NOTE: Wiring information in this User Manual is specific to the Modbus Series of the PT-500. If you have a 0-5V, mV/V, or 4-20 mA Series sensor, please consult the factory at 1-888-525-7300, or our website at <u>www.apgsensors.com/support</u>, for the appropriate manual for your sensor.

## Introduction

Thank you for purchasing a PT-500 modbus series submersible pressure transmitter from APG. We appreciate your business! Please take a few minutes to familiarize yourself with your PT-500 and this manual.

PT-500 submersible pressure transmitters offer reliability in harsh industrial conditions. The small size, integrated electronics, wide operating temperature range, and durability make the PT-500 the perfect instrument for static and dynamic pressure measurement.

#### **Reading your label**

Every APG instrument comes with a label that includes the instrument's model number, part number, serial number, and a wiring pinout table. Please ensure that the part number and pinout table on your label match your order.

## **Warranty and Warranty Restrictions**

APG warrants its products to be free from defects of material and workmanship and will, without charge, replace or repair any equipment found defective upon inspection at its factory, provided the equipment has been returned, transportation prepaid, within 24 months from date of shipment from factory.

THE FOREGOING WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES NOT EXPRESSLY SET FORTH HEREIN, WHETHER EXPRESSED OR IMPLIED BY OPERATION OF LAW OR OTHERWISE INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

No representation or warranty, express or implied, made by any sales representative, distributor, or other agent or representative of APG which is not specifically set forth herein shall be binding upon APG. APG shall not be liable for any incidental or consequential damages, losses or expenses directly or indirectly arising from the sale, handling, improper application or use of the goods or from any other cause relating thereto and APG's liability hereunder, in any case, is expressly limited to the repair or replacement (at APG's option) of goods.

Warranty is specifically at the factory. Any on site service will be provided at the sole expense of the Purchaser at standard field service rates.

All associated equipment must be protected by properly rated electronic/electrical protection devices. APG shall not be liable for any damage due to improper engineering or installation by the Purchaser or third parties. Proper installation, operation and maintenance of the product becomes the responsibility of the user upon receipt of the product.

Returns and allowances must be authorized by APG in advance. APG will assign a Return Material Authorization (RMA) number which must appear on all related papers and the outside of the shipping carton. All returns are subject to the final review by APG. Returns are subject to restocking charges as determined by APG's "Credit Return Policy".

## **Chapter 1: Specifications and Options**

### • Dimensions

PT-500 with Reusable Cage

PT-500 with Tri-clover Sanitary Fitting

PT-500 with Removable Plastic Nose Cone

### Specifications

### • Model Number Configurator

#### A. Cable Type

- □ ▲ Urethane Blue (with vent tube)
- □ A PVC Black (no vent tube sealed unit)
- □ **B** Hytrel .31″ Ø Black (with vent tube)
- □ C PVC Black (with vent tube)
- □ **D** Hytrel .25" Ø Black (with vent tube)

**B. Pressure Range** 

□ Specify range in desired unit of measure

Max Water Depth 462.2 ft. (140.9 m), 300 psig

#### C. Standard Units of Measure

🗆 PSI	🗆 FTH2O	□ INWC
🗆 INH2O	D MMH2O	□ FWC

#### **D. Output**

- □ **L1**<sup>▲</sup> 4-20 mA, 2-wire
- □ **L3** 0-5V, 4-wire\*
- □ **L9** mV/V, 4-wire\*
- □ **L10** 0-10V, 4-wire\*
- □ L5 Modbus RTU, 4-wire RS-485\* Pressure reading only
- □ L31 Modbu RTU, 4-wire RS-485\* Level calculations, tank volume

#### E. Overmold

- □ **EO**<sup>▲</sup> No overmold for 1/2" NPTM fitting for conduit
- **E37** Pigtail with overmolded cable

#### **F. Process Connection**

- □ **P1**<sup>▲</sup> 1/2" NPTM with removable plastic nose cone
- □ **P5** 1/4" NPTF
- □ **P37** Welded Cage (anti-snag 1 piece fitting)
- **P38** 1-1/2" tri-clover with 3/4" diaphragm
- □ **P39** Reusable Cage (includes P38 fitting)

#### G. Cable Length

□ (specify length of cable needed in feet)

#### H. Accuracy

- □ **N0**<sup>▲</sup> ±0.25%
- □ **N1** ±0.25% with NIST certification
- □ **N2** ±0.1% with NIST certification

Note: ▲Indicates this option is standard.

Note: \*Indicates this option does not yet have CSA Approvals.

Modbus

## **Chapter 2: Installation and Removal Procedures and Notes**

### Tools Needed

- Wrench sized appropriately for your PT-500's process or conduit connection.
- Thread tape or sealant compound for threaded connections.

### Mounting Instructions

Your PT-500 can be mounted in three ways: via NPT process connection, free-hanging suspension, or conduit mounted. Mounting your pressure transducer is easy if you follow a few simple steps:

- Never over-tighten the sensor. In all cases, tighten the sensor as little as possible to create an adequate seal.
- Always use thread tape or sealant compound on tapered threads. Wrap thread tape in the opposite direction of the threads so it does not unravel as you screw the sensor into place. Unraveling can cause uneven distribution and seal failure.
- Always start screwing in your sensor by hand to avoid cross-threading. Thread failure can be a problem if you damage threads by over-tightening them or by crossing threads.
- For suspension mounting the PT-500, drill a 3/16" hole into the 1/2" NPTF to 1/2" NPTF hex coupler (P/N 511414) and secure it to the 1/2" NPTM coupler fitting of the PT-500. Attach a .060" diameter 316L SS cable of desired length to the hex coupler and secure the steel cable according to your application requirements.

NOTE: If your PT-500 has a vent tube, do not seal, cover, or close the vent tube with anything other than an APG-provided venting cap or desiccant drying cartridge (See Figure 4.1 and 4.2). Unapproved seals or covers will prevent proper sensor operation.

### • Electrical Installation

• Attach the wires of your PT-500 to your control system according to the pinout table above.

**1** IMPORTANT: APG modbus equipment uses reversed TX+/TX- pins. When making connections between APG equipment, ensure continuity of A to A and B to B pins. When connecting APG modbus equipment to other systems, ensure continuity of TX+ to TX+ and TX- to TX-.

### Removal Instructions

Removing your PT-500 from service must be done with care. It's easy to create an unsafe situation, or damage your sensor, if you are not careful to follow these guidelines:

- For sensors installed via NPT process connection, make sure the pressure is completely removed from the line or vessel. Follow any and all procedures for safely isolating any media contained inside the line or vessel.
- Remove the sensor with an appropriately sized wrench (per your process connection).
- For suspended sensors, retrieve the sensor from the vessel. Follow any and all procedures for safely isolating any media contained inside the line or vessel.
- Carefully clean the sensor's fitting and diaphragm of any debris (see General Care) and inspect for damage.
- Store your sensor in a dry place, at a temperature between -40° F and 180° F.

DANGER: Removing your process connected PT-500 Pressure Transmitter while there is still pressure in the line could result in injury or death.

**1** IMPORTANT: Any contact with the diaphragm can permanently damage the sensor. Use extreme caution.

## **Chapter 3: Programming**

### Modbus Programming

PT-500 L5/L31 modbus series sensors use standard Modbus RTU protocol (RS-485). The sensors can only operate as slave devices. Sensor default transmission settings are **9600 Baud**, **8 Bits**, **1 Stop Bit**, **No Parity**, and require a minimum delay of 300 ms between transactions to return the contents of all registers. Commands returning fewer registers will require shorter delays. See PT-500 Modbus Register Lists on pages 7 - 9.

NOTE: For more information about Modbus RTU, please visit <u>www.modbus.org.</u>

### • Modbus Programming with RST-6001 and APG Modbus Software

APG RST-6001 Modbus Controller can be used in tandem with APG Modbus to program and control up to 20 PT-500 L5 or PT-500 L31 sensors. Through APG Modbus, you can monitor the raw readings from the sensor, including level or pressure, temperature and battery voltage, or configure the sensor. See PT-500 Modbus Register Lists on pages 7 - 9.

NOTE: For APG Modbus programming instructions, or to download APG Modbus software, please visit <u>www.apgsensors.com/support</u>.

### • PT-500 Modbus Register Lists

#### Input Registers (0x04)

<u>Register</u>	<u>Returned Data</u>
30299	Model Type
30300	Pressure (L5 - PSI; L31 - mmH <sub>2</sub> O)
30301	N/A
30302	Temperature Reading (in °C, signed)
30303-30304	Calculated (raw)
30305-30306	N/A
30307	N/A
30308	Battery Voltage
30309	Trip 1 Status
30310	Trip 2 Status

NOTE: The Calculated Readings will be returned without a decimal place. In order to obtain the true result, the Decimal Place setting must be taken into account.

### • PT-500 Modbus Sensor Parameters - L5 pressure series

#### 40401 - Units

Determines the units of measure for the calculated reading.

0 = PSI $5 = mmH2O^{\dagger}$ 10 = mmHG<sup>‡</sup> 14 = inSW 1 = BAR $6 = cmH2O^{\dagger}$  $11 = cmHG^{\ddagger}$ 15 = inSW 2 = mBAR  $7 = mH20^{\dagger}$  $12 = inHG^{\ddagger}$ 16 = mSW 3 = kPa8 = inH2O<sup>†</sup>  $13 = kg/cm^{2}$ 9 = ftH2O<sup>†</sup> 4 = MPa

<sup>†</sup> All H2O pressure measurements @ 20° C.

<sup>‡</sup> All HG pressure measurements @ 0° C.

#### 40402 - Application Type

Determines the units of measure for the calculated reading.

- 0 = Standard (units selected in 40401 are displayed)
- 8 = Custom (units selected in 40401 and multiplier in 40436-40437 are used to compute desired units; description in 40438-40439 is label for measurement)

### PT-500 Modbus Sensor Parameters - L31 level series

#### 40401 - Units

Determines the units of measure for the calculated reading when Application Type is set to 0, 1, or 7. 1 = Feet 2 =Inches 3 =Meters

#### 40402 - Application Type

Determines the type of calculated reading performed by the sensor.

- 0 = Distance
- 1 = Level
- 2 = Standing Cylindrical Tank with or without Hemispherical Bottom
- 3 = Standing Cylindrical Tank with or without Conical Bottom
- 4 = Standing Rectangular Tank with or without Chute Bottom
- 5 = Horizontal Cylindrical Tank with or without Spherical Ends
- 6 = Spherical Tank
- 7 = Pounds (Linear Scaling)
- 8 = N/A
- 9 = Vertical Oval Tank
- 10 = Horizontal Oval Tank
- 11 = Strapping Chart

#### 40403 - Volume Units

Determines the units of measure for the calculated reading when Application Type is set to 2 - 6 or 9 -11.

- $1 = \text{Feet}^3$ 5 = Liters
- 2 = Million Feet<sup>3</sup> 6 = Inches<sup>3</sup>
- 7 = Barrels 3 = Gallons
- $4 = Meters^{3}$

#### PT-500 Modbus Application Parameters - L31 level series •

### **Application 0 - Distance**

<u>Register</u>	<b>Function</b>	Value Range
40400	Device Address	1 to 247
40401	Units	1 = Feet, 2 = Inches, 3 = Meters

40436-40437	Multiplier (linear scalar)	0 - 1,000,000 (1000 = 1.000)

### Application 9 - Volume of Vertical Oval Tank

<u>Register</u>	Function	Value Range
40400	Device Address	1 to 247
40401	Units	
40402	Application Type	9
40403	Volume Units	1 - 7
40404	Decimal (Calculated)	0 - 3
40405	Max Level	(factory set)
40406	Full Level	0 - 65,535 mm
40436-40437	Tank Length	0 - 1,000,000 (mm)
40438-40439	Tank Depth	0 - 1,000,000 (mm)
40440-40441	Tank Width	0 - 1,000,000 (mm)

### Application 10 - Volume of Horizontal Oval Tank

<u>Register</u>	<u>Function</u>	Value Range
40400	Device Address	1 to 247
40401	Units	
40402	Application Type	10
40403	Volume Units	1 - 7
40404	Decimal (Calculated)	0 - 3
40405	Max Level	(factory set)
40406	Full Level	0 - 65,535 mm
40436-40437	Tank Length	0 - 1,000,000 (mm)
40438-40439	Tank Depth	0 - 1,000,000 (mm)
40440-40441	Tank Width	0 - 1,000,000 (mm)

### Application 11 - Strapping Chart (Polynomial Values)

<u>Register</u>	<u>Function</u>	<u>Value Range</u>
40400	Device Address	1 to 247
40401	Units	1 = Feet, 2 = Inches, 3 = Meters
40402	Application Type	11
40403	Volume Units	1 - 7
40404	Decimal (Calculated)	0 - 3
40405	Max Level	(factory set)
40406	Full Level	0 - 65,535 mm
40436-40437	X^3 Coefficient	0 - 1,000,000
40438-40439	X^2 Coefficient	0 - 1,000,000
40440-40441	X^1 Coefficient	0 - 1,000,000
40440-40441	X^0 Coefficient	0 - 1,000,000

## **Chapter 4: Maintenance**

### **General Care**

Your PT-500 series pressure transmitter is very low maintenance and will need little care as long as it is installed correctly. However, in general, you should:

- For process connected sensors, keep the transmitter and the area around it generally clean.
- Avoid applications for which the transmitter was not designed, such as extreme temperatures, contact with incompatible corrosive chemicals, or other damaging environments.
- Inspect the threads whenever you remove the transmitter from duty or change its location.
- Avoid touching the diaphragm. Contact with the diaphragm, especially with a tool, could permanently shift the output and ruin accuracy.
- Clean the diaphragm or the diaphragm bore with extreme care. If using a tool is required, make sure it does not touch the diaphragm.

**1** IMPORTANT: Any contact with the diaphragm can permanently damage the sensor. Use extreme caution.

### • Vent Tube Drying

Condensation in the vent tube can damage the electronics in your sensor, resulting in unreliable readings. APG offers two methods of preventing vent tube condensation: a venting cap, and a desiccant drying cartridge.

The venting cap is a PVC tube with a hydrophobic patch that allows moisture to pass out of the tube without allowing water in (See Figure 4.1). The cap is sealed by an o-ring, and is easily installed in the field.

The desiccant drying cartridge with vent tube adapter absorbs any moisture in the vent tube to keep vapor from condensing (See Figure 4.2). The installation of the desiccant drying cartridge is quick and easy. Common installation methods are cable tie, Velcro, and cable clamps.

IMPORTANT: Do NOT use desiccant cartridge in the presence of vapors or liquids containing phosphate esters, synthetic lubricants, hydrocarbon solvents, methanol, acetone, lacquer solvents, or other organics.

Figure 4.1

Figure 4.2

NOTE: Desiccant crystals change from blue to pink as they become saturated. Cartridge must be replaced when all crystals have saturated.

### Repair and Returns

Should your PT-500 series pressure transmitter require service, please contact the factory via phone, email, or online chat. We will issue you a Return Material Authorization (RMA) number with instructions.

- Phone: 888-525-7300
- Email: sales@apgsensors.com
- Online chat at www.apgsensors.com

Please have your PT-500's part number and serial number available. See Warranty and Warranty Restrictions for more information.
