Connection port	Bus terminal
Speaker	Audio from the doorbell(s)

2. Monitor Mounting

Mounting kit:

- 1) Mounting Bracket.
- 2) Two 4x25mm screws.

Installation:

- Average installation height for indoor monitor 145- 160cm (refer to sketch map).
- Attach the screws to the wall to fix the mounting bracket.
- Hang the monitor firmly on the bracket.
- Refer to the system connection section of this manual for correct wiring.

3. Main Menu

The Main Menu is your starting point for using all the applications on your monitor. To open the Main Menu page, tap either " A Menu" key twice on the monitor or touch the screen anywhere twice.

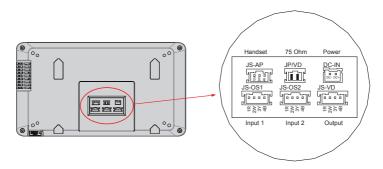

- *:This icon will be displayed when the staircase light item is light on if the system connects RLC module which controls a light. Otherwise, it won't be displayed. Touching this icon or pressing #4TALK/MON button can turn off the light.
- :This icon will be displayed when recorded pictures have not been viewed, touch this icon for viewing recorded pictures.

4. System Wiring

Terminal Description

1) DC-IN: Power supply connection port

2) JP/VD: JP/VD is used for setting the video impedance.

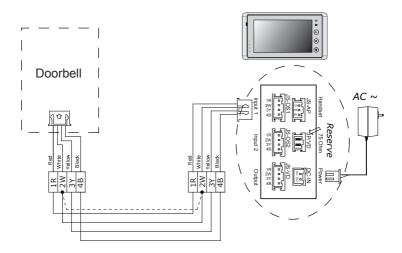

3) JS-AP: Audio phone or RLC module connection port

4) JS-OS1: The first doorbell connection port

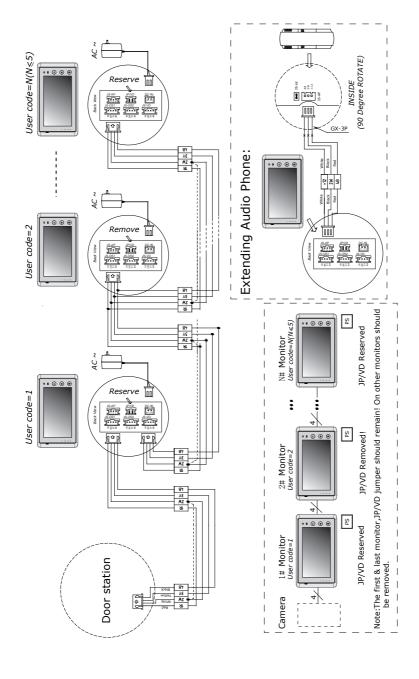

5) JS-OS2: The second doorbell connection port

6) JS/VD: Extended slave monitor connection port

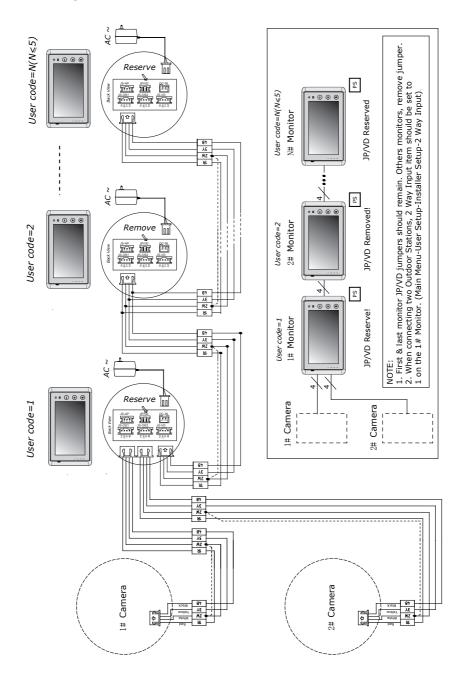

Basic 1-1 Connection

Connecting Multiple Monitors

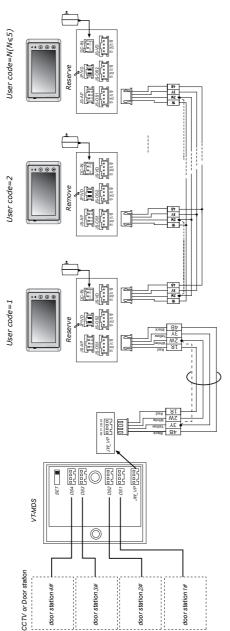

Connecting 2 Doorbells

Please refer to MDS user manual for more information.

Extending Multi Door Stations with MDS 4-way switch

Note: First & last monitor, JP/VD jumper should remain. Others monitors, remove the jumper.

5. Basic Door Release Operation

Answering a Door Call

- 1. Press the **CALL** button on door station.
- 2. The monitor rings, and the visitor's image will be seen on screen.

 Note: the screen turns off after 30 seconds(default) if nobody answers.
- 3. Press either TALK/MON Button on monitor or touch Talk icon on screen, you can communicate hands free with the visitor for 90 seconds(default). After finishing communication, press TALK/MON button or touch Talk icon again to end the communication. If the system has two or more monitors, when you answer from any monitor, the others will automatically shut off.

Status bar _

- ▶ 1. Shows the current doorbell you are viewing
- ▶ 2. Shows countdown to end of call
- ▶ 3. If the monitor is set to silent mode, this iconwill be shown
- ▶ 4. If the RLC module is connected (which controls a light), and the **Staircase Light** item is set to 1 or 2 (refer to part 9->**Staircase Light**), this iconwill be shown when receiving a call.

Door Release

During talking state, Press UNLOCK Button or touch Unlock1 icon to release the door for the visitor. (Note: if the system is connected RLC module which controls a lock, touch Unlock2 icon to release the second lock connected to RLC, for more information, please refer to RLC user manual.)

Entrance Monitoring

When the monitor is in standby mode, press TALK/MON Button(or touch Monitor ... item on main menu page), The screen can display the view of outside. If multiple doorbells are in use, touch Select icon to get into the camera switch mode(or directly touch Manual Monitor item on main menu page). Select door 1/2/3/4 to monitor the doorbell or CCTV camera. See the following diagrams.

Note:

If the system utilizes the QSW module, video quad split monitor is available, see the diagram on right. For more information, please refer to the QSW user manual.

6. Intercom Function

Intercom can be initiated by any Monitor. Touch **Intercom** or **Inner Call** item on main menu page. Intercom function is activated when multiple monitors are installed.

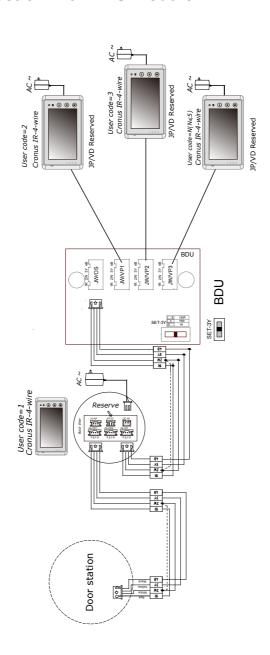

Intercom: press Intercom icon on any monitor to enter selective intercom page, see the diagram on right. Select a monitor, then press Dial Number icon to call. If the selected monitor answers the call, intercom chat starts. Inner Call: press Inner Call icon on any monitor to enter selective intercom page, see the diagram on right. All monitors will ring at the same time, whichever monitor answers the call, intercom chat starts. The other monitors will stop ringing.

- ▶ "!" means the current operating monitor.
- ► " \ " means the selected calling monitor.
- ► Each monitor is assigned a unique user code

7. Star Connection with BDU module

Please refer to BDU user manual for more information.

Touch Memory Playback icon on main menu page (SD version of monitor only).

- ▶ 4 pictures will be displayed in each memo.
- ► The newest pictures will be displayed first.
- ▶ When the built-in memory is full (max. 800 pictures), the oldest picture will be deleted to make room for new record. Save over 30.000 pictures with extra 2GB SD card.

About Picture Memory Recording

You can setup Memory Options to choose 1/4/8 pictures memo. If you choose 4/8, 4/8 shots of each call from doorbell are taken, one every1.5 seconds.Please refer to part 9->Picture Memory.

8. PhotoFrame Album Playback (for SD card version only)

Touch **Album** on main menu page to play photos(SD card must be in).it can be played automatically or manually by using your fingers to slide right or left on screen to play last or next photo. To finish the album playing, please touch the screen and hold for 2 seconds or touch " Menu" key.

Playing time setting

You can set the maximum Photo Frame album playing time, range from 1~999 minutes. Please refer to part 9->Album Playback.

Date and Time Setting

There are two formats for date and time display, refer to part 9->date/time format. Touch User Setup ->>Calendar. Use "cancel" key to select the setting item. After finishing, touch "save" key to save settings.

Day Time Setting

The day time setting is used to distinguish the day ring volume and night ring volume. 07:00 AM~18:00 PM is the default day time .Touch **User Setup** ->>**Day Time**. Use "cancel" key to select the setting item. After finishing, touch "save" key to perform the setting.

Restore to Default

Touch User Setup ->> Restore to default, a message will be asked to confirm the restore operation. Touch Restore to default icon again and all settings will be restored to default (except Calendar).

Screen Setting

During monitoring or talking state, touch Adjust icon, the Adjust page will be displayed.

The first item is **Scene** mode selection: Total 4 screen modes can be selected in sequence: **Normal, User, Soft and Bright**.

The **Brightness** and **Color** item is for the image quality setting.

The **Talk Volume** item is for talking volume adjustment.

9. Basic Setup Instructions

Ring Tone Settings

Touch User Setup item to enter setup page. Select Master Call Tone, Slaver Call Tone or Intercom Call Tone item, There are 12 ring tones can be selected. Touch a ring tone you want, then touch icon to save settings or touch icon to exit.

Master Call Tone: set the ring tone for First doorbell.

Slaver Call Tone: set the ring tone for additional doorbells (2/3/4). **Intercom Call Tone**: set the ring tone for Intercom between monitors.

Ring Volume and Night Ring Volume Setting

You can set a ring volume for day time and night time individually, 07:00 AM~18:00 PM is the day time by default, but the day time can be modified at any time by yourself(refer to Day time setting section for more information).

Touch User Setup icon on main menu page to enter setup page, select Ring Volume or Night Ring Volume to set a appropriate value. If you don't want to be disturbed at night, you can set the night ring volume to 0.

Monitor Time Setting

Touch User Setup ->>Monitor Time. A digital keypad will be shown on screen, input the monitoring time by touching the digital keypad,range from 00:30 ~ 59:59. Set time and touch "save" key. touch icon to return last page.

10. Installer Setup Instructions

Touch **User Setup** ->>**Installer Setup**, enter password (2412 > "save") to enter the menu. There is a total of 16 options which can be modified. Input the corresponding value by touching the digital keypad to modify the setting. Then either save or cancel.
