Samsung Galaxy Tab2 10.1 3G & WiFi

Samsung's first Android 4.0 powered tablet offers a variety of new and improved Android OS features. An upgraded Android Market enables access to more than 400000 applications which can be enjoyed across phones or tablets. Furthermore, a more intuitive user interface includes the ability to swipe-control applications as well as a wholly redesigned app gallery for easier sharing of content. The new OS's vastly faster performance and response times across multiple applications is further enhanced by HSPA+ 21 Mbps or WiFi connectivity. Android 4.0 includes a selection of embedded Google applications enabling users to quickly launch sites and applications that they use frequently; meanwhile, the Face Unlock feature unlocks the tablet through unique facial recognition software.

Motorola XTB 446

Across the warehouse, shop floor or school playground, the Motorola XTB446 enables instant and clear communications at the touch of a button. Developed specifically for business and commercial users, the XTB446 is a general-purpose two-way radio, ideal for users needing to stay in touch with staff, colleagues or team members quickly, easily and economically.

Convenient, Flexible and Expandable:

The Motorola XTB446 provides you with all the convenience and benefits of two-way communications without the cost or hassle of obtaining an operating licence. Multiple new handsets can be added to your radio fleet at any time and existing Motorola PMR446 users can also expand their existing radio fleets with XTB446 radios to accommodate a growing workforce. The XTB446 has been designed to be lightweight, comfortable and simple to use, offering superb audio clarity and clear communications in a wide range of environments. High performance rechargeable batteries ensure that XTB446 can operate on long shifts without the need for recharging.
