1. Safety Information

Read this information before using your mobile device otherwise may result in personal injury or your device not complying with local laws.

Battery:

If a conductive material such touches the exposed terminal, short circuit may occur resulting in property damage, bodily injury or burn. To avoid risk of leaking electricity, take care when handling a charged battery particularly when placing it inside your pocket, purse or other container with metal objects.

Keep your mobile device from water:

Keep your mobile device dry.

Use while driving

Always obey the laws and regulations on the use of mobile devices in the area where you drive. Give full attention to driving and the road; use hand-free operation or earpiece if a call is needed.

Aircraft

Mobile device may cause harmful interference so turn off your mobile device before boarding an airplane.

Blasting areas

Always obey the related limits and regulations and do not use your mobile device in blasting areas. Turn off your mobile device in areas posted "turn off electronic devices".

Potentially explosive atmospheres

Turn off your mobile device in the gas station and areas near fuel and chemical containers. Turn off your mobile device in areas posted "turn off electronic devices".

Medical devices

Turn off your mobile device whenever instructed to do so by posted signs near some medical equipment. Mobile device may interfere with pacemakers, hearing aids and some other medical transplanting equipment. Do not put your mobile device near pacemakers nor carry in the breast pocket.

Accessories and battery

Use the accessories, batteries and chargers approved by manufacturer. Use of batteries not approved by manufacturer may cause injury.

Emergency calls

Turn on your phone and keep it in service areas, dial emergency phone numbers and then tap the calling to make a call.

When losing your phone

To avoid any economy damage, please inform the Tele-communication Company or agencies to lock your SIM card when you lost your phone.

When you inform the telecom company or agencies to lock your SIM card they need to know the IMEI No. of your phone, which you can find printed on the label on the back of your phone when taking off the battery. Please backup this number for future need.

For safety consideration, you can make preventative measures such as set PIN Code for your SIM card to prevent other persons using your SIM card without your permission.

Keep away from children

Keep the phone, battery and charger away from children to avoid any personal injury.

2. Use and Care

To care for this mobile device, keep it away from:

Any kind of fluid

Keep the device away from water, rain, or other moisture.

Extreme heat or cold

Avoid the temperature below $-10^{\circ}\text{C}/14^{\circ}\text{F}$ or above $45^{\circ}\text{C}/113^{\circ}\text{F}$.

Microwave

Don't try to dry your phone in a microwave oven.

Dust and dirt

Don't expose your phone to dust, dirt, sand, food or other inappropriate materials.

Cleaning solutions

Use only a dry soft cloth to clean your phone. Don't use alcohol or other cleaning solutions.

Ground

Don't drop your phone.

3. Essential

3.1 Insert SIM

Keep your SIM cards away from the children.

Please consult your SIM card franchiser about the services and usage. SIM franchiser can be the service provider, network provider or other franchisers.

Please turn off your mobile device and disconnect it with charger before removing the battery.

Note: turn off your mobile device and disconnect it with charger or any other device before removing battery door. Place the door on the phone before store and use your mobile phone.

- 1, Remove the battery door:

With your finger pull back the clip door, which will come completely off.

Lift and Unclick Here

- 2, Insert the SIM card into the card slot:

Slide the SIM card under the metal clip, and push it to the card slot, as shown.

3.2 Battery Use and Installation

Battery tips

Battery life depends on the network, signal strength, temperature, and accessories you use.

Always use Original batteries and chargers. The warranty does not cover damage caused by non-original batteries, charger and/or accessories.

New batteries or batteries stored for a long time may take more time to charge

When charging your battery, keep it near room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Never dispose of batteries in a fire because they may explode.

Battery installation

1. Unclip the battery door up and then remove the door completely.

Lift and Unclick here

2. Aim the metal terminals of the battery at those in the battery compartment and then push down and into it.

Line up the 3 connectors on battery with these 3 connections.

Battery charging:

New batteries are not fully charged. Open the protective cover on your phone's accessory connector port, then insert the battery charger plug into the accessory connector port on the side of your phone as shown, and plug the other end into an electrical outlet. Your phone might require several hours to charge fully. When your phone is power off, it might take a few seconds to show charging display and it shows charge complete when finished. When your phone is power on, the battery icon flickers when it starting charging and become still with full bars in battery icon when finished.

3.3 Turn it on/off

Caution: On power up, the phone may prompt you to enter your SIM card PIN code to unlock the SIM card. If the password of the SIM card you consecutive input is incorrect for three times, your SIM card will be suspended, meanwhile your phone will shows input the PUK code. Please turn to your network provider.

To turn on your phone, press and hold the power on/off key for two seconds. If prompted, enter your four-to-eight-digit SIM card PIN code and/or four-digit unlock code.

If you don't insert a SIM card, your phone shows "Insert SIM". None of the functions related to SIM card can be used and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

3.4 Make a Call

1. Under the sleep mode, press the key  to open the dial-up keyboard or input the telephone number directly.
2. Tap the calling to make a call.
3. After calling, tap "Abort" to end.

3.5 Answer or Reject a Call

When there is an incoming call, the phone rings and /or vibrates showing the number or the corresponding name. Tap the Options menu on the screen to Answer the call. If you don't want to answer, you can tap the Rejection on the screen to reject.

Bluetooth Mode: When you startup the Bluetooth earphone, you can use the buttons on the earphone to answer the call. If for you its inconvenient to key-press, you can set the automatically receive (the option only presents to the user profiles-Bluetooth option) opened, and be sure that the Bluetooth earphone is connecting, the call will get automatically 5 seconds after it rings and/or vibrates.

4. Basic

4.1 Display

The idle shows when you turn your phone on:

Status bar, Main display, Application bar

Status bar & Battery Indicator

Main display

Application bar

6. Phone Book

Select the **Phone Book**  in the **Menu** to enter the phone book.

The book includes phone book and SIM, you can use both of them to storage your linkman records.

Phone Book: Each item includes Name, Number, Home Number, Company Name, Email Address, Office Number, Fax Number, and Birthday and Group etc. information.

SIM: The capacity depends on your SIM card type and there is only a name and one business number in each item. For details, please contact your service provider.

6.1 View Phone Book

You can tap and view the phone book in the sleep interface. Tap the **Option** to operate with the item as follow:

IP Dial	Automatically add the IP number before the number when make a call
View	View all the information about the item.
Edit	Edit the information of the item.
Delete	Delete the item.
Copy	Copy the names stored in the phone storage/SIM card storage to the SIM card storage/phone storage (copy between the two storages).
Move	Move the names stored in the phone storage/SIM card storage to the SIM card storage/phone storage (move between the two storages).
Duplicate	Duplicate the names stored in the phone storage/SIM card storage to the phone storage/SIM card storage (backup in the same storage).

6.2 Search Entry

Input the name need to select, then through the **Option-Search** menu to lookup the item qualifying in the phonebook.

The phone provides initial of the name's search, and input the initial of the name, then you can go to the corresponding item quickly.

6.3 Add New Entry

You can add new names in your phonebook by this function and save to the phone storage or SIM card storage.

Only names and call numbers can be added when you add new contact to SIM card storage. If you choose phone storage, beside names, numbers, family numbers, company numbers, fax numbers, company names, email address, you can add birthday dates and set group/individual incoming call ring as well.

6.4 Copy All

You can copy all the names and switch between SIM card and phone storage.

Note: When copy the names stored in the phone storage to SIM card, only names and default numbers can be saved.

6.5 Delete

You can do following operations:

- | | |
|-------------------|--|
| From SIM | Delete all the names stored in SIM card |
| From Phone | Delete all the names stored in the phone storage |
| One By One | Delete the selected names one by one |

Note: You need to enter the password when you delete from SIM or phone.

6.6 Caller Group

There are 5 caller groups in your phone and you can set the group name, group incoming call ring and group members as you like.

6.7 Extra Number

You can set **Owner Number**, **Service Dial Number** and **SOS Number** in this menu.

Note: this feature must be supported by your SIM card. For details please contact your service provider.

Note: SOS Number can be set no more than five.

6.8 Setting

In the settings menu, you can examine the memory statue, includes SIM and Phone; also can setup the preferred storage location of the new-add linkman; filter the corresponding information of the linkman store in the phone; edit and send My vCard.

Note: The preferred storage location also can select when saving.

7. Call

7.1 Call History

Your phone keeps lists of incoming and outgoing calls, even for calls that didn't connect. The most recent calls are listed first.

Tip: the phone keeps the only latest call of the same number.

To view detail information or perform other operation:

- 1, Enter main menu from idle and select  **Call History**.
- 2, Find the lists of **Dialed Calls**, **Received Calls**, and **Missed Calls**.
- 3, Tap **OK** to view the detail information: date, time and times etc.
- 4, Tap Option and will appear the operations as follow ing:

Delete	Delete the item
Save to Phone	Save the number in the note to the phone book
Dial	Dial the number in the note
Edit	Enter the input number idle, you can edit, save and dial the number

7.2 Operation during a call

Tap option to perform following operation during a call:

Hold:	Hold this call
End:	Hang up and end this call
New Call*:	Enter a new dialing display to make a new call
Phone Book:	Enter the phone book
SMS:	Enter messages
Mute:	Set mute on or off. When setting mute on, your voice can not be heard through the line.
DTMF:	Set sending DTMF or not during a call
Sw ap*:	Sw itch between the current call and the holding call
Conference*:	You can add additional parties to a call.

Note: the menus marked with * must be supported by your SIM card. For details, please contact your service provider. Only when two or more calls are on can **Sw ap** and **Conference** show.

7.3 Insert international access code

When you are dialing an international call, keep tapping “*” key till the international call prefix “+” shows and then enter the number in the following order:

+ Country code complete number

7.4 Dial a extension or voicemail number

You need to enter P (pause) or W (wait) when dialing an extension number, press “*” to switch between ‘P’ and ‘W’.

You can enter numbers as following:

District code exchange phone number P or W extension number

7.5 Emergency calls

You can make emergency calls as long as your current location is network-covered which you can know by checking the signal strength bar showing on the top left corner of the screen.

Note: Emergency numbers vary by country. The emergency number(s) in your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

8. Messages

You can send and receive Chinese or English messages through the message centre. Instant messaging allows you to exchange information with other wireless phone users instantly. Enter the main menu from the idle, and select the  message menu to operate.

- your phone may be affected with damp, keep it dry

Tips: if all suggests and solutions can't solve your problem, please contact authorized after service center. Please do not disassembly or repair your phone without professional guide. Thank you!

Specific Absorption Rate Data

This model meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobile devices used by the general public is 2 W/kg

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

New phones must meet the international guidelines before coming into the market. The highest SAR value for this device when tested at the ear was 0.85 W/kg and the highest tested SAR value is 0.44 W/kg

Information from the World Health Organization

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of SAR Data mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "hands-free" device to keep the mobile phone away from the head and body. Improvement of this device may cause a little change of the SAR data. However, the device is designed in accordance with the guidelines in any case.

Battery Tips

- The battery we provide can be rechargeable.
- The new battery can achieve the best performance only after two, three times fully charged and discharged.
- The battery can be recharged, but it can be exhausted. When the call and standby time was shorter than usual, and then need to replace a new battery.
- Please use the battery the phone manufacturer authorized, and the charger the phone manufacturer authorized to charge.
- Please do not cut off the power supply when the charger is not used.
- Please don't let the battery connect with the charger longer than a week, for the longer time will impact the use life of the battery.
- Long time stored battery will affect the use effects. If the battery unused for long time, it will discharge automatically.
- Please do not use the damaged battery or charger.
- Too cold or overheated environment will affect the capacity of the battery.
- Do not place the battery in the overheated or too cold environment, for example, place the battery in the close car in summer or winter, will reduce the capacity and the life of the battery. The battery is too cold or too hot, even if the battery has enough power, it will cause occasional unable to work.
- Do not let the battery short-circuit. When the metal objects (such as coins) connect with the anode and the cathode (metal side of the zone) directly, it will occur the short-circuit accident.
- Do not make the battery as other use.
- Please deal with the old battery according to the local's regulation.
- Do not throw the battery in the fire.

Product Maintenance

Your phone is a product with outstanding design and superior quality, please take good care using it. You are strongly suggested to take the following advice which should help you stick to the warranty in order to extend the usage period of the product

- Keep your phone and its parts away from children.
- Keep your phone dry. Keep it away from rain, damp or any kind of fluid
- Don't touch your phone with wet hands when charging or there may be bodily injury or damage to the phone
- Keep your phone away from extreme heat which can shorten your phone's life, damage the battery, twist or melt some plastic parts.
- Keep your phone away from extreme cold because when the temperature grows up, water vapor accumulated from inside the phone may damage the electronic circuit.
- Keep your phone away from dust and dirt.
- Keep your phone away from ignited cigarettes, fire or heat source.
- Don't disassemble your phone by yourself
- Don't drop, beat or shake your phone. Any rude treatment can damage the inner electronic circuit board.
- Don't daub your phone because paint would jam-up the earpiece, microphone or any other removable part and disable your phone.
- Clean the pc camera or screen with neat, soft and dry cloth. Don't use alcohol or other cleaning solutions.
- If your phone, battery, charger or parts can't work, please take them to the authorized service center for help.
