VLC Media Player Ver. 1.0.5
<http://www.videolan.org>

vlc-1.0.5-win32.exe

Overview of the VideoLAN project

VideoLAN is a complete software solution for video streaming and playback, developed by students of the Ecole Centrale Paris and developers from all over the world, under the GNU General Public License (GPL).

VideoLAN was originally designed to stream MPEG videos on high bandwidth networks, but VideoLAN's main software, VLC media player, has evolved to become a full-featured, cross-platform media player.

More details about the project can be found on the VideoLAN Web site.
VLC media player

VLC works on many platforms: Linux, Windows, Mac OS X, BeOS, BSD, Solaris, Familiar Linux, Yopy/Linupy and QNX.

It can play:

- * MPEG-1, MPEG-2 and MPEG-4 / DivX files from a hard disk, a CD-ROM drive, and so on
- * DVDs, VCDs, and Audio CDs
- * From satellite cards (DVB-S)
- * Several types of network streams: UDP/RTP Unicast, UDP/RTP Multicast, HTTP, RTSP, MMS, etc.
- * From acquisition or encoding cards (on GNU/Linux and Windows only)

The present guide describes all the playback (client) aspects of VLC media player.

XX

Infra Recorder Ver. 0.46.2.0
<http://infrarecorder.org/>

ir050.exe - 32 bit
ir050_x64.msi - 64 bit

InfraRecorder

Is a free CD/DVD burning solution for Microsoft Windows. It offers a wide range of powerful features; all through an easy to use application interface and Windows Explorer integration.

InfraRecorder is released under GPL version 3.

Features

Create custom data, audio and mixed-mode projects and record them to physical discs as well as disc images.
Supports recording to dual-layer DVDs.

Blank (erase) rewritable discs using four different methods.
Record disc images (ISO and BIN/CUE).

Fixate discs (write lead-out information to prevent further data from being added to the disc).
Scan the SCSI/IDE bus for devices and collect information about their capabilities.

Foxit PDF Reader Ver. 3.1.3.1030
<http://www.foxitsoftware.com/pdf/reader/>

FoxitReader31_enu_Setup_1030.exe

Foxit Reader 3.1 for Windows

An exclusive small and fast PDF Reader!

Is a small and fast PDF viewer. Now, Foxit Reader 3.1 has been released and introduces many fascinating new features including internet search and favorite toolbar settings.

What's New in Foxit Reader 3.1

The following is a list of exciting new features in Foxit Reader 3.1.

Foxit Reader 3.1 supports internet keyword search. You can select the text and click the pop-up search icon or press and drag the mouse directly to search for the related information in internet.

Favorite Toolbar

Foxit PDF Reader 3.1 supports to customize the useful tools to appear in the Favorite Toolbar area, so that users can choose the tools that are used most often easily and quickly.

Comments Panel

Lists all comments in the PDF document, and provides a number of common options that helps users check their comments better, such as expanding or collapsing all comments, as well as sorting comments in different ways.

Summarize Comments

Allows users to generate a new PDF document with comments summary and set the document properties, such as paper setting, page range choosing, and so on. It is a convenient way to get a synopsis of all the comments associated with a PDF.

Document Restrictions

Now users can view document restrictions by clicking the Security tab in the properties dialog box. The document's Security Method restricts what can be done to the document, and the Document Restrictions Summary displays a list of tasks that users can perform.

Supports MSAA

Part of user interface elements supports Microsoft Active Accessibility (MSAA), that is, to deliver the UI information to the MSAA client-side.

Streamlined UI

A completely redesigned UI with a new look and feel that makes Foxit Reader more intuitive than ever before, such as updated icons and the reclassified menu bar.

Photo Story Ver. 3

<http://www.microsoft.com/downloads/details.aspx?FamilyID=92755126-a008-49b3-b3f4-6f33852af9c1&DisplayLang=en>

PStory.msi

Photo Story 3

Overview

Create slideshows using your digital photos. With a single click, you can touch-up, crop, or rotate pictures. Add stunning special effects, soundtracks, and your own voice narration to your photo stories. Then, personalize them with titles and captions. Small file sizes make it easy to send your photo stories in an e-mail. Watch them on your TV, a computer, or a Windows Mobile-based portable device.

Photo Story 3 includes features that enable you to create a slideshow with your digital pictures, edit your pictures, create your story with original music, add narration, and share them with your family and friends.

Create a photo story. You can create a photo story that includes motion, narration, and music. Photo Story 3 includes dramatic pan and zoom effects, picture rotation, and cropping tools to customize your photos. You can also compose an original soundtrack from directly within Photo Story 3, narrate your story and add special effects, transitions, and much more.

Edit and save your photo story. The new smart touch-up features make it easy to instantly remove red eye, and correct the lighting in your pictures. There are also several different options for saving a story and its associated project so that you can edit the story later or share it immediately.

Import pictures. If you have a collection of pictures on an MSN Group Web site, you can import these pictures into

your photo stories.

XX

FastStone Image Viewer Ver. 4.0

<http://www.faststone.org/>

FSViewerSetup40.exe

FastStone Image Viewer

Is a fast, stable, user-friendly image browser, converter and editor. It has a nice array of features that include image viewing, management, comparison, red-eye removal, emailing, resizing, cropping and color adjustments. Its innovative but intuitive full-screen mode provides quick access to EXIF information, thumbnail browser and major functionalities via hidden toolbars that pop up when your mouse touches the four edges of the screen. Other features include a high quality magnifier and a musical slideshow with 150+ transitional effects, as well as lossless JPEG transitions, drop shadow effects, image annotation, scanner support, histogram and much more. It supports all major graphic formats (BMP, JPEG, JPEG 2000, animated GIF, PNG, PCX, TIFF, WMF, ICO and TGA) and popular digital camera RAW formats (CRW, CR2, NEF, PEF, RAF, MRW, ORF, SRF and DNG).

Audacity Ver. 1.2.6

<http://audacity.sourceforge.net>

audacity-win-1.2.6.exe

add-in to be able to export MP-3

libmp3lame-win-3.98.2.zip

From <http://lame.buanzo.com.ar>

About Audacity

Audacity is a free, easy-to-use and multilingual audio editor and recorder for Windows, Mac OS X, GNU/Linux and other operating systems. You can use Audacity to:

Record live audio.

Convert tapes and records into digital recordings or CDs.

Edit Ogg Vorbis, MP3, WAV or AIFF sound files.

Cut, copy, splice or mix sounds together.

Change the speed or pitch of a recording.

Audacity is free software, developed by a group of volunteers and distributed under the GNU General Public License (GPL).

Free software is not just free of cost (like "free beer"). It is free as in freedom (like "free speech"). Free software gives you the freedom to use a program, study how it works, improve it and share it with others. For more information, visit the Free Software Foundation.

Programs like Audacity are also called open source software, because their source code is available for anyone to study or use. There are thousands of other free and open source programs, including the Firefox web browser, the OpenOffice.org office suite and entire Linux-based operating systems such as Ubuntu.

XX

FLV Player Ver. 2 build 25

<http://www.martijndevisser.com/blog/flv-player/>

flvplayer_setup.exe

FLV Player

Is a program to play Adobe Flash Video (FLV and H.264 / MPEG-4) files with. The current version of FLV Player is 2.0.25. FLV Player is compatible with Windows XP, Vista and Windows 7. It supports both local and internet streaming content, has full screen mode and, best of all, it's free.

XX

Riva FLV Player 1.2

RivaFLVPlayerSetup.exe

Riva FLV Player

This free tool displays single FLV video files.

Riva FLV PLayer is Freeware.

XX

CCleaner (Downloaded)

<http://www.ccleaner.com/>

ccsetup228.exe

CCleaner is a freeware system optimization, privacy and cleaning tool. It removes unused files from your system - allowing Windows to run faster and freeing up valuable hard disk space. Additionally it contains a fully featured registry cleaner. But the best part is that it's fast (normally taking less than a second to run) and contains NO Spyware or Adware! :)

XX

Spybot - Search & Destroy

<http://www.safer-networking.org>

spybotsd162.exe

Spybot - Search & Destroy

Detects and removes spyware, a relatively new kind of threat not yet covered by common anti-virus applications. Spyware silently tracks your surfing behavior to create a marketing profile for you that is transmitted without your knowledge to the compilers and sold to advertising companies. If you see new toolbars in your Internet Explorer that you haven't intentionally installed, if your browser crashes inexplicably, or if your home page has been "hijacked" (or changed without your knowledge), your computer is most probably infected with spyware. Even if you don't see the symptoms, your computer may be infected, because more and more spyware is emerging. Spybot-S&D is free, so there's no harm giving it a try to see if something has invaded your computer.

XX

Belarc Advisor

<http://www.belarc.com/index.html>

advisor.exe

Belarc Advisor

The Belarc Advisor builds a detailed profile of your installed software and hardware, missing Microsoft hotfixes, anti-virus status, CIS (Center for Internet Security) benchmarks, and displays the results in your Web browser. All of your PC profile information is kept private on your PC and is not sent to any web server. Operating Systems: Runs on Windows 7, 2008 R2, Vista, 2008, 2003, XP, 2000, NT 4, Me, 98, and 95. Both 32-bit and 64-bit Windows is supported. Browsers: Runs on Internet Explorer, Firefox, Safari, Opera, and many others. License: The license associated with this product allows for free personal use only. Use on multiple PCs in a corporate, educational, military or government installation is prohibited. See the license agreement for details. The Belarc Advisor is not permitted to be used for any commercial purposes. Belarc's commercial products are used for software license compliance, hardware upgrade planning, cyber security status, information assurance audits, IT asset management, configuration management, and more.

OpenOffice Ver. 3

<http://www.openoffice.org/>

OOo_3.1.1_Win32Intel_install_wJRE_en-US.exe

Installation_Guide_OOo3.pdf

WriterGuide.pdf

OpenOffice.org 3 is the leading open-source office software suite for word processing, spreadsheets, presentations, graphics, databases and more. It is available in many languages and works on all common computers. It stores all your data in an international open standard format and can also read and write files from other common office software packages. It can be downloaded and used completely free of charge for any

purpose.

Easy-to-use Easy to choose, easy to install, easy to learn - OpenOffice.org 3 is the easy choice for an office software suite. OpenOffice.org 3 is suitable for complete beginners, but if you have used any other office software, that's ok too. OpenOffice.org 3 will make full use of what you already know - through familiar screens and menus - and also what you have - by reading existing files with no retying.

K-Lite Codec Pack

<http://www.free-codecs.com>

K-Lite_Codec_Pack_570_Basic.exe - Basic
K-Lite_Codec_Pack_570_Standard.exe - Standard
klcodec570f.exe - Full

K-Lite Codec Pack is a collection of codecs and related tools. Codecs are required to encode and/or decode (play) audio and video. The K-Lite Codec Pack is designed as a user-friendly solution for playing all your movie files. With the K-Lite Codec Pack you should be able to play 99% of all the movies that you download from the internet.

The K-Lite Codec Pack has a couple of major advantages compared to other codec packs:

- It always up-to-date with the latest versions of the codecs.
- It is very user-friendly and the installation is fully customizable, meaning that you can install only those components that you really want.
- It has been very well tested, so that the package doesn't contain any conflicting codecs.
- It is a very complete package, containing everything you need to play your movies.

There are three versions of the K-Lite Codec Pack: Basic, Standard and Full.

- K-Lite Codec Pack Basic contains only the most essential things. It contains everything you need to be able to play the most popular and widespread formats. It is small enough to fit on a single floppy. Also great for including on your movie CDs.
- K-Lite Codec Pack Standard contains everything you need to play all the commonly used formats. This package should be enough for the average user.
- K-Lite Codec Pack Full contains even more codecs. It also has encoding support for the various formats. This package is for power users and people who do their own encodings.

XX

7-ZIP

<http://www.7-zip.org/>

7z465.exe - 32 bit
7z465-x64.msi - 64bit

7-Zip is an open source file archive designed originally for Microsoft Windows. 7-Zip operates with the 7z archive format, and can read and write to several other archive formats. The program can be used from a command line interface, graphical user interface, or Windows shell integration. 7-Zip began in 2000 and is actively developed by Igor Pavlov.

The 7z archive format

Astonsoft Ltd
<http://www.essentialpim.com>

essentialpim3.exe - This version is free to use. There is also a Professional version for the desktop and a Portable version for a flash drive. These last two versions are not free.

PIM stands for Personal Information Manager, and it allows you to keep all your information in electronic form. All your appointments, tasks, to do lists, notes, contacts and email messages are stored in a graphical and easily accessible form. Fully Netbook compatible

XX

Inkscape v0.47.3
Inkscape-0.47-3.exe

<http://www.inkscape.org/>

About Inkscape
An Open Source vector graphics editor, with capabilities similar to Illustrator, CorelDraw, or Xara X, using the W3C standard Scalable Vector Graphics (SVG) file format.

Inkscape supports many advanced SVG features (markers, clones, alpha blending, etc.) and great care is taken in designing a streamlined interface. It is very easy to edit nodes, perform complex path operations, trace bitmaps and much more. We also aim to maintain a thriving user and developer community by using open, community-oriented development.
XX

Paint.NET v3.5.4

<http://www.getpaint.net/>

Paint.NET.3.5.4.Install.ZIP

Paint.NET is free image and photo editing software for computers that run Windows. It features an intuitive and innovative user interface with support for layers, unlimited undo, special effects, and a wide variety of useful and powerful tools. An active and growing online community provides friendly help, tutorials, and plugins.

It started development as an undergraduate college senior design project mentored by Microsoft, and is currently being maintained by some of the alumni that originally worked on it. Originally intended as a free replacement for the Microsoft Paint software that comes with Windows, it has grown into a powerful yet simple image and photo editor tool. It has been compared to other digital photo editing software packages such as Adobe® Photoshop®, Corel® Paint Shop Pro®, Microsoft Photo Editor, and The GIMP.

XX

BonkEnc v1.0.14

<http://www.bonkenc.org/>

BonkEnc is a free audio converter and CD ripper which integrates various popular formats and encoders. It currently supports MP3, MP4/M4A, Ogg Vorbis, FLAC, AAC and Bonk files.

BonkEnc makes it easy to convert your audio CDs to MP3 or Ogg Vorbis files which you can use in your hardware player or with your favorite audio software. The program supports the Cddb/freedb online CD database and CDText and automatically writes song information to ID3v2 or Vorbis comment tags.

BonkEnc is available for free. However, the project relies on your support to be able to push the development further. If you like this software, please consider making a donation. Click on one of the icons in the donation section to the right to support the BonkEnc project with a donation.

BonkEnc comes with a multilingual user interface and is currently available in 35 languages (English, German, French, Spanish, Spanish (Latin American), Italian, Japanese, Korean, Chinese (simplified), Chinese (traditional), Vietnamese, Russian, Ukrainian, Polish, Serbian, Croatian, Czech, Slovak, Dutch, Danish, Swedish, Norwegian, Finnish, Estonian, Lithuanian, Greek, Turkish, Hungarian, Romanian, Portuguese, Portuguese (Brazilian), Esperanto, Galician, Catalan and Valencian). It can be translated to other languages easily using the 'smooth Translator' utility that is included in the distribution.

XX

Songbird v1.4.3.8

<http://www.getsongbird.com/>

This fun app that's part music player, part Web browser, and all about music discovery, management, and playback is ready for every day use.

During installation, it'll ask if you want to load your iTunes music directory or another media directory, or perform the task later. Processing 5,000 songs took about 3 minutes, which is not a bad pace. It then asks you which of the preinstalled Songbird extensions you want to load. Most of these, like the iPod, Mass Storage Class, and USB device managers only make the app stronger.

The left sidebar provides quick links to bookmarks, downloads, your music library in an iTunes-style interface, and several music discovery Web sites to get you started. When you're looking at any Web site with MP3s available for download, Songbird will open a new window at the bottom of the main browsing pane. Double-click on a song to play it, and links on the right let you purchase the track from Amazon, iTunes, eMusic, and Amie St. They also tell you the format of the track--MP3 or AAC, for example--and provide a blog link for more info.

Songbird has a growing library of extensions, and support is slowly growing for those written originally for Firefox. Although it works on Windows 7, it doesn't yet have any Windows 7-specific features. Still, Songbird is more than stable enough to take flight for the music-loving, Web-surfing fanatic in all of us.

- * Cross-platform compatibility with Windows XP, Vista, Mac OS X v10.5 (x86, x86-64) and Linux (x86, x86-64).
- * Ability to play multiple audio formats, such as MP3, AAC, Ogg Vorbis, FLAC, Apple Lossless and WMA
- * Ability to play Apple FairPlay-encoded audio on Windows and Mac platforms via hooks into QuickTime (authorization takes place in iTunes)
- * Ability to play Windows Media DRM audio on Windows platforms
- * A skinnable interface, via feathers
- * Media files stored on pages viewed in the browser show up as playable files in Songbird
- * MP3 file download
- * Ability to subscribe to MP3 blogs as playlists

- * User-created bookmarks
- * Ability to build custom mixes
- * Ability to scan the user's computer for all audio files and add them to a local library
- * A configurable and collapsible graphical user interface similar to iTunes, and mini-player mode
- * Keyboard shortcuts and media keyboard support
- * Automatic updates
- * Last.fm integration via a plugin, complete with love/hate buttons
- * Insound.com and HypeMachine integration
- * Microsoft MTP compatible device support
- * Ability to edit and save metadata tags
- * Gapless Playback & Replay Gain
- * Watch Folders
- * Media Importing / Exportings (from and to iTunes)
- * Automatic Library Files Organization
- * Last.fm Radio

XX

I have loaded 27 of these programs onto my Pin / Flash Drive and am only using 1.5 Gb of the available space. Most of the applications on this site are versions of the same software we are using in the Computerbuddies program. The advantage is, these will fit on a pin / flash drive and they do not load any drivers or files on the host machine. This is especially important for students going to school or employees going to work, where there are restrictions on what software is allowed to be loaded onto the workstations.

The following information was taken from <http://www.portableapps.com> web site.

PortableApps.com
<http://www.portableapps.com>

What is a portable app?
 Now you can carry your favorite computer programs along with all of your bookmarks, settings, email and more with you. Use them on any Windows computer. All without leaving any personal data behind.

Open Platform & Open Source
 PortableApps.com provides a truly open platform that works with any hardware you like (USB flash drive, iPod, portable hard drive, etc). The entire platform is open source built around an open format that any hardware or software provider can use.

Free
 The PortableApps.com Suite and Platform is free. It contains no spyware. There are no advertisements. It isn't a limited or trial version. There is no additional hardware or software to buy. You don't even have to give out your email address. It's 100% free to use, free to copy and free to share.
