Read all instructions before using this product

- Do not throw the product into fire as this may cause an explosion.
- Do not immerse into water or get soaked as this can permanently damage the player.
- Please charge the battery before you use the player first for approximately 4 hours.
- Do not charge rechargeable batteries longer than specified.
- Do not take the batteries apart.
- Overcharging & over-discharging rechargeable batteries may shorten their life span.
- To prolong the life of a rechargeable battery, completely discharge it before fully charging it again.
- Recharge battery with below status:
  - Low battery
  - System auto off.
  - Operation key not working
- When the "Copying Files" window appears on your PC please don't remove the USB from your computer.
- Do not unplug the USB cable during file downloading, it may cause malfunction to your PC and player.
- Do not plug in an earphone or audio cable during file download.
- Downloading can be delayed if there are too many folders or files.
- The order of music files displayed on the Windows Explorer is not the order of actual music playback.

Add to My List

Enter <Add to My List> and select one list and press OK key, then the current song will now be added to that playlist.

Delete File

Select <Delete the File>, press OK key to delete the song from the player.

Information

Check the information of the current song.

There are two ways you can put music onto your player, the easiest way is drag and dropping or copy and pasting. In order to do this simply plug your player into the PC and then go into MY COMPUTER and you will see a TEVION MP3 listed, from here simply copy and paste your MP3's or WMA'S into the TEVION MP3 or drag and drop directly into it. This method however will not place your songs into ALBUMS. If you wish to do this you need to place your music on the player using the sync function.

SYNCING Music to your player

Syncing a playlist to the player will place your albums as separate folders so you can access one album at a time.
1 – Make sure that your running windows 11 and above, if your not then go to the Microsoft website and do an update.
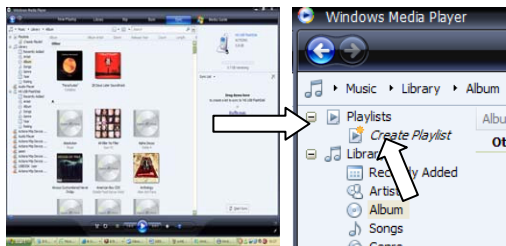

2 – Open up windows media player and plug your Media player in, then click on the SYNC button on the top right of windows.
3 – You will notice now on the right hand side of the screen that it's asking you to drag items here to create a list to sync. Before you drag anything over you must first create a playlist containing the albums you require to put on.

Helpline No. UK/Northern Ireland: 0844 635 0008 Rep. Ireland: 1800 995 036
Web Support www.quesh.co.uk
Model Number: 42813

19

4 – To create your playlist first left click once on create playlist on the top right of the screen. Now rename this to what you would like to call your playlist.
5 – Now that you have given your playlist a name you can start dragging your files into this playlist.

6 – Once you have dragged all your selected files onto the playlist you should now see all of your files in your newly created playlist.

7 – Now drag your playlist over to the box mentioned in step 3 which asks you to drag items in to sync. What you should now see is your playlist listed in this box, then below you will see a START SYNC button you will need to press to begin syncing the playlist to the player.

8 - Windows media player should now show that it's syncing each song in your playlist by indicating a progress bar for each song. Wait until the sync is complete before you take out your player.
9 – You now have successfully synced a playlist to your player. To now access each album simply switch your player on and go into your music function. From here press the play button on the music section and then press play on which all music, your songs should now be displayed in this folder.

Select <Photo> in the main interface to enter its main menu.

**Main Interface**

Now Playing: the function and operation are the same as that of <Music-Now Playing>.
Dir List: the function is the same as that of <Music-Dir List>.

Converting Movie Files
Installing the video software
Place the CD included with your MP4 player in the computer compact disk drive. In the Windows Operation System, it will automatically pop up with the installation interface. Click on "Video Convert Tool" to start installing all the software for the MP4 player. Follow the installation prompt to complete the installation process.

Producing video files
The MP4 Player supports AVI files only once they have been converted. AVI files need to be converted using the software provided before you place them onto your player. File formats you are able to convert are Divx AVI, mpeg2-4 and WMV. NOTE: You cannot use this convertor to convert an original DVD, you will need to find alternative software to first convert the DVD into a format the convertor will recognise as listed above.

How to convert a video File into the players AVI format.

1 - Click and run the AVI convertor you have now installed, this will display the following screen.

2 - Click "add ", which will then display the following options

Helpline No. UK/Northern Ireland: 0844 635 0008 Rep. Ireland: 1800 995 036

WARRANTY CARD

Congratulations! You have made an excellent choice with the purchase of this quality product.Our commitment to quality also includes our service. Should you, contrary to expectations, experience defects due to manufacturing faults during private use within 36 months of the date of purchase we shall be liable for warranty in accordance with statutory warranty regulations
provided that:
- the device was not put to any use other than the intended
- was not overloaded
- was not used with the wrong accessories
- repairs were not carried out by any other than the authorized workshop

The warranty certificate is only valid in connection with the receipt. Please keep both in a safe place. This warranty does not affect your statutory rights.

This purchase is guaranteed for a period of three years beginning on the day of purchase. Keep your purchase receipt safe as proof of date of purchase. The guarantee can only be extended for the duration of any repair required.

Should your item become defective during the warranty period, in the first instance please call our service centre on the number below, they will then inform you of what to do next. We will at our discretion, either repair or exchange the device in accordance with warranty legislation.

Please enclose the following when sending your product in for repair:
1. Receipt (proof of purchase)
2. This warranty certificate with the fault report form overleaf complete with your name, contact details and fault description.

If the original receipt is not enclosed the repair will be charged in all cases. After the warranty has expired you can still send defective devices for repairs to the address stated below. Quotes as well as repairs after the warranty period are to be paid for in all cases. Ensure that the product is sent well packed as no responsibility can be accepted for items lost or damaged in transit.
This warranty does not affect your statutory rights.
