fixed again indicating machine is ready for beverage deliveries

ensure the opening of the dispensing mechanism is pointing to the bottom

**cleaning the drip tray**

**Replacement of Brita water filter**

**Reset the water counter**

Switch off the machine

Push expresso button, keep pushed and switch machine on  
Blue led blinks

Push expresso button again to reset

Blue led goes out and procedure terminates .
